
CP share series No.26 CP explanation of the eighty-first shrimp

Original Origami Student Takayama **CP Origami Opening Number** 2019-01-31

Hello everyone, welcome to CP Opening!

Regarding the folding of shrimp, there are still many truths. I originally planned to open a special topic, but the time relationship was not completed last year, but even if I start this issue, I will continue to talk about it later.

First enter this issue to talk about: shrimp
Shrimp (Shrimp) is an arthropod that lives in the water. It belongs to the arthropod crustacean and has many types, including Antarctic red shrimp, prawn , river prawn , grass prawn , prawn , prawn , lobster, etc. Shrimp has a high nutritional value in diet , and it can be steamed, fried, etc., and can be used as a traditional Chinese medicine .

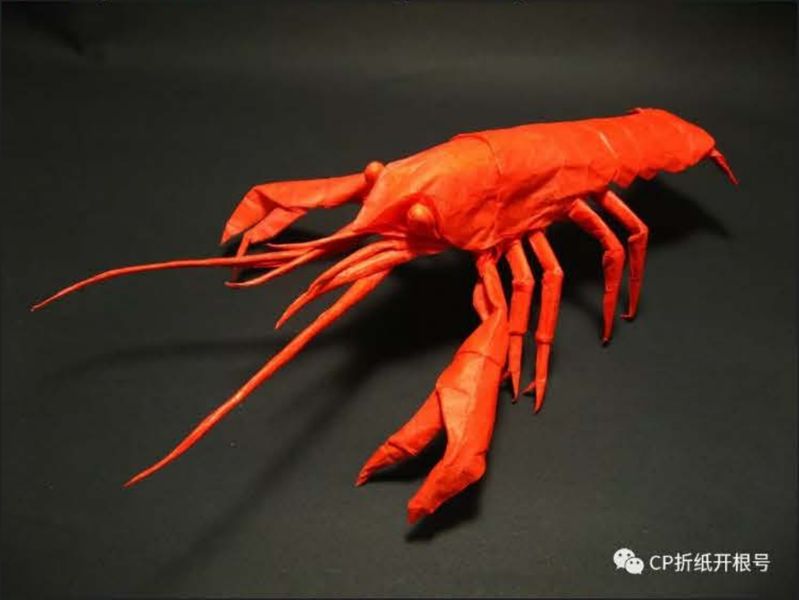
Freshwater shrimp is warm and sweet, slightly warm, and enters the liver and kidney. Shrimp has the effects of nourishing kidney and aphrodisiac, anti-drug tonic, nourishing blood and solidifying essence, removing blood stasis and detoxifying, nourishing qi and nourishing yang, Tongluo analgesic, appetizing and phlegm. It is suitable for patients with kidney deficiency impotence, premature ejaculation of nocturnal emission, impaired breast milk, pain in bones and bones, hand and foot twitching, itching all over the body, skin ulcers, physical weakness and neurasthenia. Shrimp can be eaten with oats, chives, cabbage (cooked), shallots, coriander, bean sprouts , wolfberry, tofu , and not with watermelon, pork, pumpkin, tomatoes , kiwi, lily , cauliflower, strong tea So as not to cause physical discomfort or poisoning.

Shrimp treats pediatric red-white swelling, and the shrimp is mashed and applied to the affected area. Used as a soup to treat lumps, support acne, and lower milk. Boil the juice to cure wind and phlegm. When mashed into a paste, wormworm is effective. Born in paddy fields and ditches of shrimp poison , made pickled products more harmful. The hot rice is marinated and eaten in a container, which can poison people . ** It is not necessary or black under the abdomen, and it turns white after cooking.

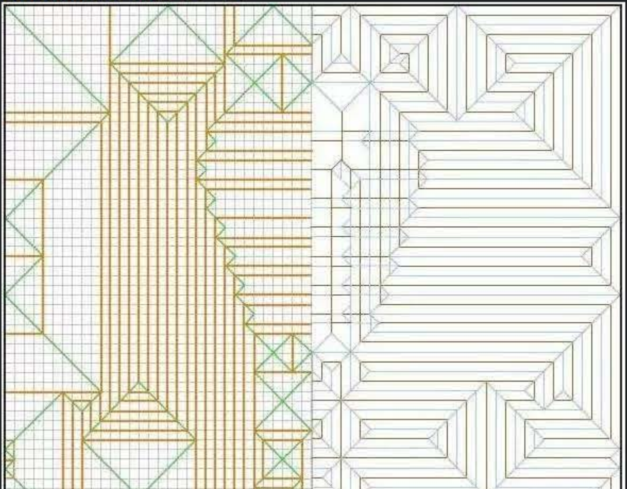
Regarding the issue of toxins produced by eating shrimp and vitamin C-containing things, it still varies from person to person, and the main reason is how much they eat, so everyone must judge scientifically and calmly!

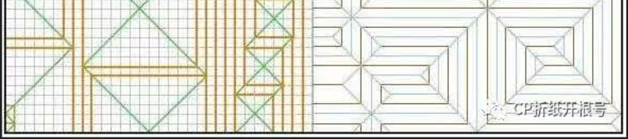
This issue is intended to be issued last week, but I have the strength to make this issue because of diarrhea for a few days, and the reason is probably due to shrimp! !! !! 😭
Alas, please pay attention to Chinese New Year!

Now let 's get to know the CP we are talking about today!



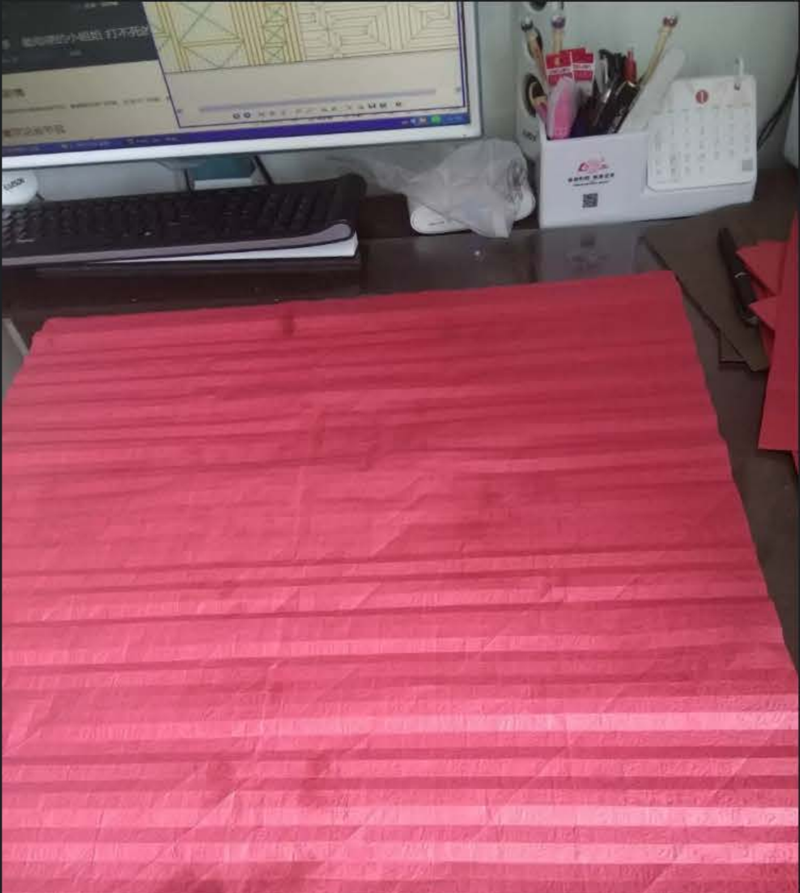
Works in this issue 64 * 64





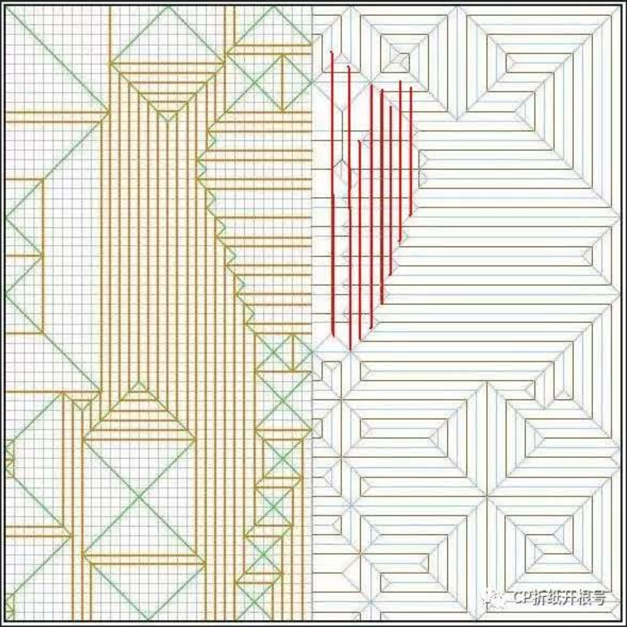
CP折纸开根号

First of all, please take out your hands to knead paper or oily paper, 64 equal parts, then wire according to CP, unfold, and prepare to aggregate! !!

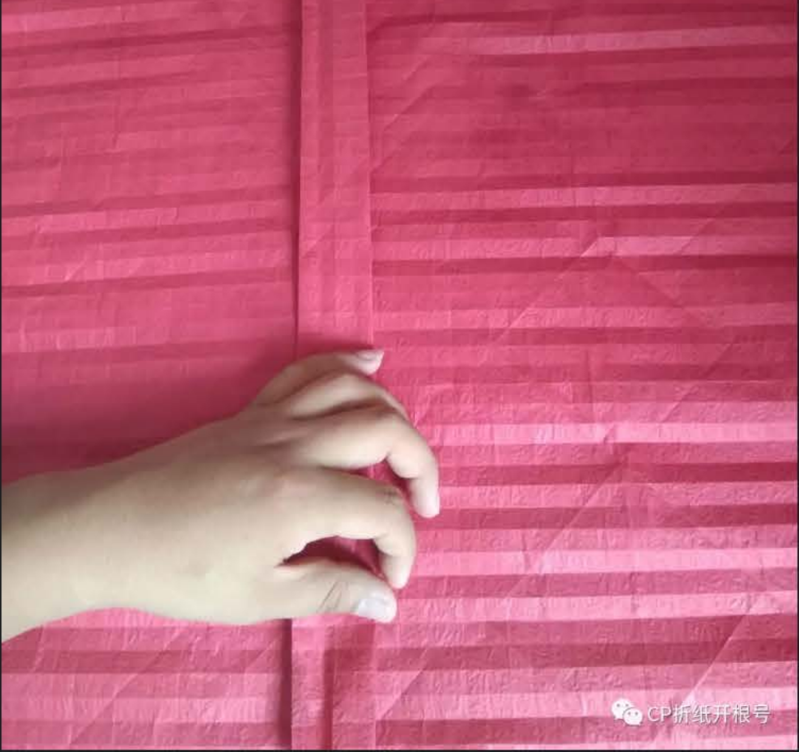


CP折纸开根号

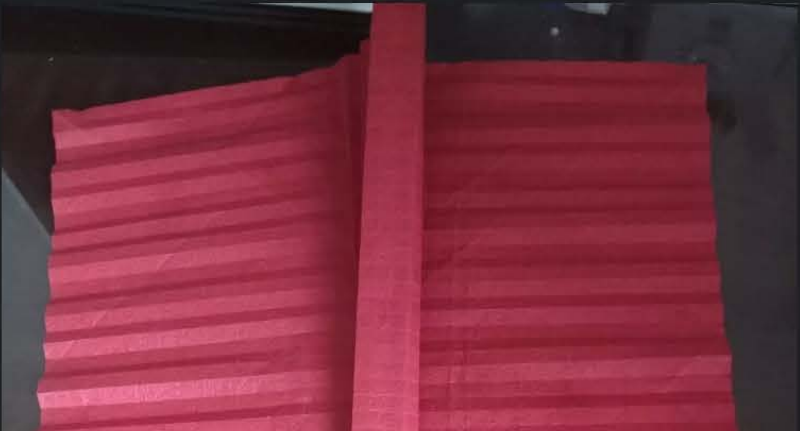
The first step is to fold the peaks and valleys. We follow the picture below, and the first two cells are the unit and then the second cell is the unit.

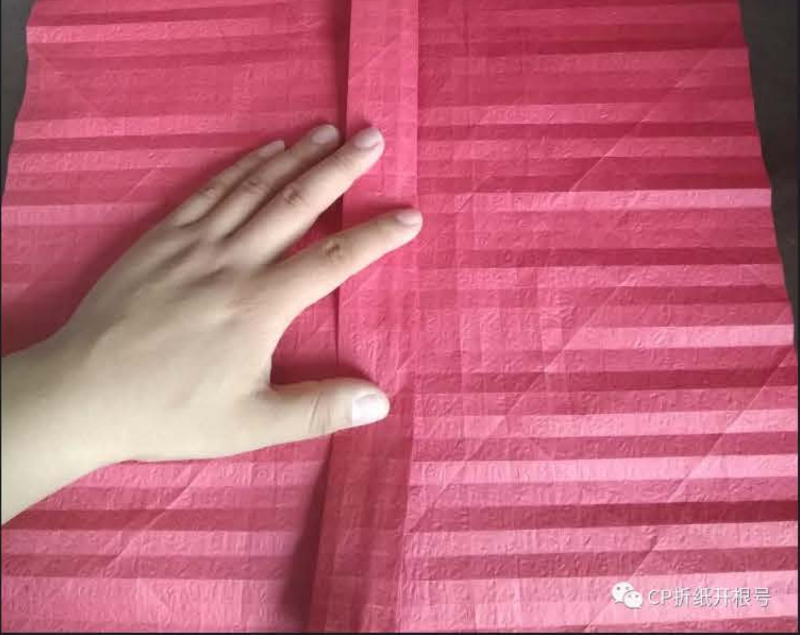


CP折纸开根号

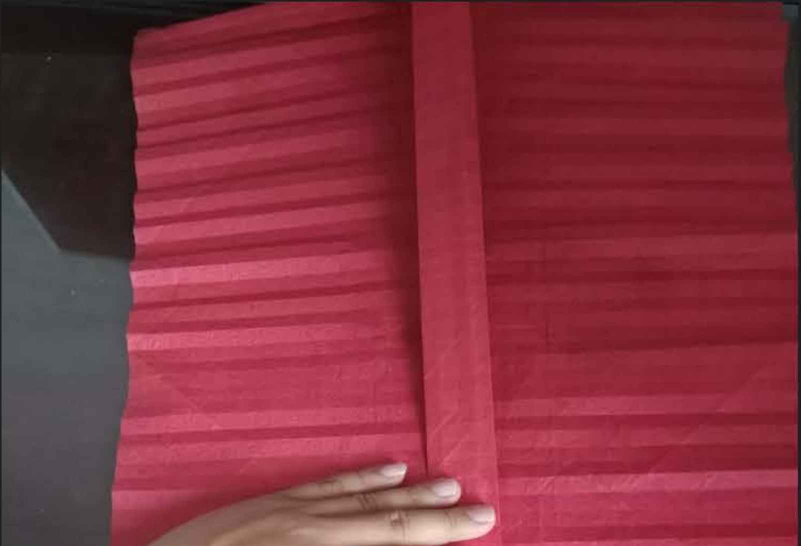


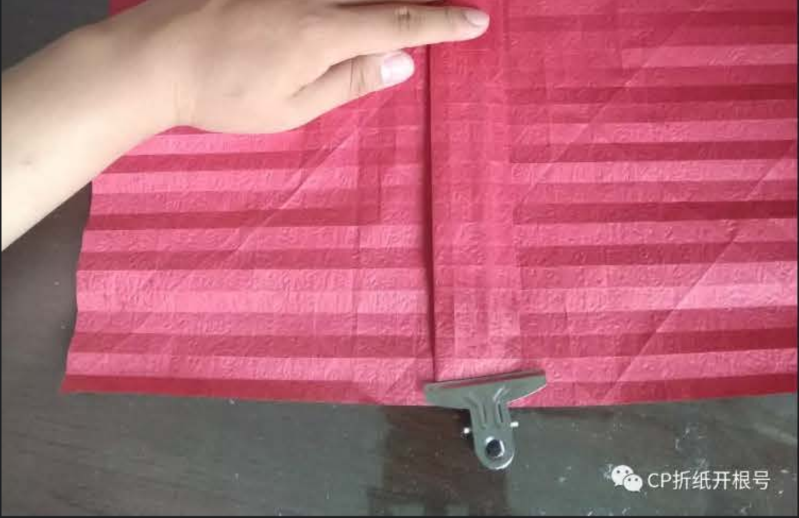
CP折纸开根号



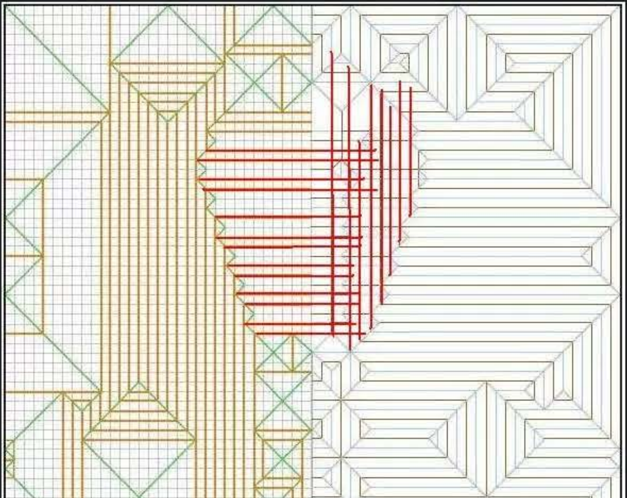


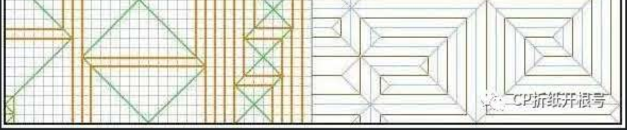
CP折纸开根号





Next, fold it horizontally, make peak and valley folds according to the position of the sawtooth, and fold out each node on the back.

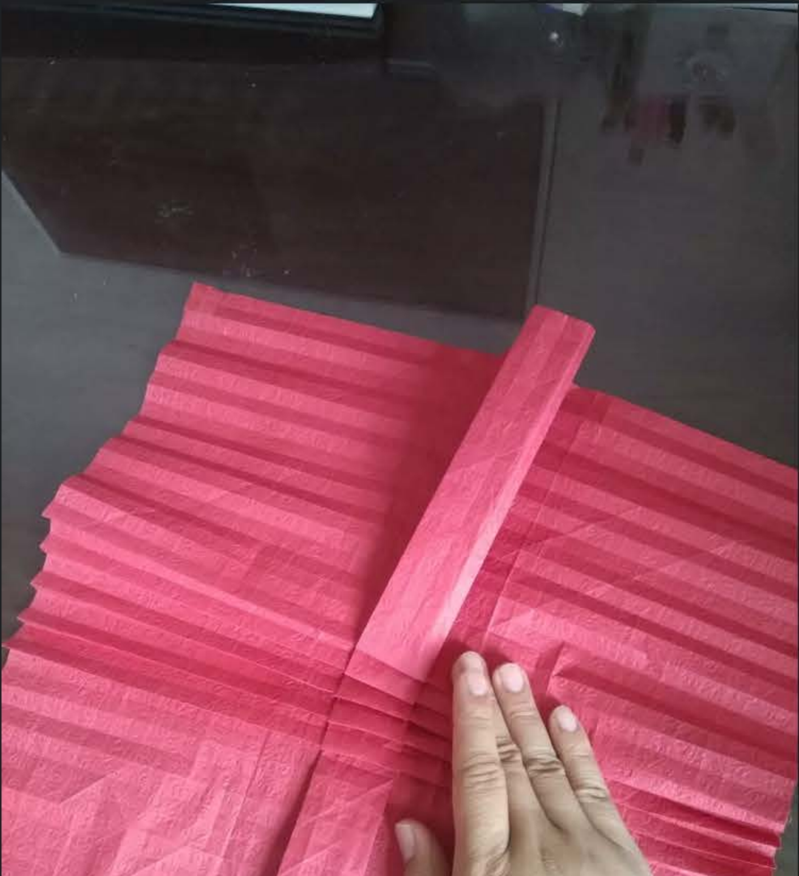




CP折纸开根号

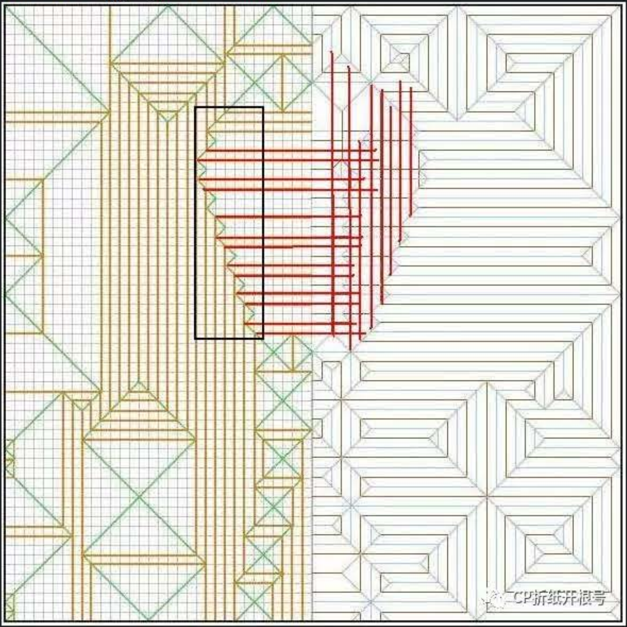
CP折纸开根号

CP折纸开根号



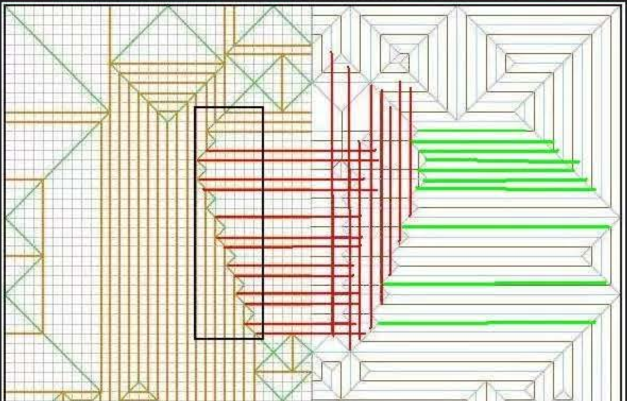
CP折纸开根号

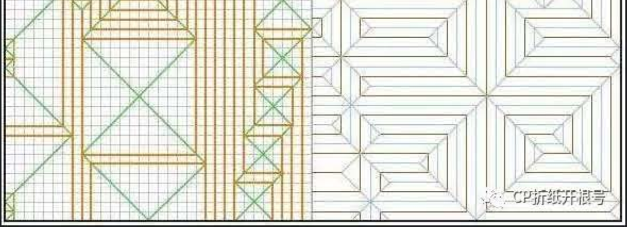
Below we aggregate sawtooth



CP折纸开根号

CP折纸开根号





CP折纸开眼号

With the above figure, we are still starting to aggregate from the right side, while the zigzag structure is being aggregated, the green line in the above figure is pulled out horizontally.

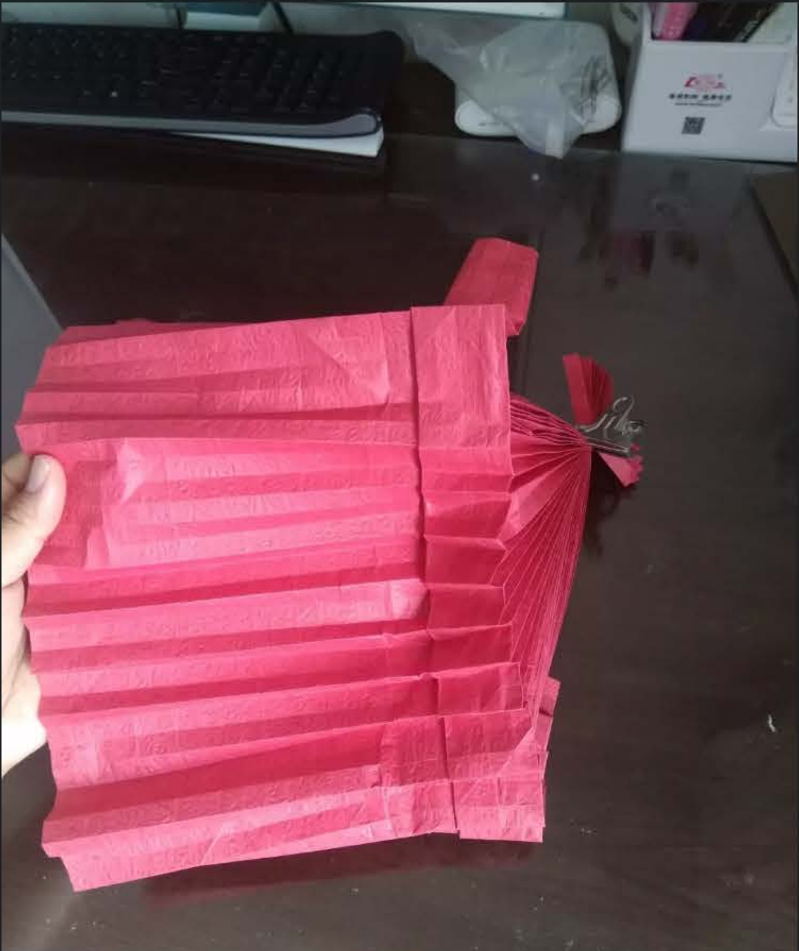
CP折纸开根号

CP折纸开根号

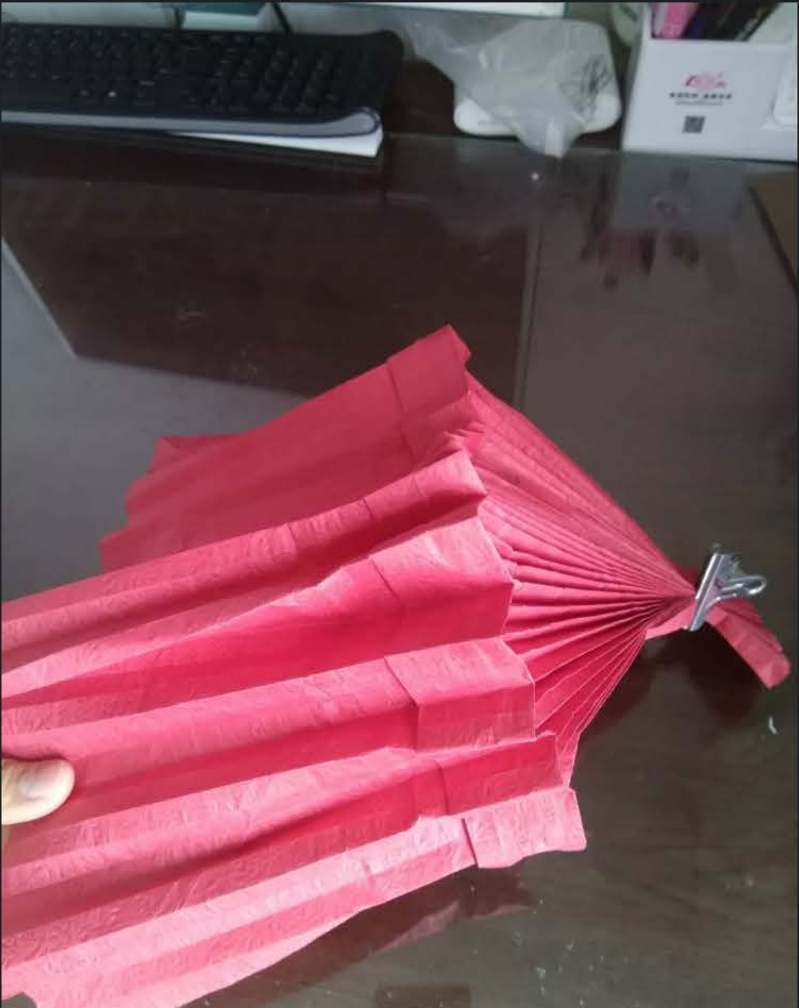
CP折纸开根号

CP折纸开根号

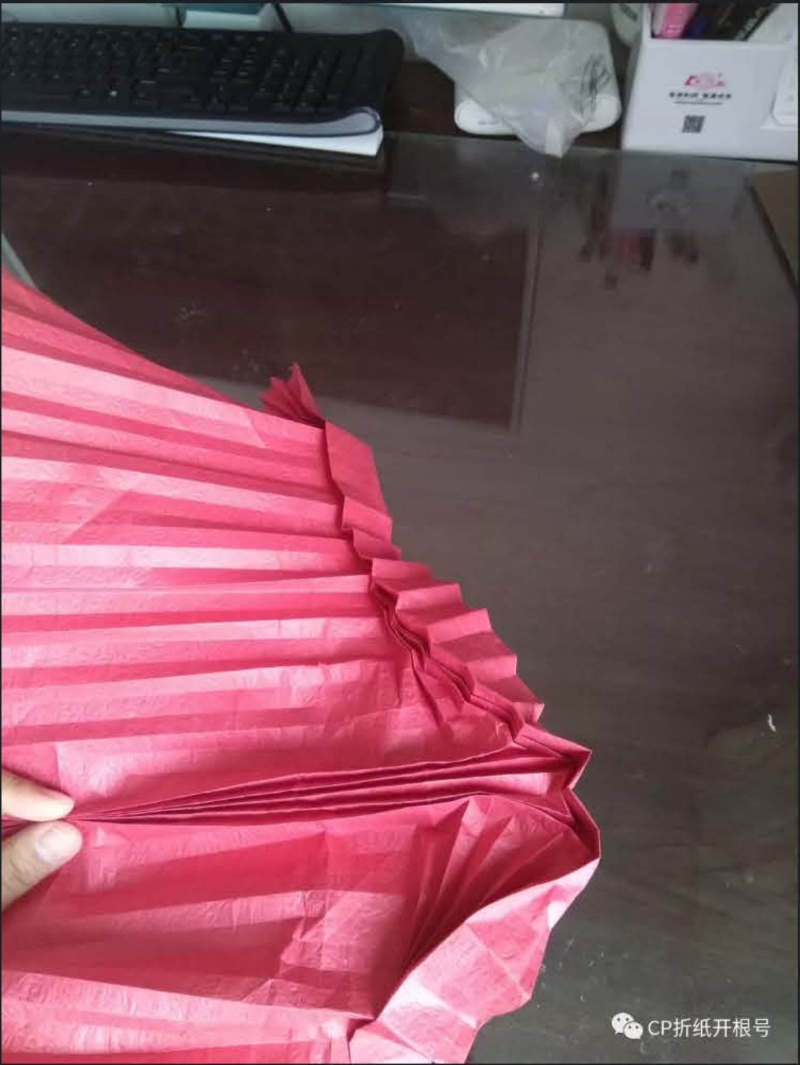
CP折纸开根号



Start the same method to polymerize the other side

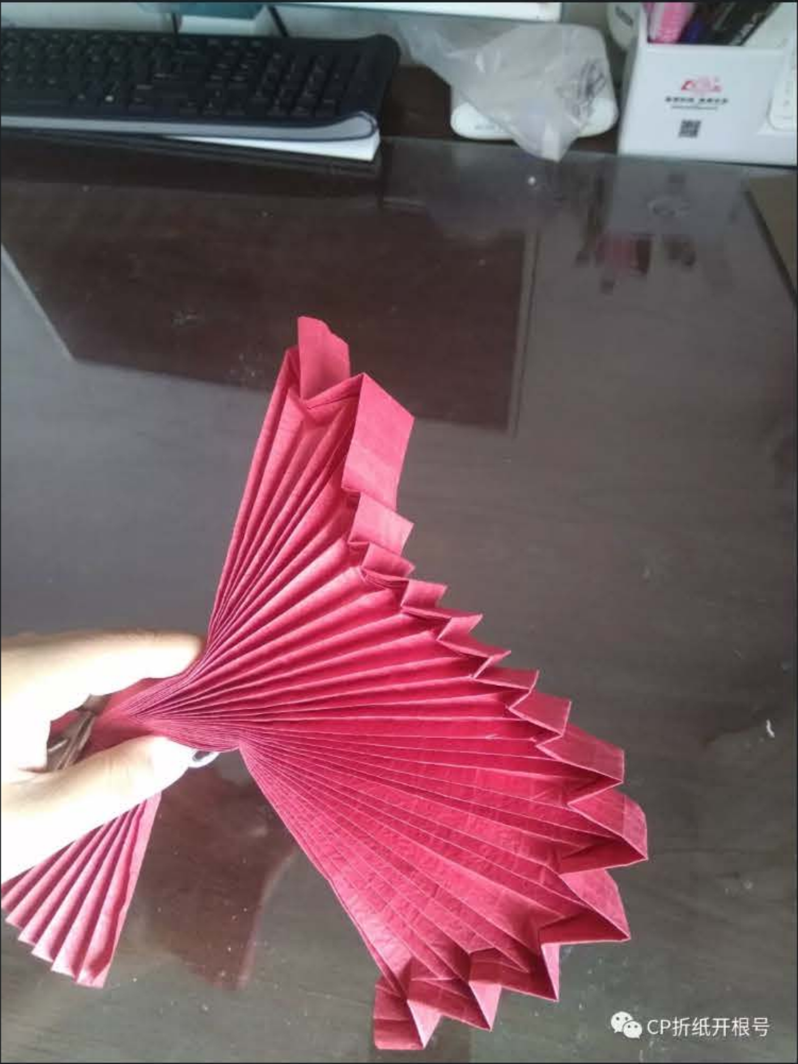


CP折纸开根号

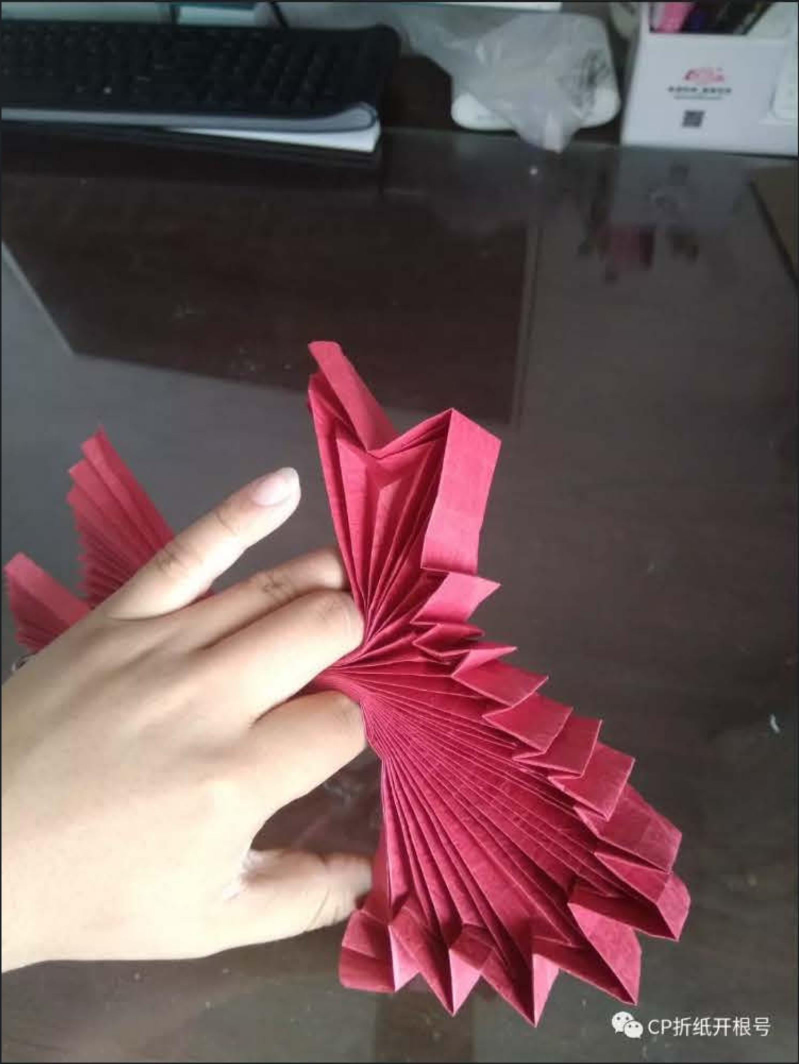


CP折纸开根号

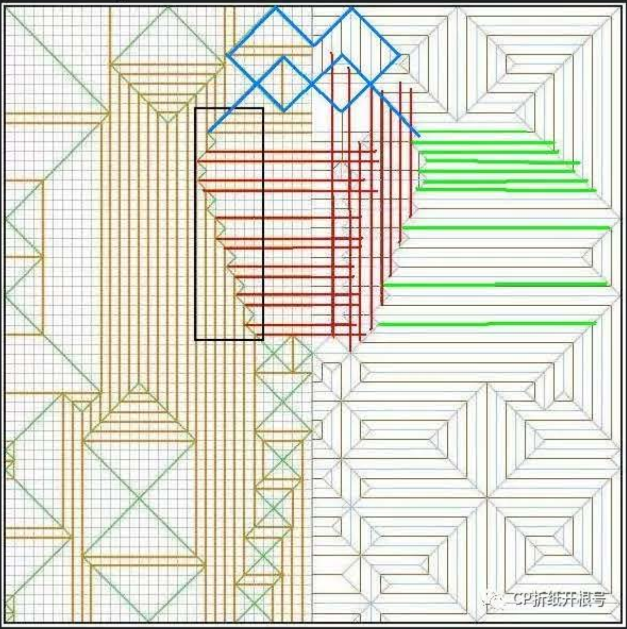
CP折纸开根号



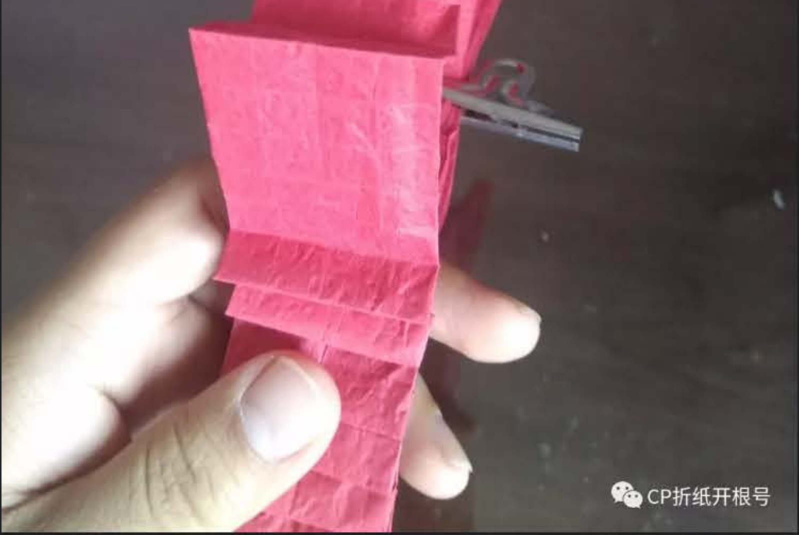
CP折纸开根号



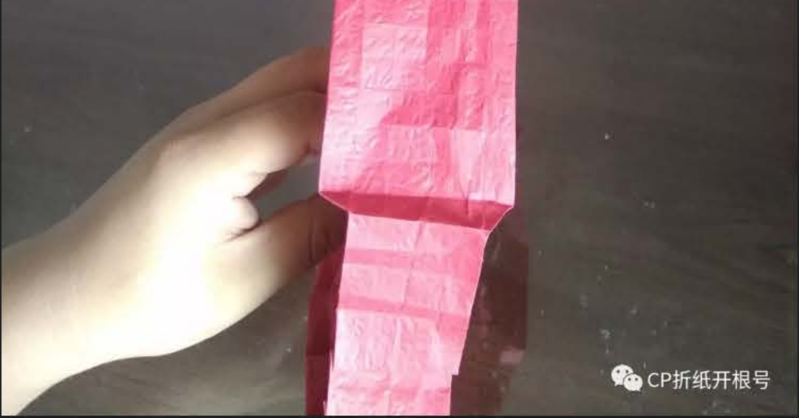
Next, as shown in the figure below, we start to aggregate the head, which is the blue part in the figure below.



CP折纸开根号

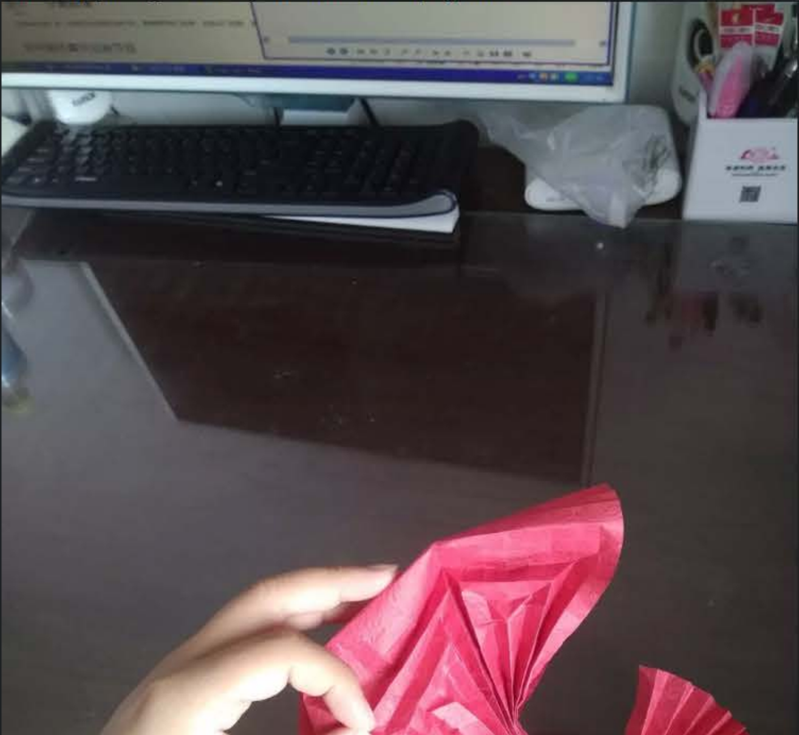


CP折纸开根号

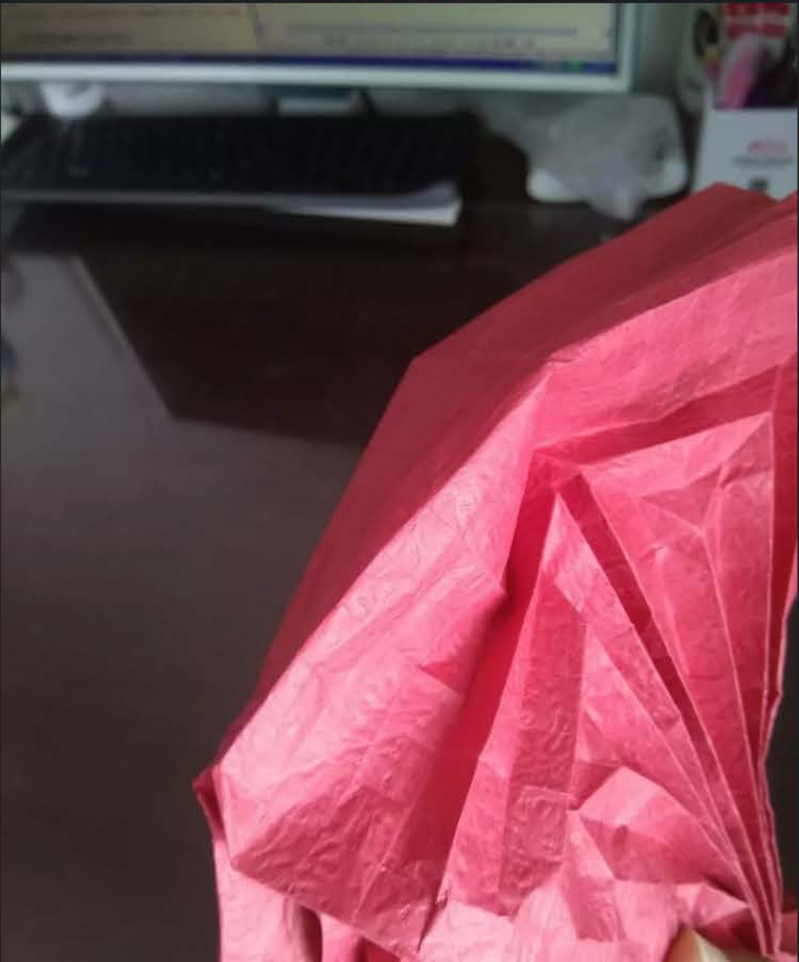


CP折纸开根号

Pull the paper layers one by one and then re-polymerize



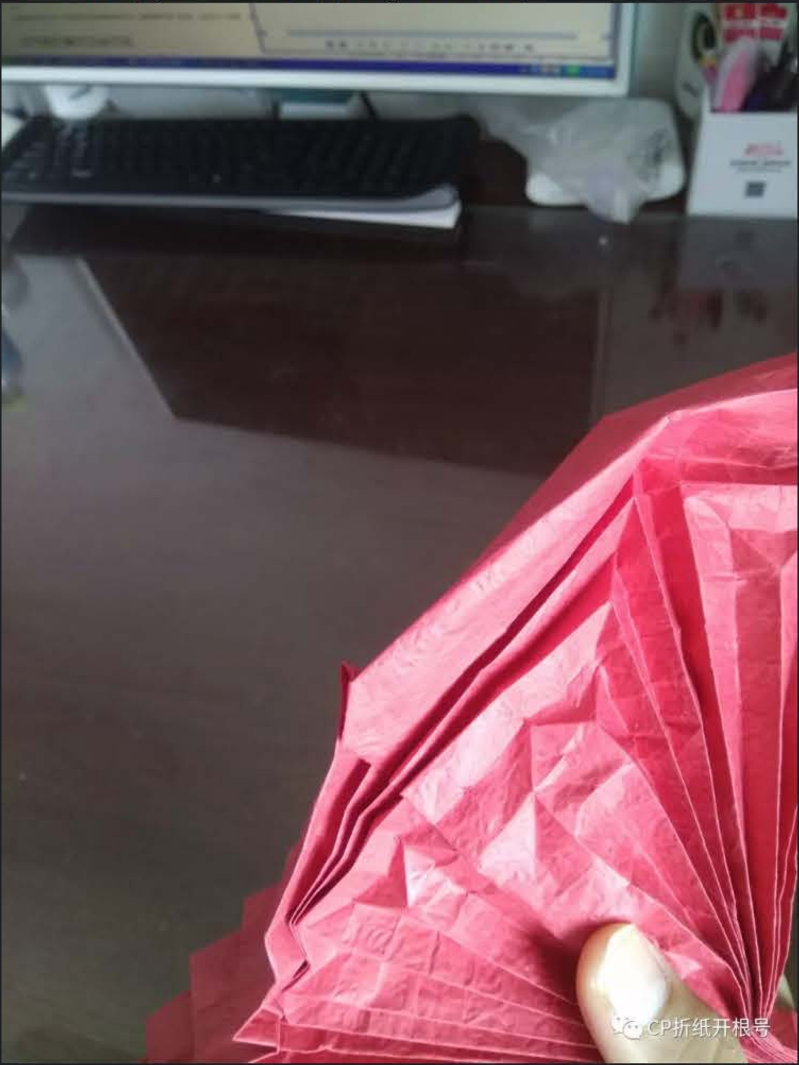
CP折纸开根号



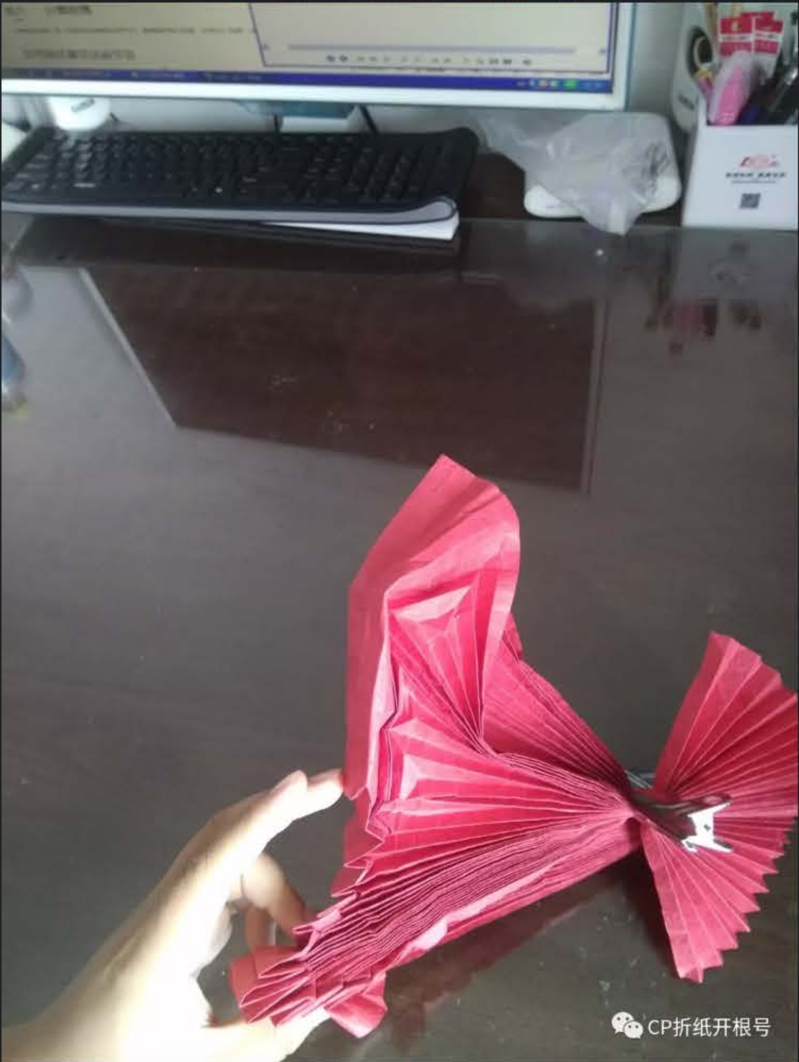
CP折纸开根号

CP折纸开根号

Here we must pay attention to all paper layer relationships

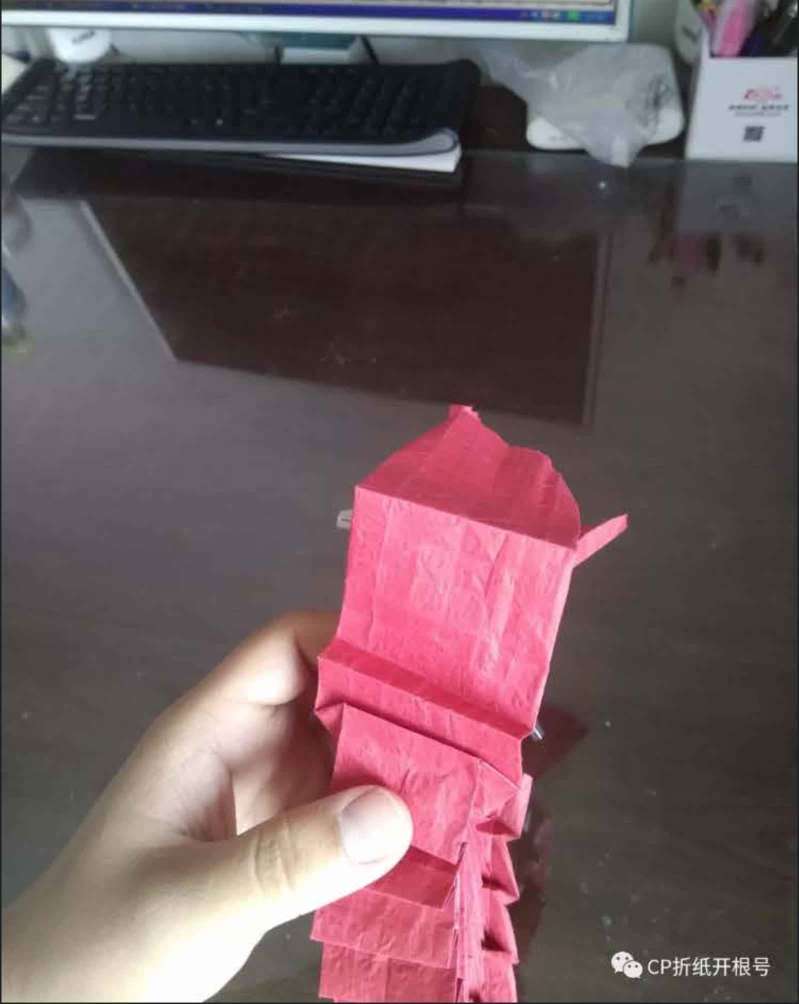


CP折纸开根号



CP折纸开根号

CP折纸开根号



CP折纸开根号

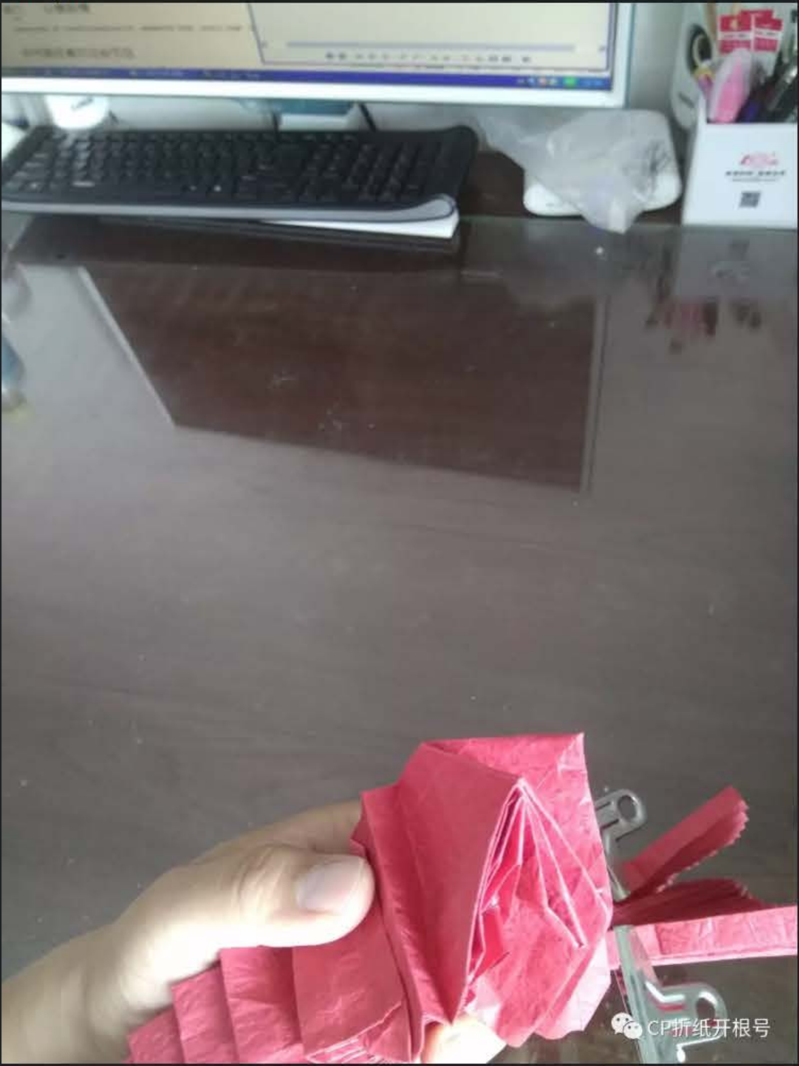
So far, we can finally aggregate the blue lines

CP折纸开根号

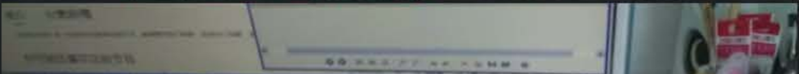
CP折纸开根号

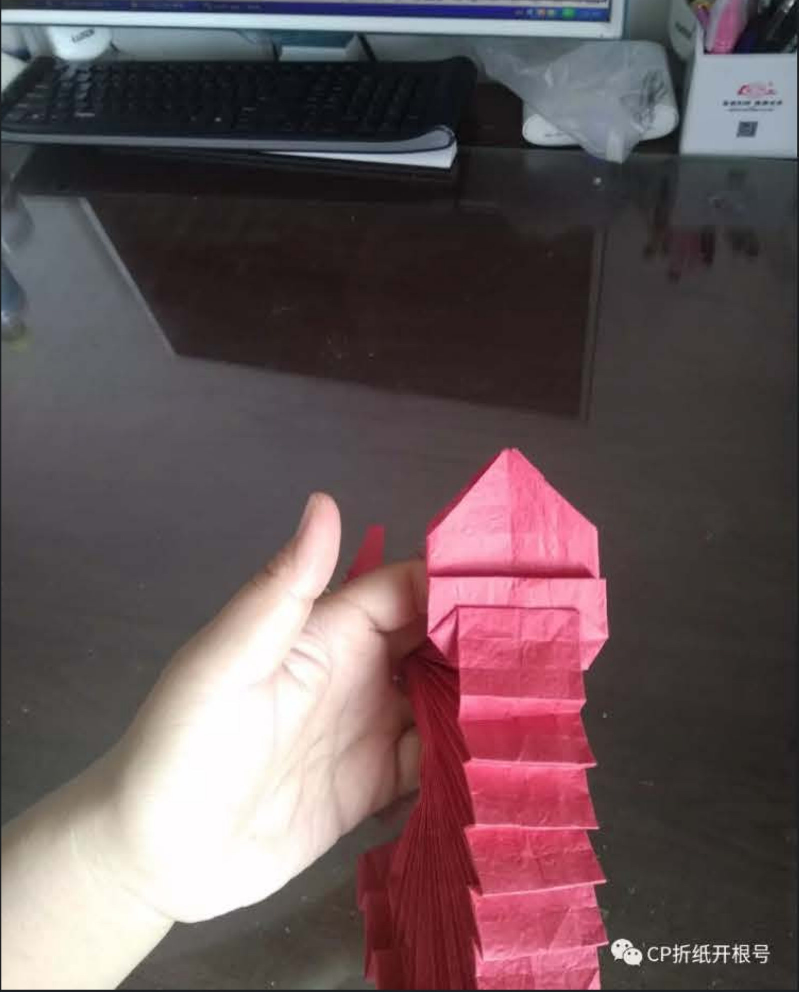
CP折纸开根号

Pull apart



CP折纸开根号

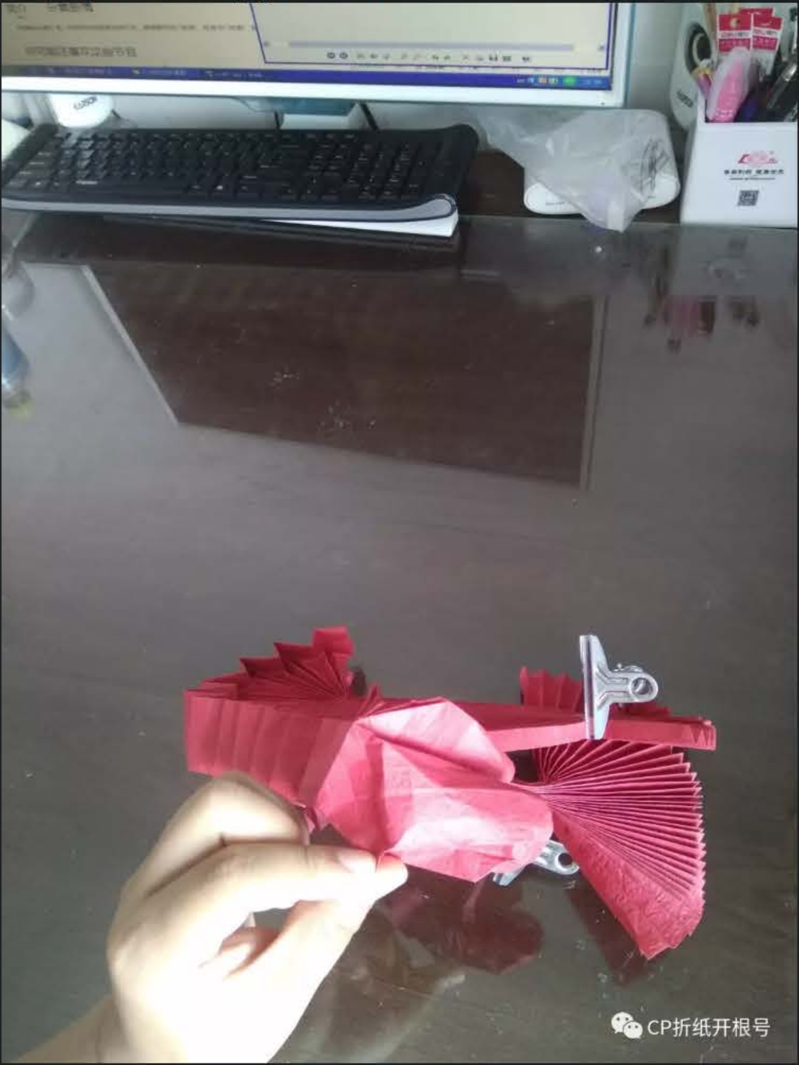




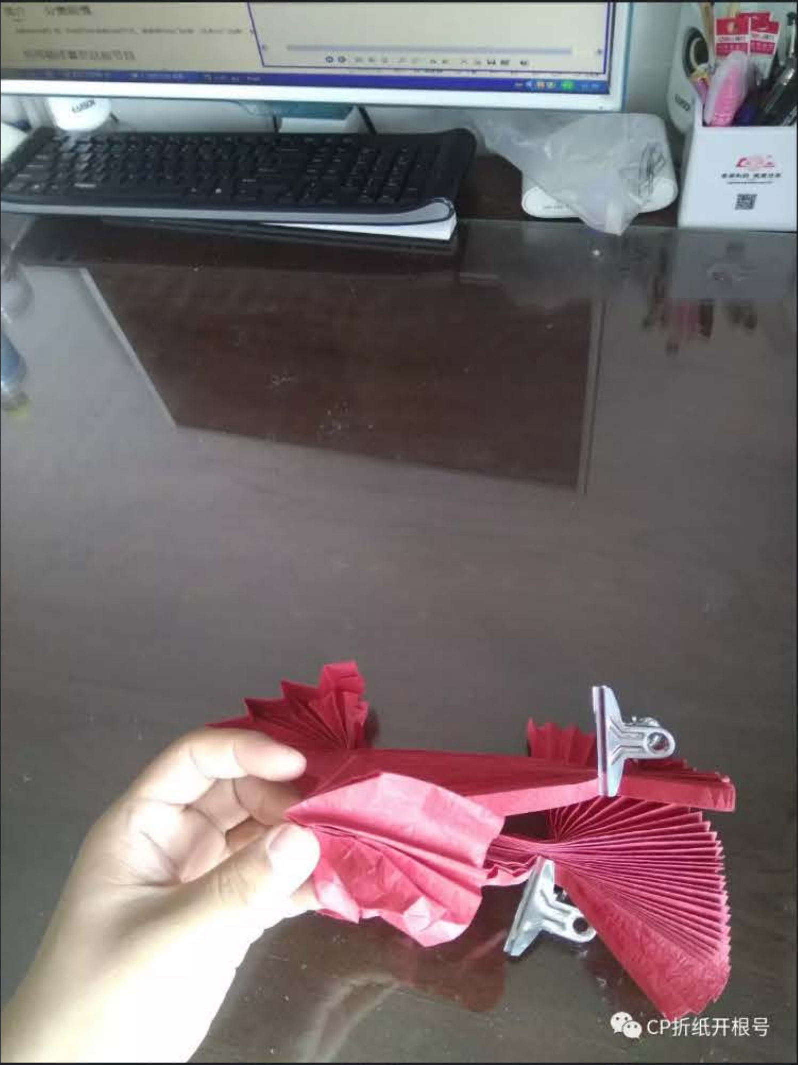
CP折纸开根号

Below we aggregate the other side of the head, which is the side facing away from us.

Here is a process of changing from three to one.

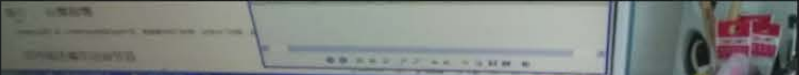


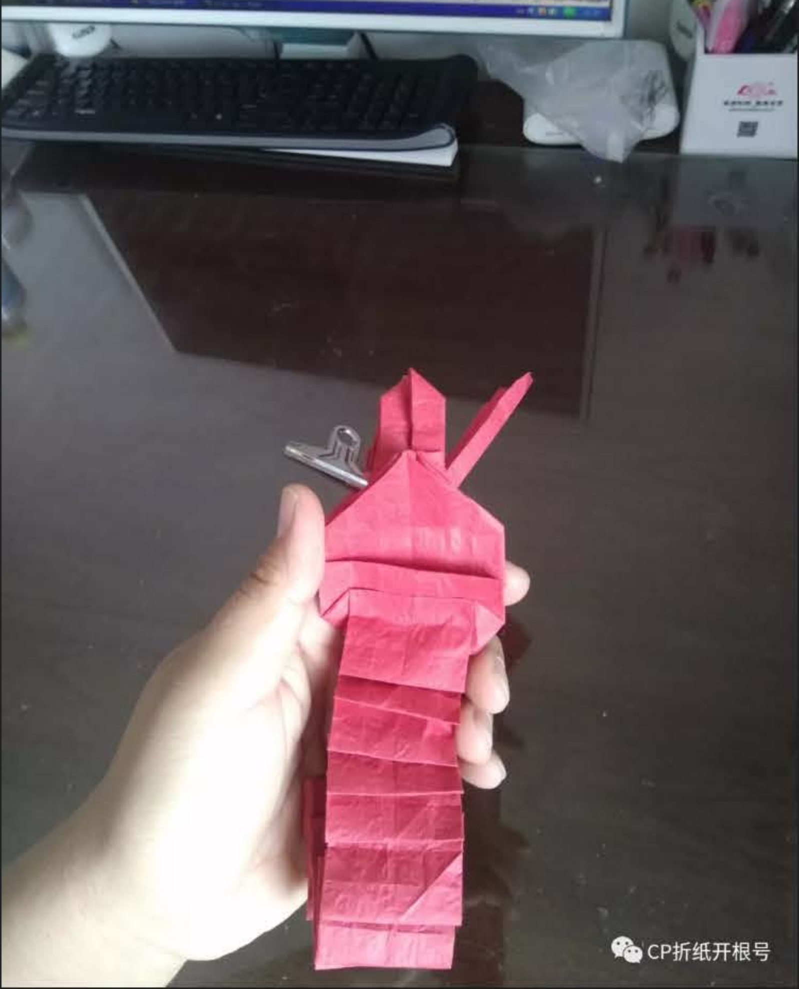
CP折纸开根号



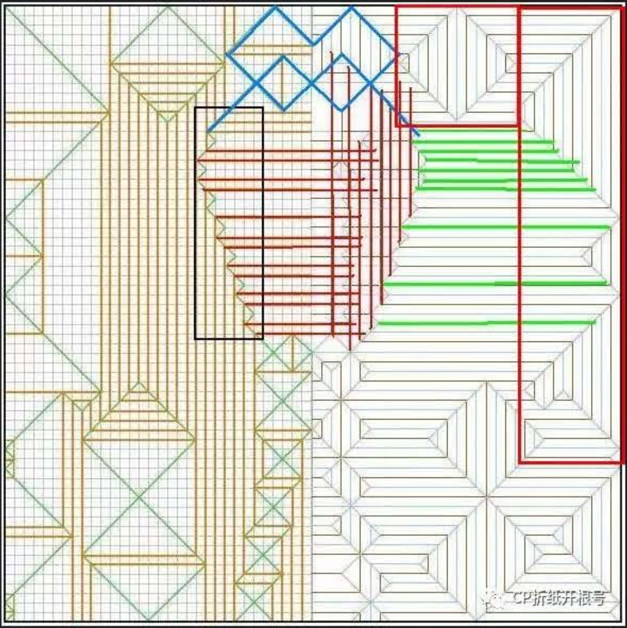
CP折纸开根号

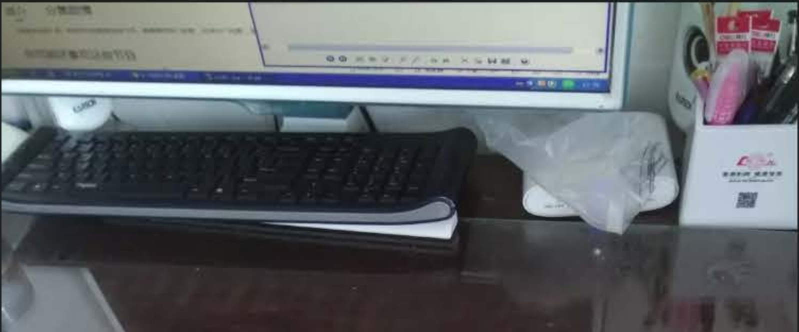
CP折纸开根号

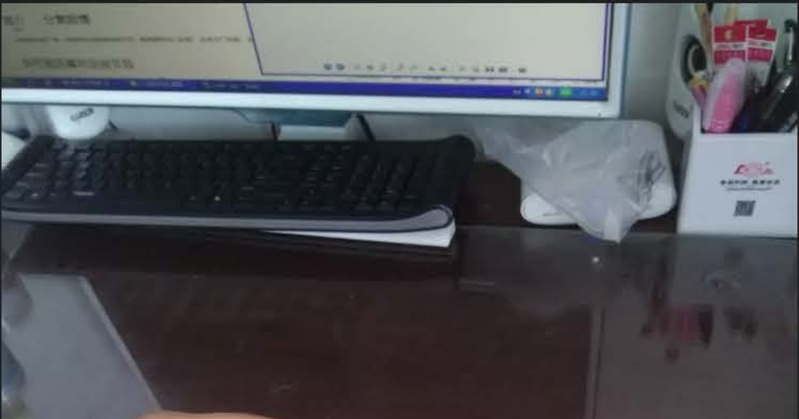




Next, we aggregate the parts of the pliers and legs inside the red box on both sides, which is relatively simple and will not be introduced here.







CP折纸开根号

CP折纸开根号

CP折纸开根号

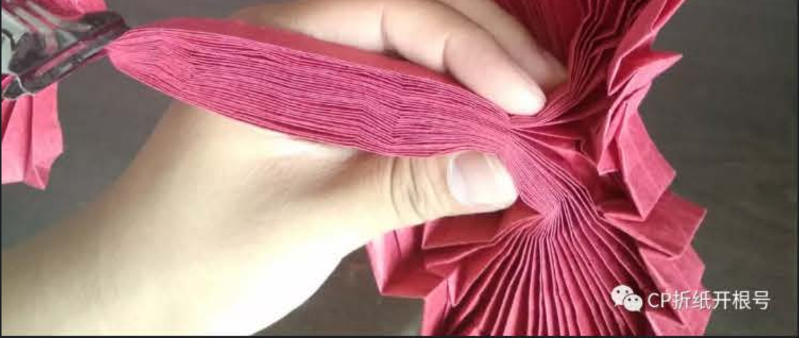
CP折纸开根号

CP折纸开根号

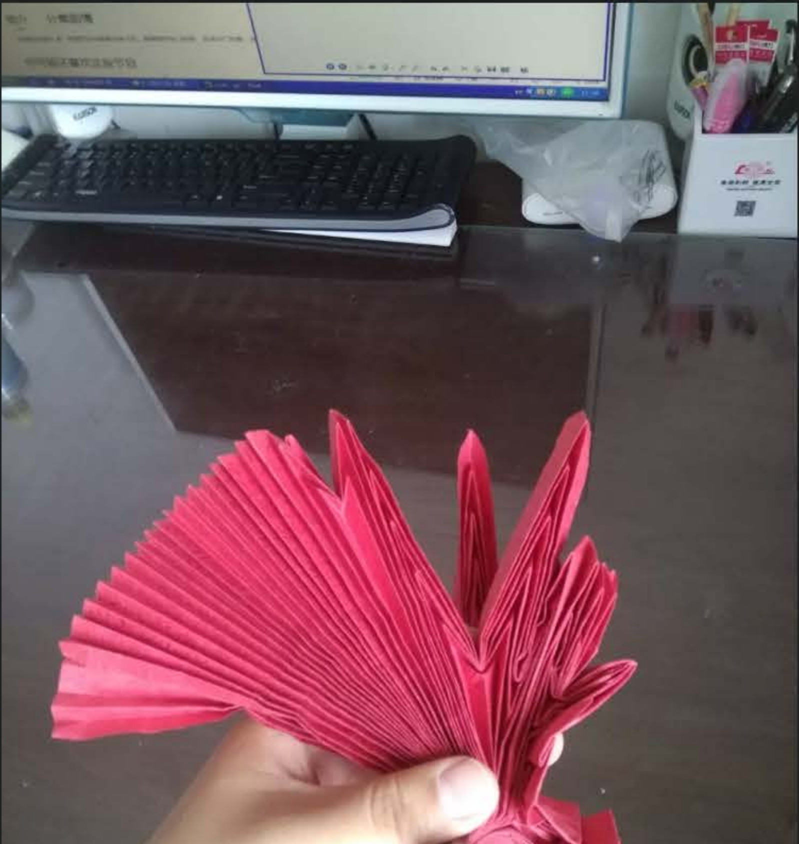
CP折纸开根号

CP折纸开根号

Complete the pliers on the other side below

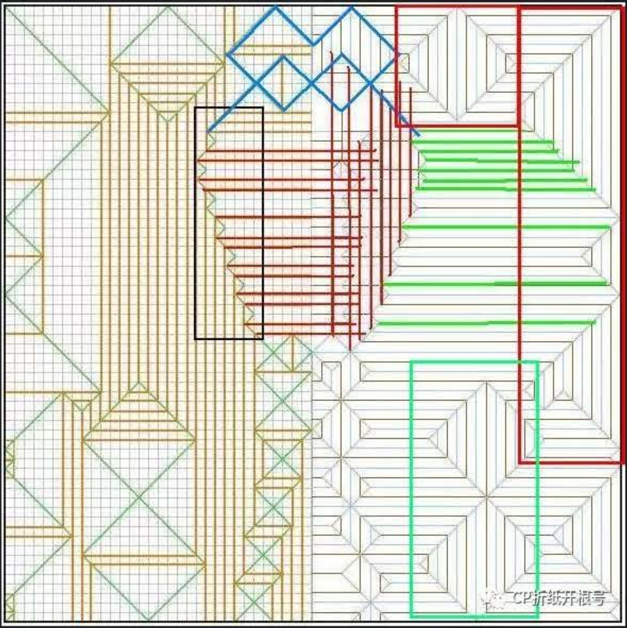


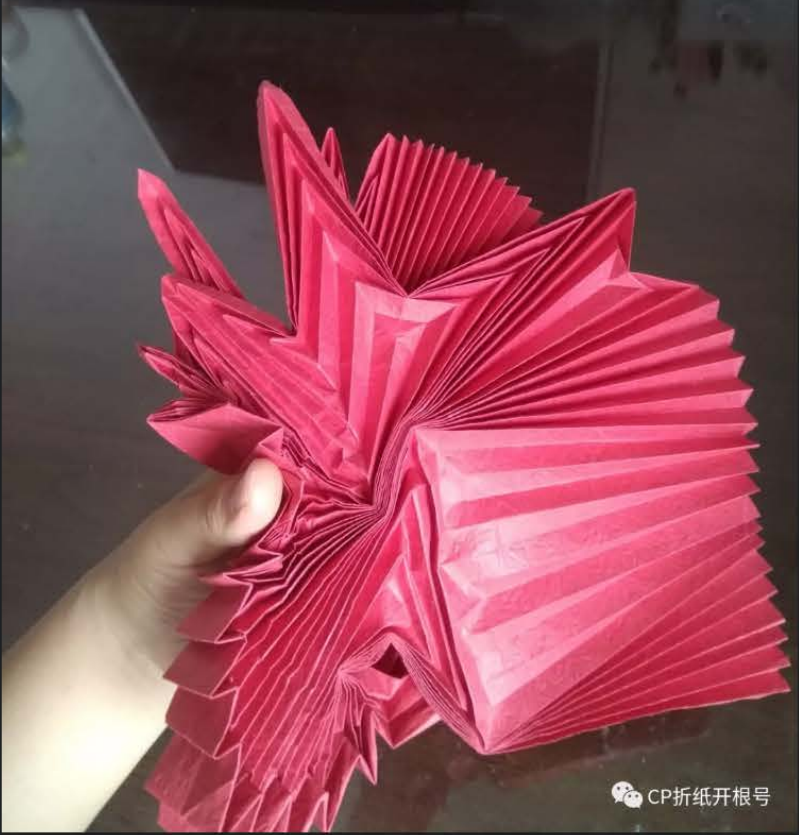
CP折纸开根号



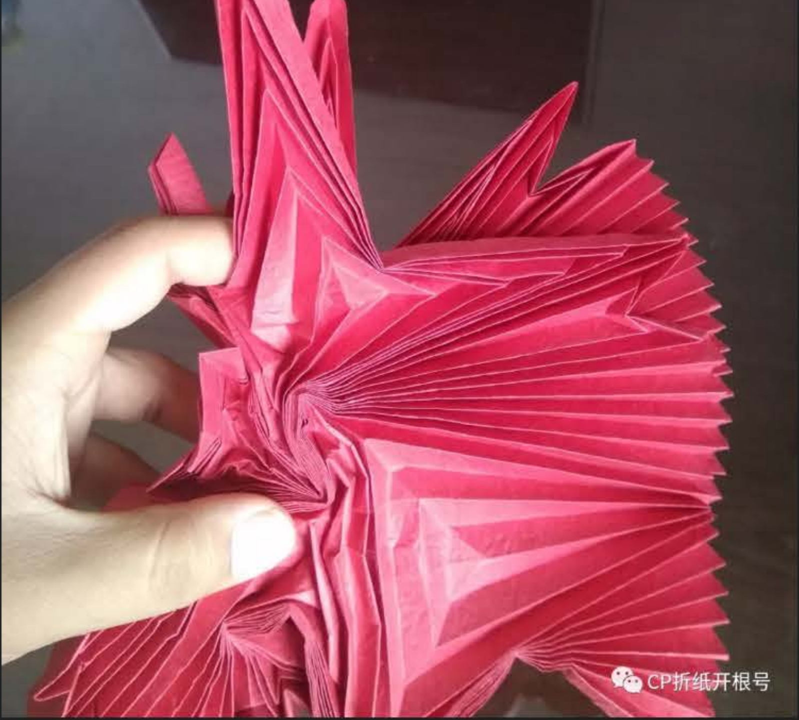
CP折纸开根号

The upper part is the convergence of two pliers, and the lower part starts to pull out the legs



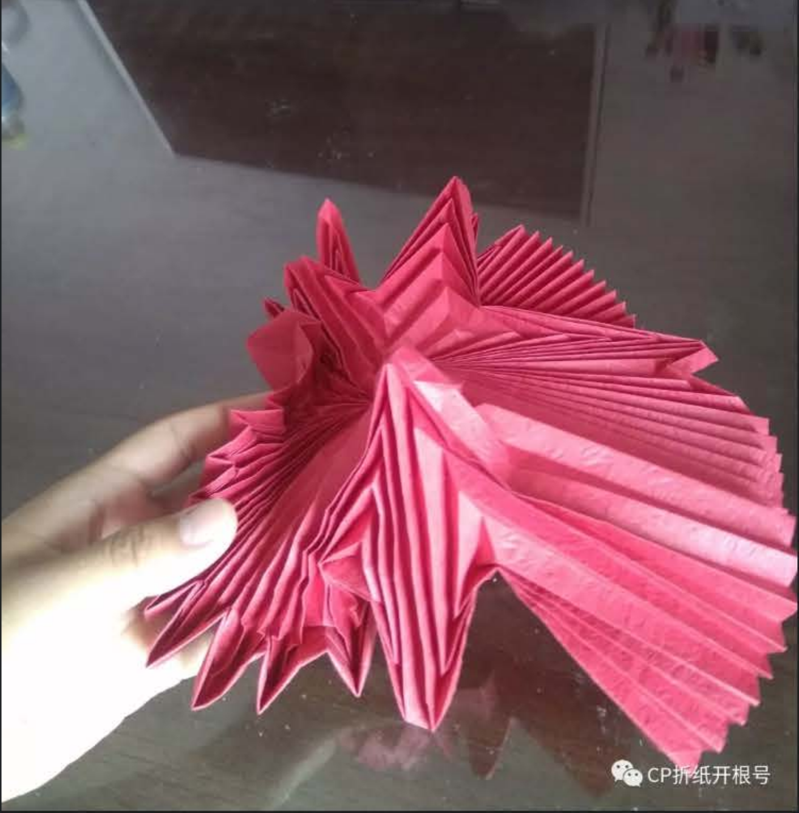


CP折纸开根号



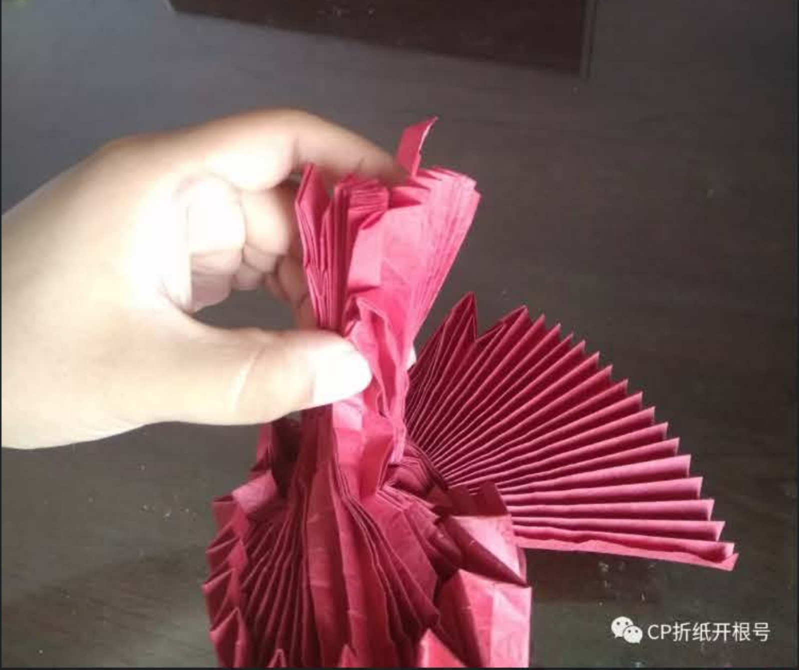
There is a raised part in the middle to talk about. The structure here is similar to the previous section on CP warming. You must first pull up a branch and then perform peak-to-valley conversion locally, and then merge it into the overall leg structure. go with

CP折纸开根号

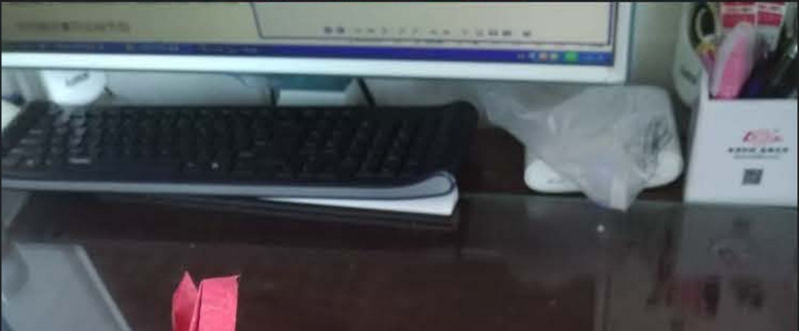


As shown in the figure below, there is a multi-paper layer conversion in some places.

CP折纸开根号

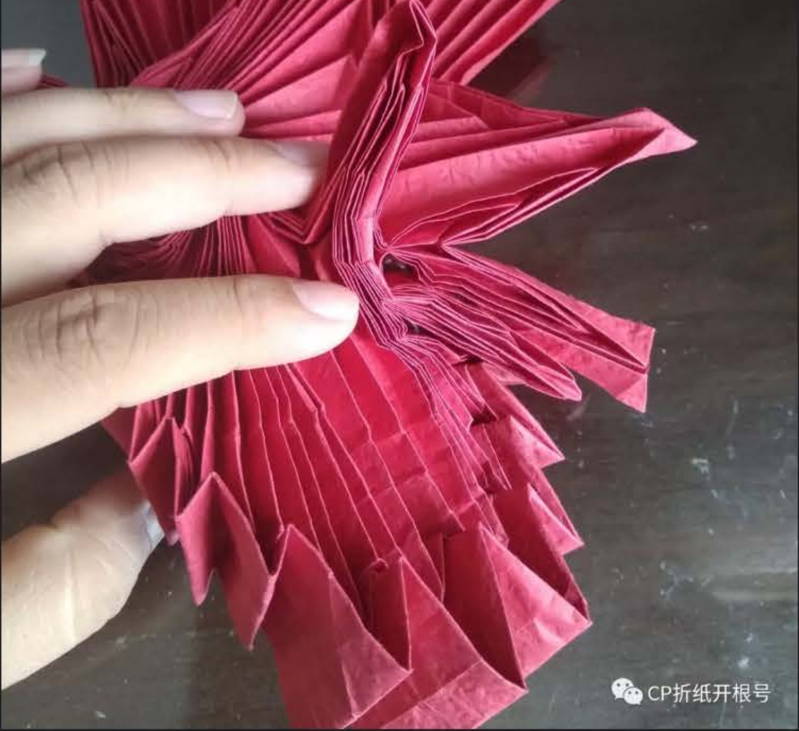


CP折纸开根号

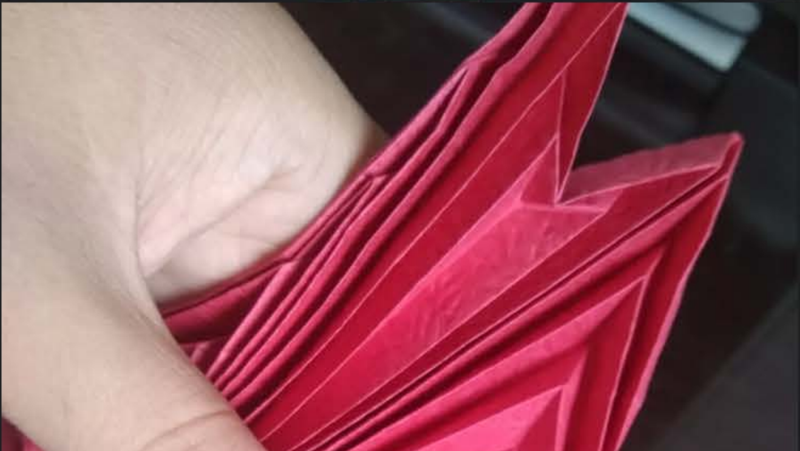


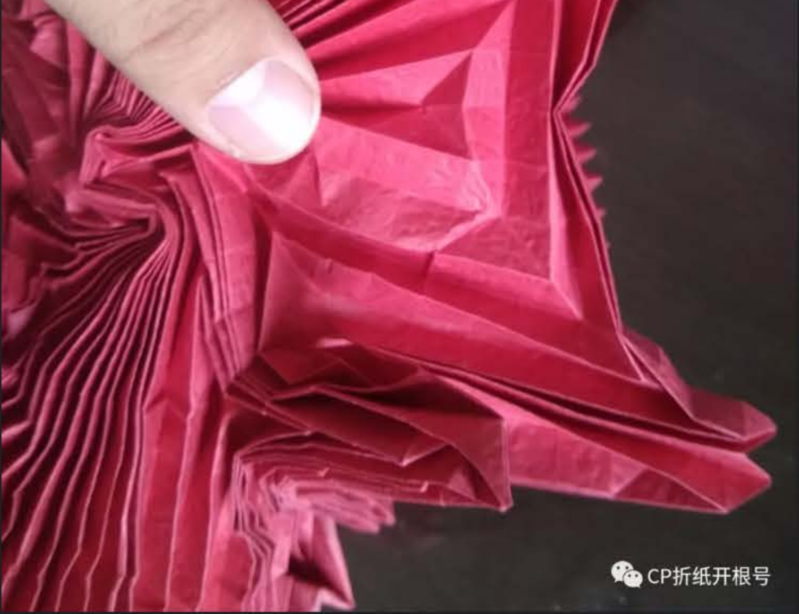
CP折纸开根号

CP折纸开根号



CP折纸开根号





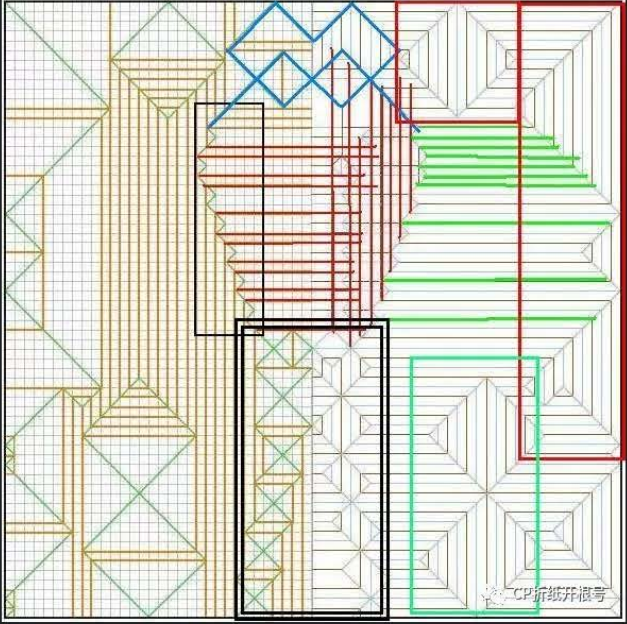
Here we look at the paper layer structure on one side as a whole, and then polymerize the other side in the same way.

CP折纸开根号

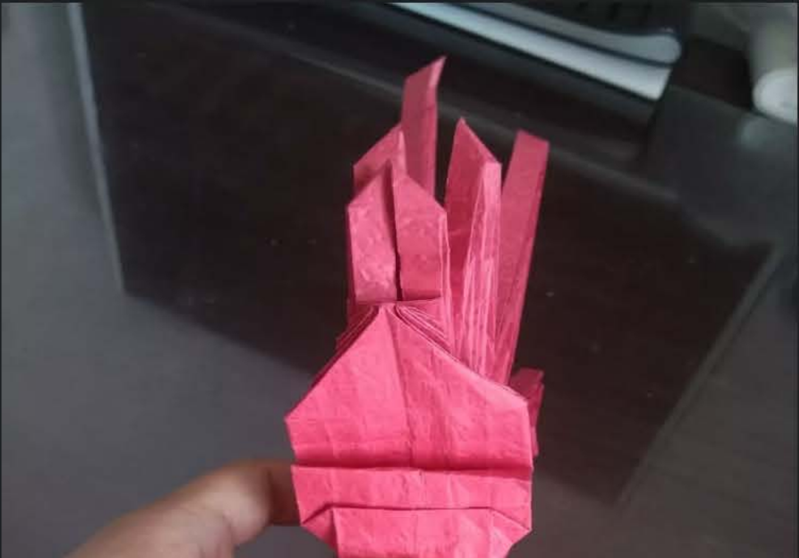
CP折纸开根号

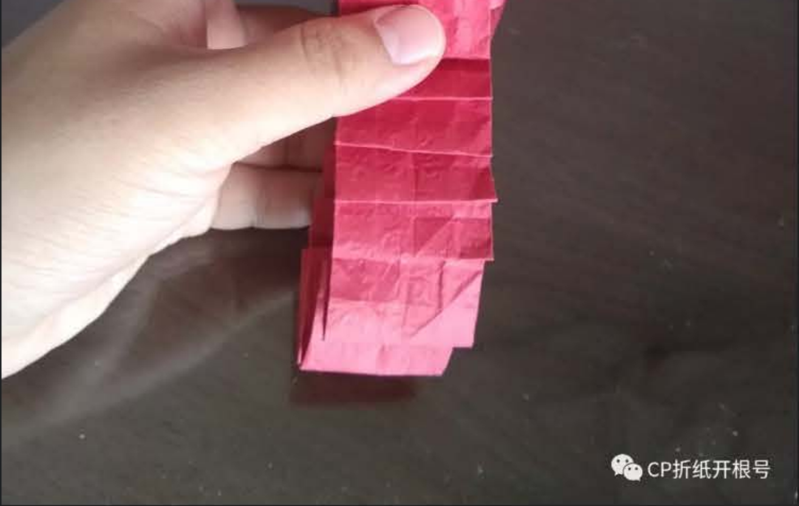
CP折纸开根号

Finally, we aggregate the shrimp tails and the polypod structure under the tail in the black double-lined box in the lower and middle part of the picture below. The hardest part here is the use of peaks and valleys. The rectangular structure suddenly added a rectangular structure for changing direction. Here are the common methods for shrimps and polypods. Please remember those who want their original works. Take notes!

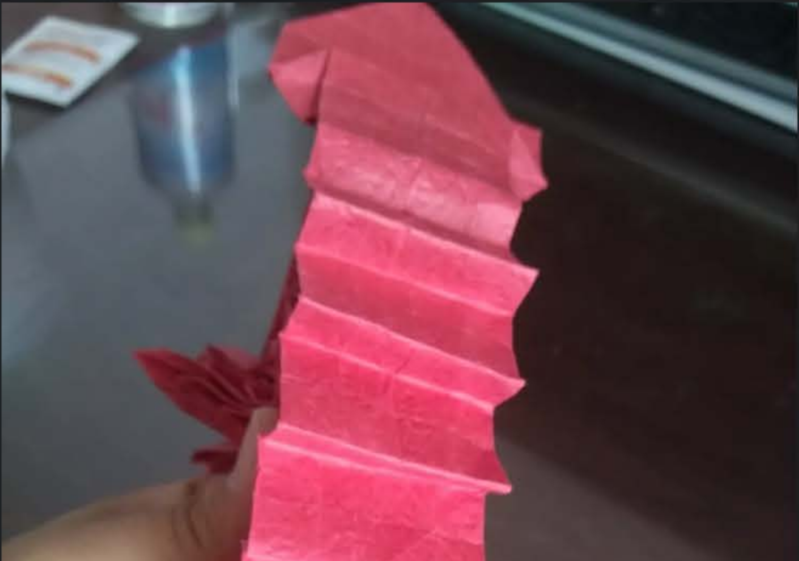


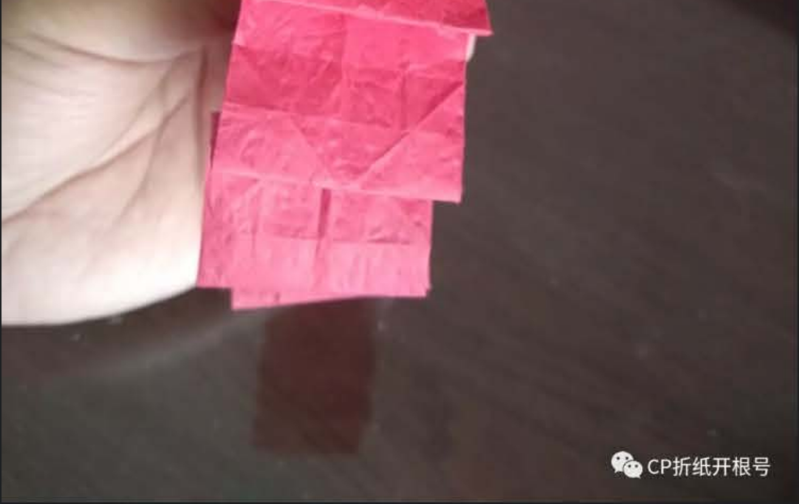
CP折纸开根号



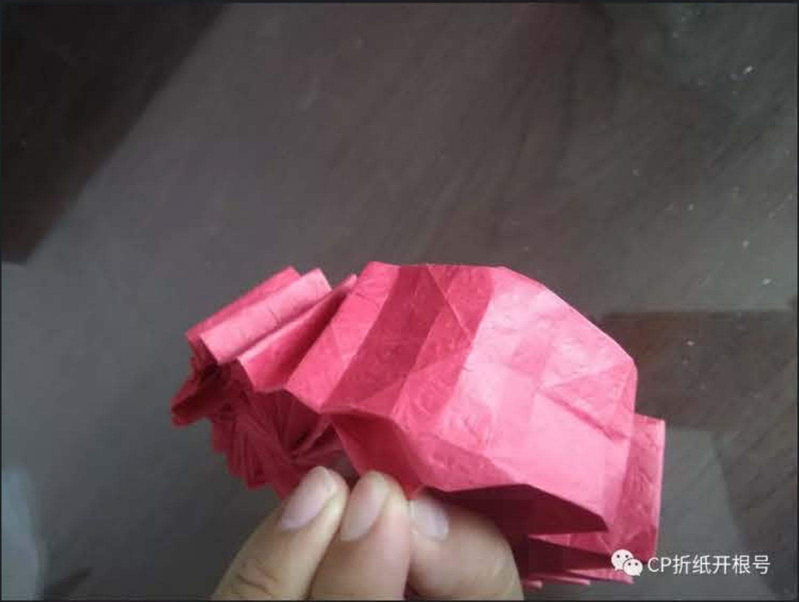


CP折纸开根号

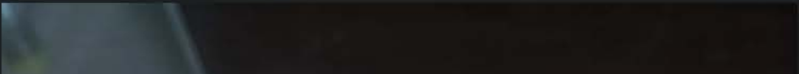


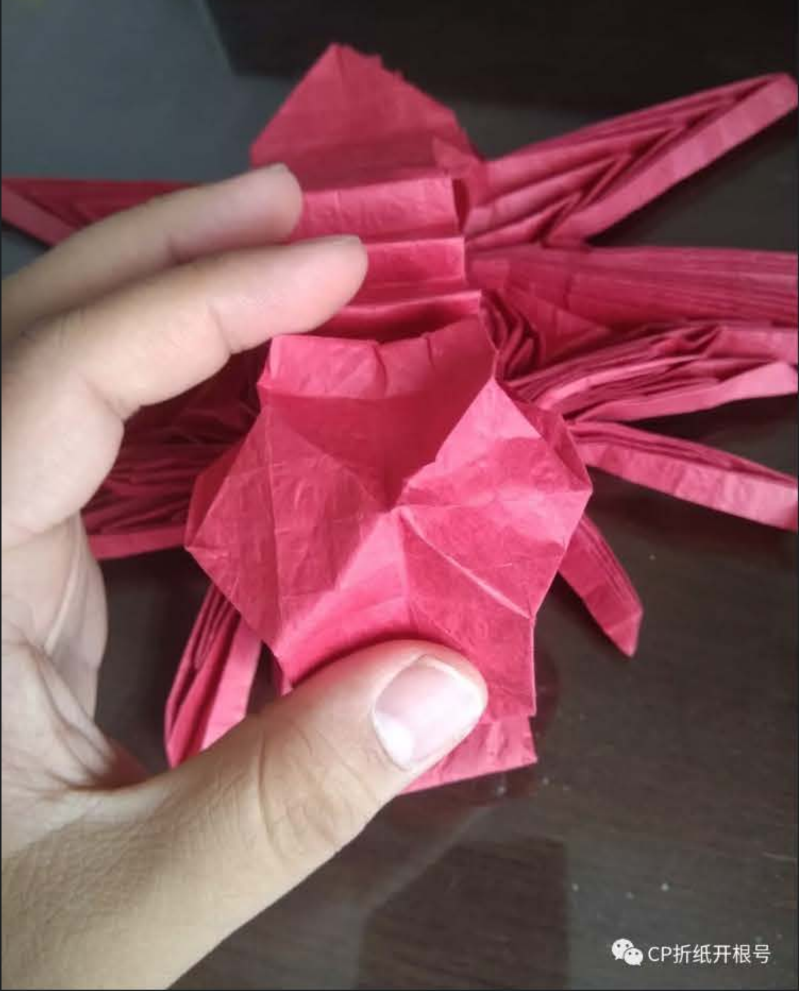


CP折纸开根号



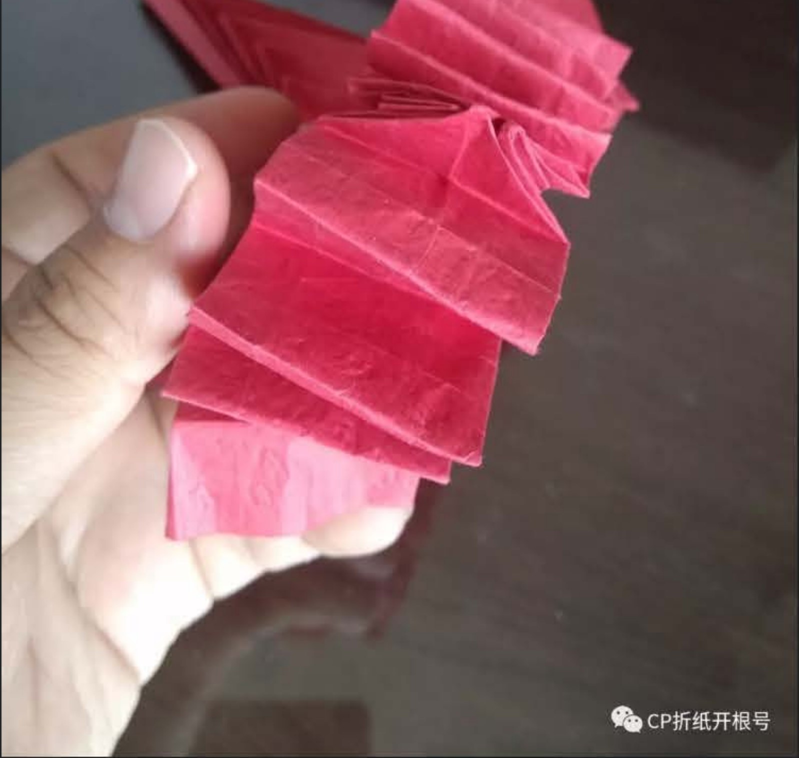
CP折纸开根号





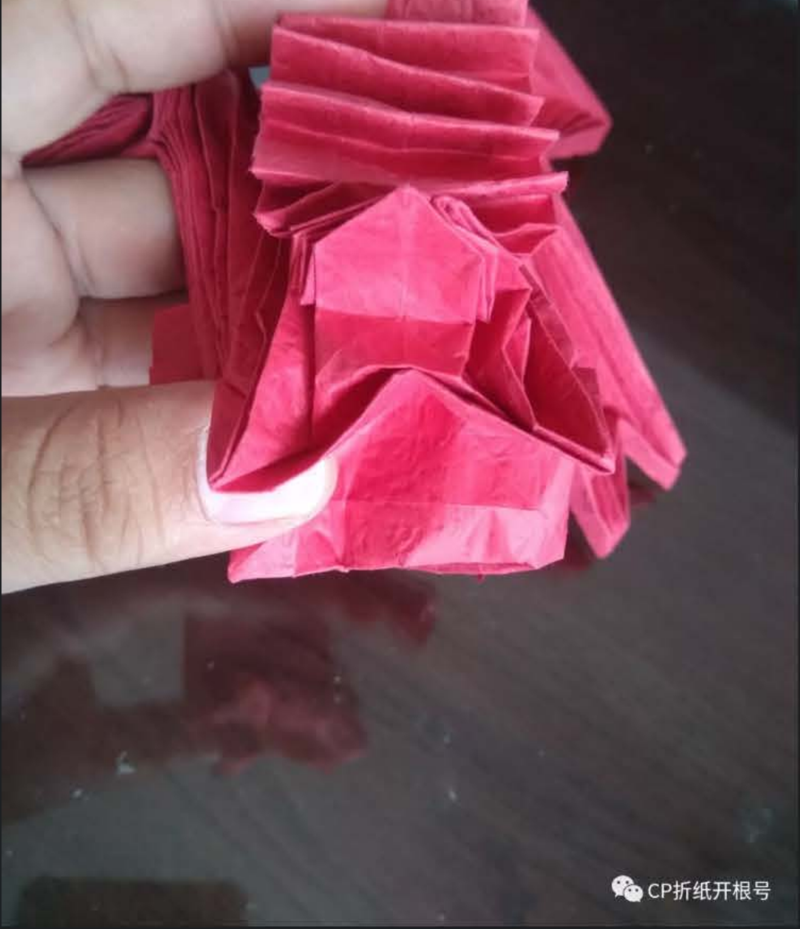
CP折纸开根号

CP折纸开根号



CP折纸开根号

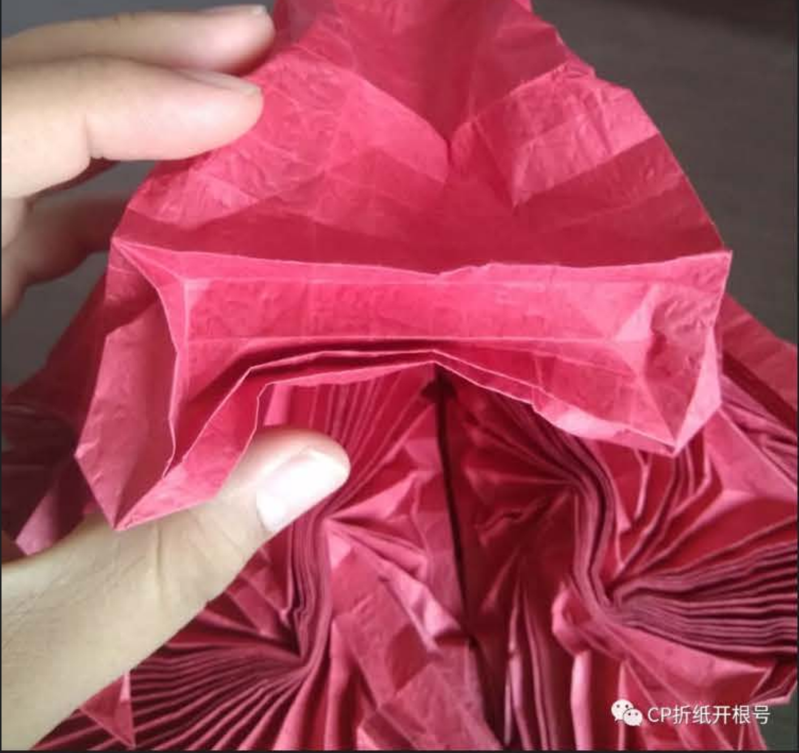
CP折纸开根号



CP折纸开根号

This type of structure is pulled apart greatly, and then the polymerization is completed one by one, and then part of it is retracted.

CP折纸开根号



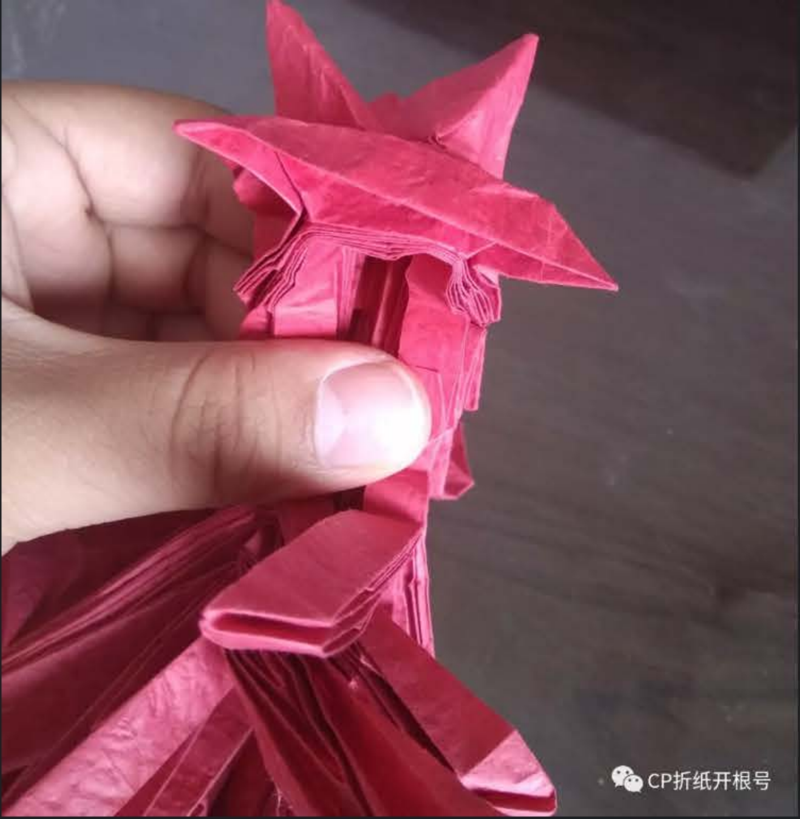
CP折纸开根号

CP折纸开根号

CP折纸开根号

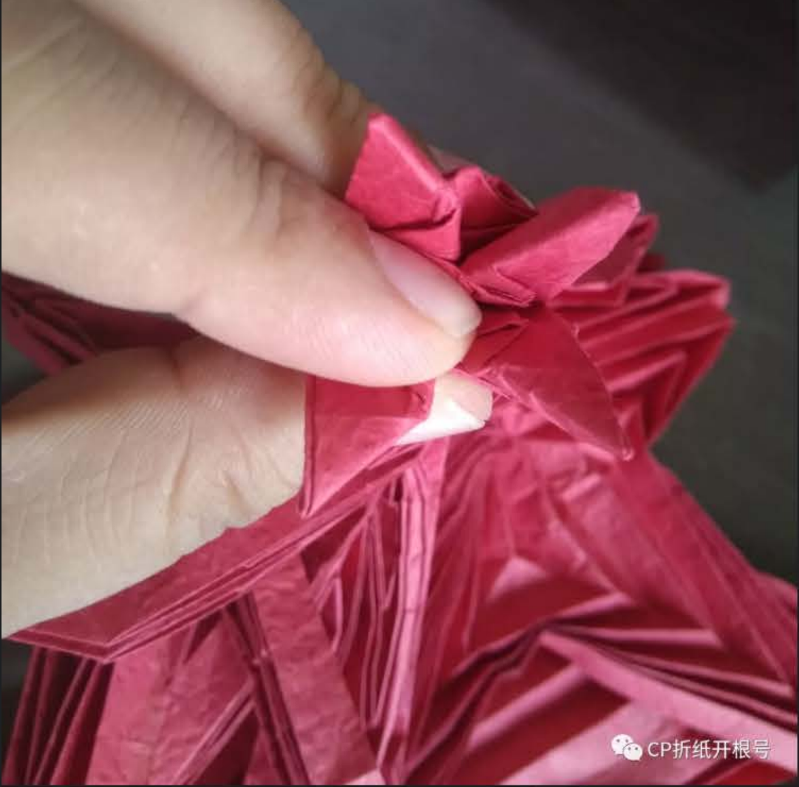
CP折纸开根号

CP折纸开根号

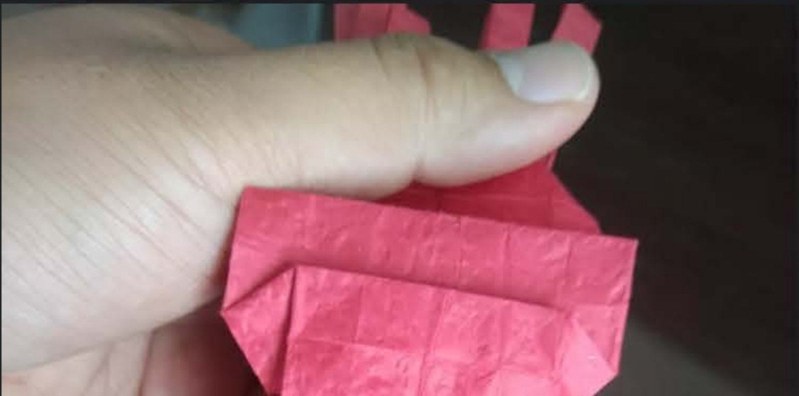


CP折纸开根号

There are many changes in this part of the valley, so everyone must be patient.

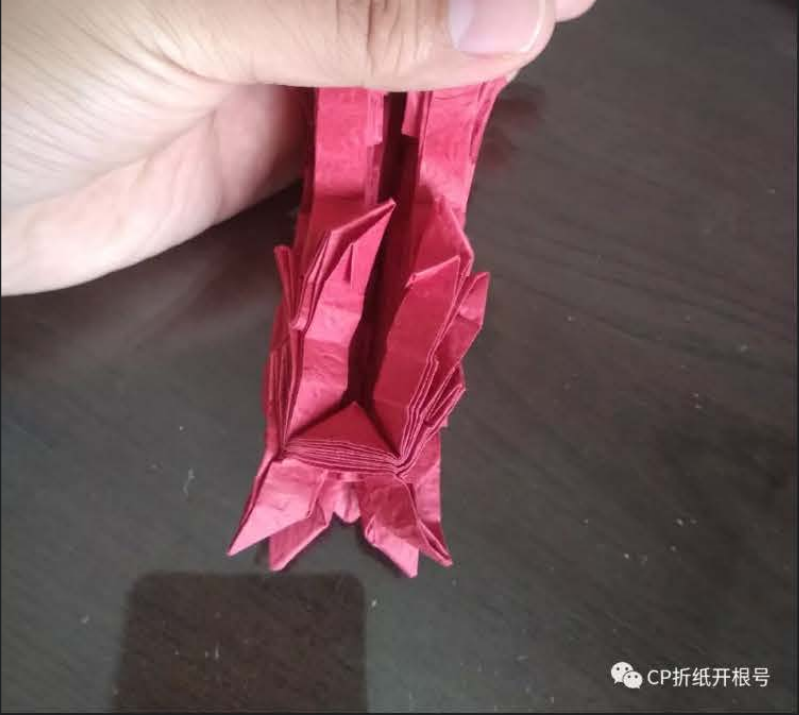


CP折纸开根号



CP折纸开根号

CP折纸开根号



CP折纸开根号

Convergence is over here, I believe everyone knows all the branches, so ,,,, hurry up!
Well,
That's it for this issue!
See you next time!
