
Origami Interactive Series No.30 Total 97th Entry Entry-level Works Swimming Dinosaur

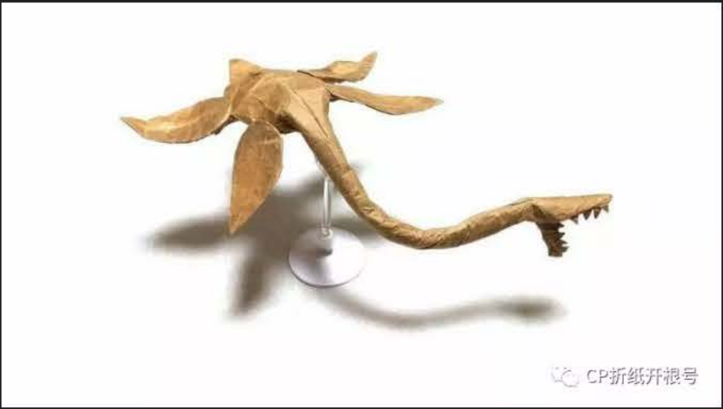
Original origami student Takayama CP origami opening number2019-05-26

Hi everyone, welcome to CP Opening!
This issue is still a simple CP, so let's enter the relevant talk as soon as possible!

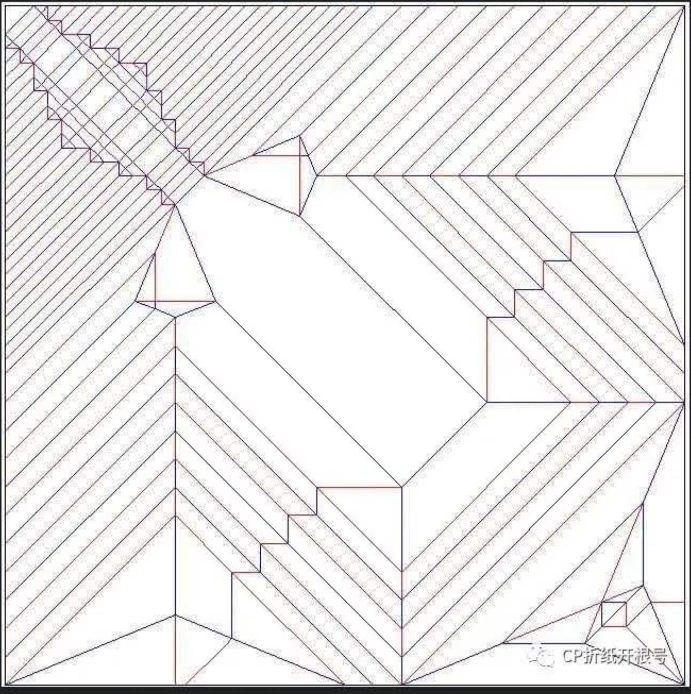
In this issue, dinosaurs
Fear Long (sauropsida prehistoric animals) (English name: Dinosaur), is found in the Mesozoic period (the Triassic , Jurassic and Cretaceous collectively referred to a class of reptiles), the supple limbs, long tail and The huge body is a portrayal of most dinosaurs. They mainly inhabit forested or open areas on the lakeshore plain (or coastal plain).
In 1841, when British scientist Richard Irving studied several pieces of fossils that looked like lizard bones, they thought they were left by some prehistoric animal and named them dinosaurs, which means "horrible lizards."
Dinosaurs suddenly disappeared at the end of the Cretaceous 65 million years ago , becoming a mystery in the evolutionary history of the earth's biology, a mystery that remains unsolved to this day. The living things of the earth were recorded in the fossils . In the Mesozoic strata, many fossils of dinosaurs were found. You can see a large number or bones of various shapes. However, in the subsequent Cenozoic strata, the fossils of non-bird dinosaurs could not be seen at all, so it is inferred that non-bird dinosaurs became extinct together during the Mesozoic. Today, only birds remain, and most scientists agree that Dinosaur. "

The term "dinosaur" refers to the terrifying lizard (horrifying lizard) in the west. The paleontologists in Japan translated it as "horrifying tadpole" and later became popular in China. Ancient Greek lizard (Saurosc), especially a large lizard-like reptile with limbs, tails, or wings.
Oriental translation of this context in the "dragon" refers specifically to the Greek lizard family, such as the main dragon, Tyrannosaurus , dimetrodon , Diplodocus , Tyrannosaurus rex , pterodactyl , Triceratops and so on. The tiger character like " gecko " is diversion.

Alright, the time for gaining knowledge has passed, let's move on to the work CP in this issue!



CP折纸开根号



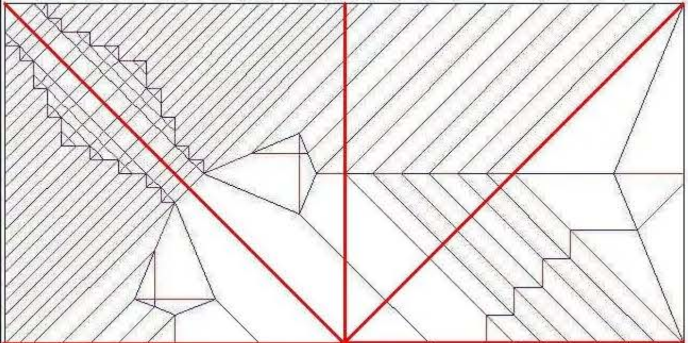
CP折纸开根号

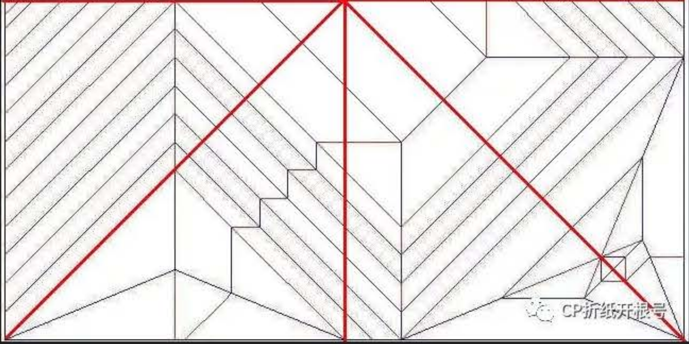
This work 24 squares

First of all, prepare a piece of square paper. The size can be slightly larger, so the folded work will have more momentum!

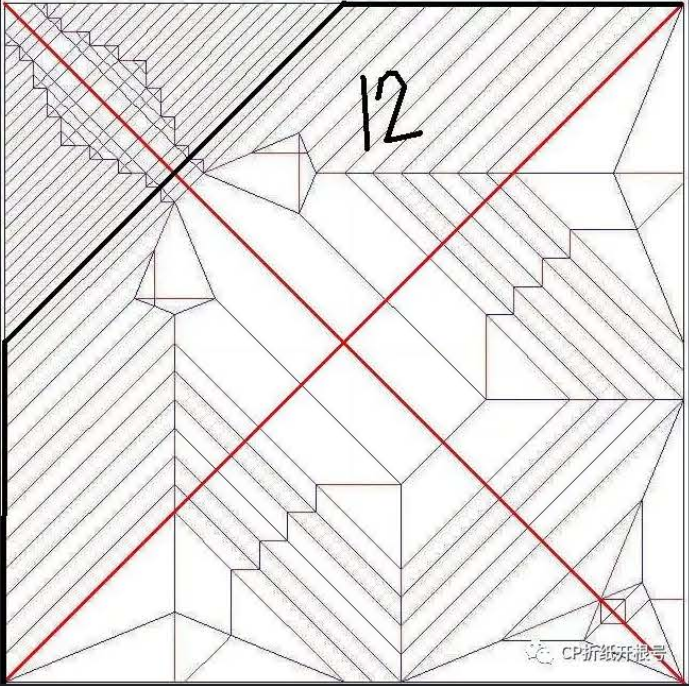
CP折纸开根号

In the first step, everyone cuts the paper and then folds it in meters, and then finds the line corresponding to each midpoint from the CP. The midpoints on the sides of the figure below are the starting points of the diagonal lines.

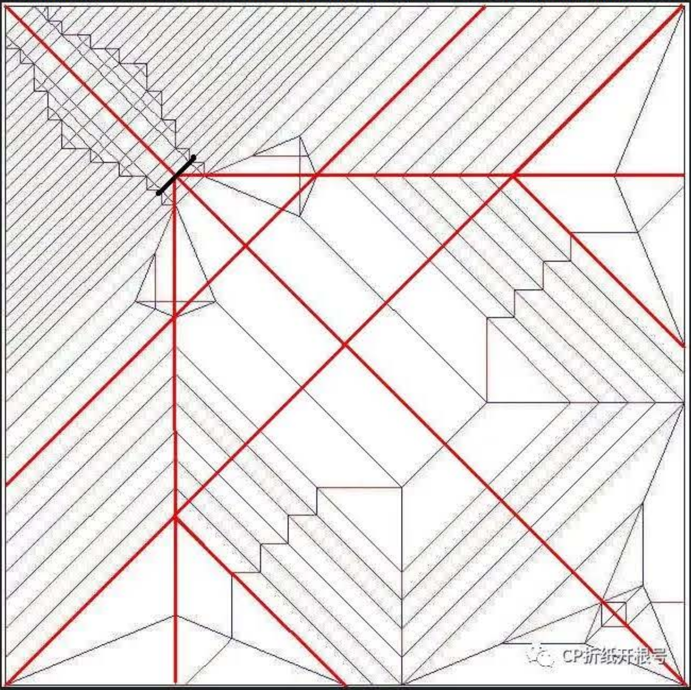




After the midpoint is connected, the upper and lower parts are equally divided, the middle is 12 equals, and the top is 24 equals.

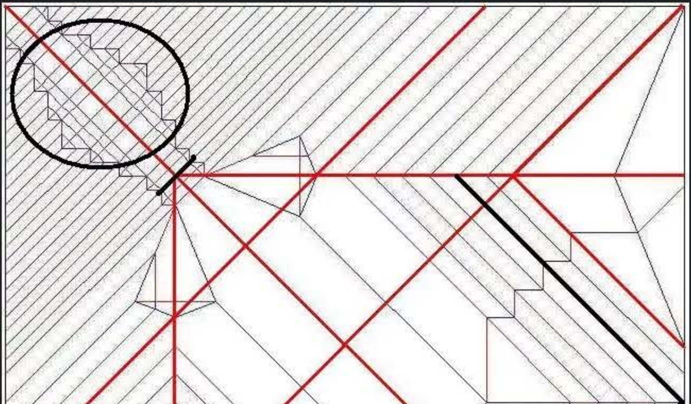


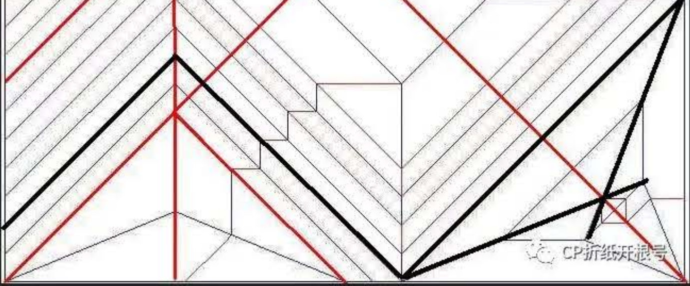
As shown in the CP, it is not necessary to go through all the paper, and the corresponding ones are sufficient. After that, we have to draw the red lines as shown in the following figure. These lines are corresponding to the corresponding bisect points.



CP折纸开根号

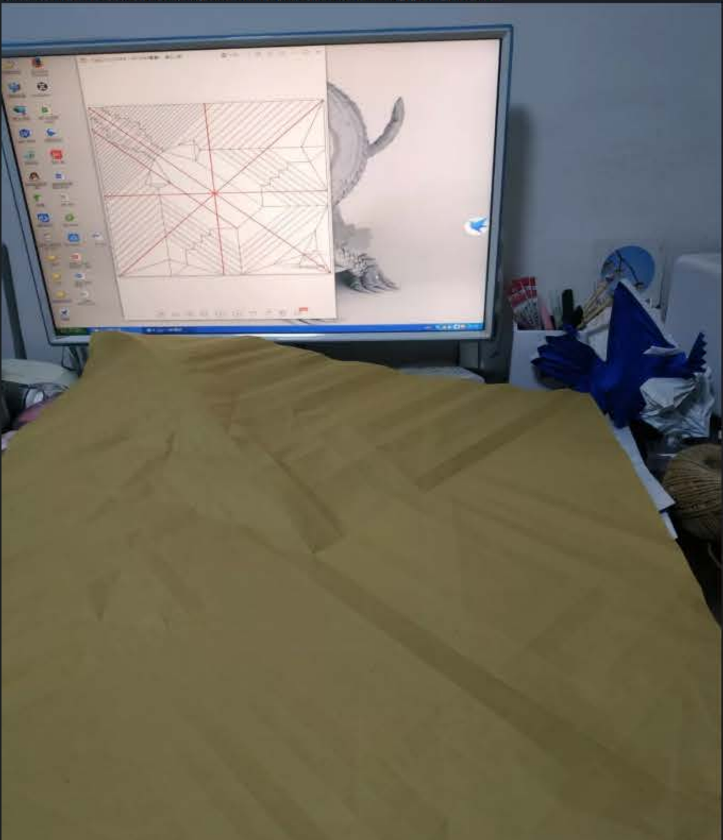
Finally hit the upper part of the jagged part and the lower part of the tail to complete the wire.





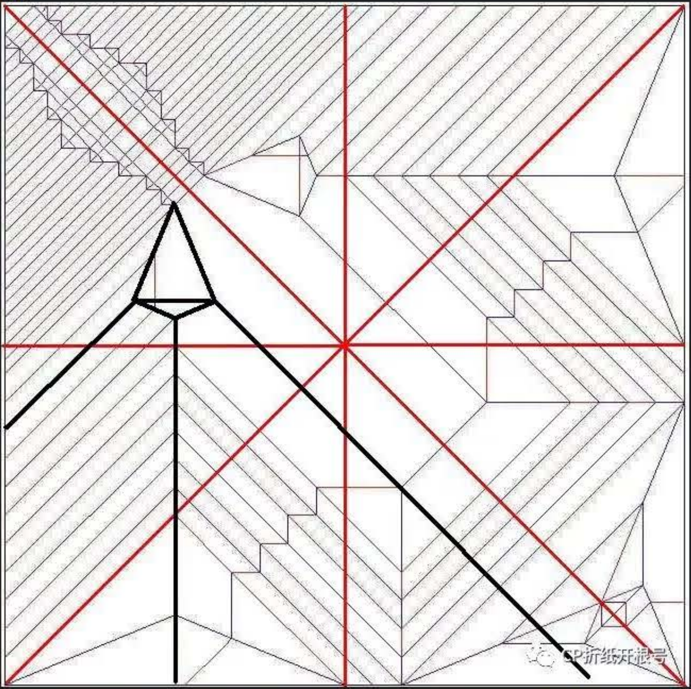
CP折纸开根号

Now we unroll the paper and prepare for aggregation.



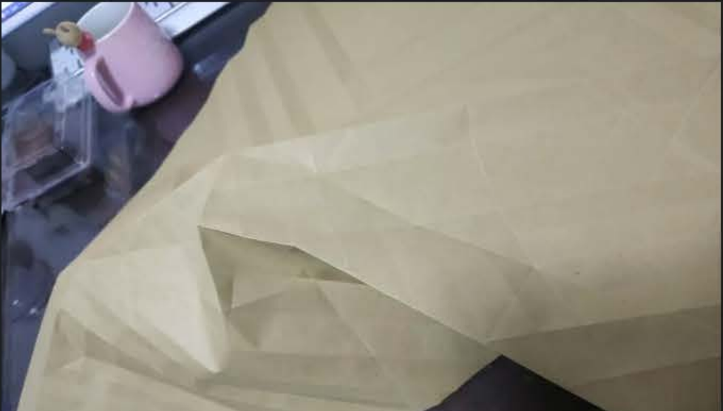
CP折纸开根号

As shown in the figure below, we start with the black line in the figure below when we aggregate



CP折纸开根号

CP折纸开根号



CP折纸开根号

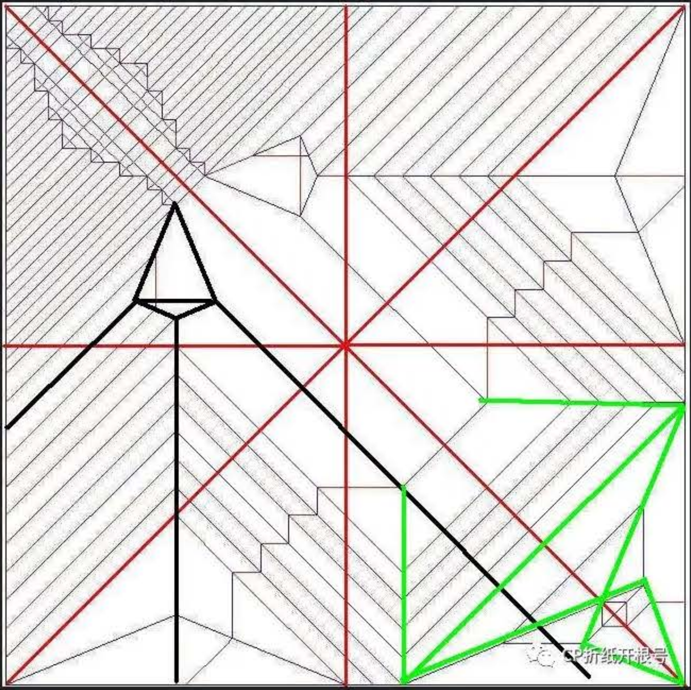
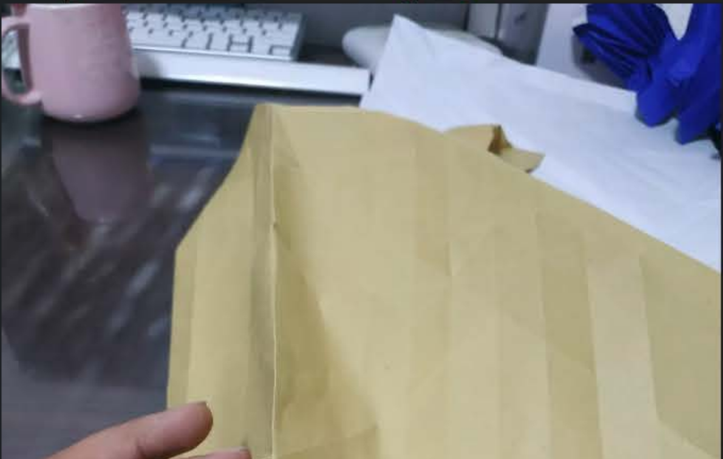
Next, we aggregate the green line part in the lower right corner. The other corresponding parts are gathered as much as possible in a unit.





CP折纸开根号

Finally, according to the figure below, first fold in the middle red line, and then deal with the jagged structure in the upper left corner.

Let's briefly reshape it.
First of all, I use 60 grams of kraft paper, which is relatively soft, and domestic paper is relatively transparent, so everyone should slow down and use better paper.

Here are some real shots,
The specific plastic idea is this. Starting from the teeth, there are four rows of teeth above and below, so the lower teeth must borrow the two paper layers in the middle; then pinch the head and adjust the thickness of the neck, and the body below Adjust the streamlined shape, and then below are the positions of the four fins. Finally, fold out the tail and adjust the paper layer on the tail. Basically as above, come on!

I posted a lot of life sketches and origami sketches, and of course there are original works on display🤔

My Taobao Online Store

Although there is no decoration in the online store and the pictures are not very beautiful, the works are still complete, and I can order CP works that are not in the store. Of course, it also includes the aggregated semi-finished products and finished products of almost all the works explained by the public account. And line paper for sale.

Everyone says my Taobao shop ca n't find it, I do n't know why, here is the URL
