# 24 Blue Sea Life 3D Origami Table Legend Book

Difficulty: Intermediate

Time to Complete: Approximately 2 hours

Origami Paper: Square origami paper is required. Any size will work, but the larger the paper, the larger the finished model will be. Origami paper is thin paper printed with a design on one side and solid color on the other side. Origami paper is available at craft stores, hobby shops, and online. Origami paper comes in packages of assorted colors or packages of a single color. Origami paper is also called origami squares or origami kami.

Introduction: Origami is the Japanese art of folding paper into decorative shapes and figures. Origami models are made by folding a piece of paper according to a set of instructions. Origami models usually start out as a square piece of paper. Origami models are usually made without cutting the paper or using glue. Origami models are usually made with one piece of paper, but some models require more than one piece of paper. Origami models are usually made with the solid color side of the paper facing up, so that the design side of the paper is hidden. Origami models are usually made with the corners and edges of the paper folded precisely to the corners and edges of the paper. Origami models are usually made with the folds creased sharply.
