Origami Interactive Series No.39 The 120th issue in total is slightly more difficult than the entry-level scorpion

Original Origami Student Takayama CP Origami Opening Number 2019-11-17

Hello everyone, welcome to CP Opening!

According to the plan, we will talk about the origami of the little scorpion. Although we have explained a lot of CPs of the scorpion before, there are still more than 10 different scorpion pictures so far. The picture and my own data collection will meet with you in the future. I will also do a small spoiler in advance here. In another issue, I will come to Imai's scorpion, which is said to be difficult to break!

Let's meet today's little scorpion!

Works in this issue: 32 --- 32 square

Now please take out a piece of paper about 35 cm, preferably not too thick, about 40 grams, first divide 32 equal parts, and then line according to CP.
This takes about 40 minutes.

Friends who have completed the line can start aggregation according to the red line logo in the figure below

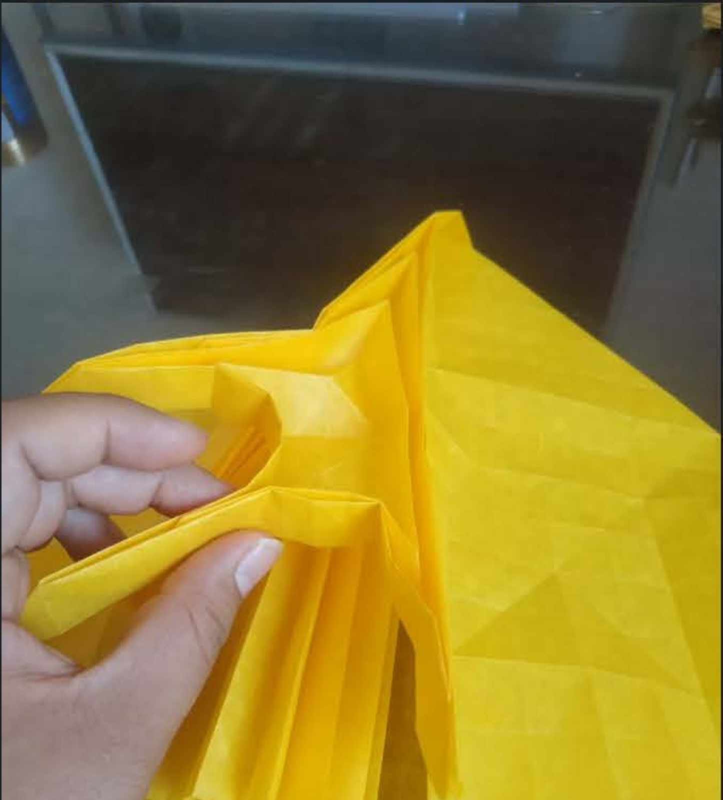
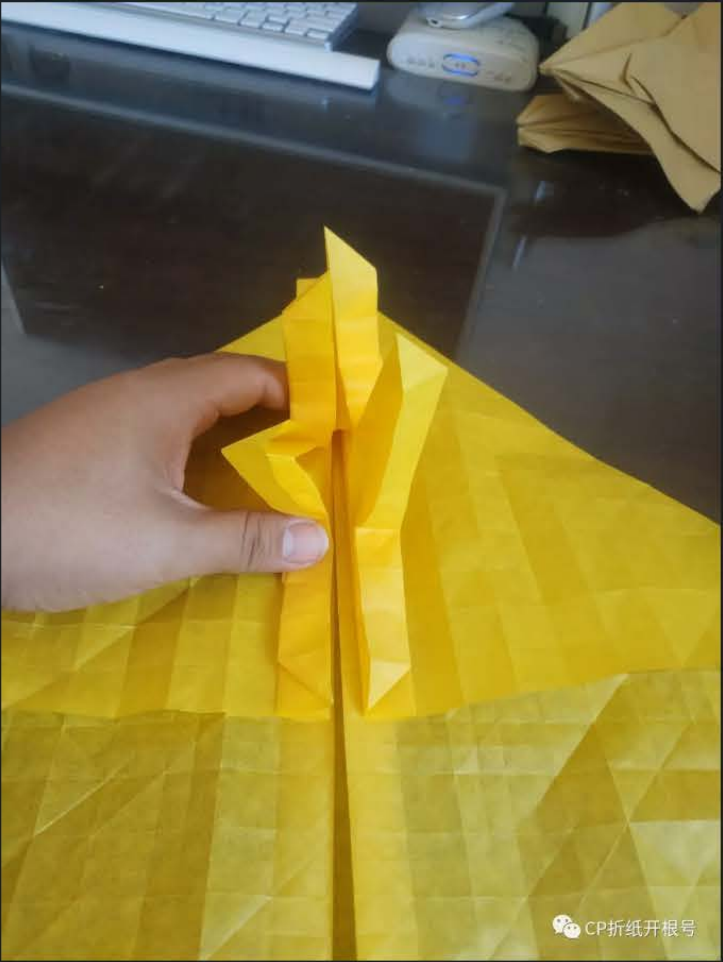
Pay attention to the structure inside the black box during the aggregation. Here I made a reservation. I did not fold it directly but left it to the end to make adjustments.



CP折纸开根号



CP折纸开根号

Next, after the legs have been aggregated, we will gently pull away to adjust the entire position. At this time we will aggregate the structure marked by the black box just now.

Since this is a dark CP, some lines may not be clear. You can also use a small piece of paper to make a record of this conversion structure, which may be used later in the design.

Let's do the other side

At this time, there is a long-line peak-valley structure. Please note that this situation was mentioned in the previous CP 暖 knowledge. It will not be repeated here. Friends can check whether the first fold and back fold in the zigzag structure. Issue of knots.

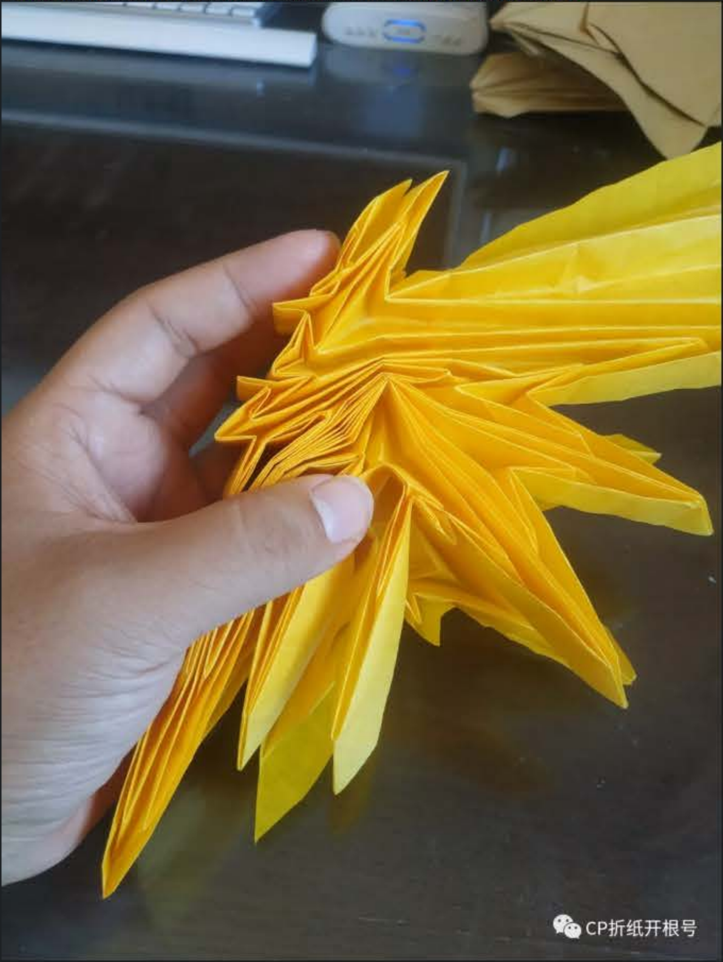
Here is a very detailed picture of each piece of paper. The students gathered here must compare the above picture to see if there is anything wrong.



Below we gently pull open the paper layer on the edge to start making pliers and teeth

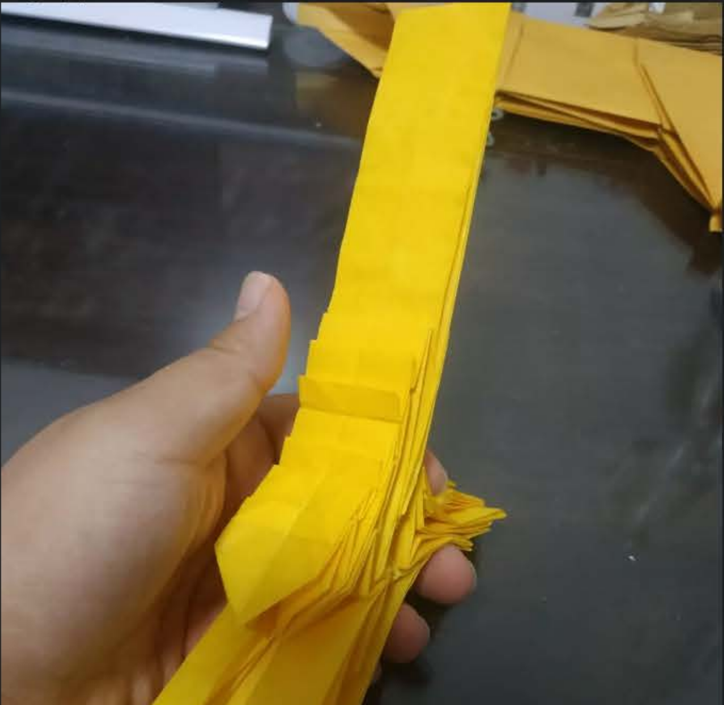
After the aggregation is complete, let's take a brief look at the branch. This is a relatively regular symmetrical work, so the shaping is not too difficult, let's take some shaping pictures directly!



CP折纸开根号

Next, we need to trim the tail carefully, and then dry the two teeth and let the body bulge a little bit, then the rest of the task is left to everyone to complete by themselves!

Come on, origami gentlemen!
See you next time!

Once again, the name of the volcano 515650243 is the mountain origami player
I posted a lot of life sketches and origami sketches, and of course there are original works on display🤔
My Taobao Online Store
Although there is no decoration in the online store and the pictures are not very beautiful, the works are still complete, and I can order CP works that are not in the store. Of course, it also includes the aggregated semi-finished products and finished products of almost all the works explained by the public account. And line paper for sale.
Everyone says my Taobao shop ca n't find it, I do n't know why, here is the URL
