Yes, origami.

A blog that you write down to remember your broken work.

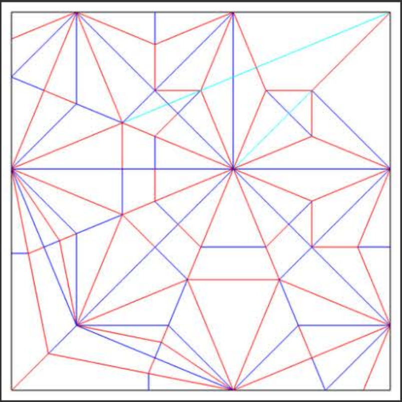
Tips for folding Pikachu

May 16, 2018

Anyway, I want many people to fold, so I will write hints on how to fold it.

It's pretty subjective, so it might be a hint ... (´・ω・`)

Then we will break it.



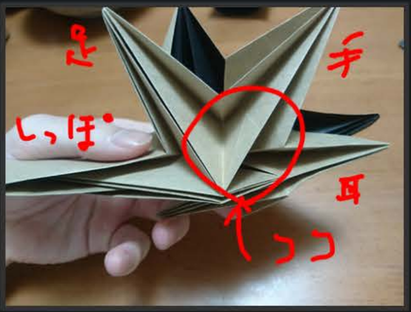
折 Let's fold this street (noisy!)

The ratio is so simple that it will probably break.

It should be foldable.

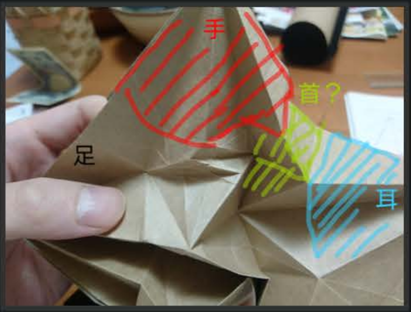
The light blue line is the line used for folding.

ら If you fold, it looks like this.

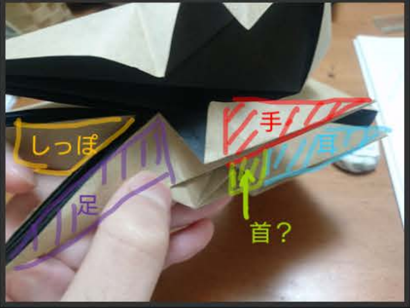


処理 For the time being, it is processing around the arm.

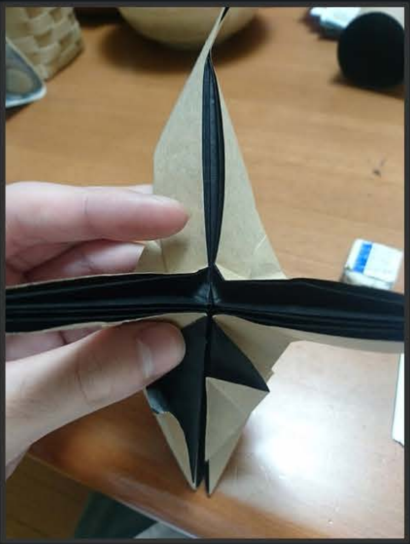
The tail, feet, hands and ears from the left.



れ ば It is okay if the hands are shorter and the distance between the ears and hands, that is, the neck, is formed.



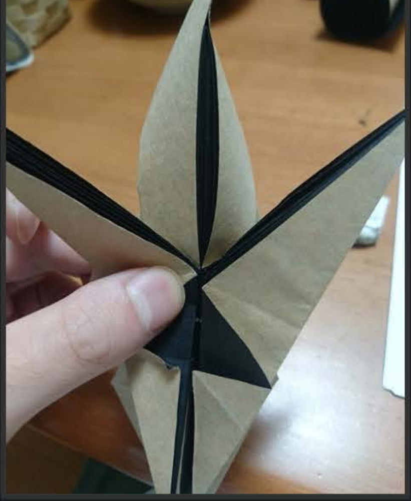
と き At this time, the ears and hands are parallel and the feet are slanted (the base of the feet cannot be folded).



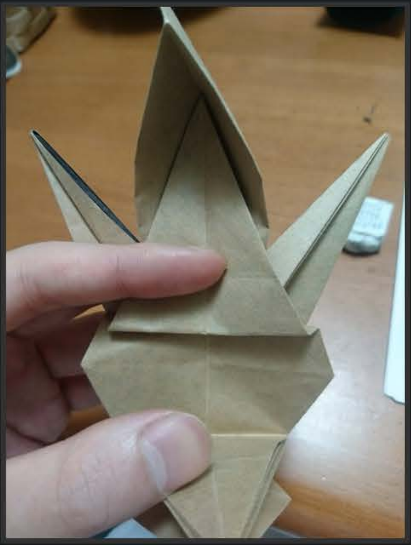
た The one who saw the previous photo from the back side.

The tail is up.

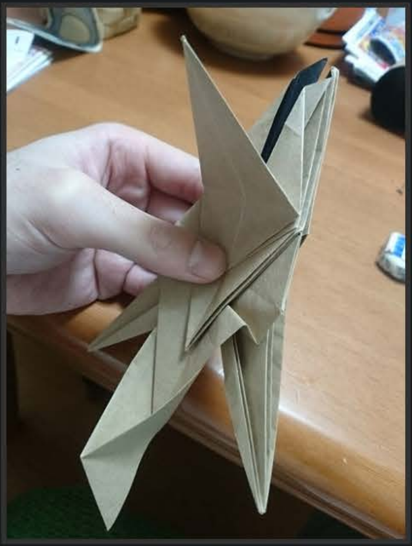
As you can see, the tail connection is not folded.



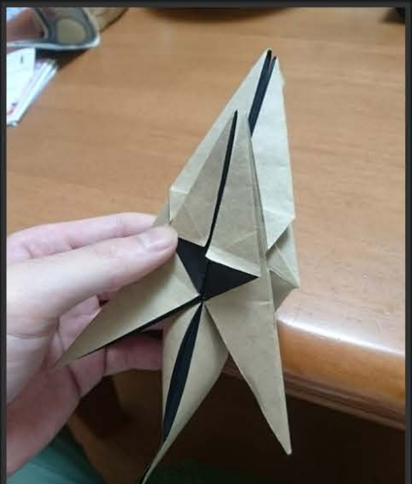
↑ There, fold the back side up and align.



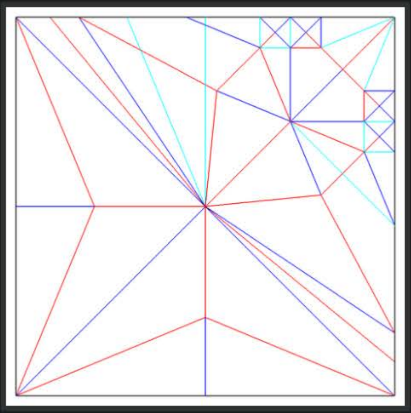
と こ ろ I turned it over.



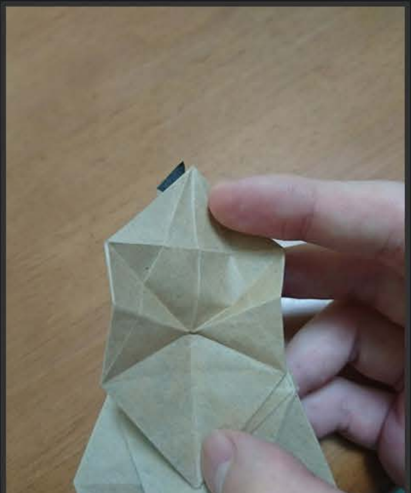
↑ Vertical rotation. After a little break with my ears.



と こ ろ I turned it over.

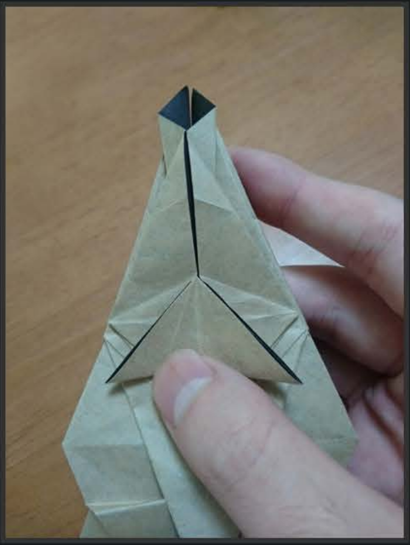


↑ Here, the development of the face is put out.
Light blue is the line used for folding.

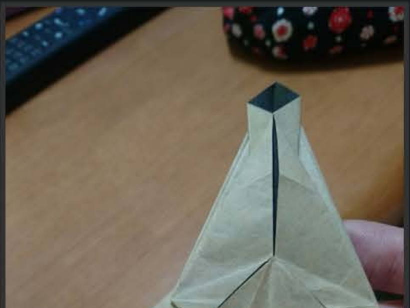


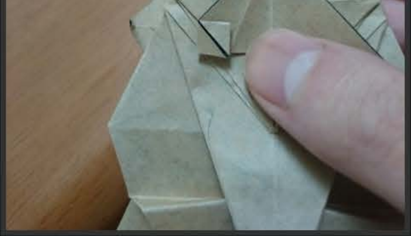
方 How to put out cheeks.

From the basic shape of a crane, pull out the paper and make it hexagonal,

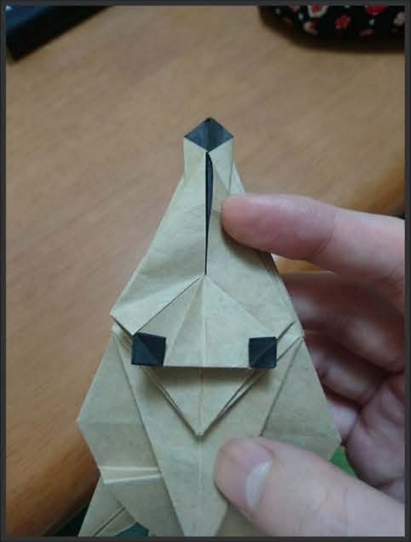


↑ Thus,

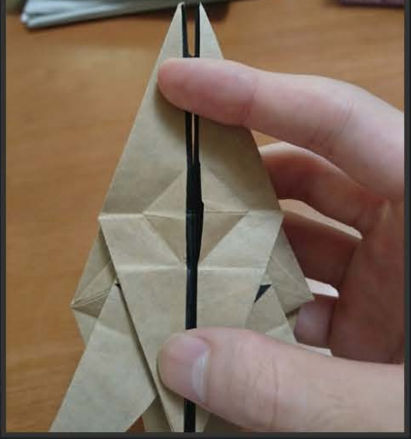




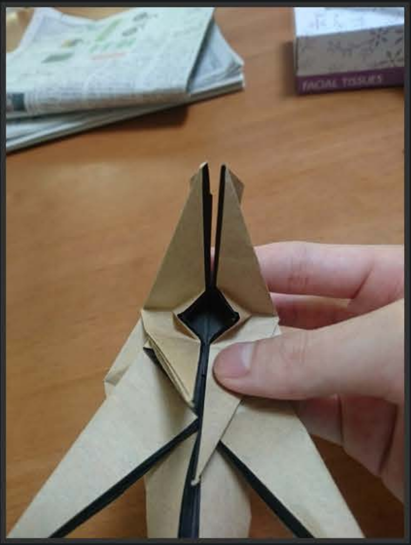
↑ Thus,



↑ Fold it over!

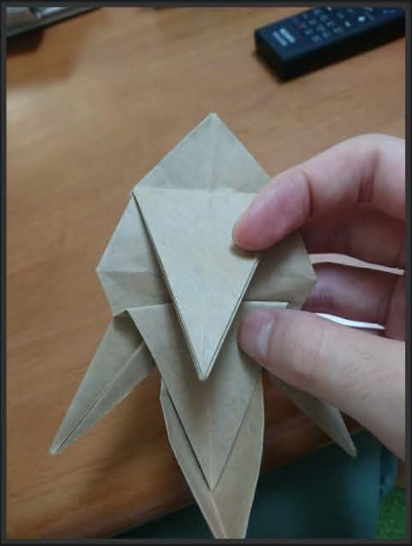


↑ Furthermore, turn it over and make a crease like this.



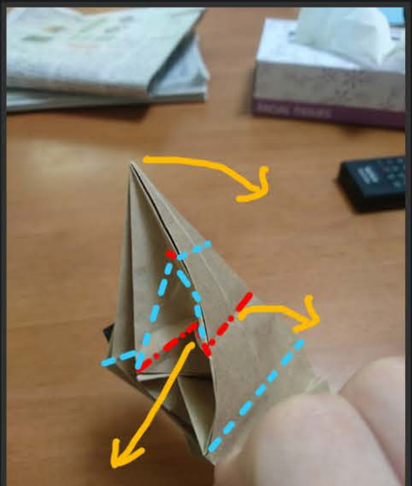
耳 Fold the ear down and the face up along the fold line.

This process is to avoid thickness when finishing the face.



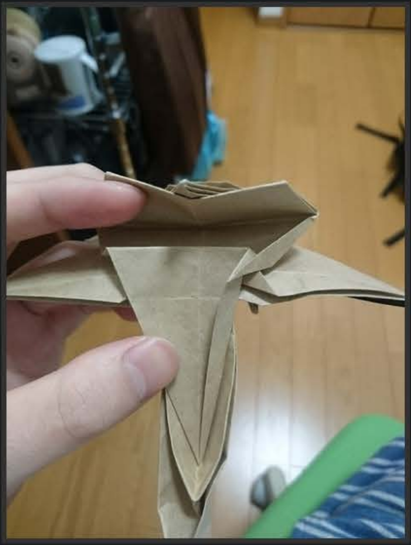
感じ Feeling seen from behind after defeat.

It's a huge internal caddy shown in this photo, but I don't have to do it because I like the processing.



↑ In my case, the red line is a mountain fold and the blue line is a valley fold.

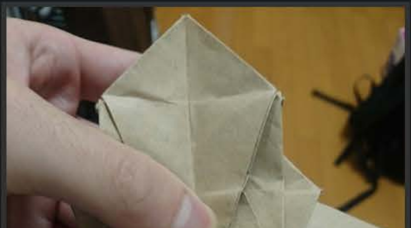
Please confirm the state after crushing with the two pictures after.



Make the tail thin.

The left side is the original state, and the right side is in the middle of thinning.

Already, the tail of the tail is sunk and folded in the photo to make it thinner.

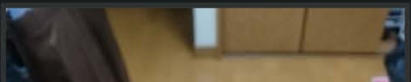


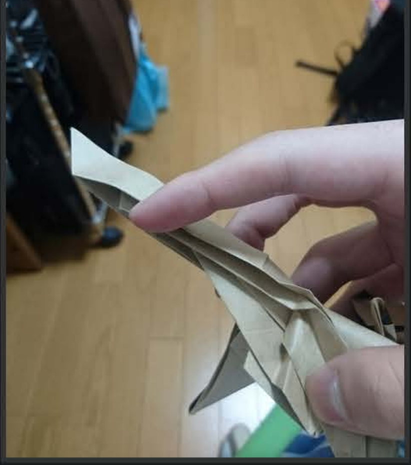
↑ It's thin.

After stomach crush.

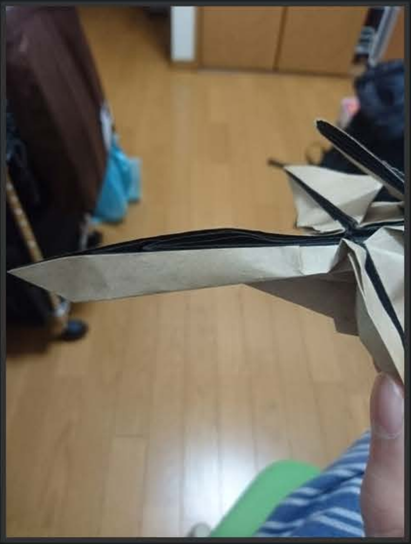
For the final stomach treatment, break your limbs.

The tail is creased like this,

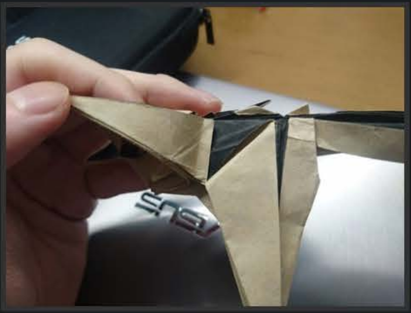




↑ Fold it down,

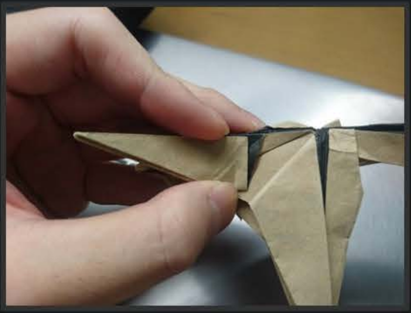


↑ It looks like this.

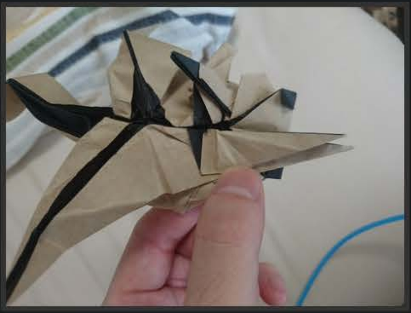


です Left hand.

The head side of the back stripe



This.

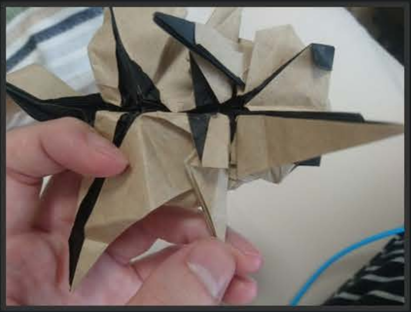


↑ The photo is upside down ...

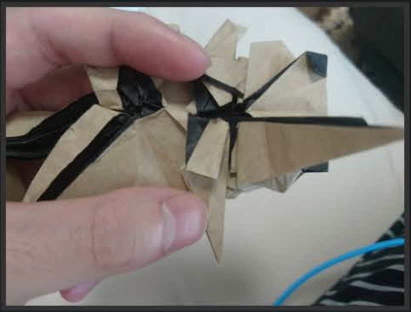
Don't worry about the upper half.

My head is good and my limbs are broken.

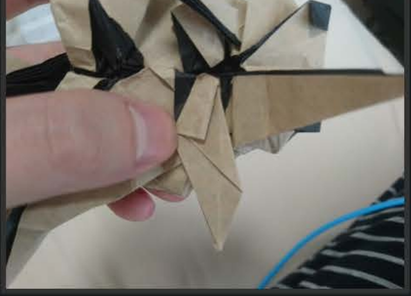
If you try to finish your head first, you will ache later.



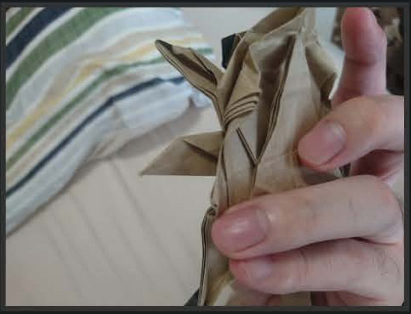
広 げ Widen the gap of the first sheet from the top, and turn the quad face down by splitting twice



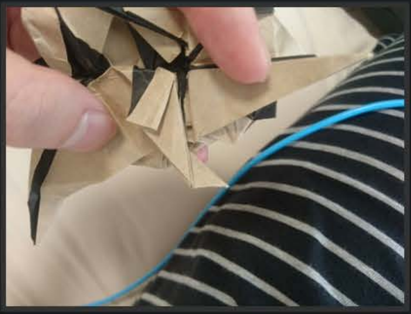
ず ら Slightly shift the stripes on the back,



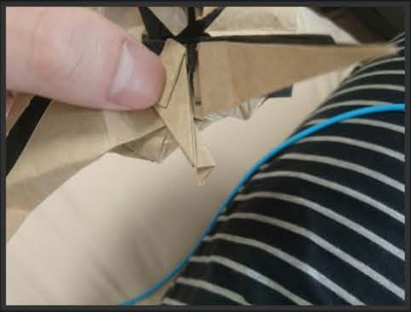
も Shift the tip of your hand one sheet at a time.



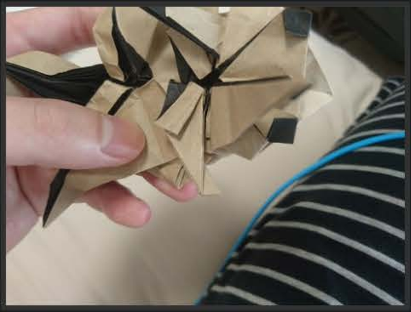
と こ ろ As seen from the back.



っ て Twist your hand back

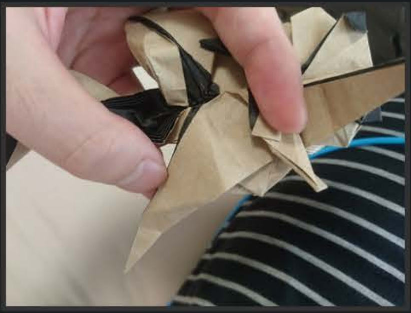


っ て Twist again,

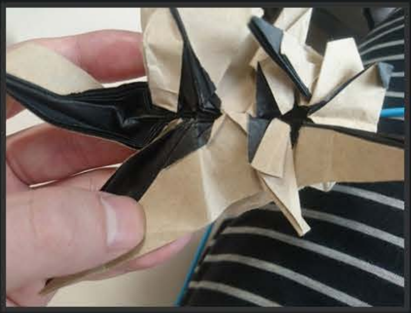


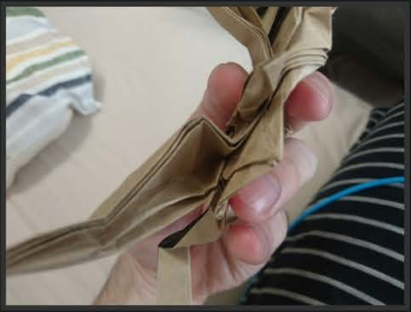
隠 Hide the lower part inside.

It looks like it's done.

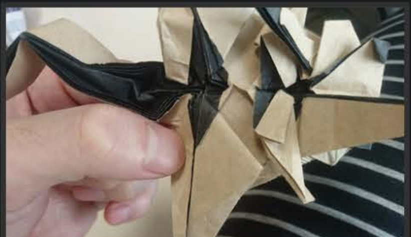


は For the foot part, first shift the quad right below, but ↑ Fold the tail stripe first.

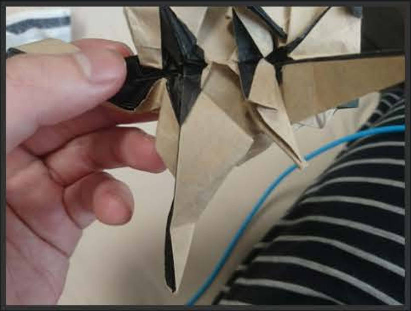




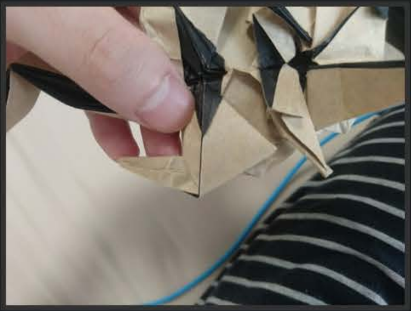
に Shift only 3 cards from the top referring to this gap.



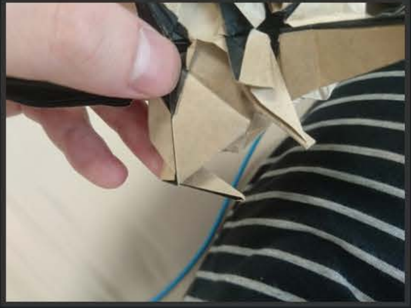
↑ It looks like this.



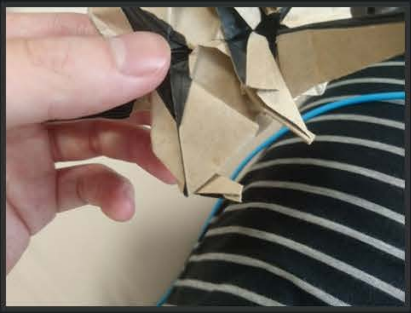
↑ Pinch,



↻ Twist behind,

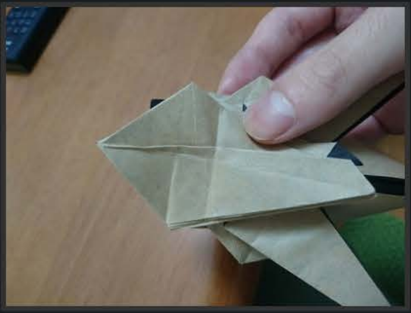


倒 Defeat your feet forward,



↑ Heels are folded in the mountains and fingers are split in the middle.

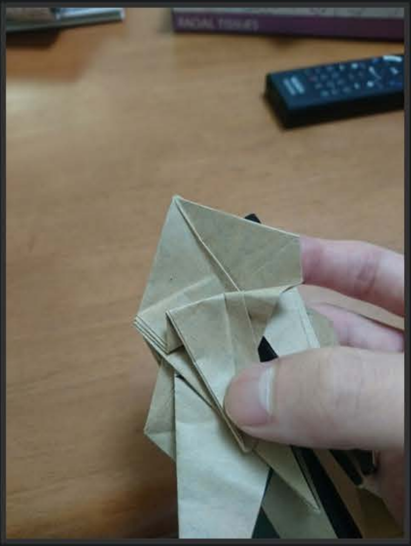
That's it!



段 Fold the ears to make them thin.

This is where I turned two ears from the back.

Fold it in this state.



や っ て This is how to defeat the turned part.

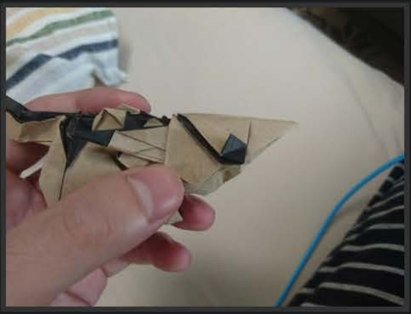


写真 It's an upside down photo ...

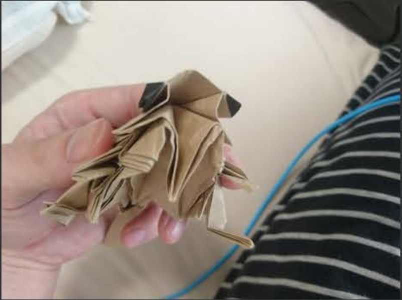
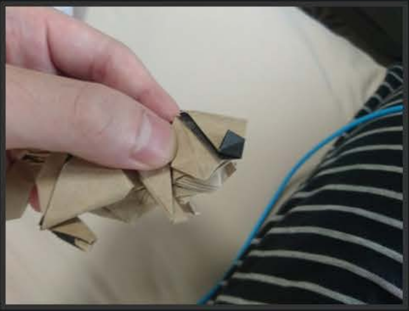
Fold the corner that is on the right.



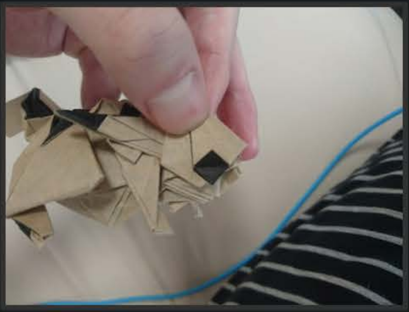
↑ Please use the backmost point as a fulcrum.

The thickness should have been reduced in the previous process.



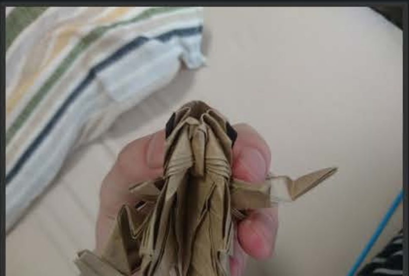
あ と After folding in half.

Move your head slightly (11.25 °).

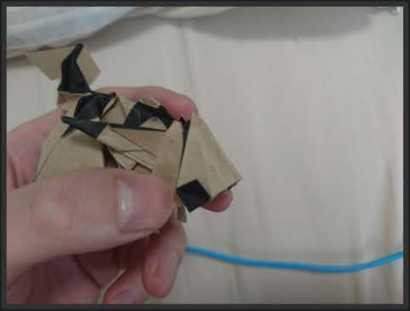


After shifting.

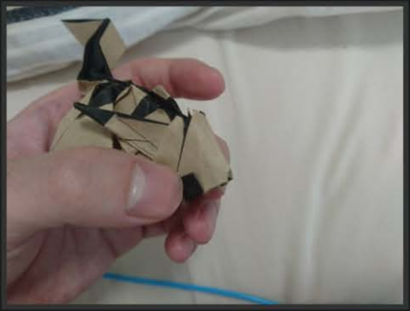
After that, we fold all the unnecessary parts inside.



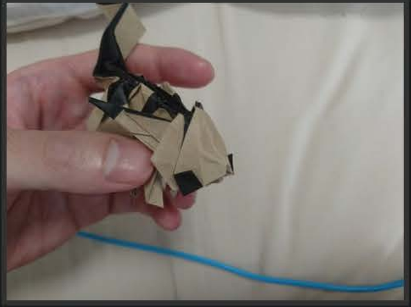
あ と After folding.



↑ Fold the nose slightly in half.



凹 Dent from the forehead to the tip of the nose to make it three-dimensional.



↑ It looks like this.

We omit the last tail.

Please feel free to do any processing after stomach m (__) m

It's up to you to fold or not to fold, so I'd be grateful if you could confirm that it's made of just one piece.

It has become quite easy, but I'd be glad if you could refer to even a little if you want to fold.

Then, this is ('ー `) /
