CP entry-level discount friend exclusive real shot interactive series No.38 total 117th issue of marine life and little dragon

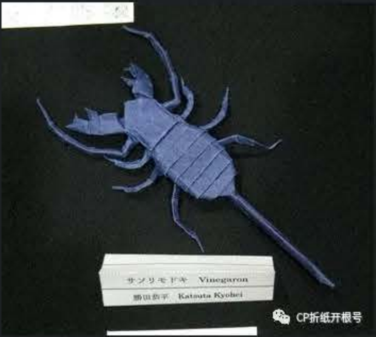
Original Origami Student Takayama CP Origami Opening Number 2019-10-26

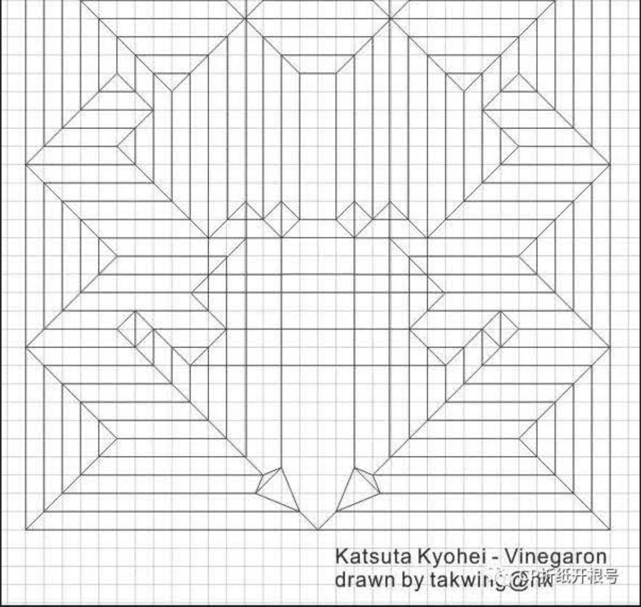
Hello everyone, welcome to CP Opening!

Last time, the real shot of the entry work was pretty good. Some people have discounted it, and they still trust me personally, but some people said that they wanted to get started a little bit, so they will do a real shot again this month! In the future, some real shots of entry-level works will be sent for entry-level friends to play origami.

The work in this issue is said to be a marine creature, and I am not sure about the name. You can see the introduction in the picture below.
vinegaron I Baidu said for a short time that it is a kind of sea scorpion. We will not discuss what it is called! If you know, please tell me!

Let's pay tribute to Teacher Katsura first. He really did a lot of this kind of work for us.





Katsuta Kyohei - Vinegaron

Introductory works in this issue: 32--32 squares

Let's go online first

This issue is still very simple. As one of the introductory works, I still hope you can fold it and practice plastic surgery.

The specific text will not be added, everyone believes that they can understand it against CP!
