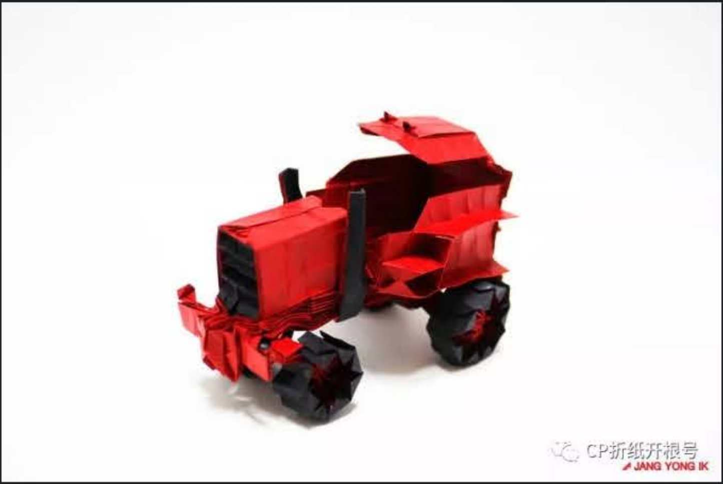
CP Interpretation of Origami Sharing Series No. 43 Total No. 109

Original origami student Takayama **CP origami opening** root2019-08-27

Hello everyone, welcome to CP Opening!
Today we fold a transport. Yes, you must say, this can also fold? Yes, this can be folded.

Talk about this issue: Torah machine ,,,, forget it, there is really nothing to say, let's go straight to the topic when time is tight!

Please look at the drawings in this issue!



JANG YONG IK

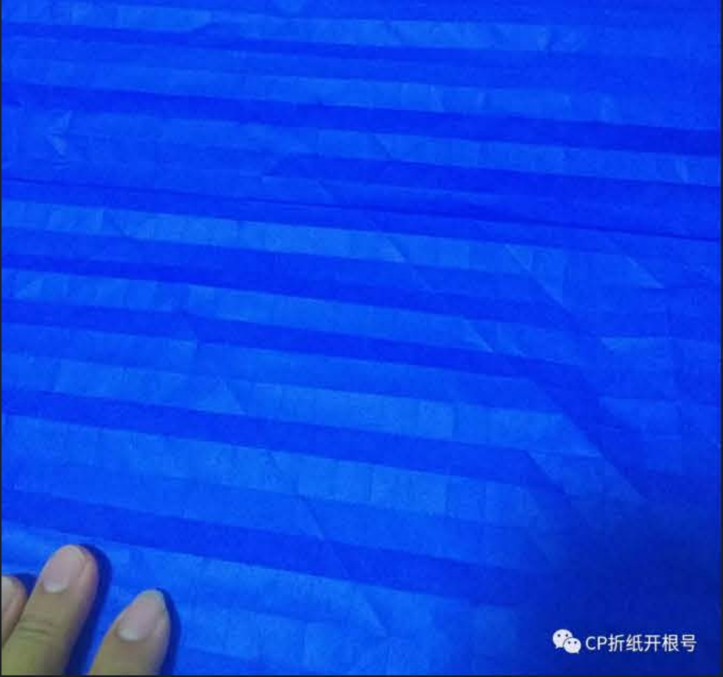
Works in this issue: 64--64 squares.

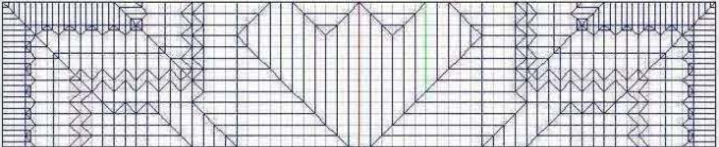
First, let's find a two-color paper. It's better to have a larger contrast.
Then 64 equal divisions, and then hit the line, students with obsessive-compulsive disorder in this work have to work hard, because it can take a long time to get all the lines.

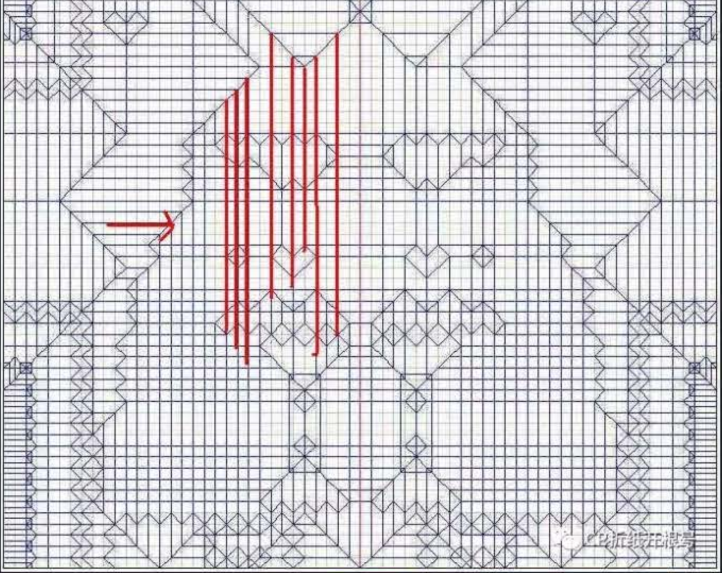


Now that we're done, let's start converging!

First of all, the whole is still partitioned from the middle and aggregated. The peaks and valleys here are dark, but in the middle it is really just simple peaks and valleys, but there are a lot of transitions on the edge, so I think some places can Two effects come together.

According to the figure below, two cells, one cell, then two cells, one cell, and then all one cell is included.





CP折纸[illegible]

CP折纸开根号

CP折纸开根号

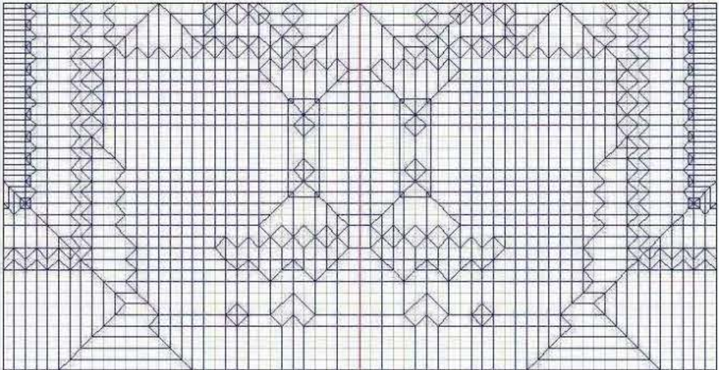
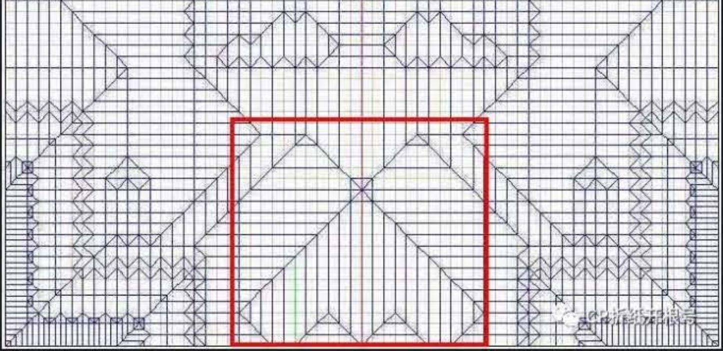
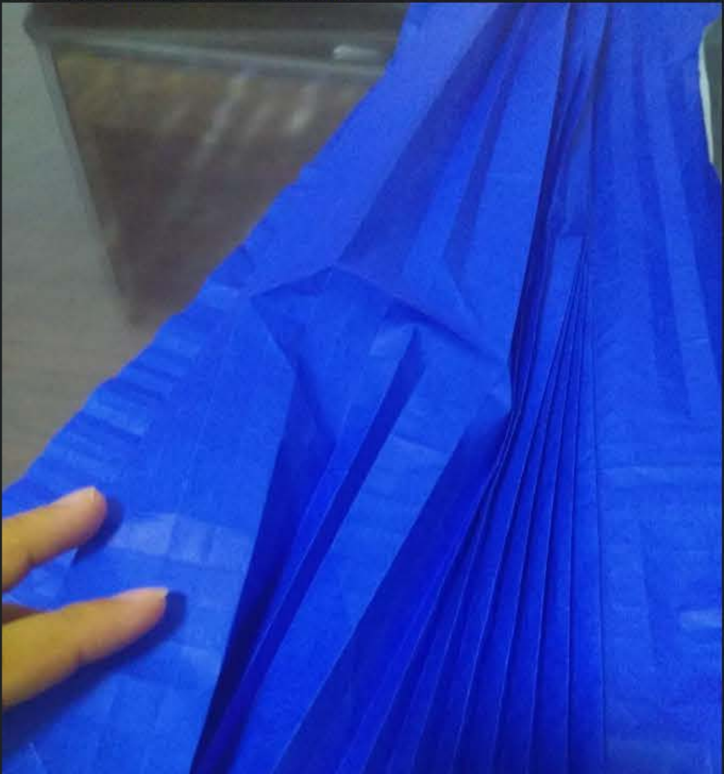
Next, we rotate the drawing 180 degrees

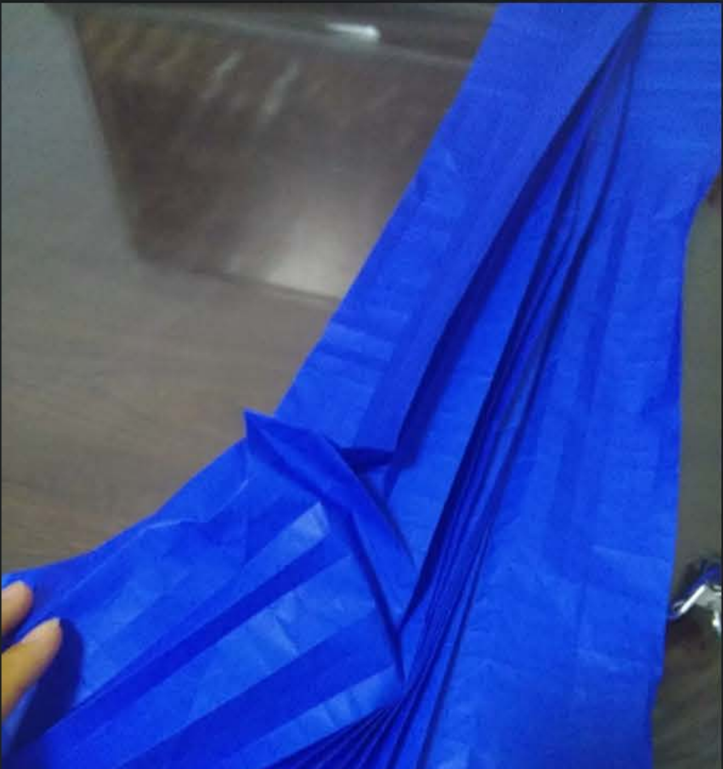




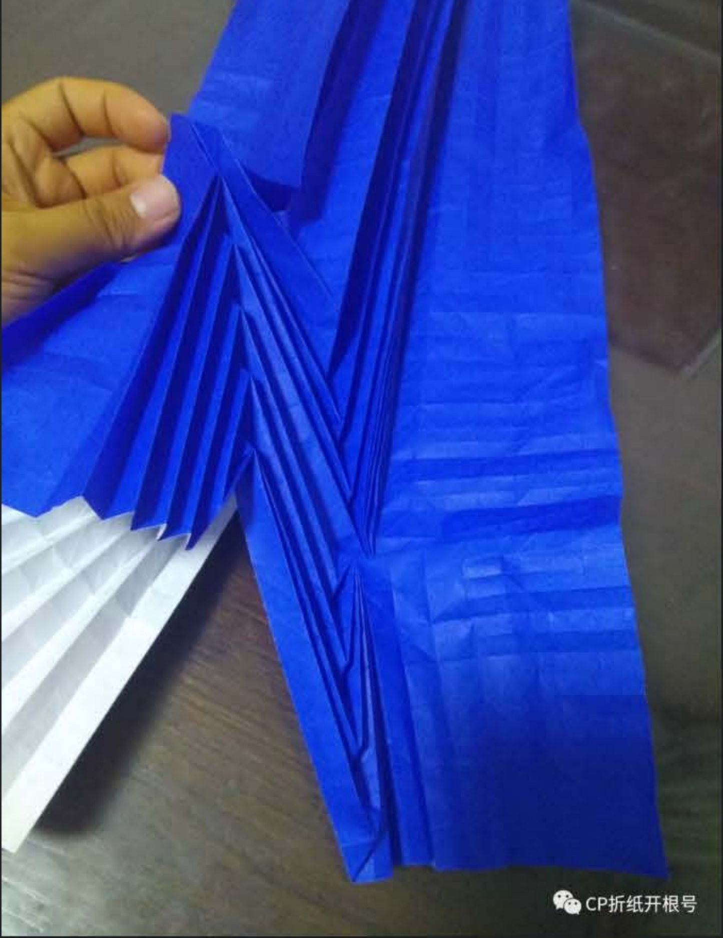
Starting from the middle and lower part, we first locate the intersection of the cross, and then converge to the left and right.



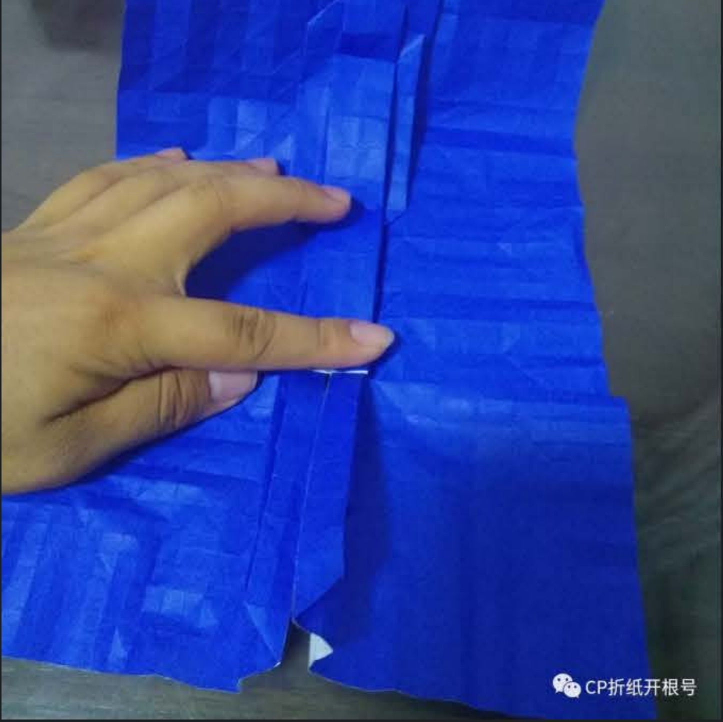
CP折纸开根号



CP折纸开根号

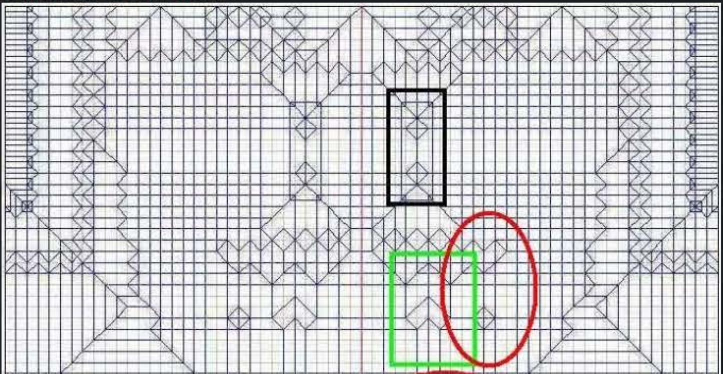


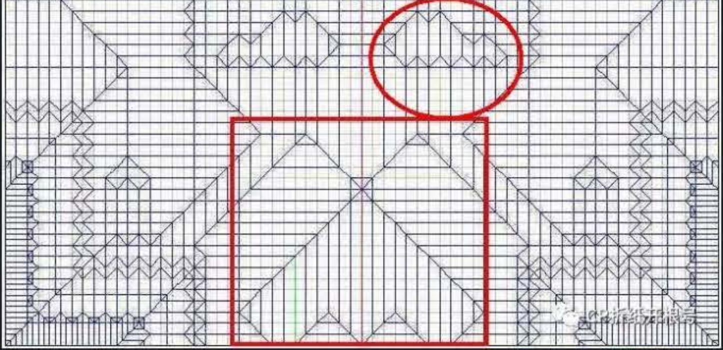
CP折纸开根号



CP折纸开根号

Next we have to follow the picture below, starting with green and black, we have dealt with the most important "board" in the middle. It should be noted here that the two red circles are to be coordinated.





CP折纸开根号

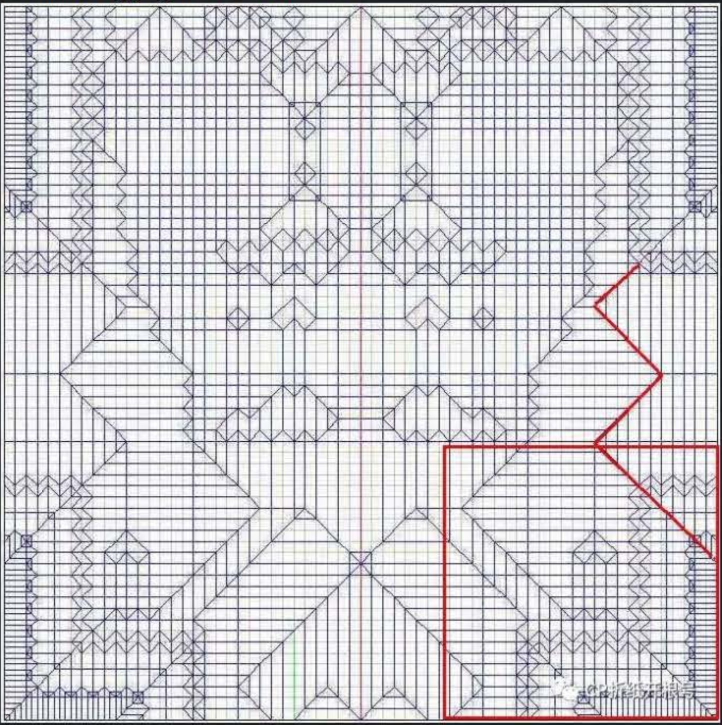
Now we start to aggregate one of the wheels.



It's a bit complicated here. There are too many lines. For my understanding of this part, I tend to deal with short lines first, and then perform single paper layer operation, rather than first aggregate and then perform multiple paper layer operations. When you fold this place, you can refer to the origami of clothes in the violin player of Shijo Hojo.

CP折纸开根号

CP折纸开根号

CP折纸开根号

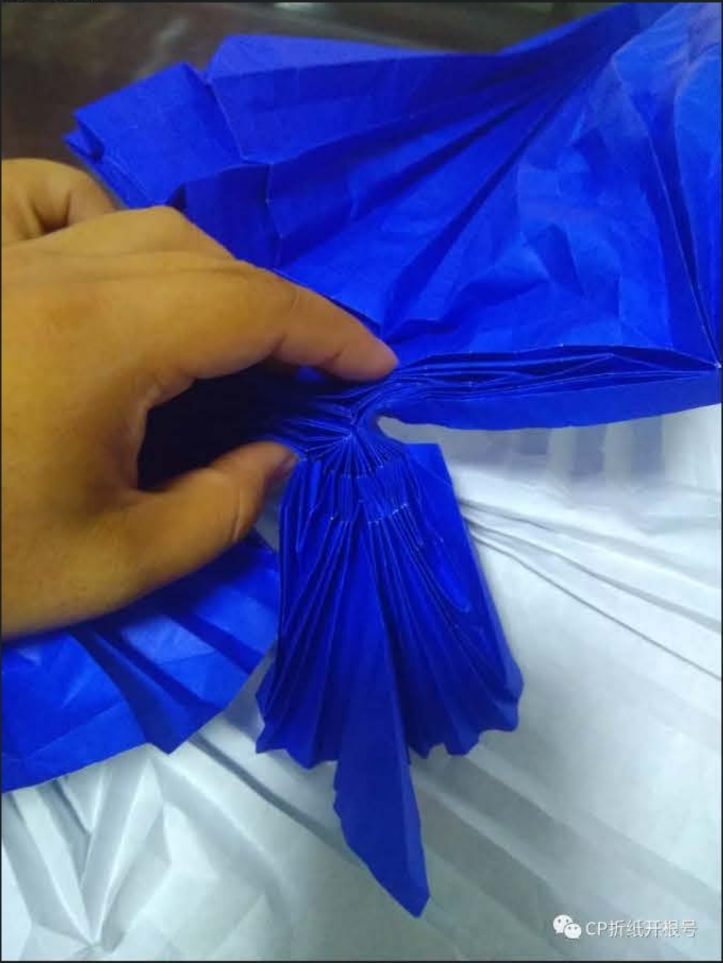
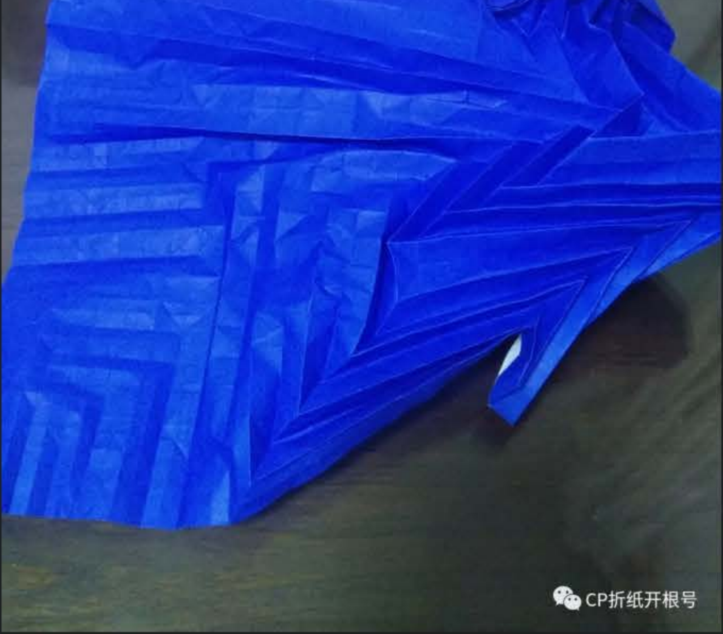
The aggregation of this part should be combined with the large sawtooth structure on both sides.

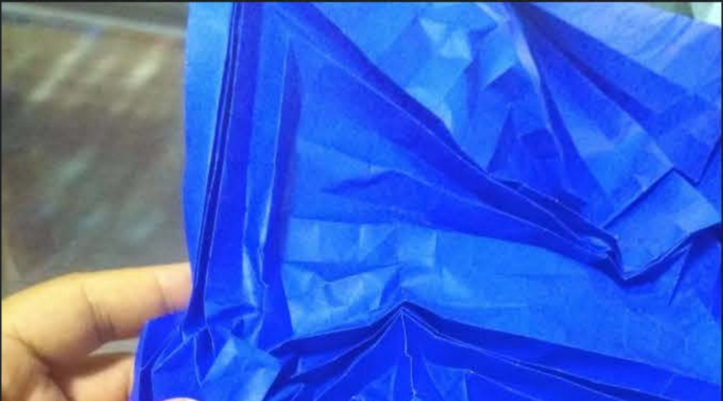


CP折纸开根号

CP折纸开根号



Next we use the same method to deal with the other side.

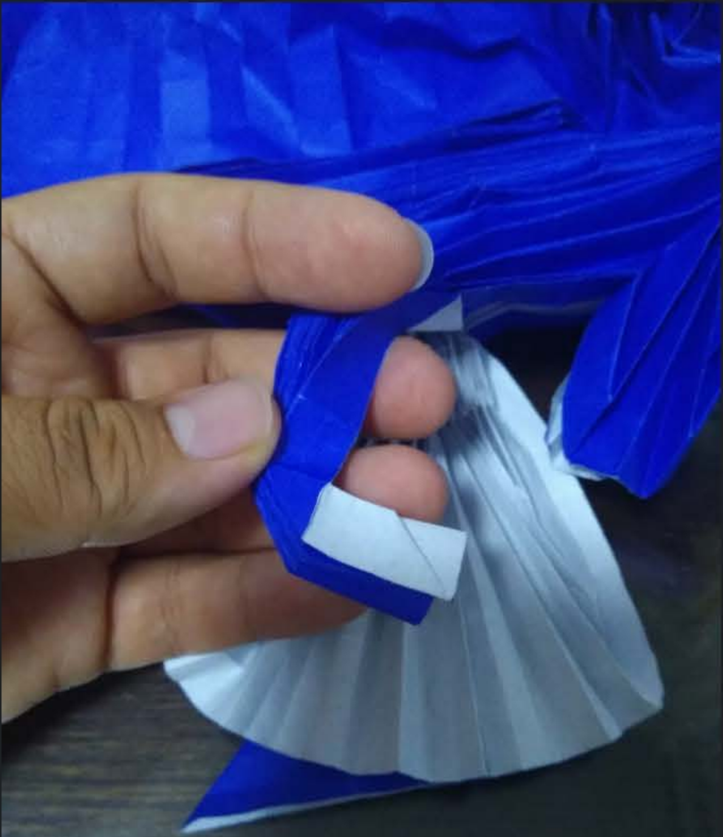


CP折纸开根号

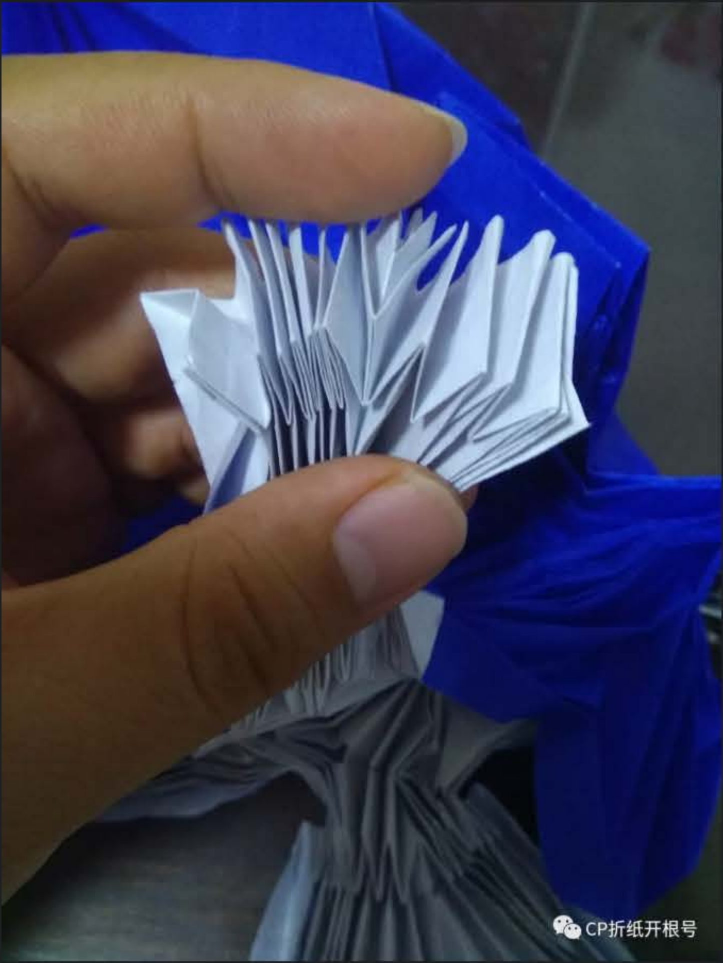
CP折纸开根号

CP折纸开根号

On this side we can then aggregate those small half-grids, here are a few folds to reverse the color.



CP折纸开根号

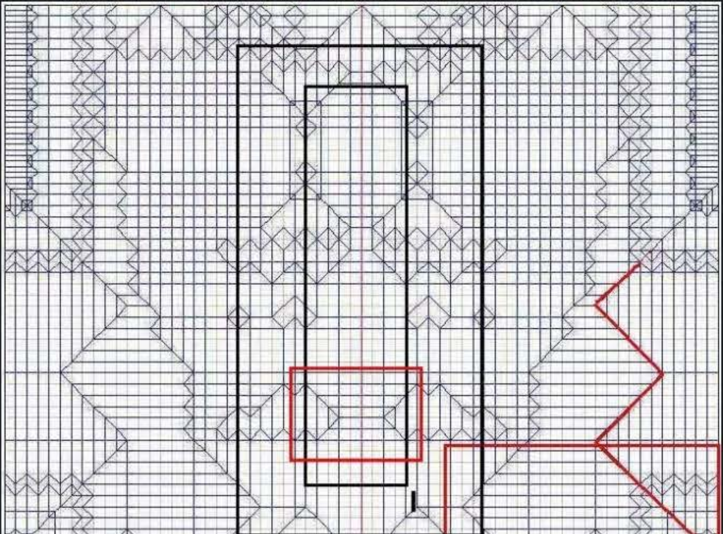


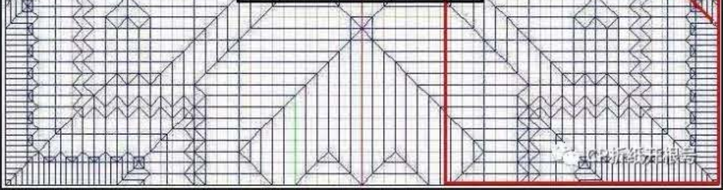
CP折纸开根号

CP折纸开根号

CP折纸开根号

The structure of the wheels on both sides is almost the same, we started to operate the "board" in the middle, and made the protrusions and depressions in the middle.





CP折纸开根号

CP折纸开根号

CP折纸开根号

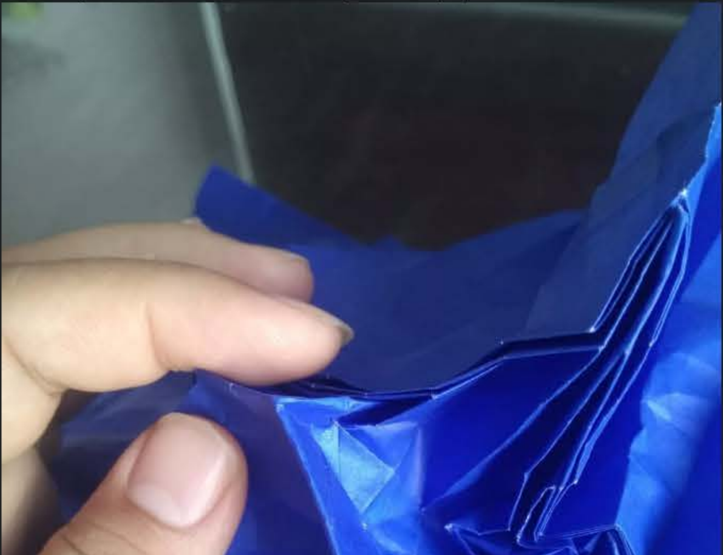
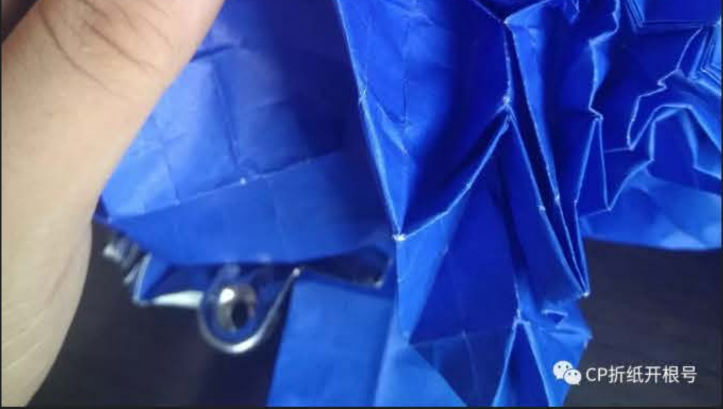
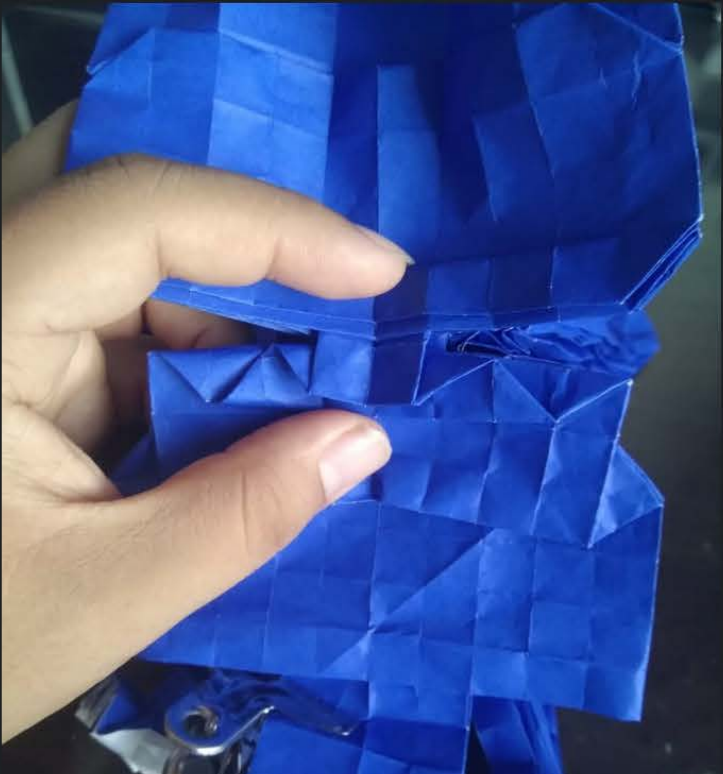
The thing to note here is a two-level peak-valley operation.





CP折纸开根号

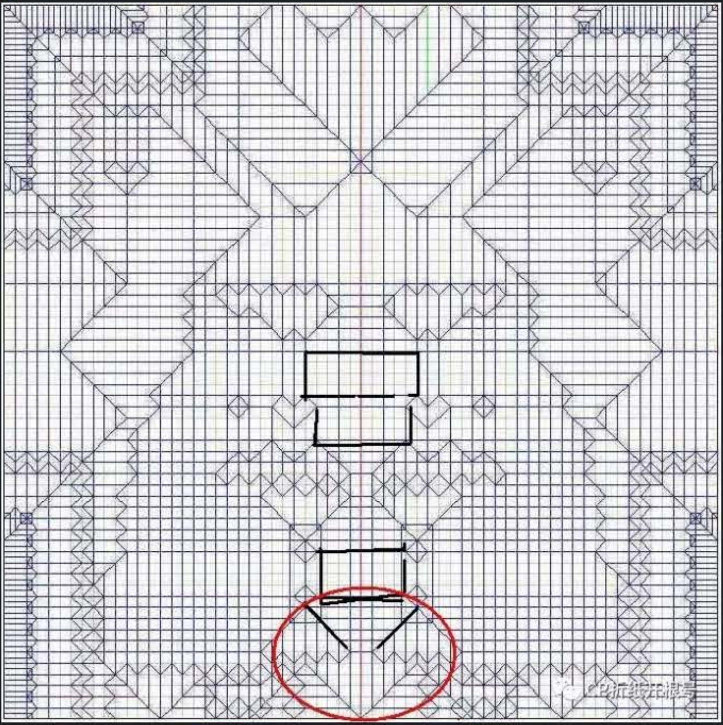


CP折纸开根号

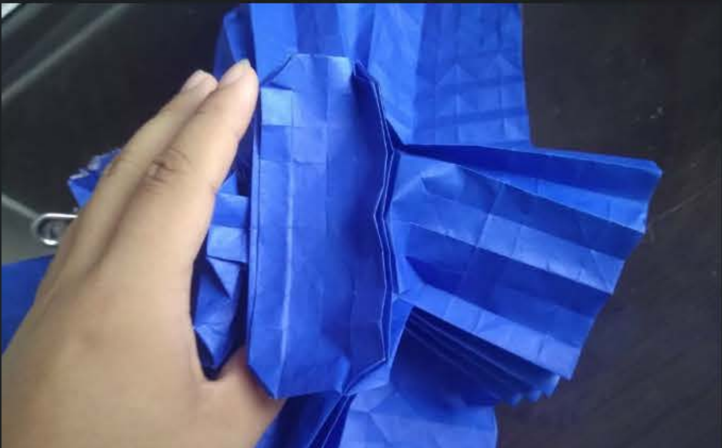
CP折纸开根号

CP折纸开根号

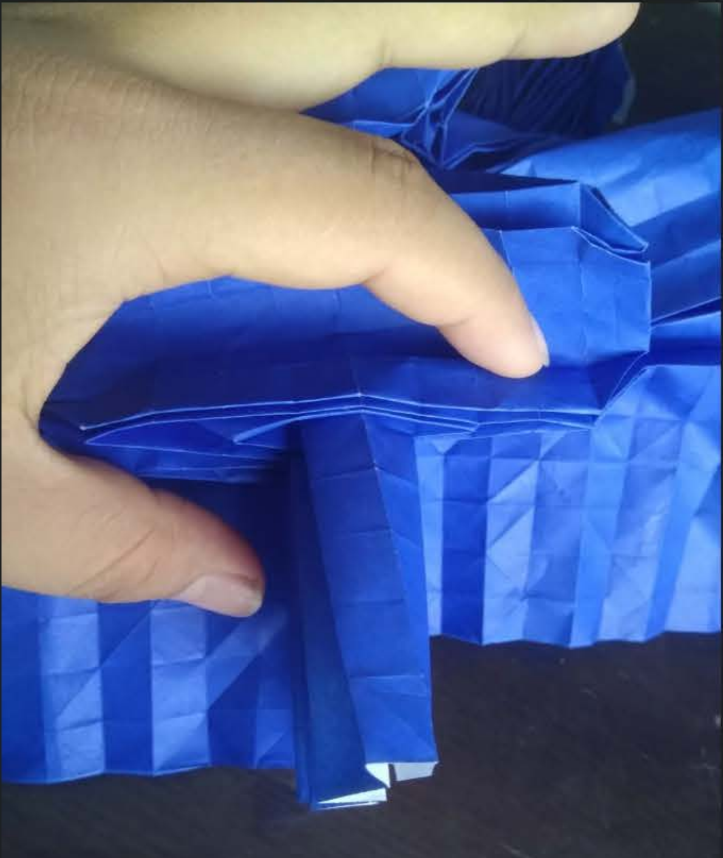
Here we rotate the drawing again to deal with some small structures on the "middle board".



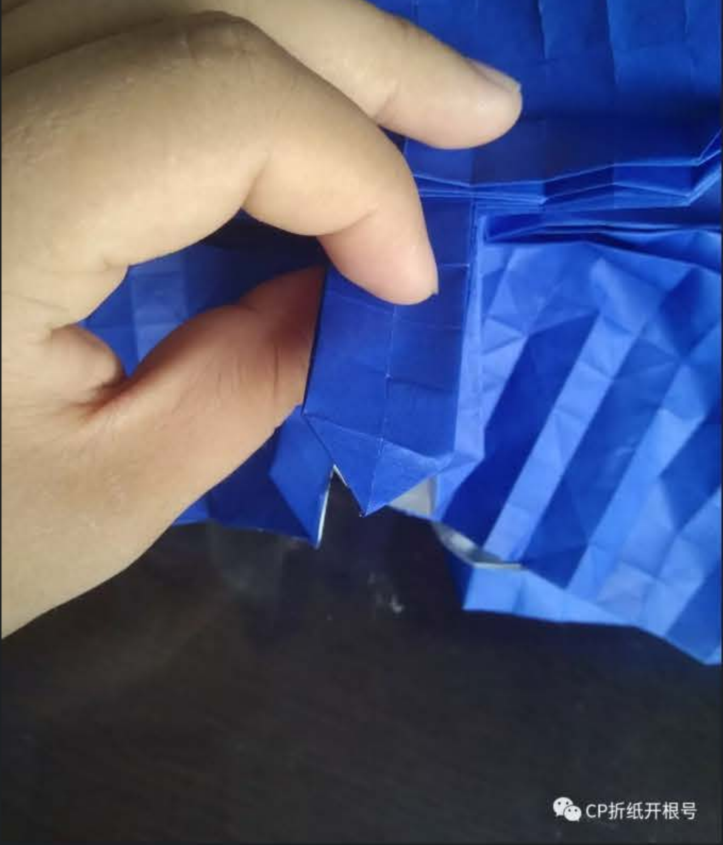
CP折纸研根号



CP折纸开根号



CP折纸开根号



CP折纸开根号

Next, we aggregate the edges on one side according to the figure below. It should be said that multiple paper layers can be operated here, so if the single layer operation is completed first, all the lines may be aggregated, but another An effect. My personal suggestion is to first find a small piece of paper and punch out the local thread, then try it once, but be sure to use two-color paper.

If you need to leave a message in this step, I can do a solo shoot alone, but I will not do it first because I am too busy this month.

CP折纸开根号

CP折纸开根号

Next we continue to aggregate to the two sides, on the one hand to deal with another wheel structure, on the other hand to complete the black internal zigzag structure.

It 's really allergic to the nose. I have runny nose and tears when I look at the computer.

I do n't want to type too much, so I took more pictures than before. I hope everyone can see each part clearly. It seems that the wheels are not found, but I It must have been taken, but I just forgot which folder I put it in. Let 's talk about it. The wheels are fixed first. Here, it is best to use 502, and then use a half grid reverse color to press the entire branch into a circle. It is shaped like a wheel and fixed with glue. Questions about the front and rear lights can also be adjusted slightly, especially in the front of the car. I personally think that it is necessary to try a few more times. When this work was aggregated, the paper broke and there was no way to make it exactly the same as the original. Pity!
But I still hope everyone will succeed! !! Come on!

Time relationship I will do it again in the last issue of this month, so stay tuned!

Come on, origami gentlemen!

See you next time!
