Origami Sharing Series No.21 Total 70th Issue Scorpion 03

Original origami student Takayama **CP origami opening number** 2018-11-26

Hello everyone, welcome to CP Opening!

Today we are going to make the third phase of Scorpion. Before that, a friend left a message asking me why the scorpion hasn't started. Now it starts, and a message asking me why the scorpion has not ended yet.😆😆😆😆😆😆😆😆😆

Here I have to say, there are several issues in the Scorpion plan. Please do n't worry. After Scorpion, we will try to talk about the bee, because many people leave me a message and let me talk about Kamiya Hornet. Yes, so I adjusted the plan. Let's talk about Bee's CP in the next series.

That's it for spoilers, let's get to know this CP.

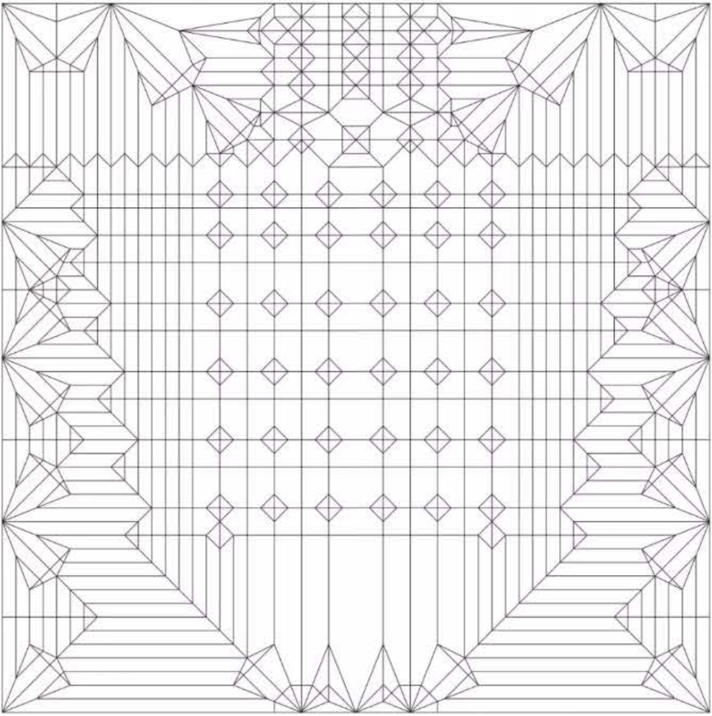
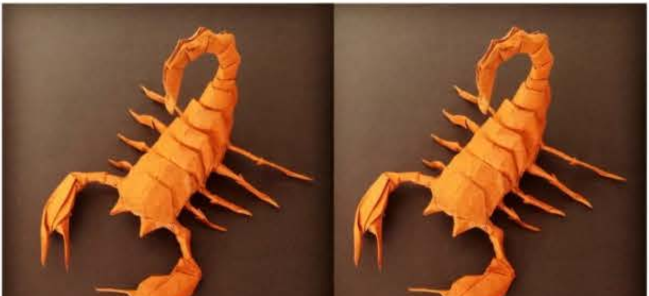
SCORPION 2.0 CP

BY: LANGKO

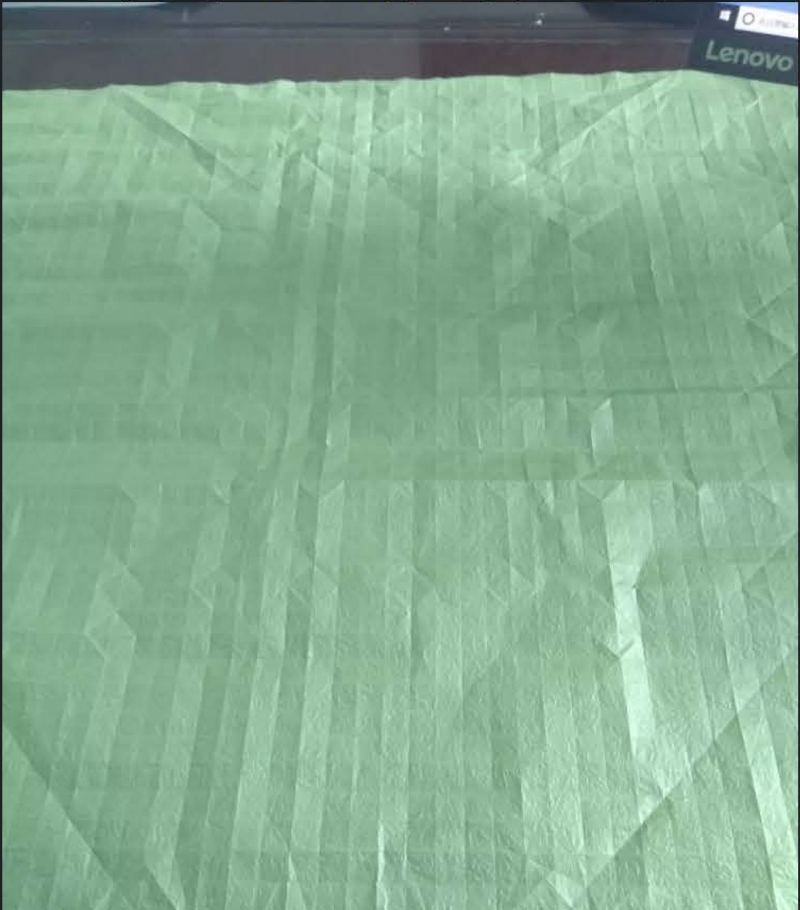




This issue works 52 * 52 square.

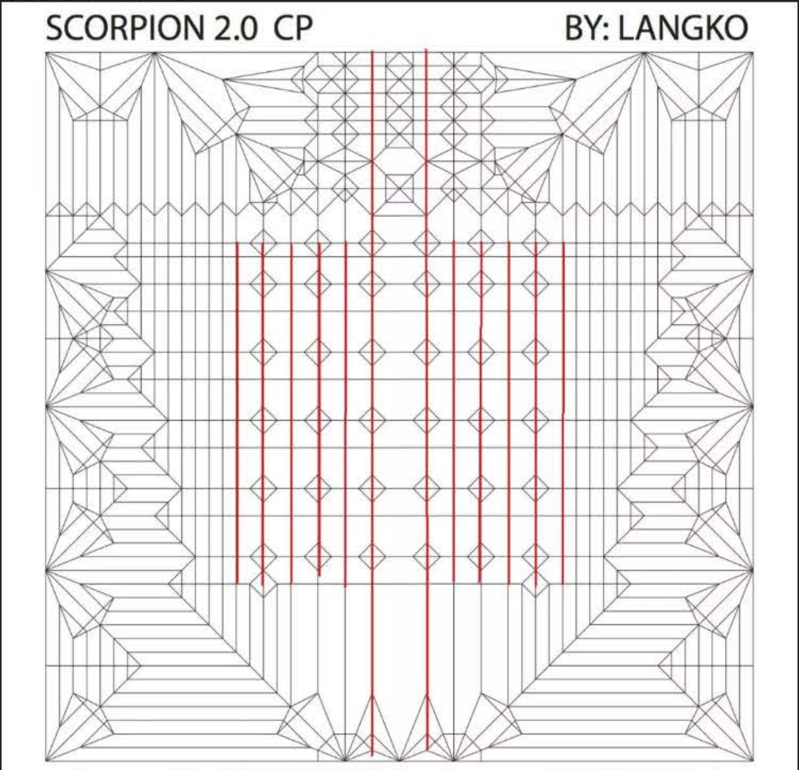
Let 's join the grid and the line with me. This CP is a symmetrical figure in the center line, so it will be faster when the line is lined. Usually, the two sides are lined together after being folded horizontally. This will be much faster.

After finishing the line, please flatten the paper and prepare to converge!

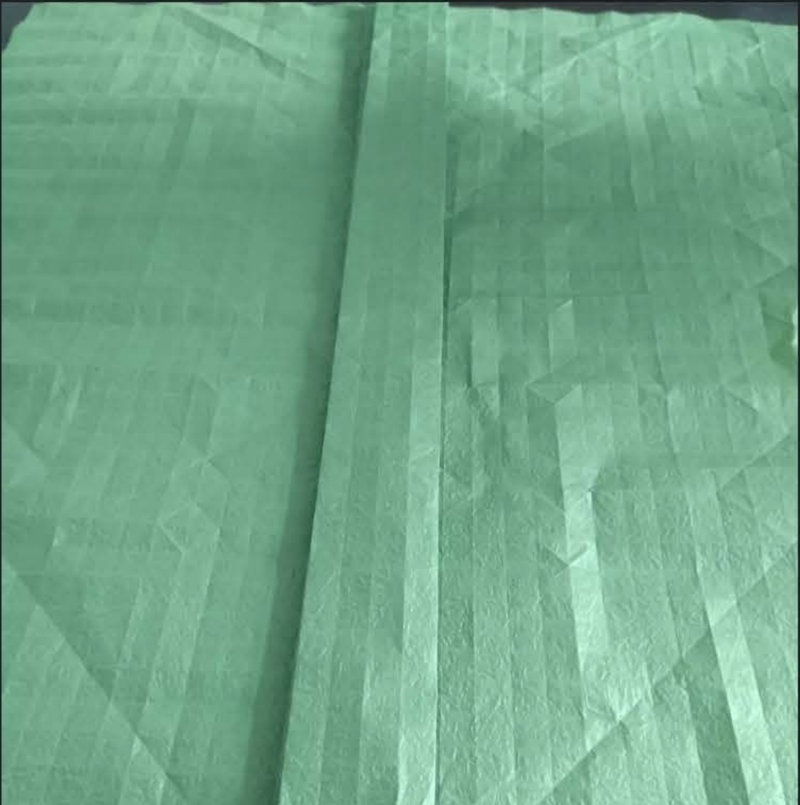


CP折纸开根号

As shown in the following figure, we still start from the middle, and take two cells as the unit to enter the middle.

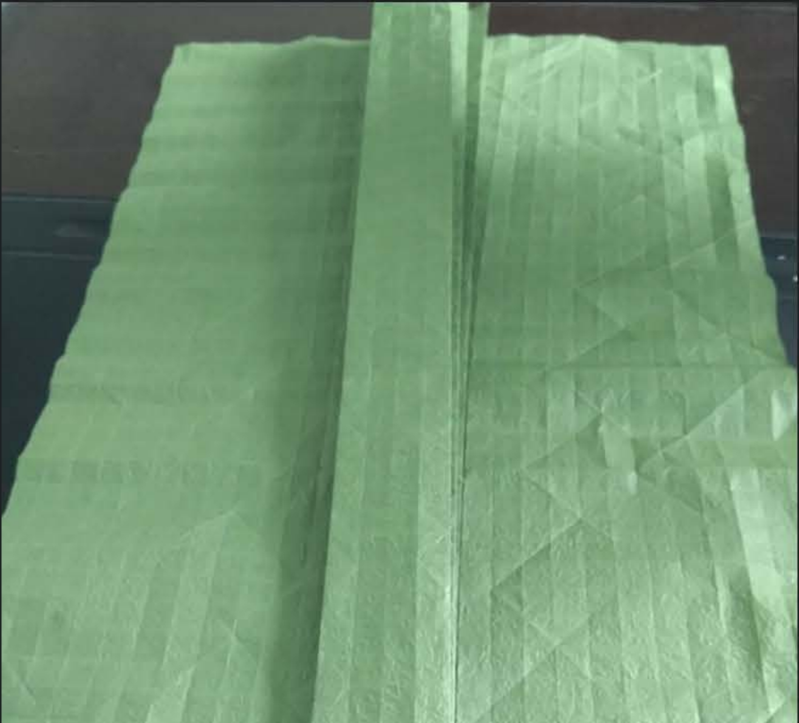


CP折纸开根号

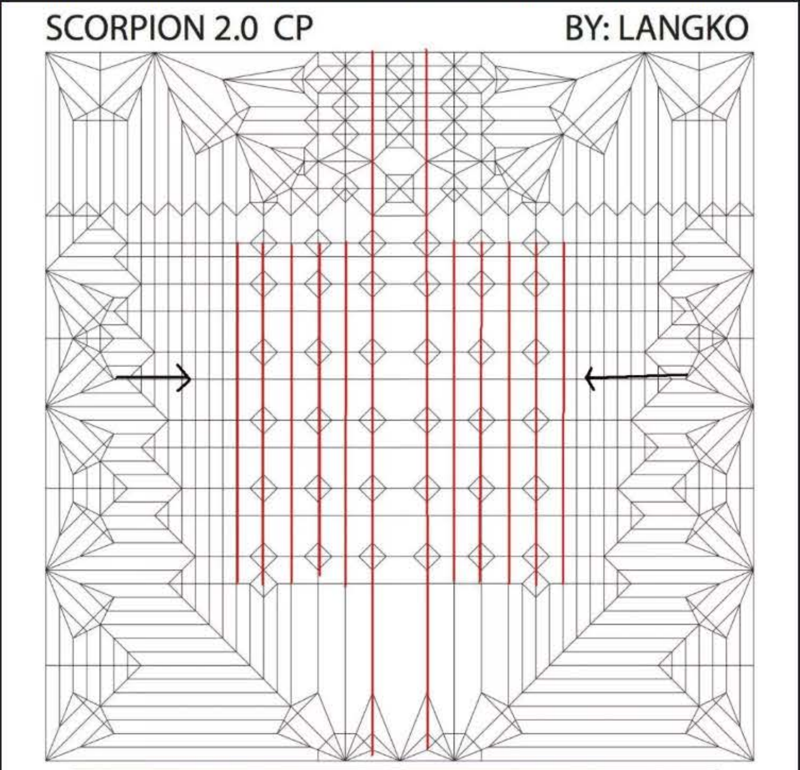


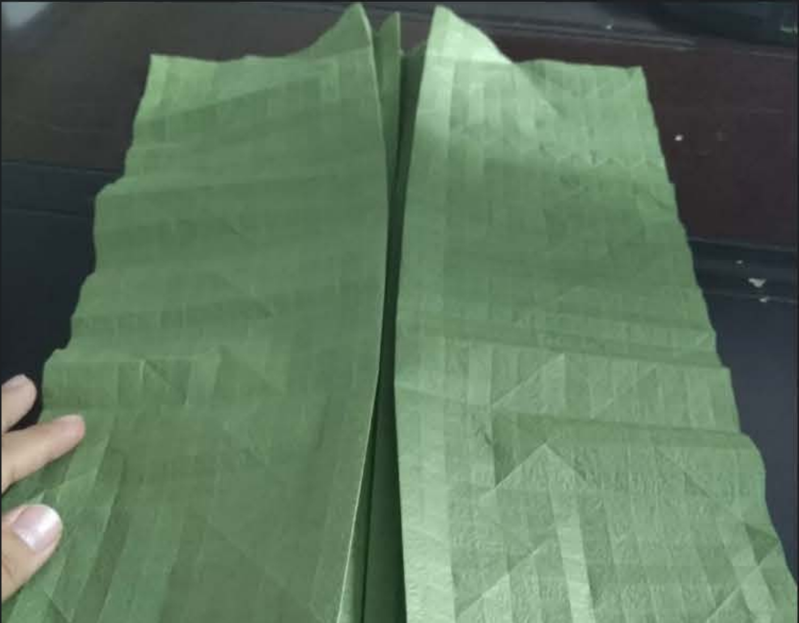
CP折纸开根号

There are 12 squares on each side.



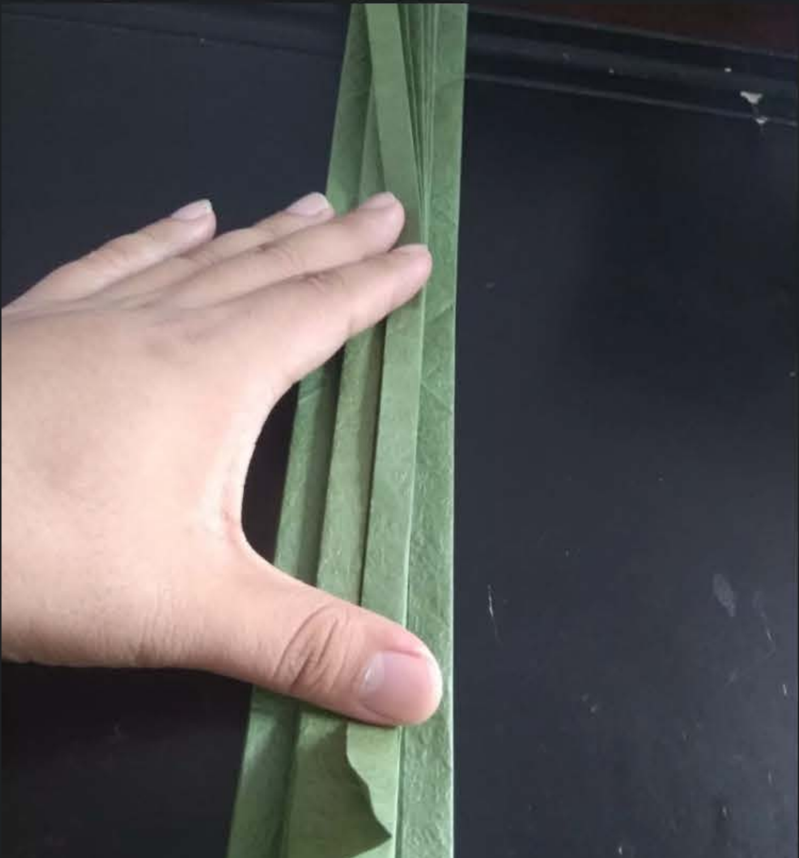
Next, flip the work, and from the back, close the work to the center line in one unit.



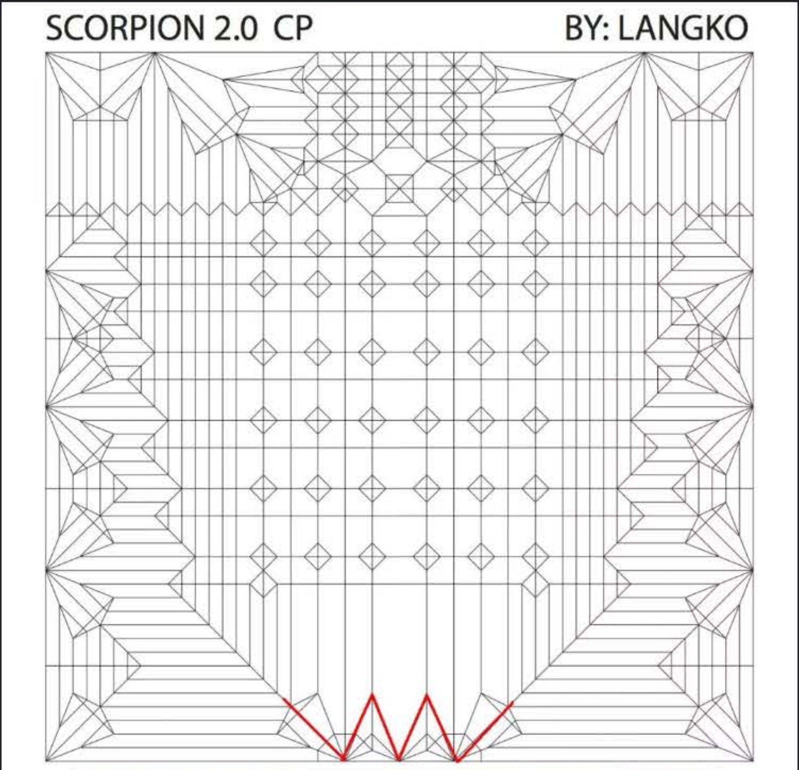


CP折纸开根号

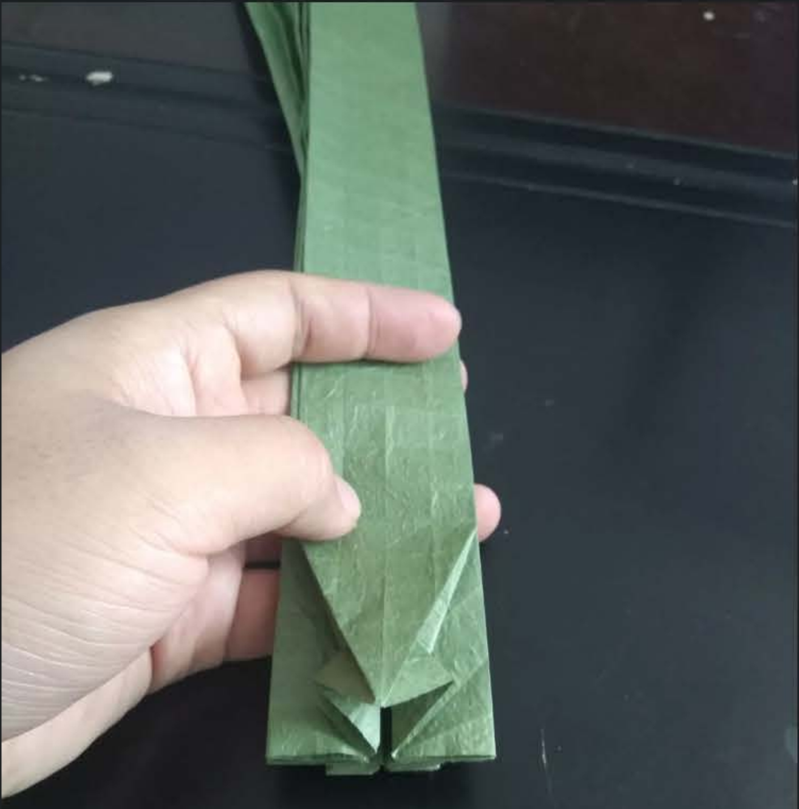
CP折纸开根号



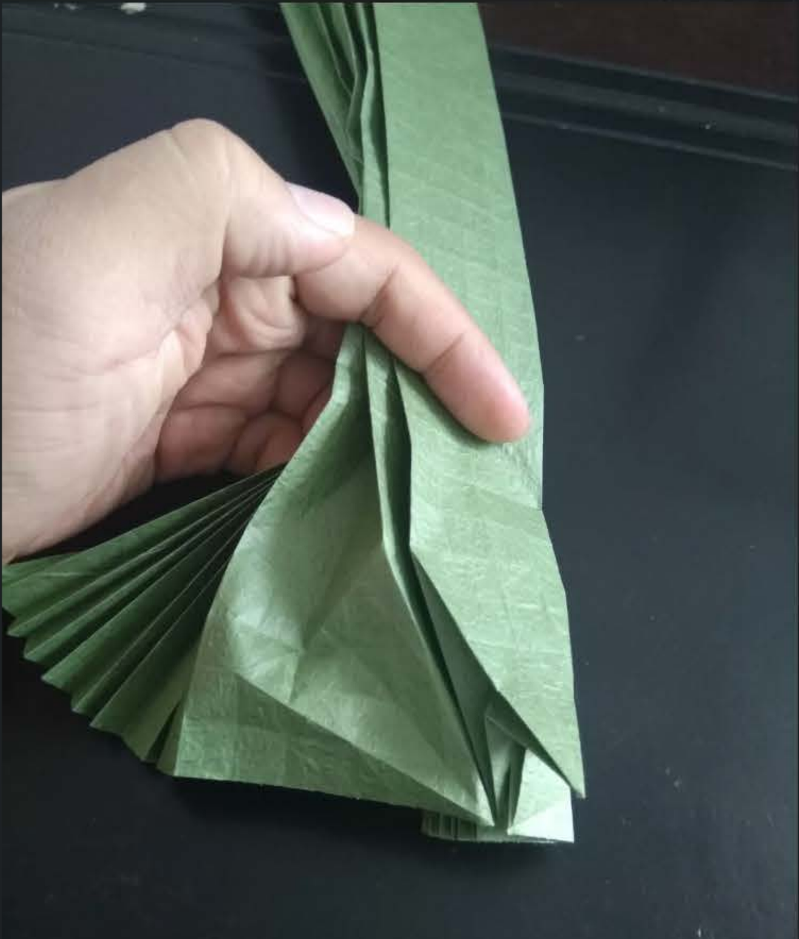
Turn the work back to the original perspective, according to the following picture, we first aggregate the best part of the front



CP折纸开根号



CP折纸开根号



CP折纸开根号

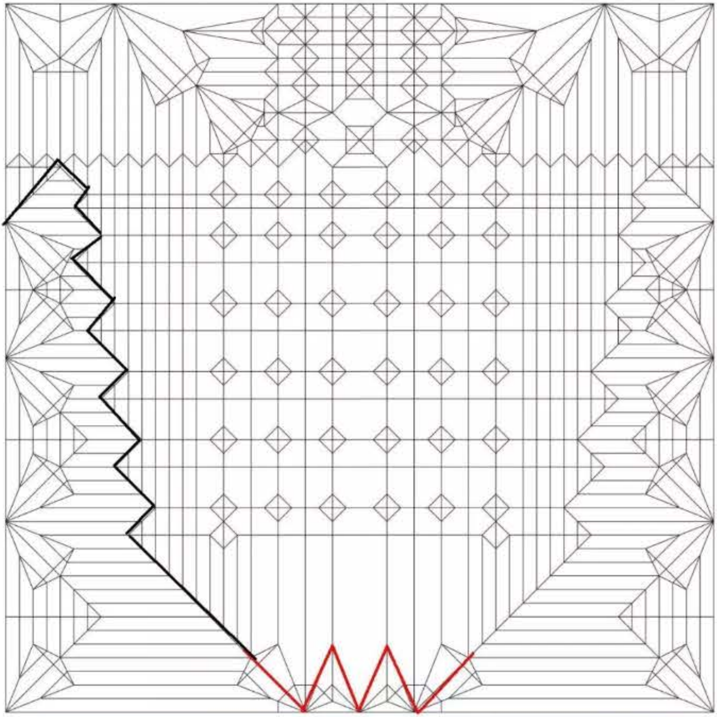
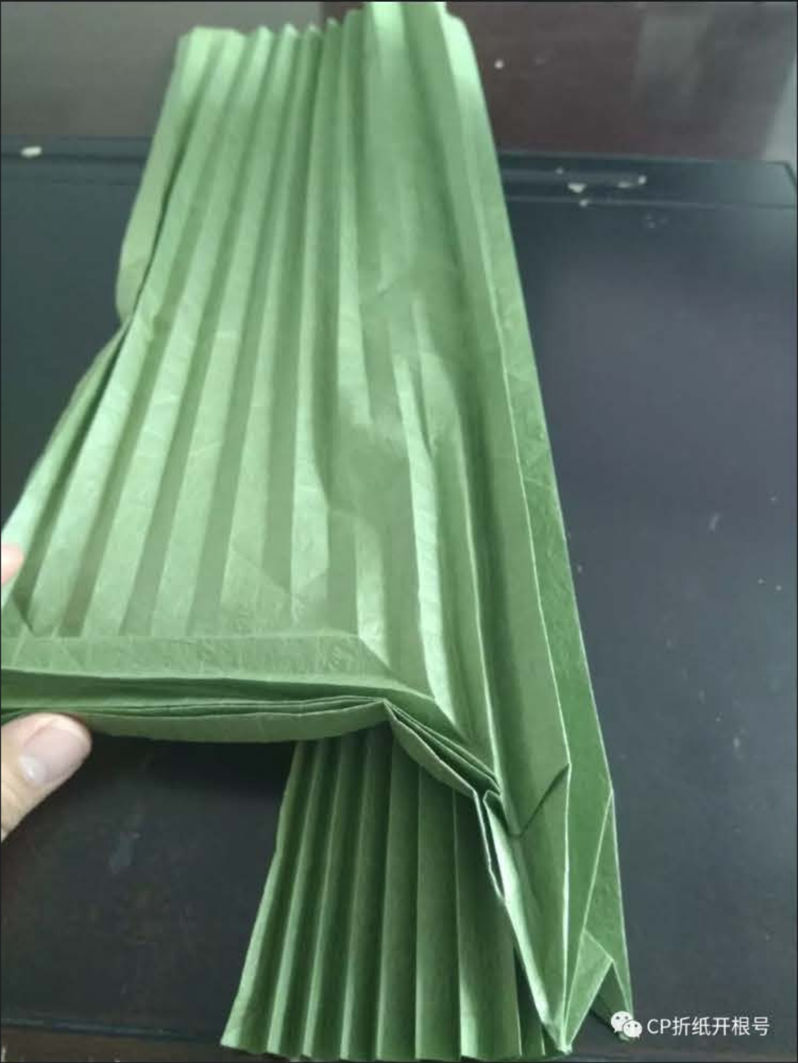
Below we start aggregation from the left, as shown below
Let's go step by step

SCORPION 2.0 CP

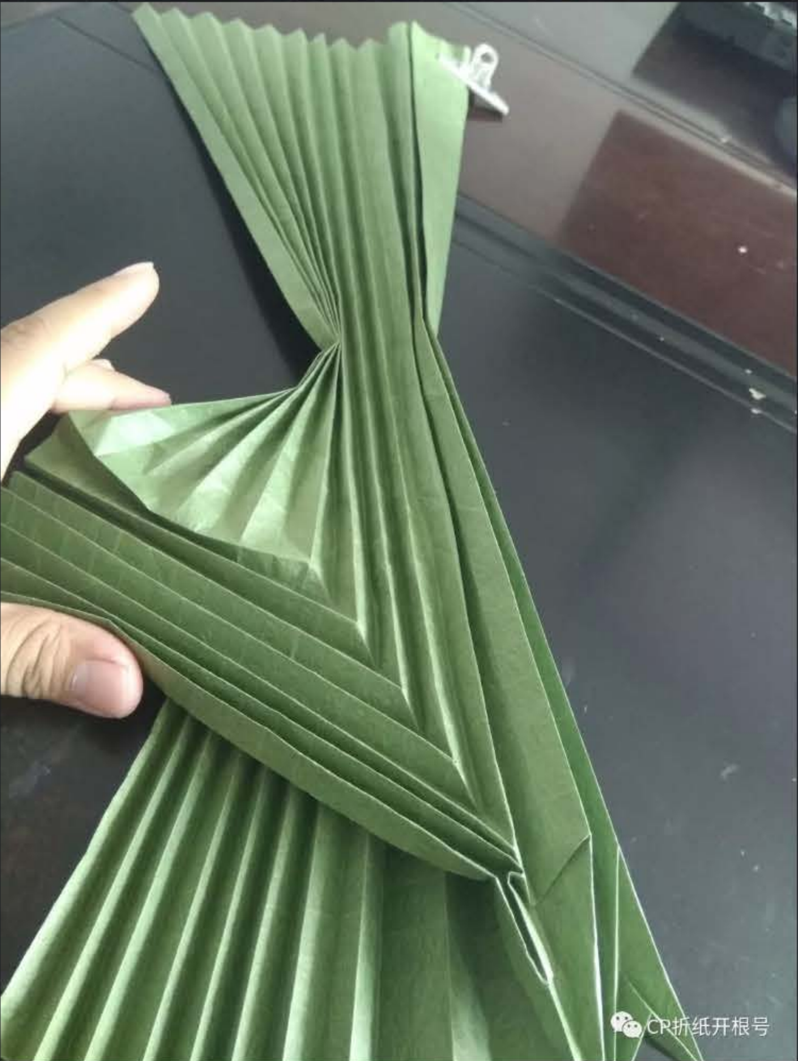
BY: LANGKO



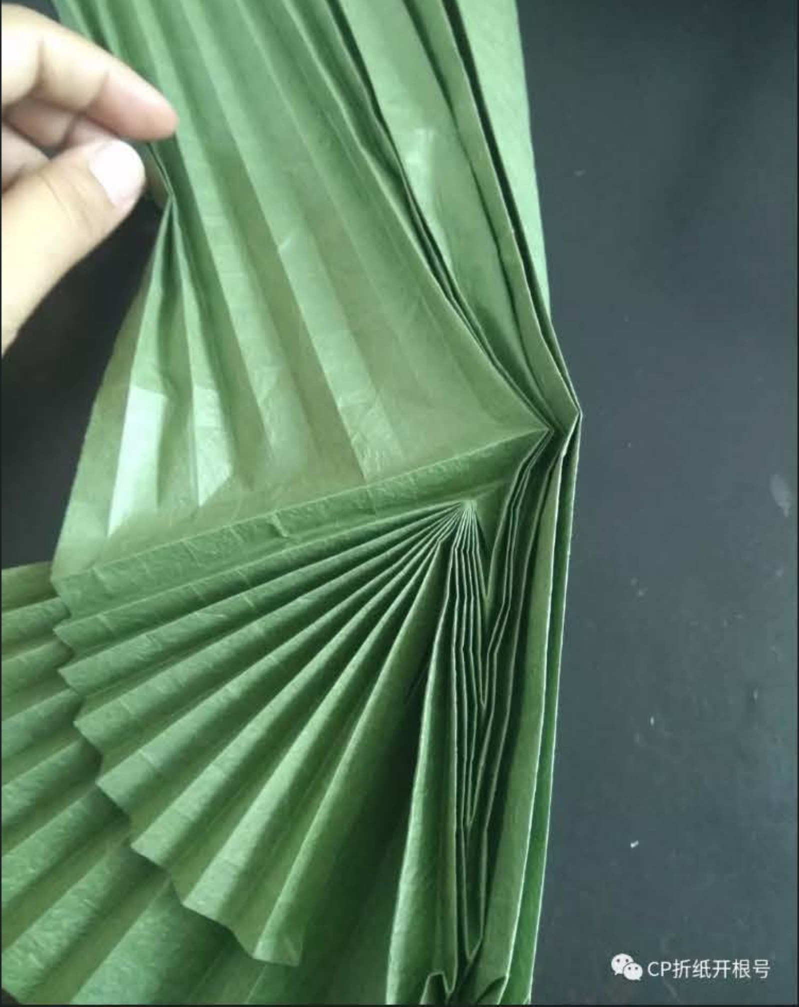
CP折纸开根号



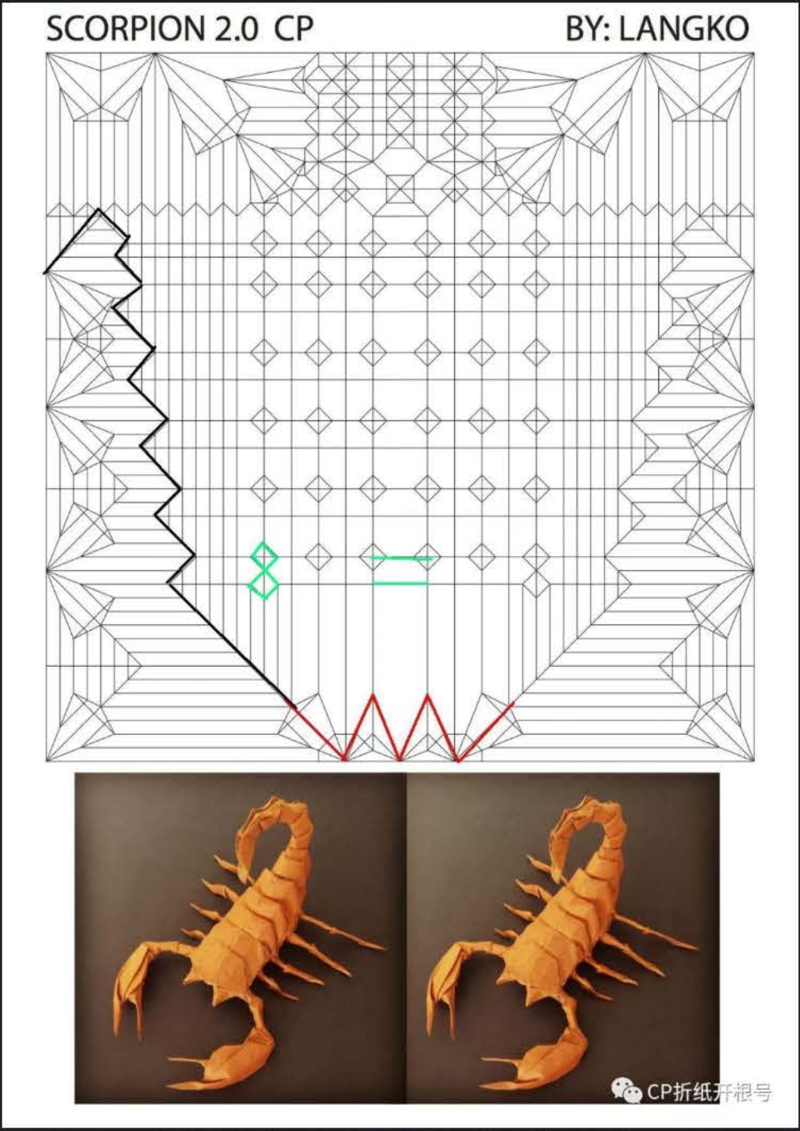
CP折纸开根号

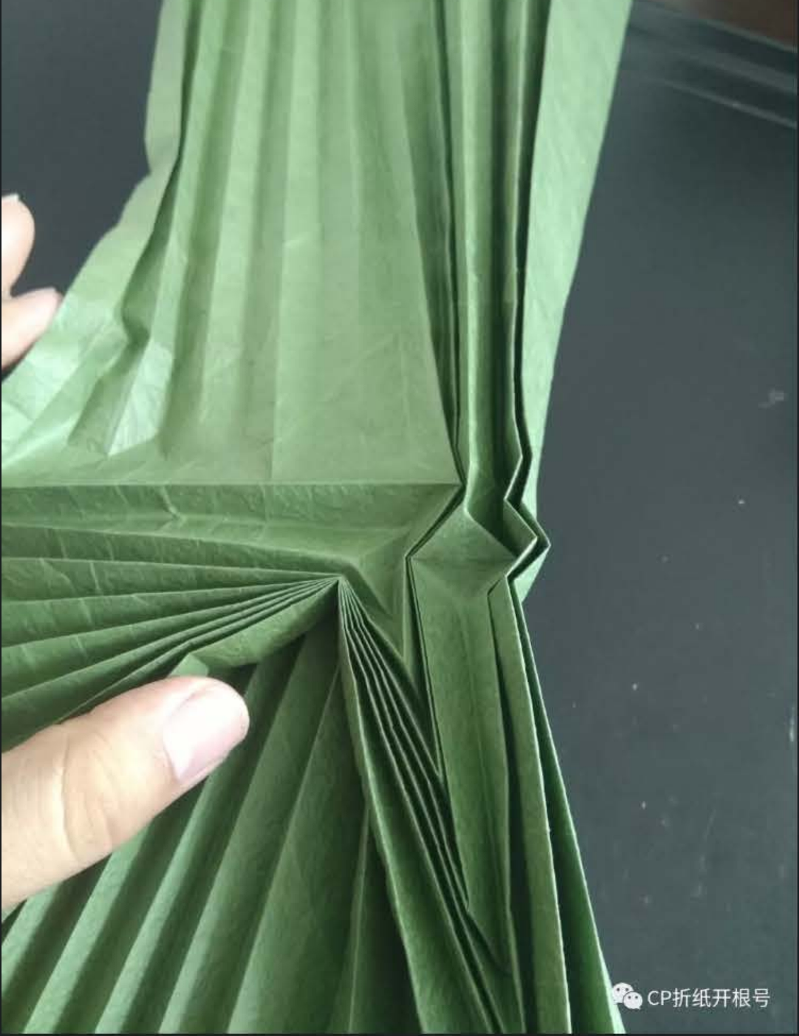


CP折纸开根号

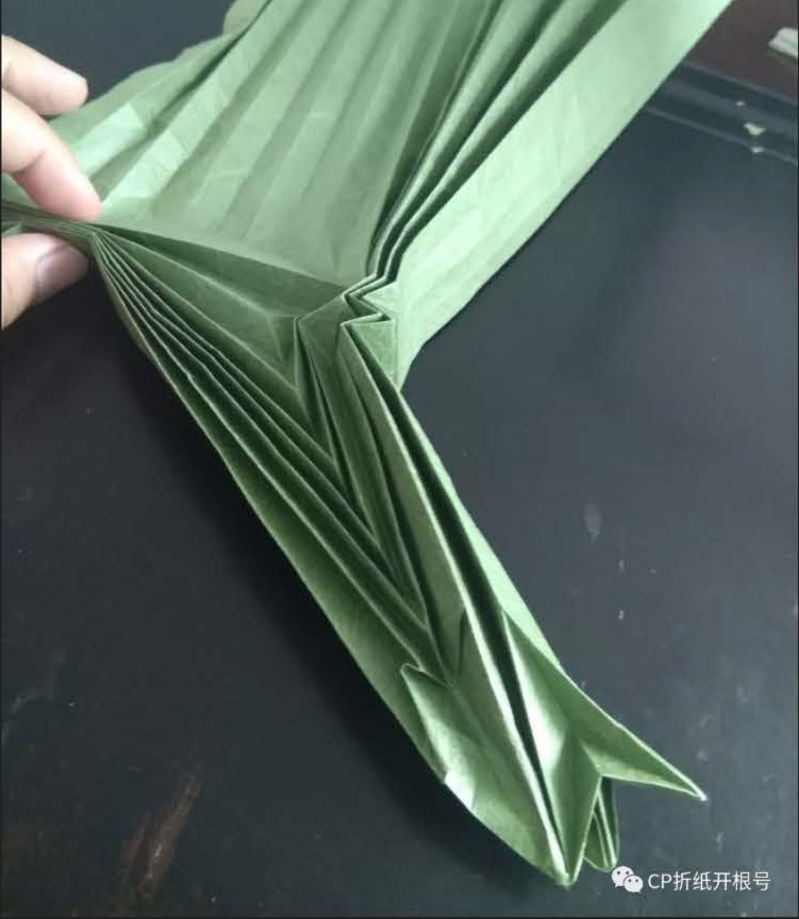


The zigzag structure here must take into account the small square in the middle of the CP, so when doing things, aggregate them together and process them together as shown in the green part of the figure below



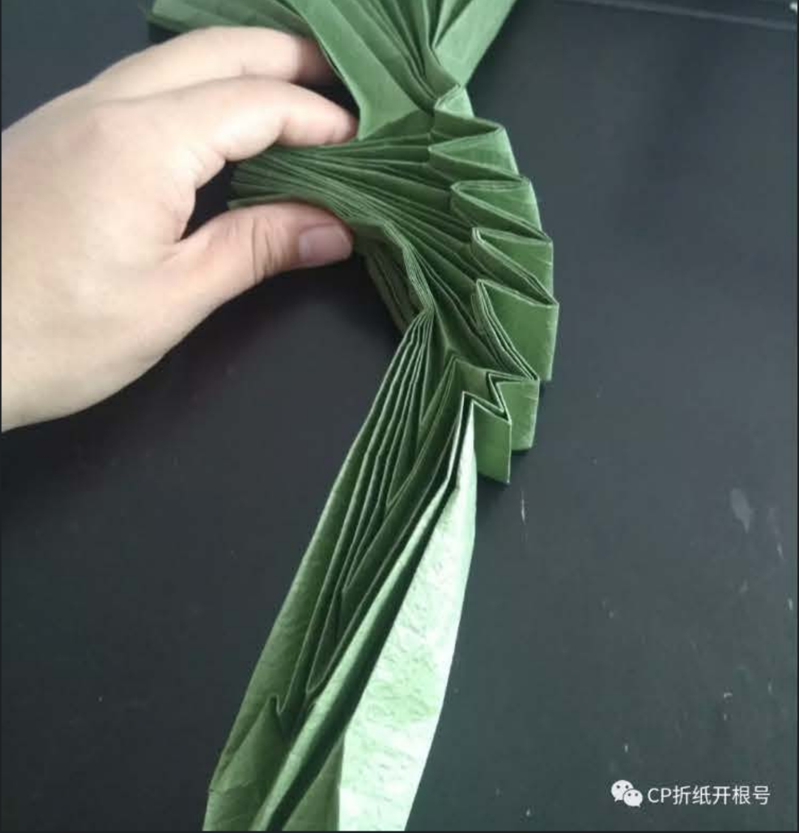


CP折纸开根号



CP折纸开根号

Same way for all jagged structures, so is the other side of the work



Now let's press the zigzag, and by the way, the legs on the side are out, this is really by the way!

The blue part in the picture below

CP折纸开根号

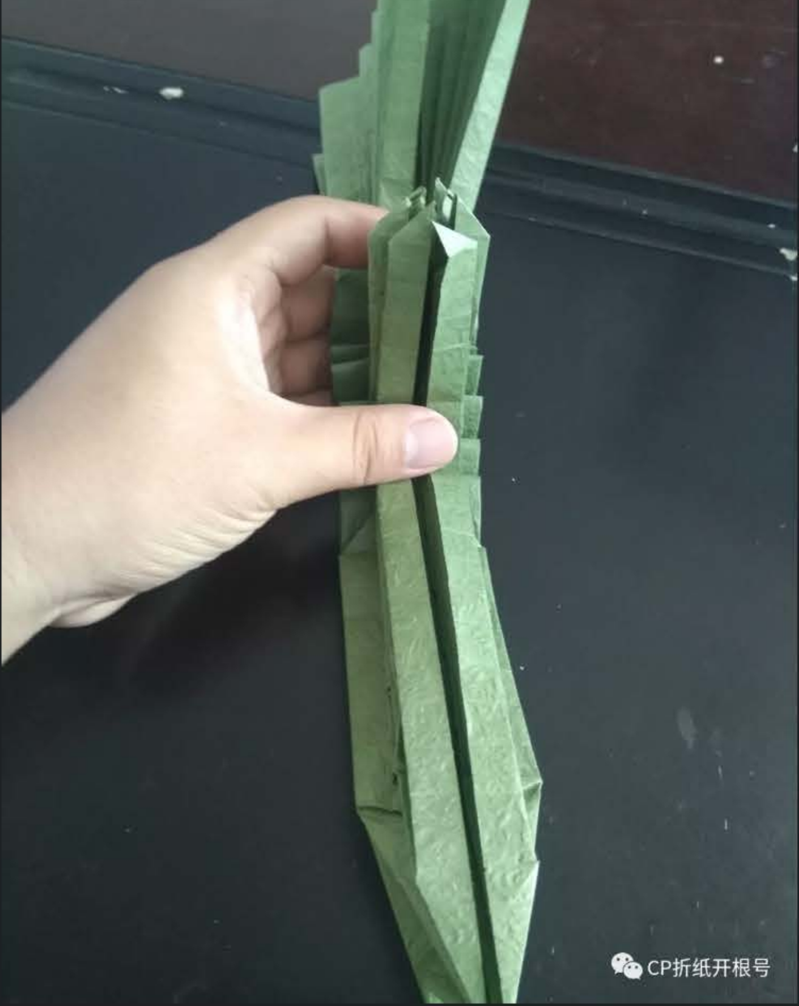
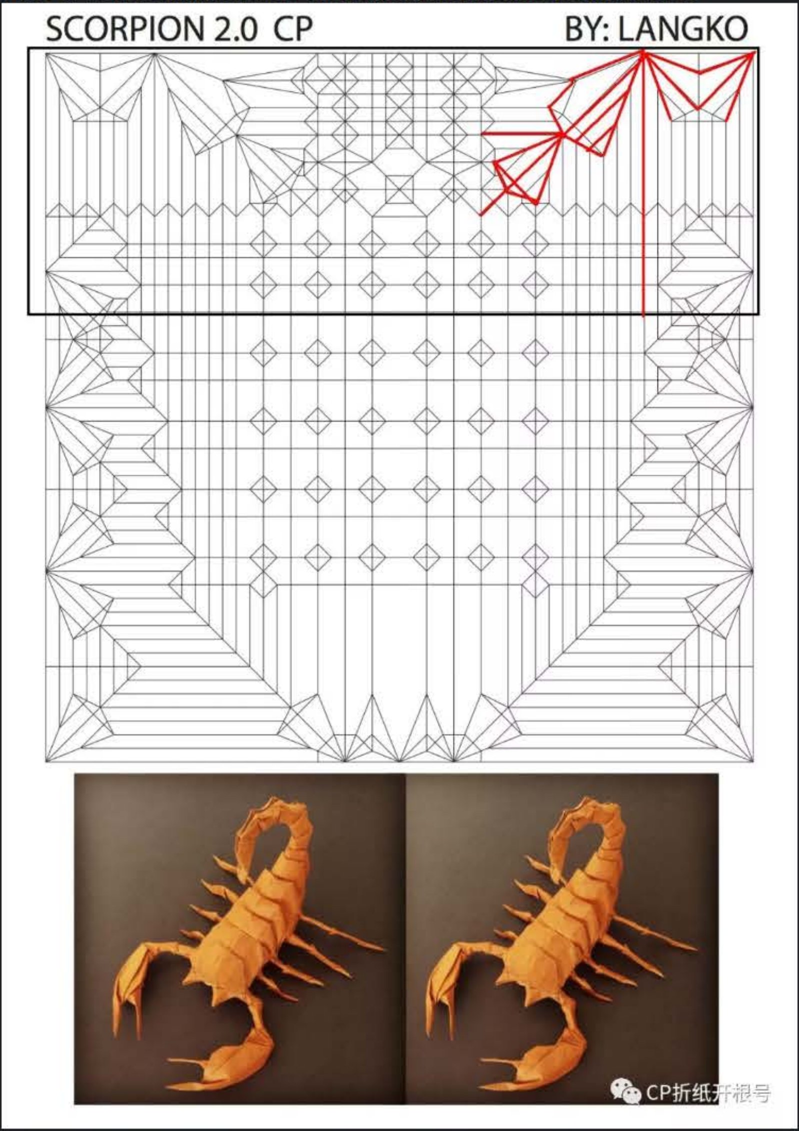
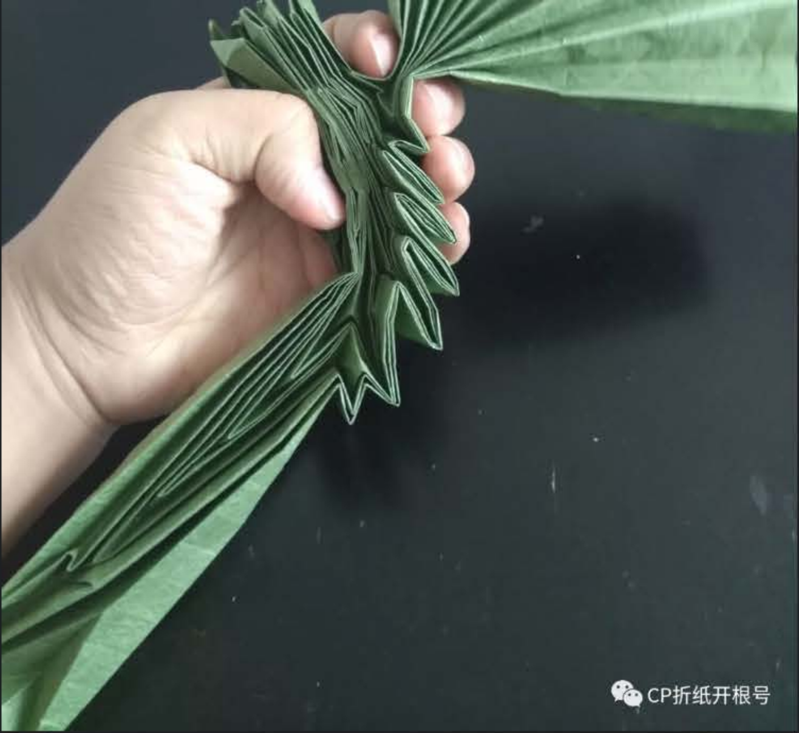
Handle the legs on the other side at the same time, and then arrange on the back of the work

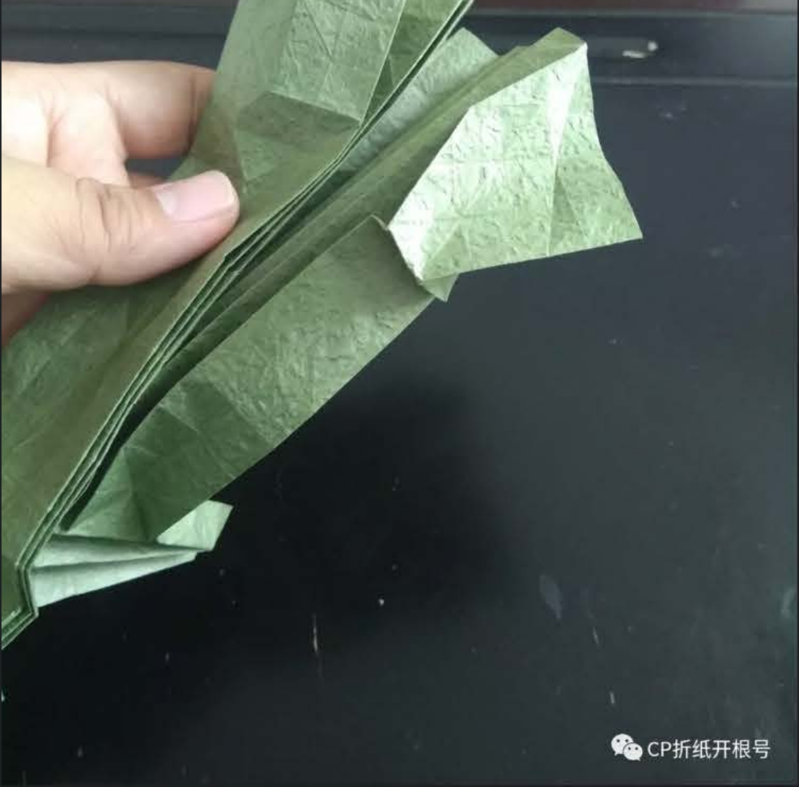


Side view, below we have to converge the head. As shown below, we converge the lines inside the black frame, starting with the red line on the right side, because the middle of this CP is a bit complicated, so we are going Intermediate polymerization.





CP折纸开根号



CP折纸开根号

Once the pliers on one side are done, don't rush to gather to the center, we can lower it first and then go to the other side

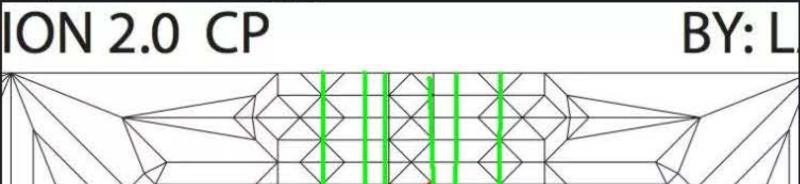
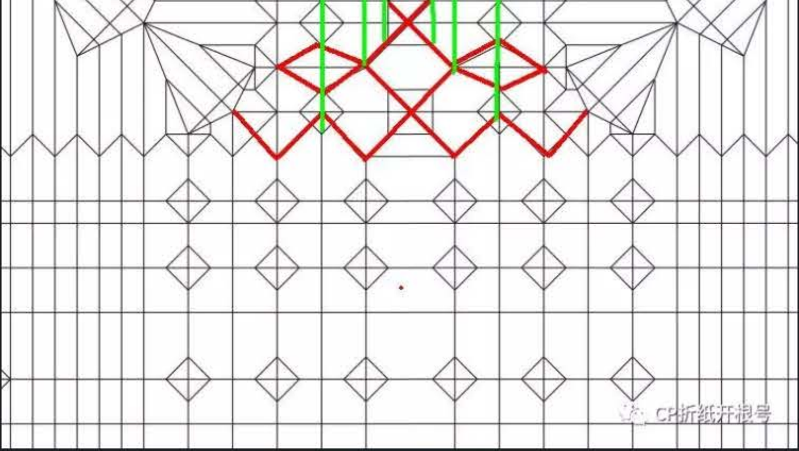
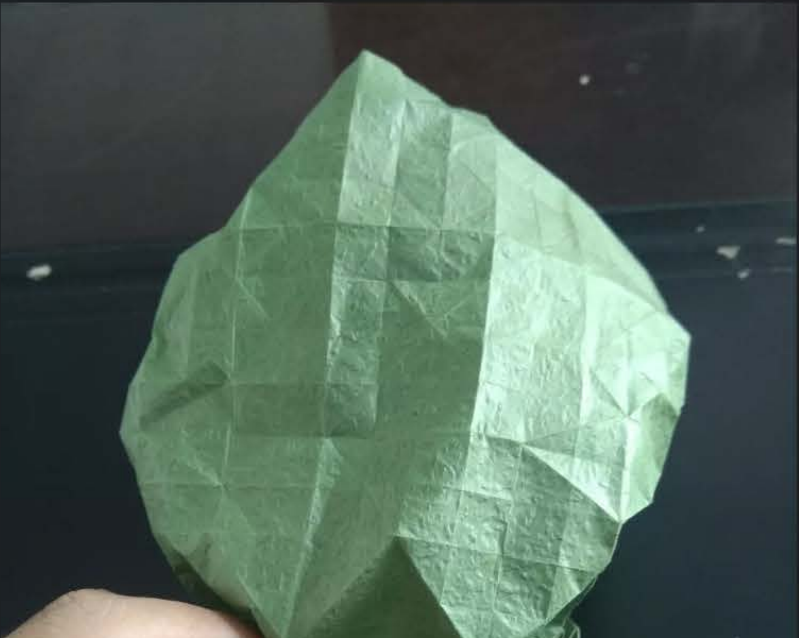
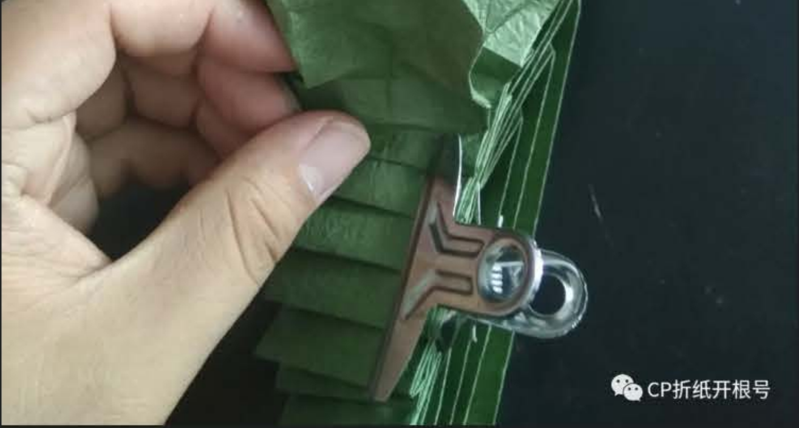
After the pliers on both sides are over, let 's focus on the middle part. When we aggregate, we follow the long-line principle we have talked about before, as shown below. The vertical green lines here are peaks and valleys, so no need to consider So the first thing we need to pay attention to is the several figures surrounded by the red lines in the figure below. Here we must keep the figure unchanged and there must be no segment breaks when we aggregate.



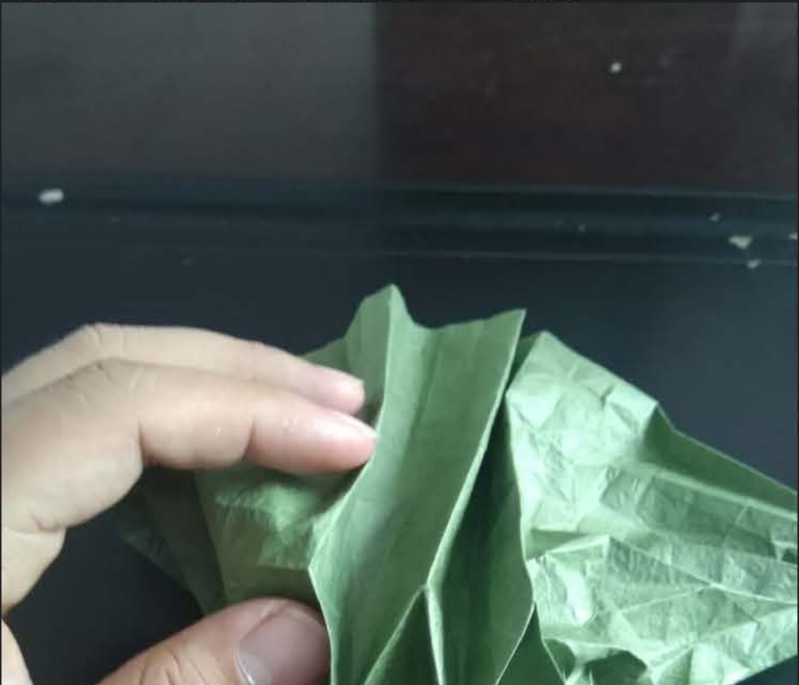


CP折纸开根号

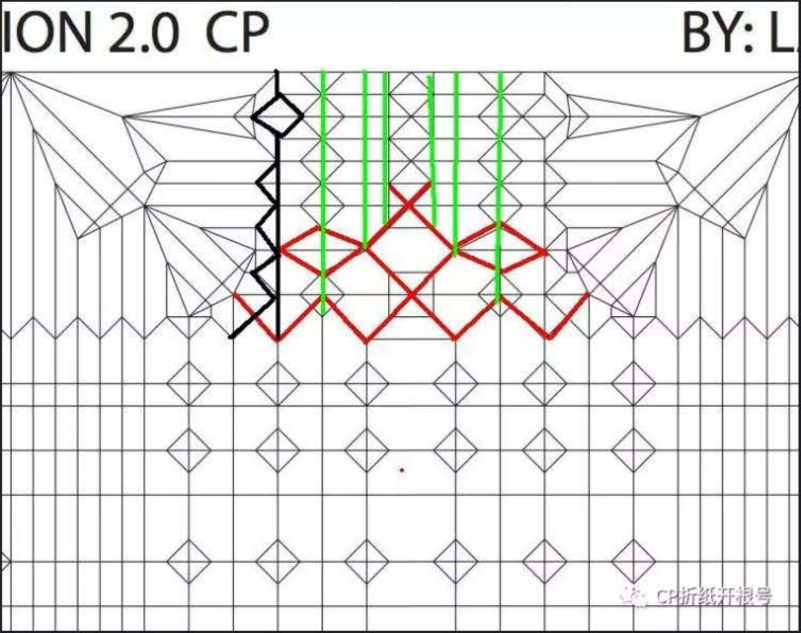


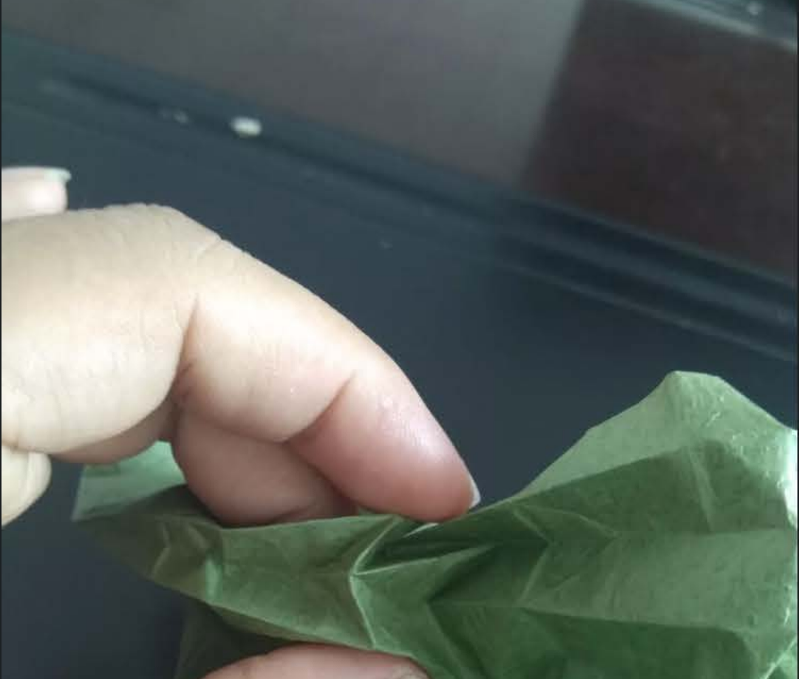


As shown in the figure below, keep the peak shapes of several red lines unchanged, and then connect them horizontally with the newly gathered pliers.



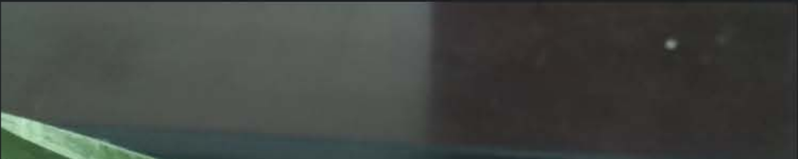
As shown in the figure below, the black transition lines are uniformly connected to the graphics processing when we aggregate this type of line, because this type of line may not have much meaning in the shaping of the work, but the transition without them is not good, so the master is playing It is generally not possible to hit the line, but it is recommended that beginners still mark the position of the edge.

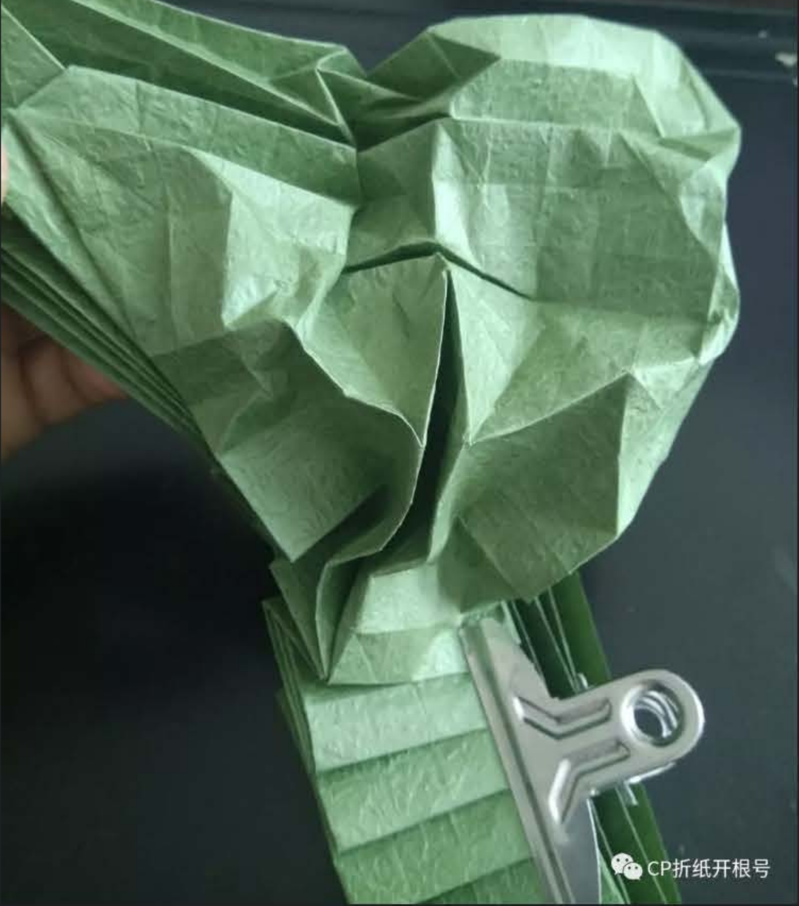




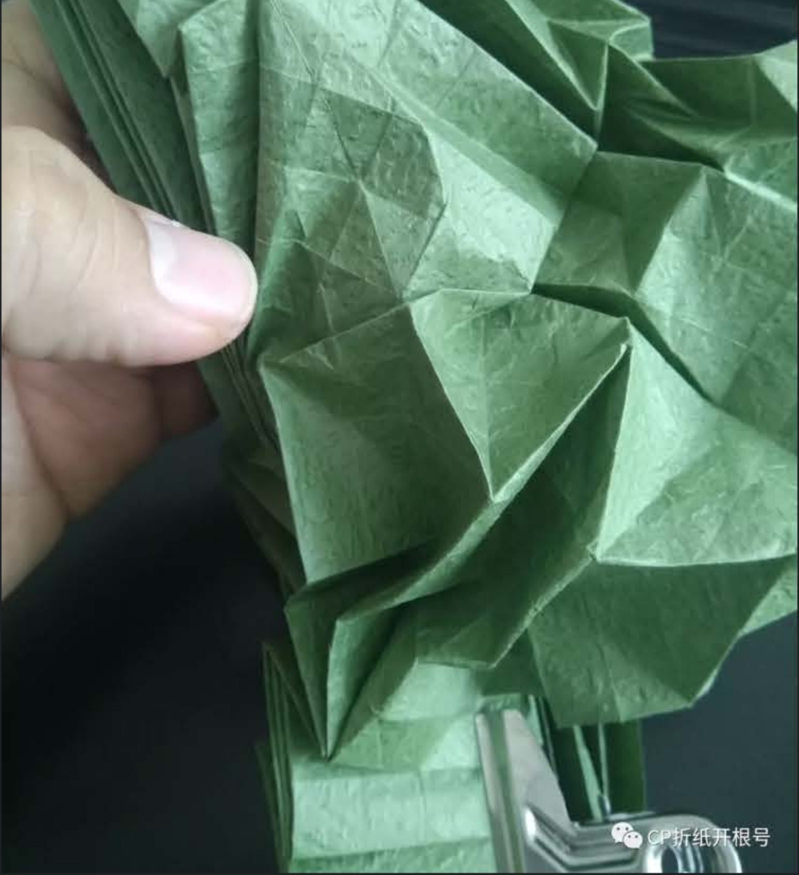
CP折纸开根号

CP折纸开根号



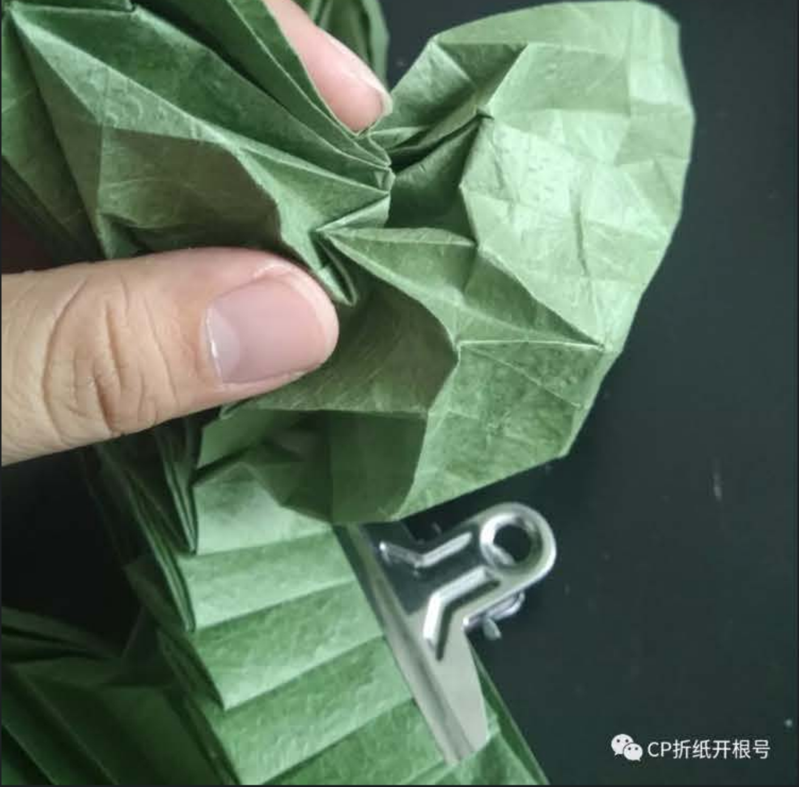


CP折纸开根号



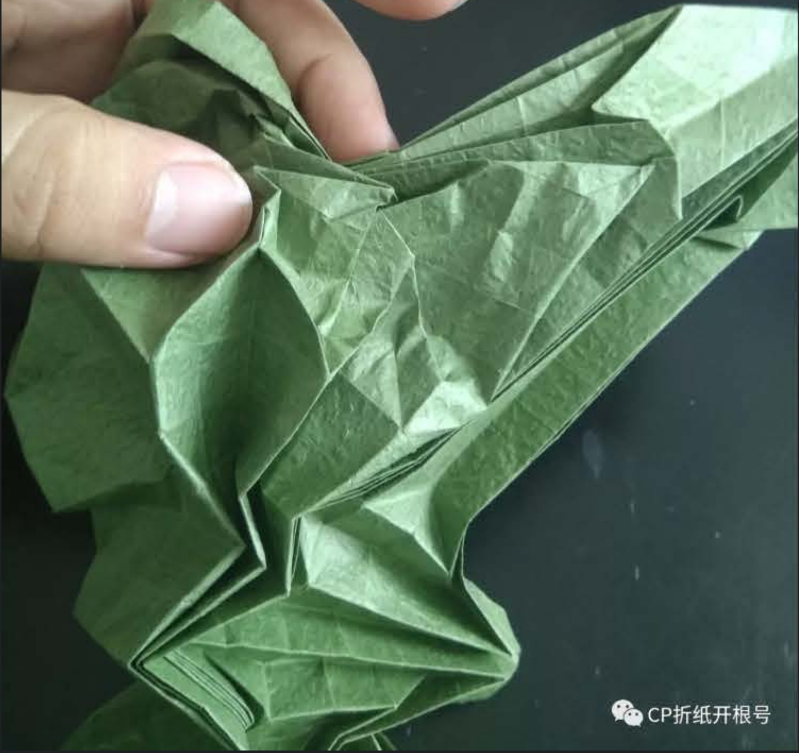
CP折纸开根号

Make the transition on the left first



Then do the right

CP折纸开根号

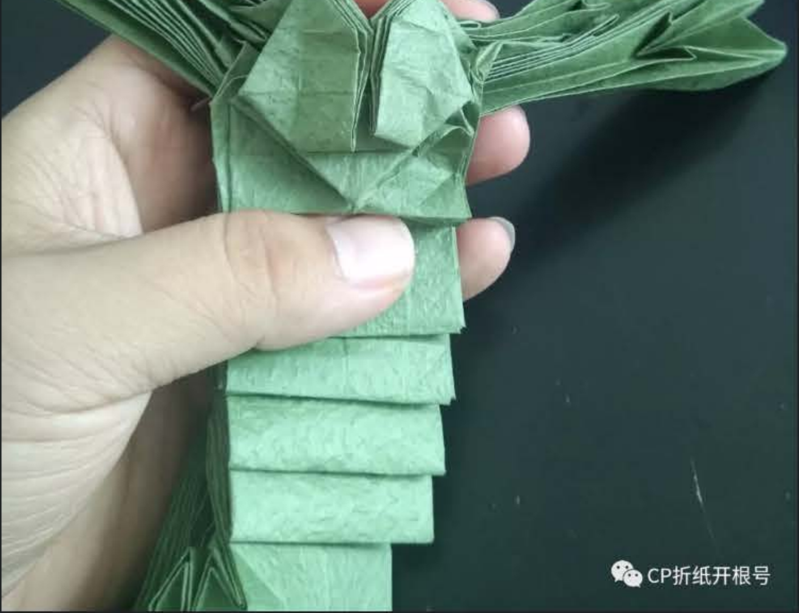


CP折纸开根号

After both sides are done, the middle is only close to the horizontal peaks and valleys. Let's get together in order.

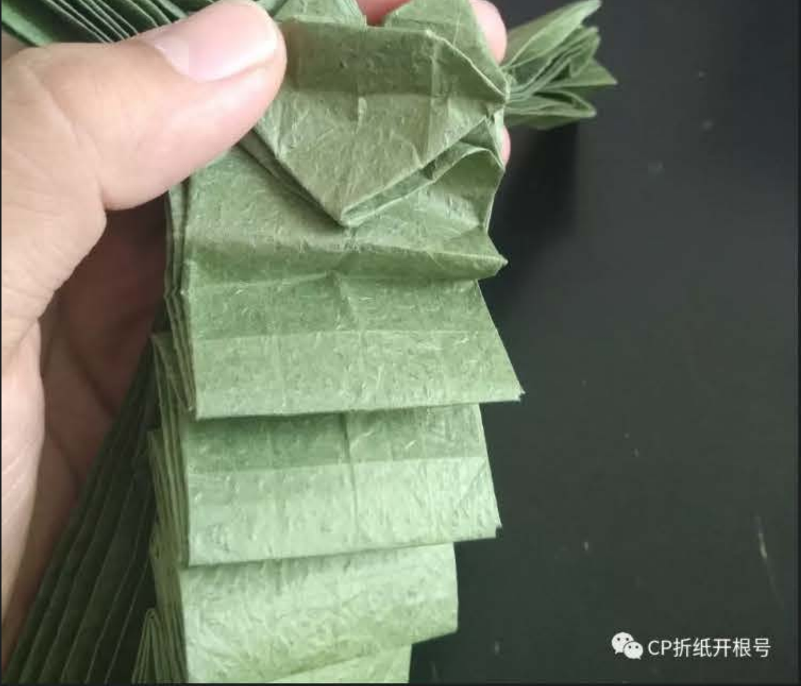
CP折纸开根号

CP折纸开根号



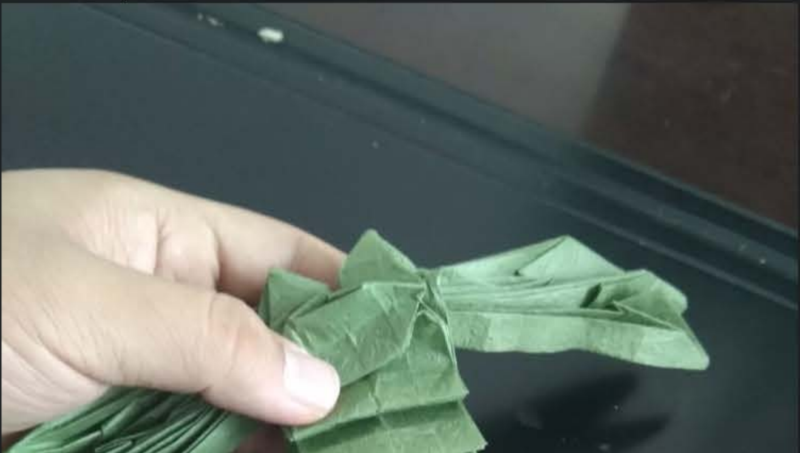
CP折纸开根号

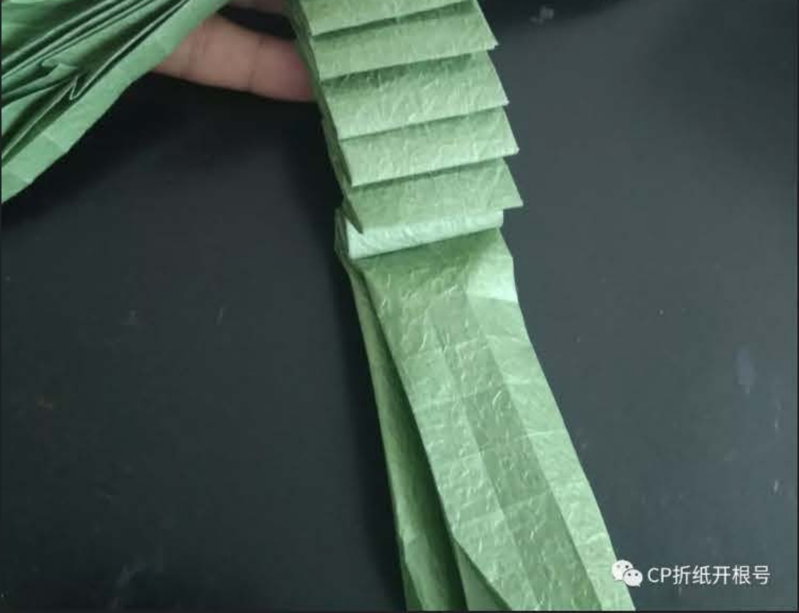
Fold the lower paper layer up



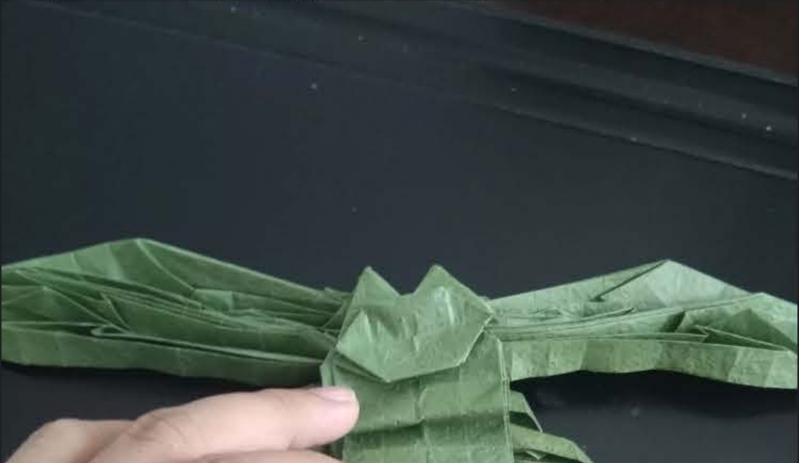
CP折纸开根号

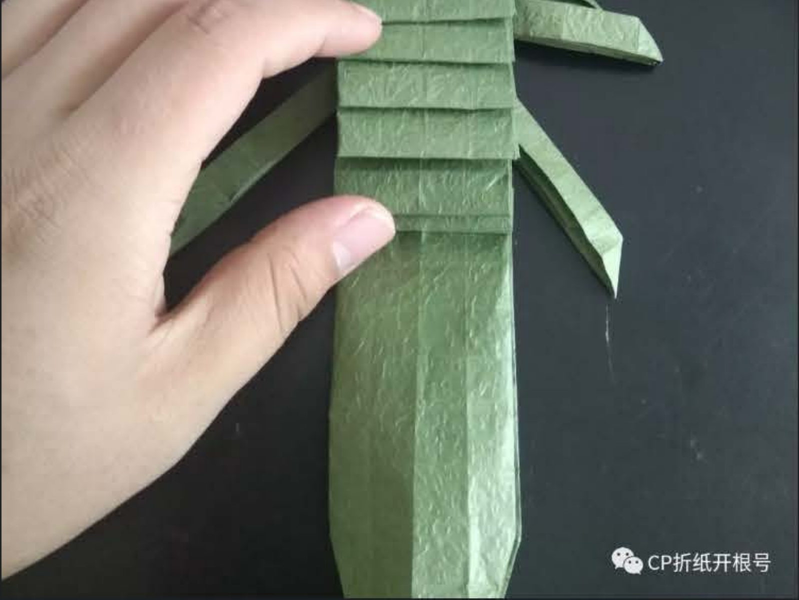
Fold the sharp corners to the back



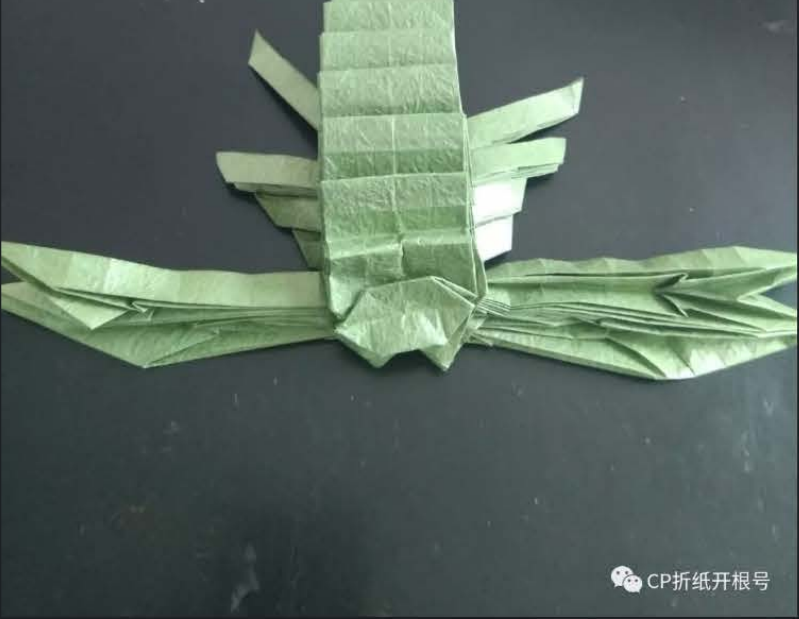


Now, please divide the pliers, legs, and prepare for plastic surgery.

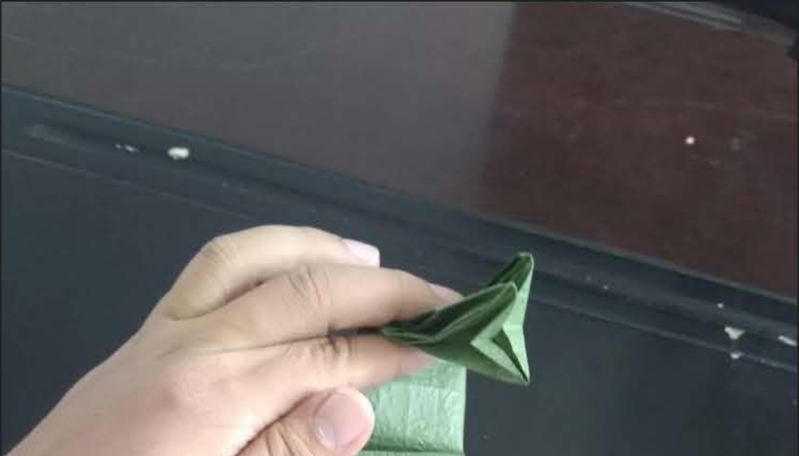


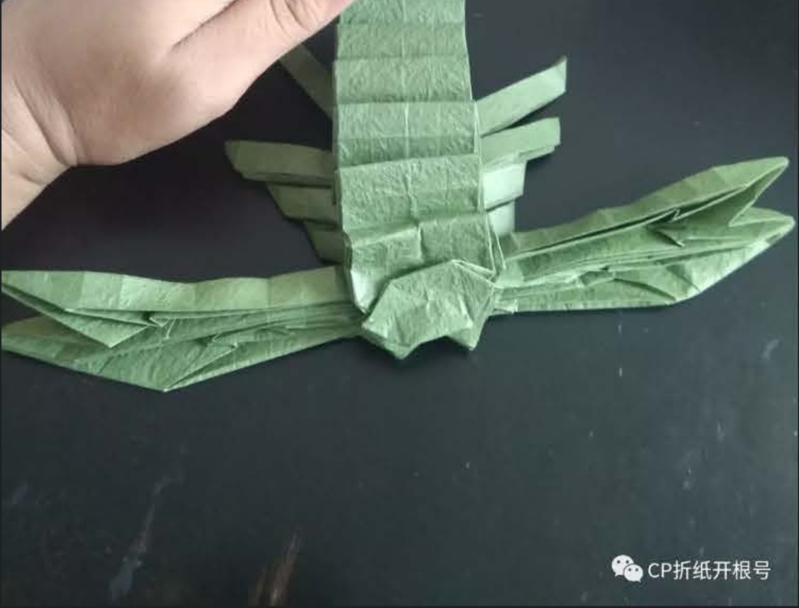


CP折纸开根号



Finally, it is worth mentioning. Here, the tail pin part, please make up the tail pin of the scorpion, and then keep the part of the needle here, and then form a relatively round hat-shaped part.





CP折纸开根号

Alright, everyone, come on, I believe everyone has no problem! !! !!💪💪💪💪

Then

See you next time!
