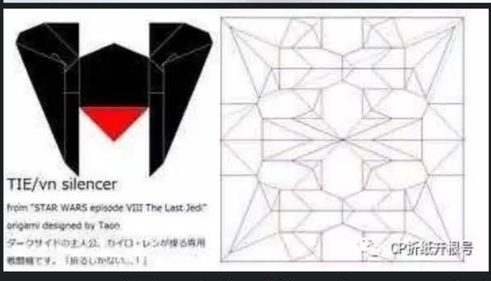
In order to say this work, you only need to distinguish the peak and valley lines and then flatten them, so it is a relatively simple CP sketch.

Let ‘s take a look at a simple version of the fighter



I wo n’t say much about the line of this work. You can just look at the above picture carefully. The full picture is derived from the 22.5-degree line that can be angled up. The starting point of CP, let's follow this horizontal line!
Let's use our talents, and let's get together!
