CP Interpretation of Origami Sharing Series No.25 Total 78th Crab

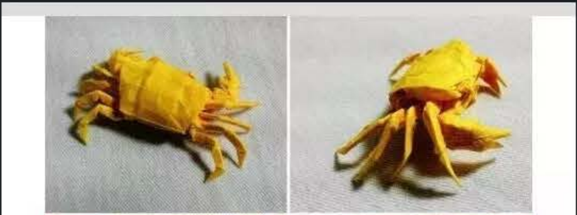
Original Origami Student Takayama CP Origami Opening Number 2019-01-05

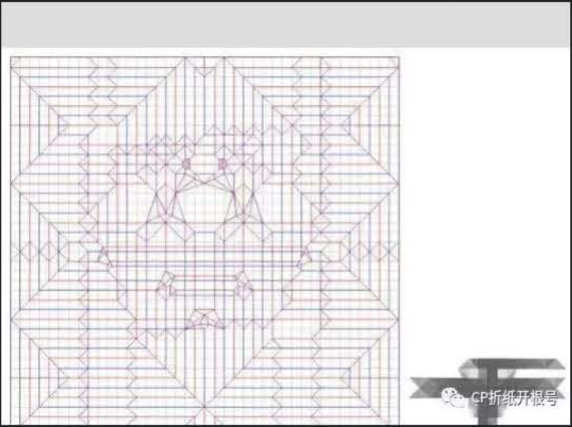
Hello everyone, welcome to CP Opening!

This issue wants to talk to you: crab.
Crab (páng xiè): Animal kingdom, arthropoda , crustaceans , soft armors , true soft armors , decapods , gastropods , short-tailed orders . It is a crustacean (crustacean) whose body is protected by a hard shell and relies on the gills to breathe. In taxonomy, it is similar to shrimp , lobster , and hermit crab .
Most species of crabs live in the sea or offshore, and some live in freshwater or land. They rely on female crabs to give birth to small crabs. Each female crab lays a lot of eggs, numbering more than millions. Crabs rely on the geomagnetic field to determine their direction. Common crabs are hairy crabs (river crabs , hairy crabs , and freshwater crabs), and barracudas . Our resources are very rich in crabs, which the Yangtze River downstream of Gucheng Lake hairy crabs , the Taihu Lake crabs , Gaoyou Lake hairy crabs , Yangcheng Lake hairy crabs, crab crabs floor, Xinghua crabs, crabs Hongze Lake crabs produced for the top grade.
Chinese New Year, although the crab is delicious, don't be greedy!

Celebrity Quotes:
Crabs inherently die, or they die of steaming, or they die of spicy.

After the joke is finished, it's time to get things done. Let's take a look at the CP we are going to talk about in this issue.





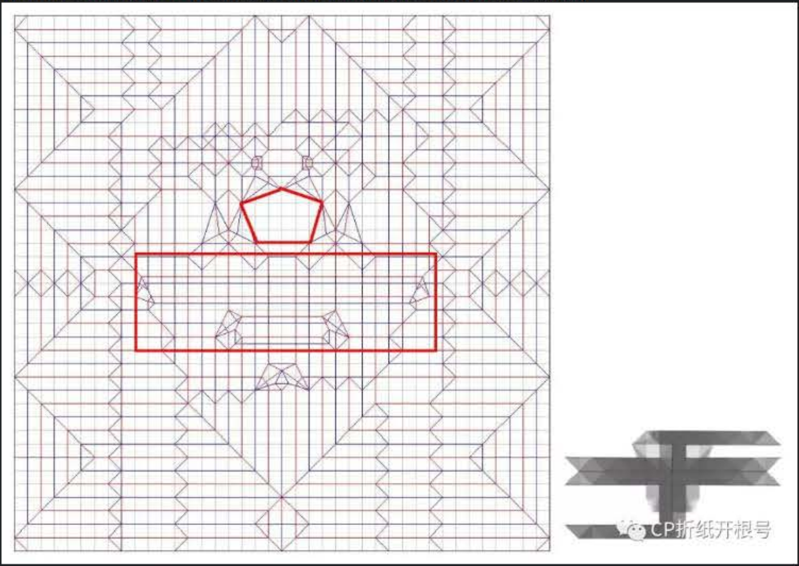
CP折纸开根号

CP square 40 * 40 in this issue

Please prepare the paper first, check the grid and line, unfold and flatten, and get together with me!

20 CP折纸开根号

At the beginning of the new year, let me talk about ideas again!



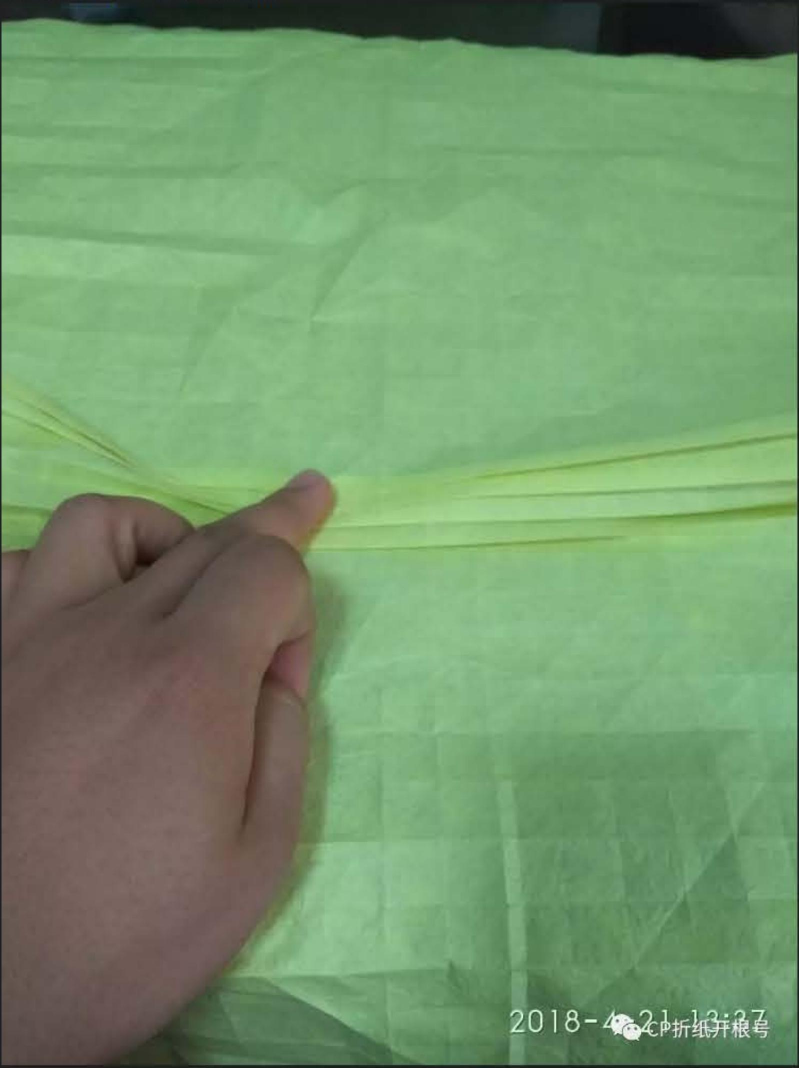
CP折纸开根号

As shown in the figure above, this is a classic opening of this type of CP. It is a bit like playing chess. It can be said that when we encounter such a half-grid as shown in the figure above, it does not cross the entire paper In the case that these lines are long peaks and valleys, we will first fold these half ruled lines.

The pentagon identified in the picture above is easy for everyone to understand. Yes, there is the crab's back shell, which must be prominent, so all the lines around it are for it.

At this point we can start to aggregate.

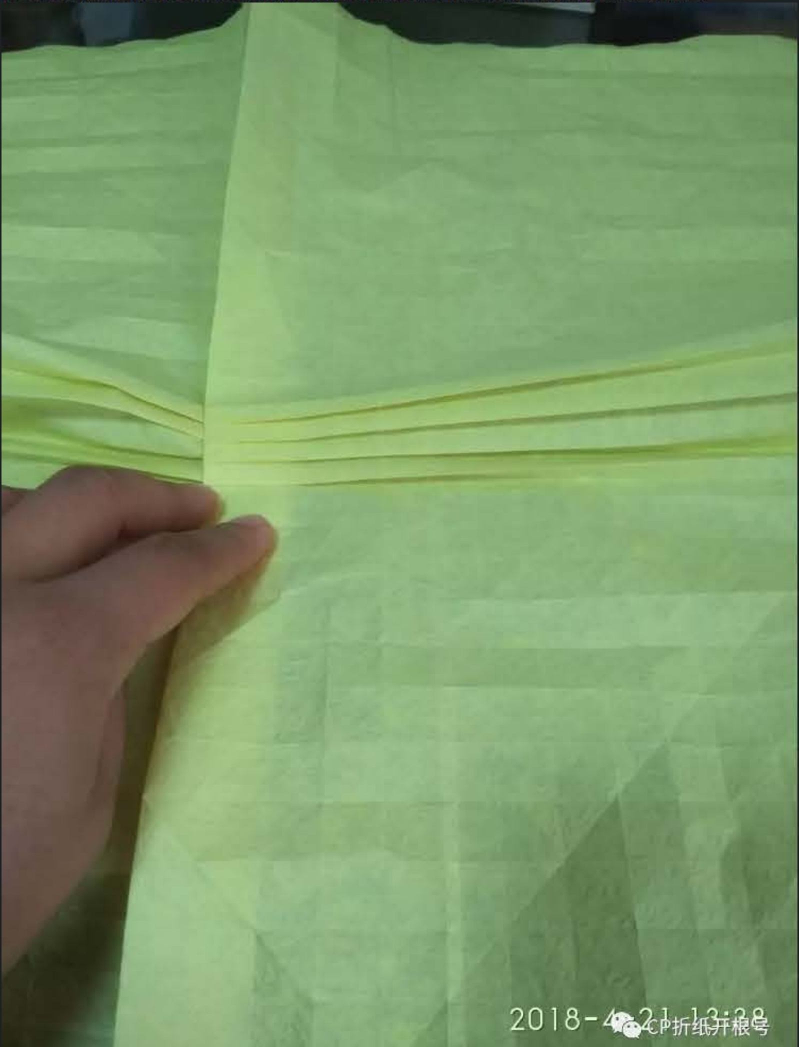
Let's start with the classic start



2018-4-21 13:27

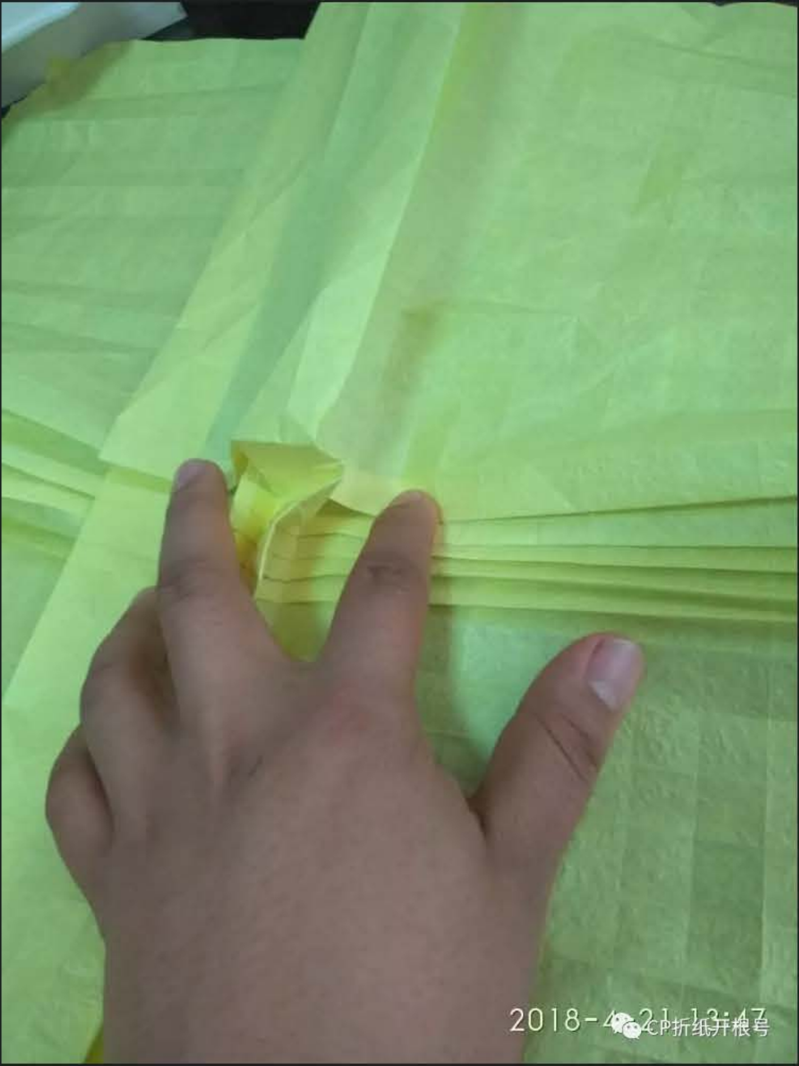
CP折纸开根号

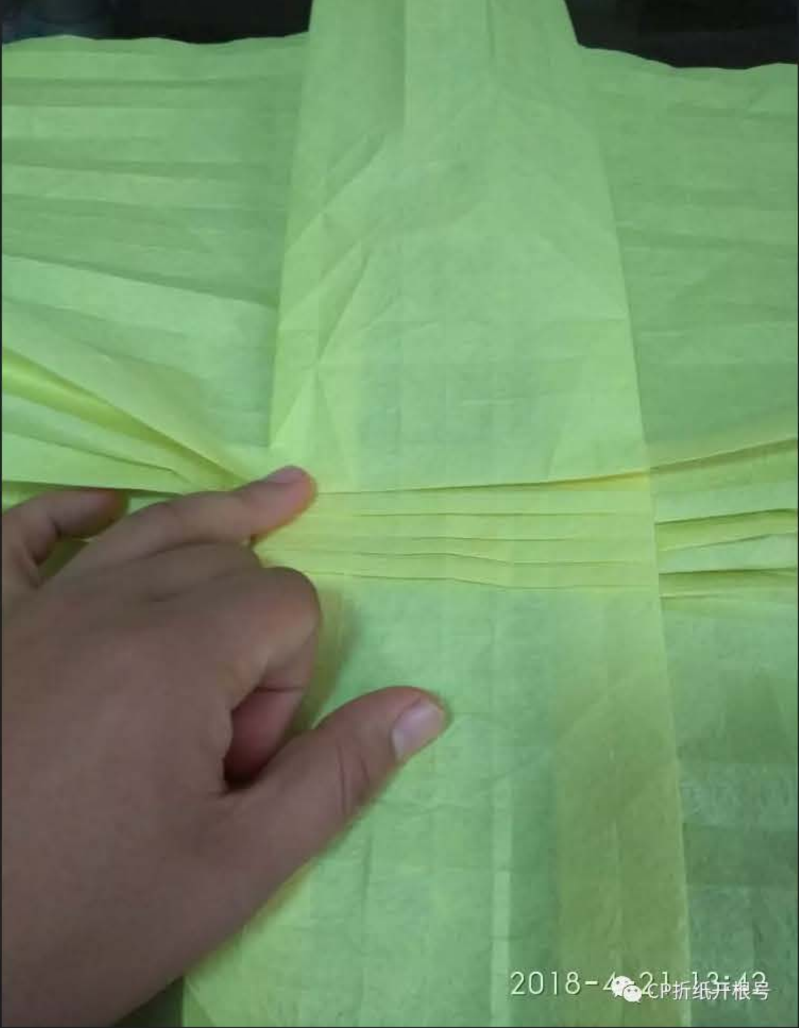
As long as such a line is a long line, it is folded down as shown in the figure, and then the vertical segment fold will retain the places that do not need to be changed, and only the places where the half grid is connected to one grid. (This kind of treatment method will be said a lot in the future. I will repeat the introduction at that time until it is used by everyone. Personally I think it needs to be said at least five times.)



CP折纸开根号

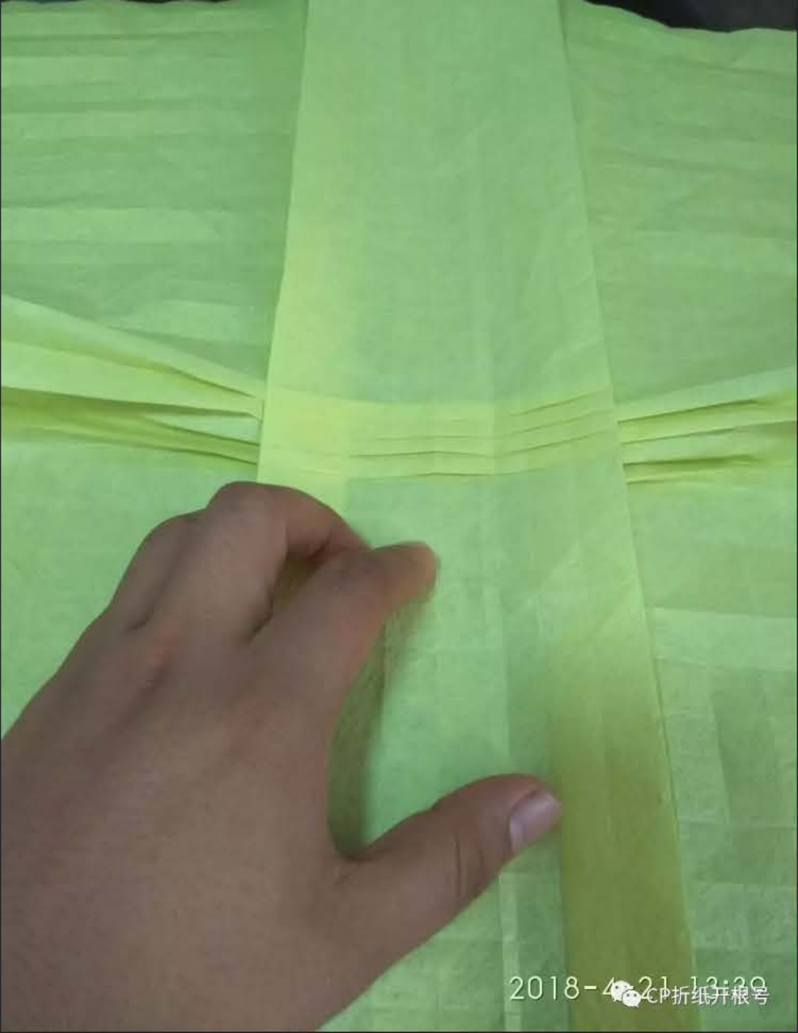
Next, we process the connection between the half-lattice and the one-lattice according to the method in CP warming knowledge.



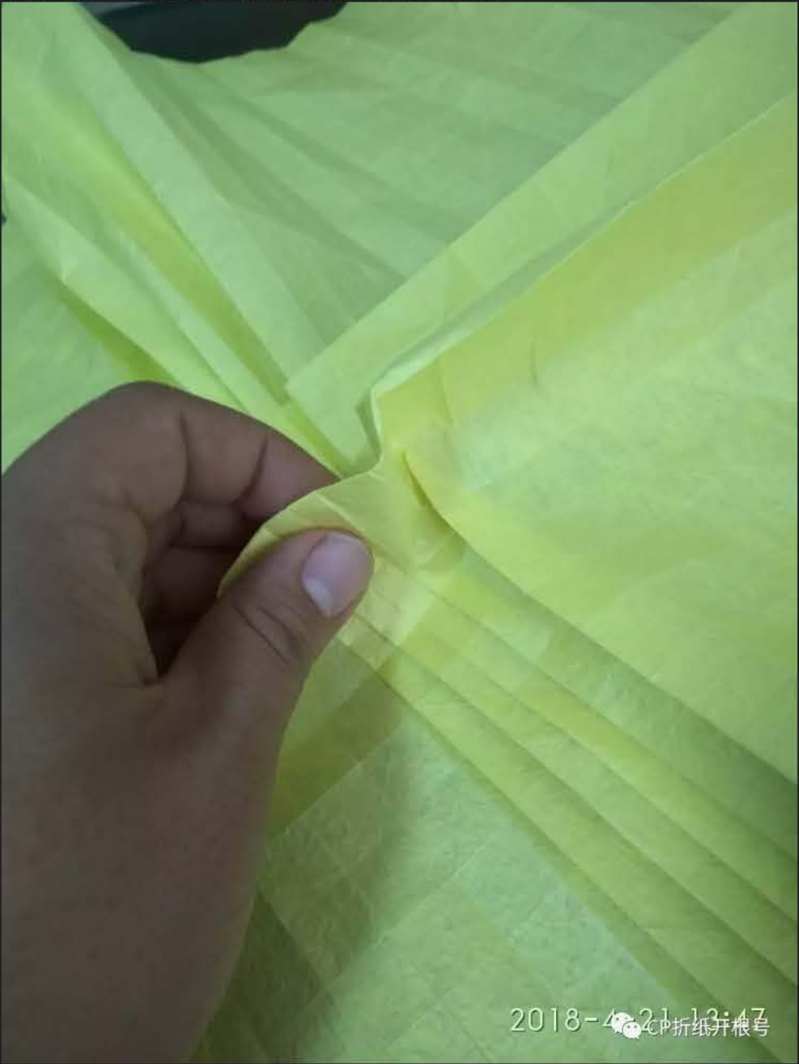


CP折纸开根号

After the half-cell and one-cell connections on both sides are processed, we can gently flatten the work.



Next we have to deal with the perimeter of the pentagon in the picture above. The main purpose is to highlight the back shell of the pentagon.

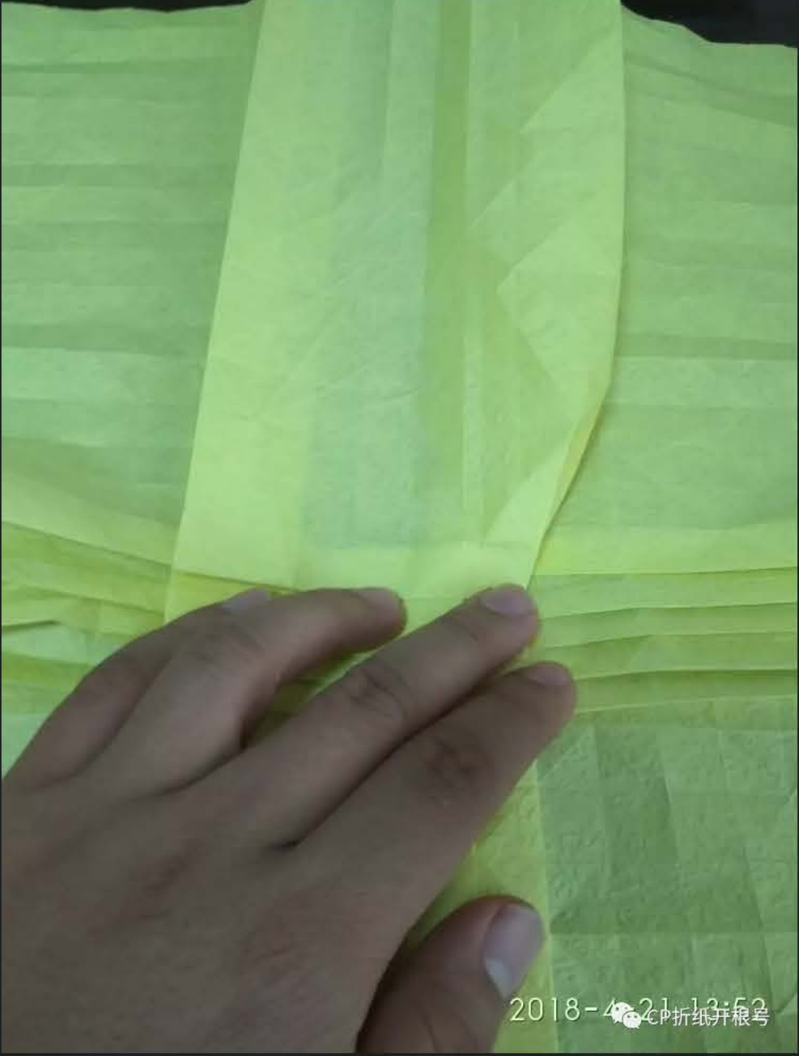


2018-4-21 13:47

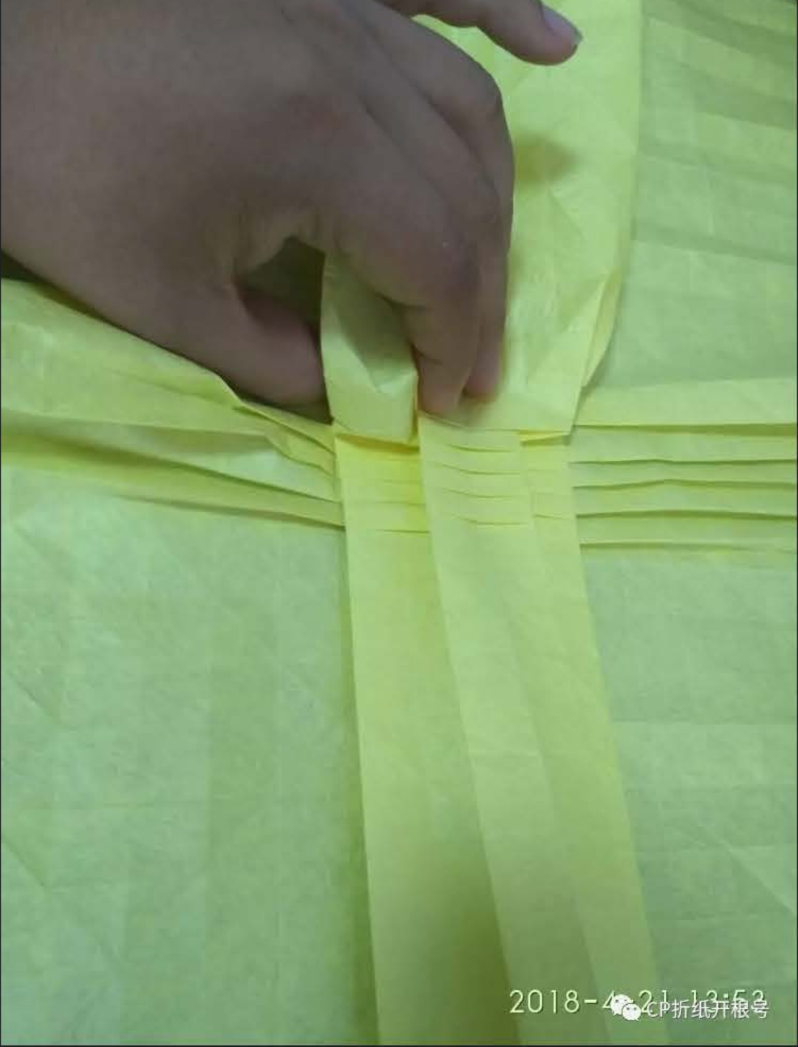
CP折纸开根号

2018-4-21 13:49

CP折纸开根号

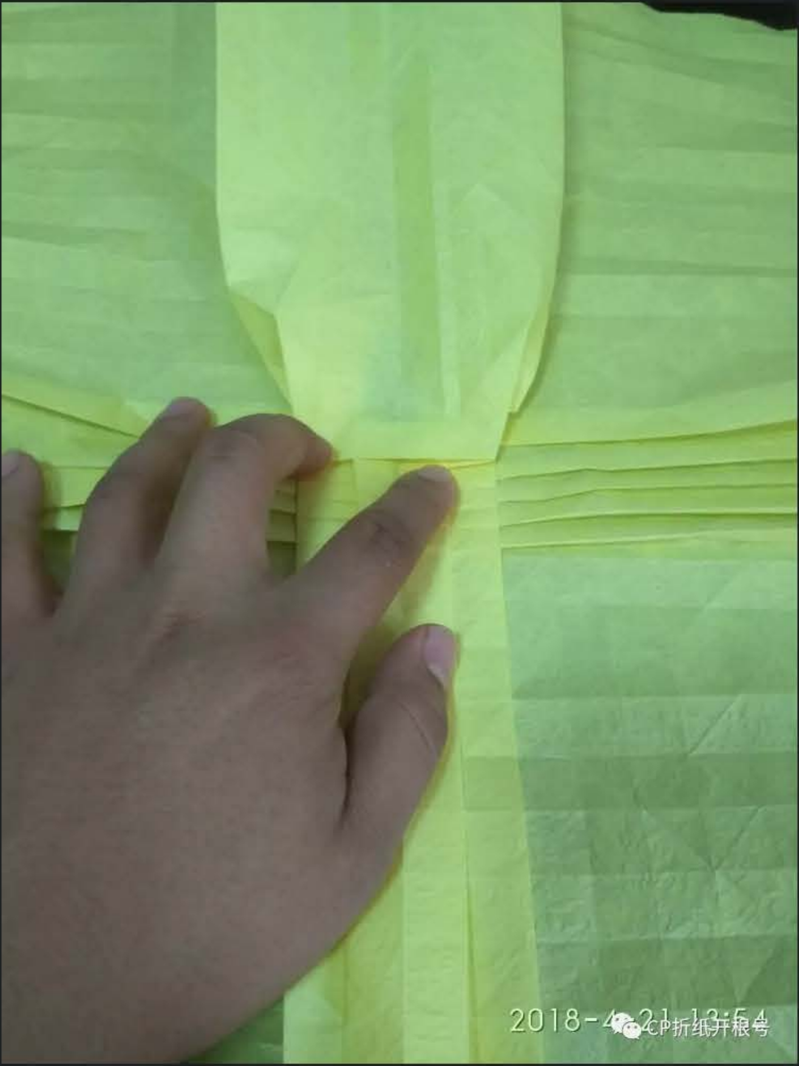


By processing the surroundings, the first step is to make a segment break in the vertical direction.

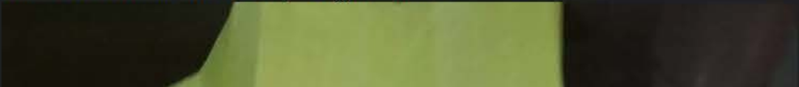


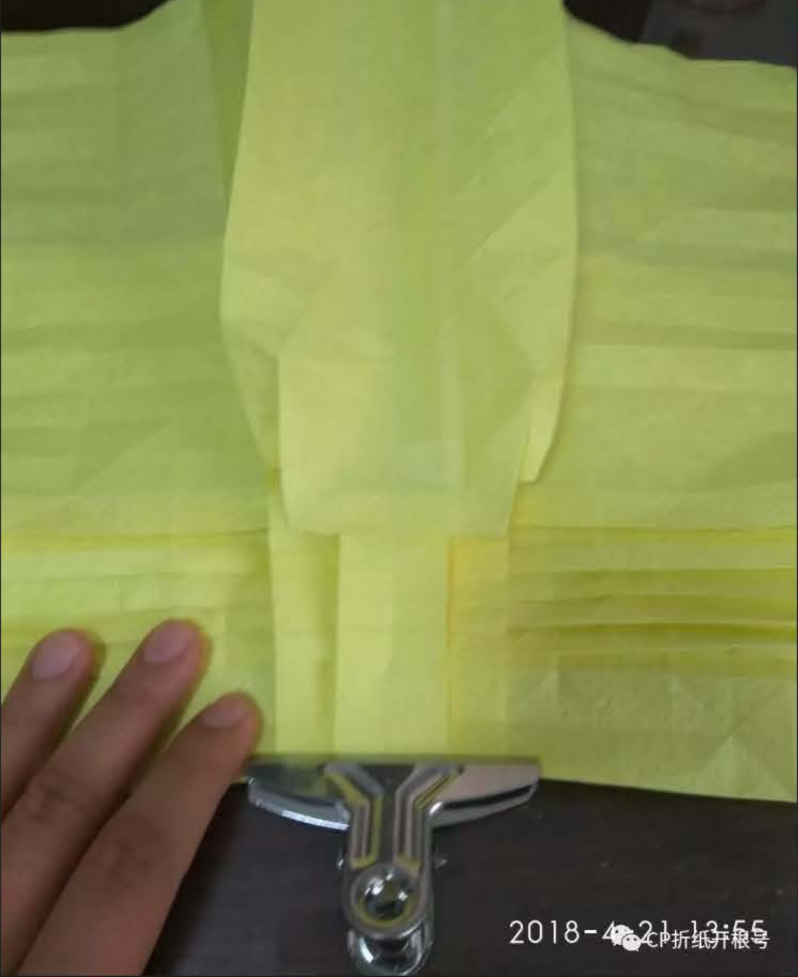
2018-4-21 13:53

CP折纸开根号

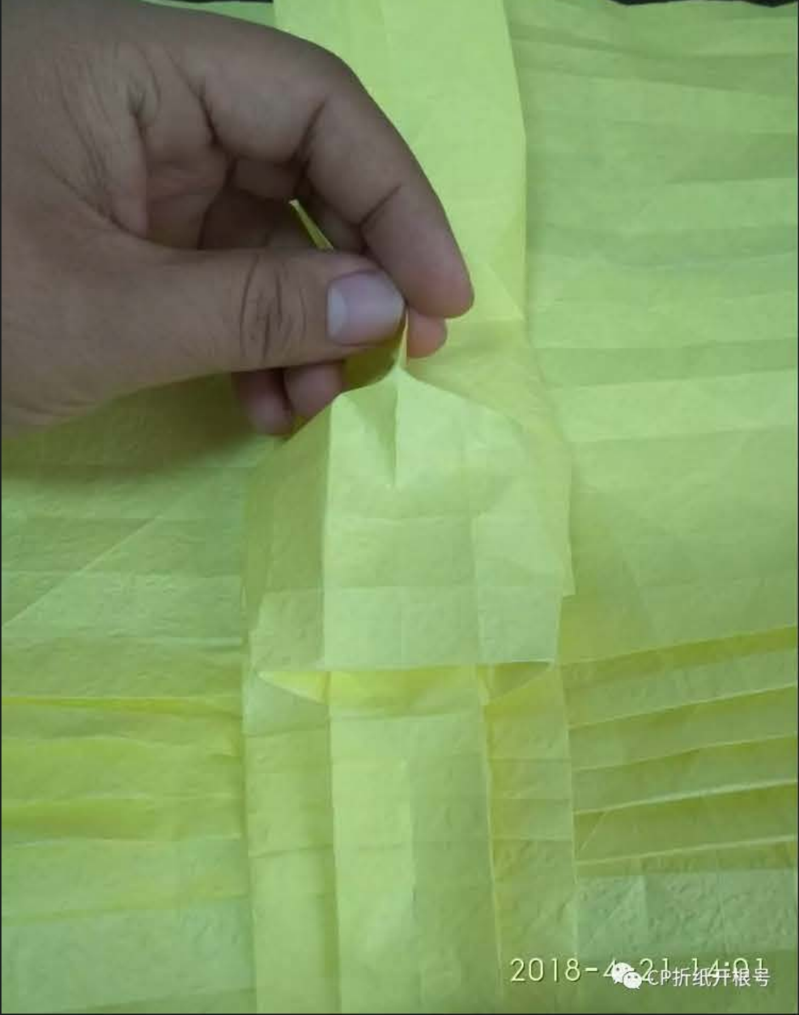


Below we continue to trim the pentagon structure



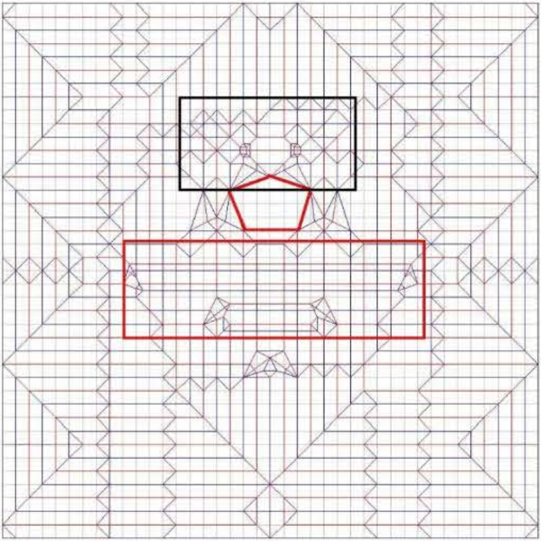


cp折纸开根号



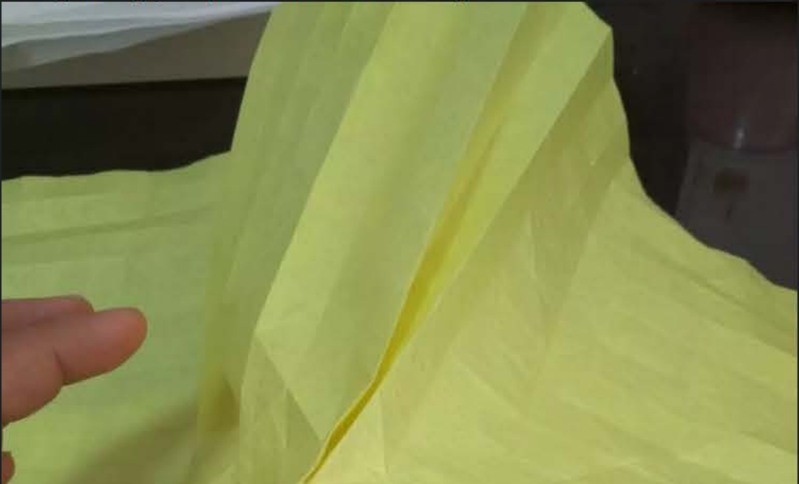
CP折纸开根号

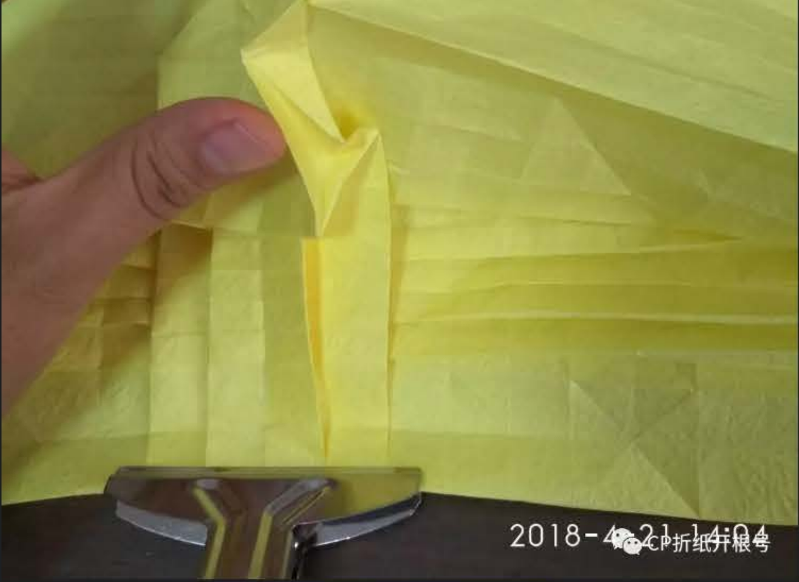
The next trimming will use the structure in the black box in the picture below. Here everyone must pay attention to details when gathering.



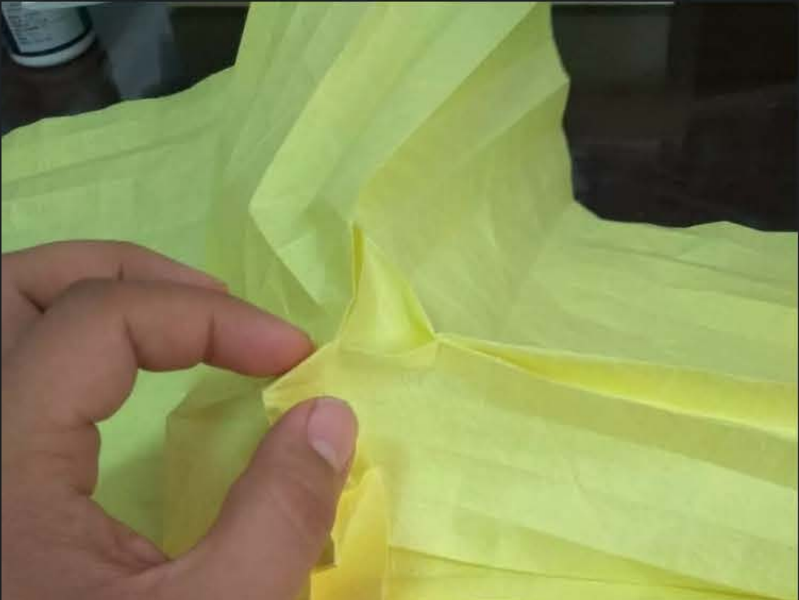
CP折纸开根号

First open the paper layers on the side and turn up





cp折纸开根号

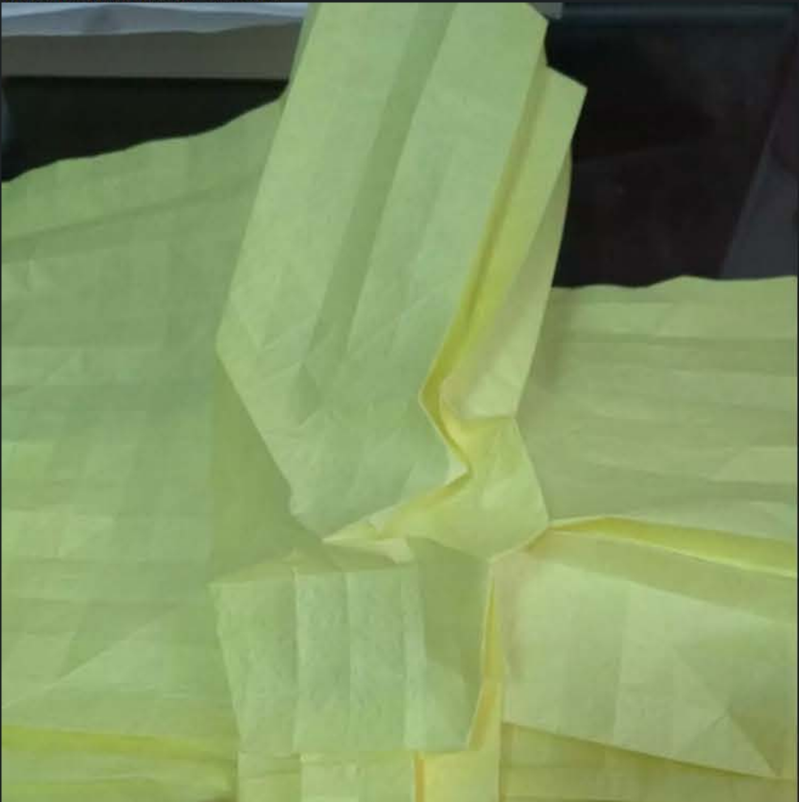


2018-4-21 14:05

cp折纸开根号

2018-4-21 14:09
CP折纸开根号

Trim the structure on one side



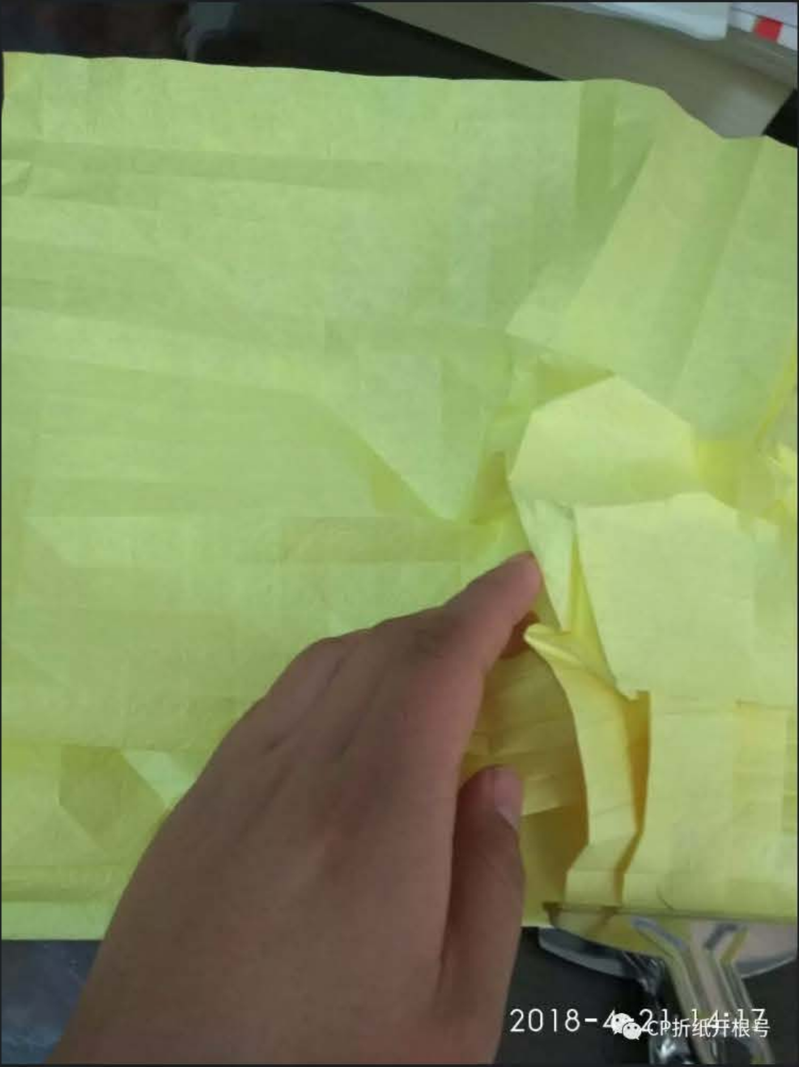
2018-4-21 14:12

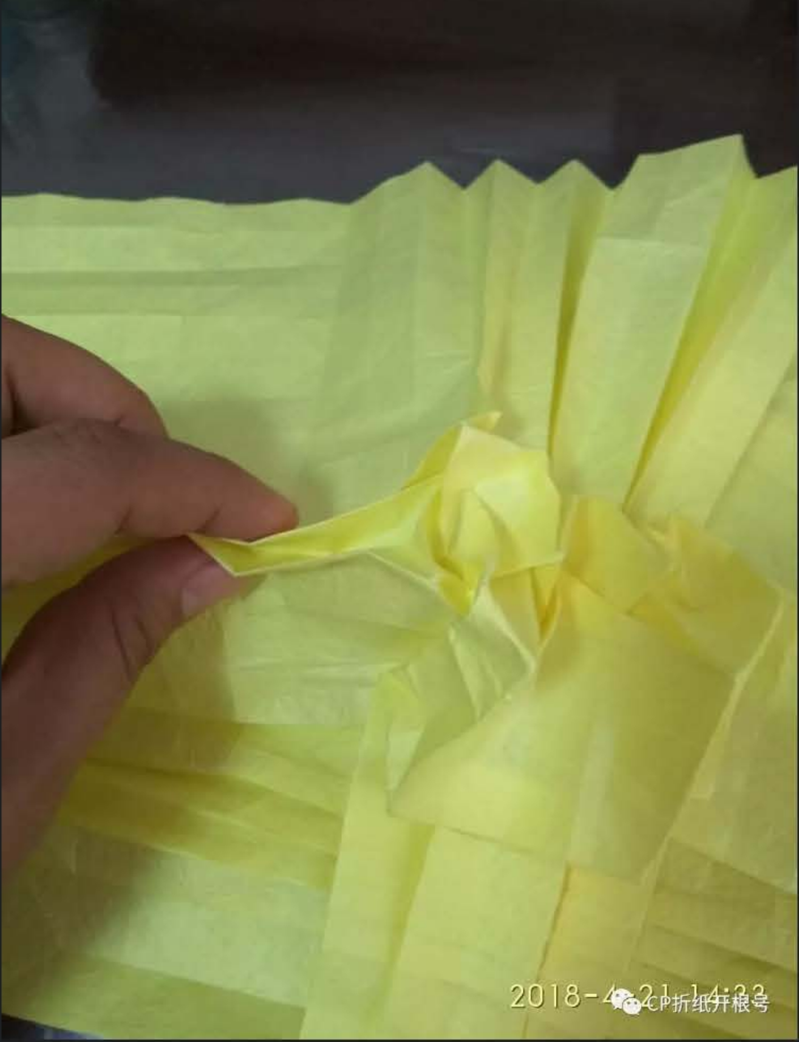
CP折纸开根号

2018-4-21 14:14

CP折纸开根号

Do the same for the other side

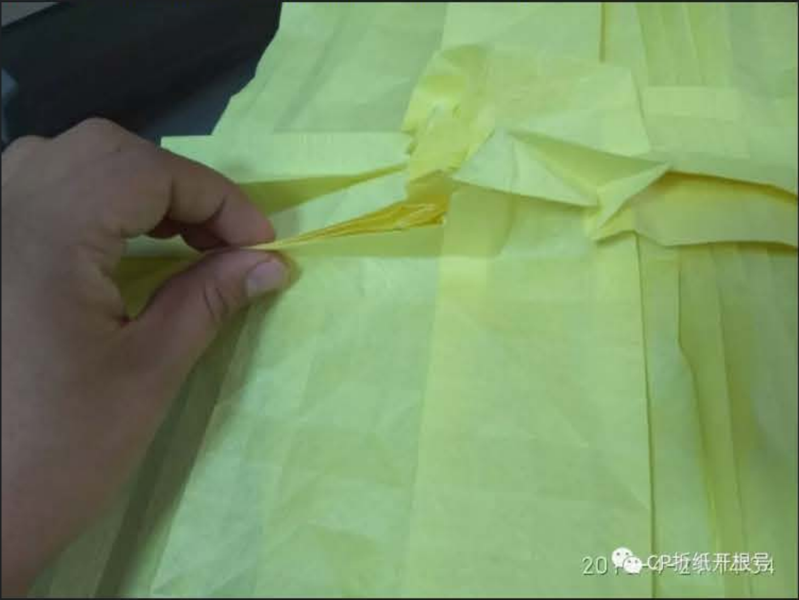




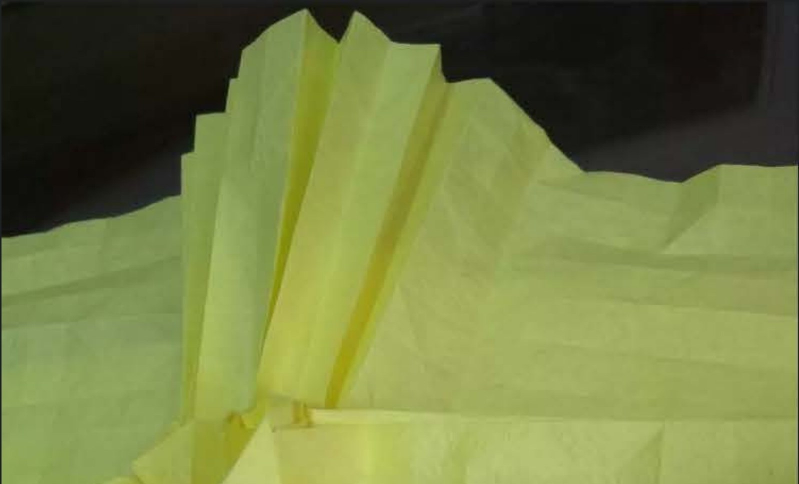
2018-4-21 14:23

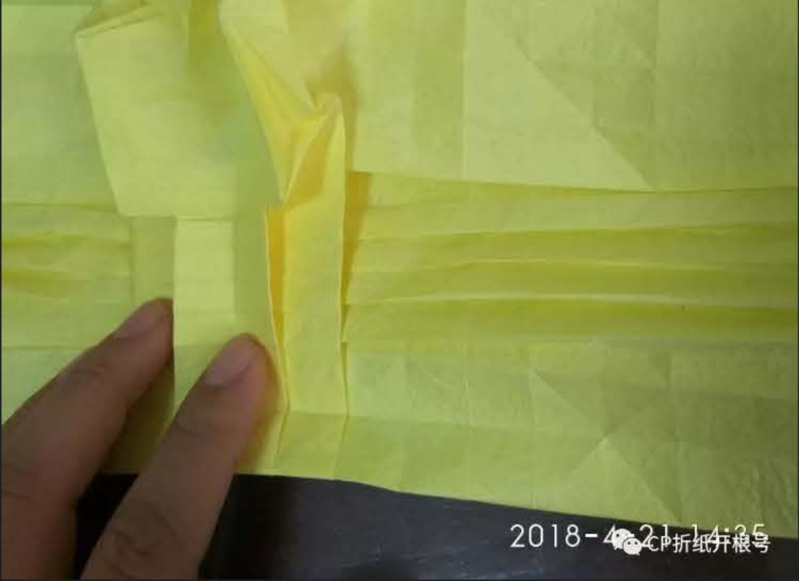
CP折纸开根号

Here we use the structural relationship to make vertical peak-valley breaks on it.



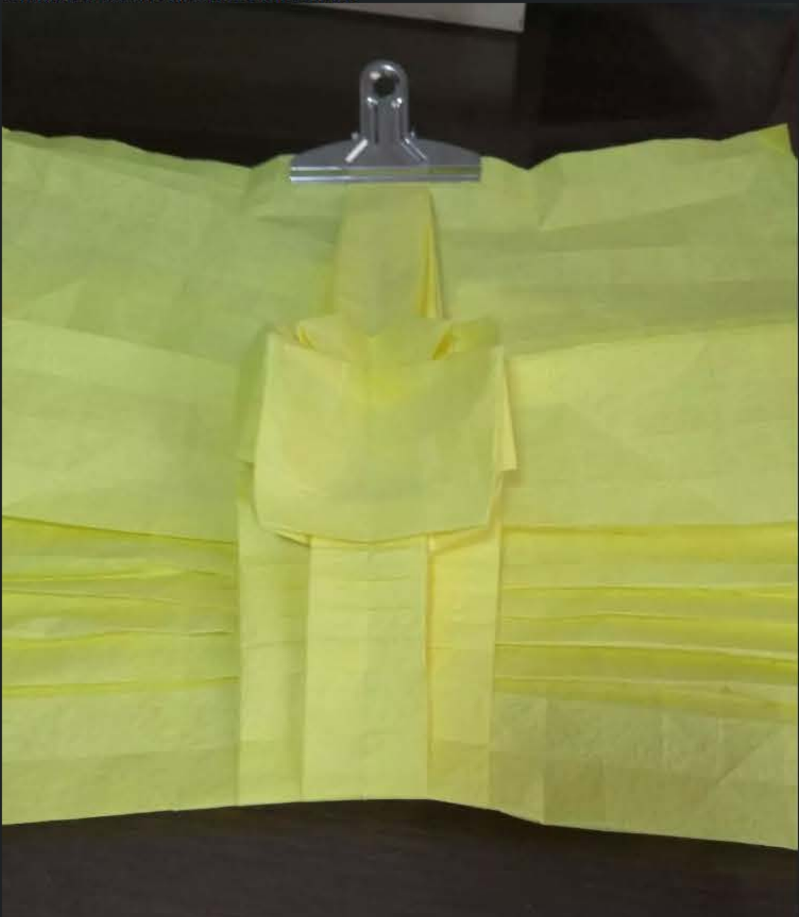
CP折纸开根号





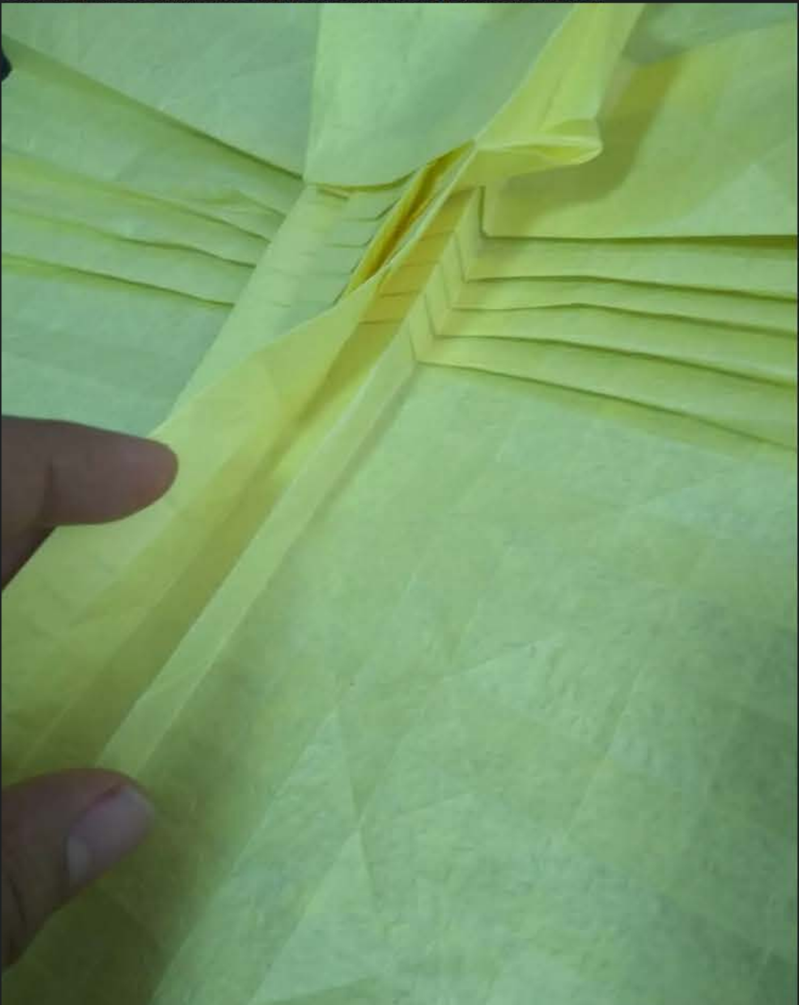
Simple fix on top

Straighten the perspective of the work



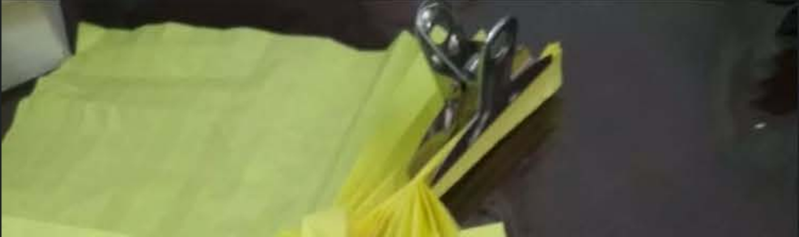
2018-4-21 14:35
cp折纸开根号

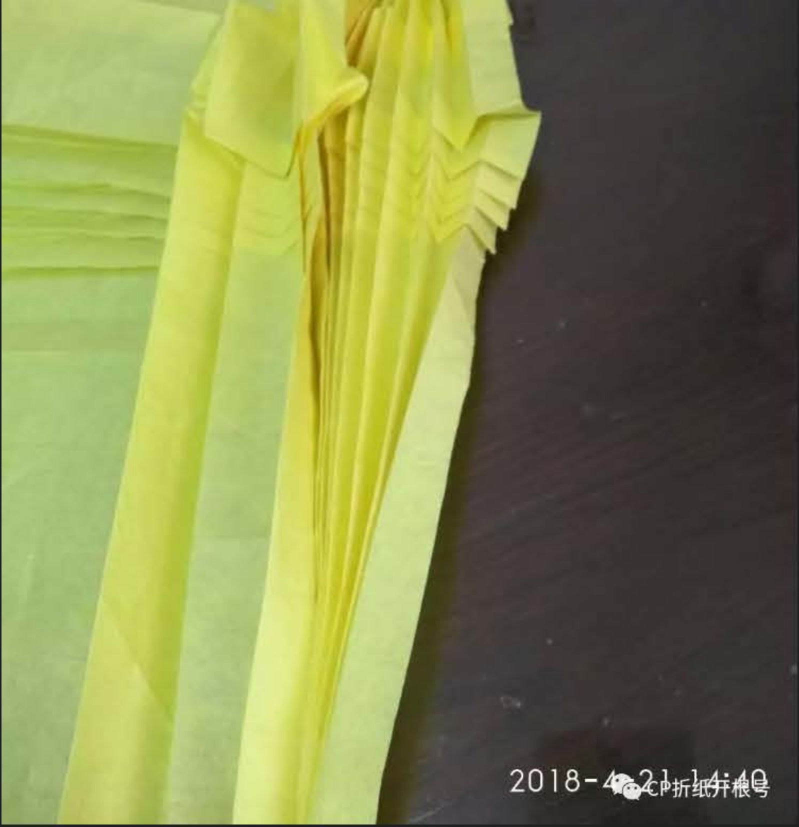
Now we pull the right side away and adjust the paper layer below



2018-4-21 14:27
CP折纸开根号

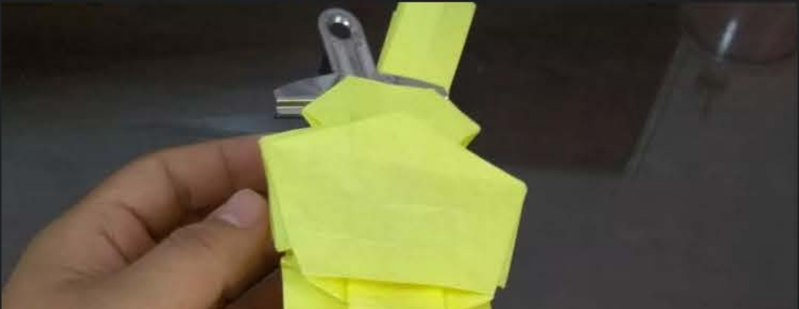
Take in the middle by one division

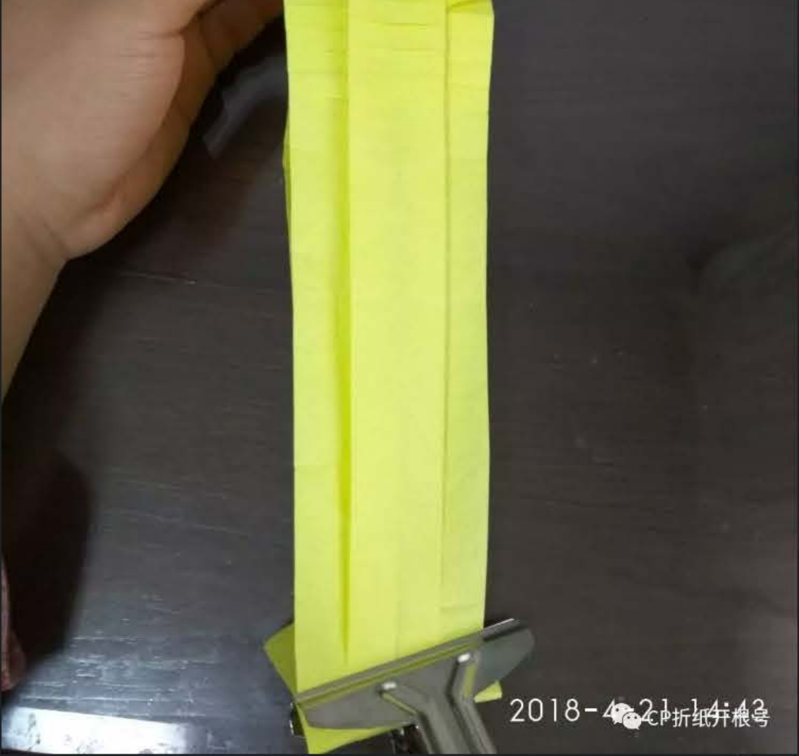




2018-4-21 14:40
cp折纸开根号

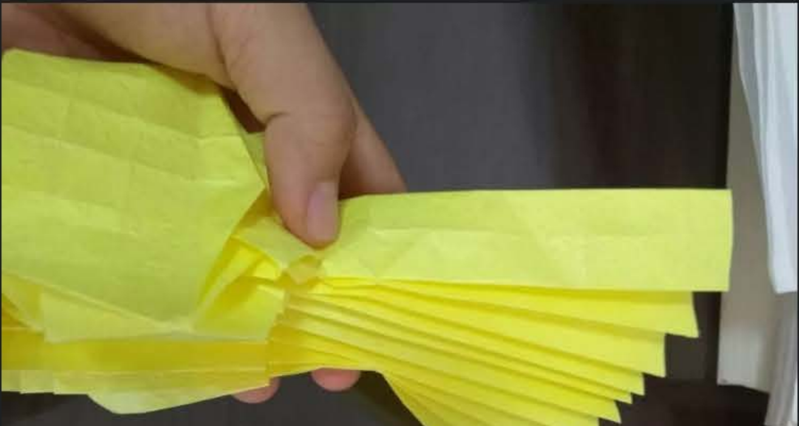
Both sides are taken in and ready for processing





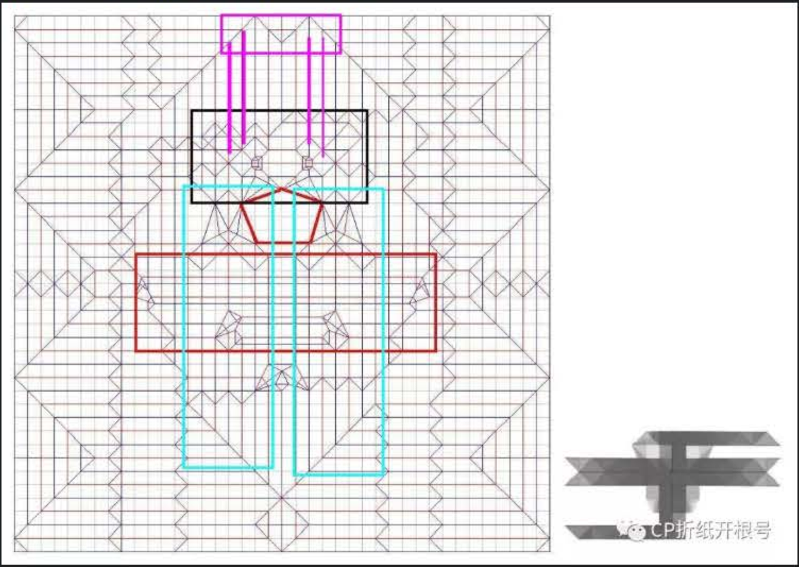
2018-4-21 14:43

cp折纸开根号



CP折纸开根号

Next we fold the purple part in the picture



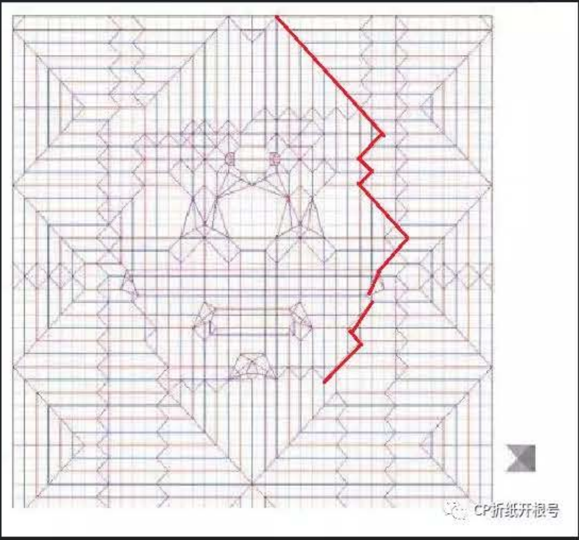
CP折纸开根号

2018-4-21 14:46

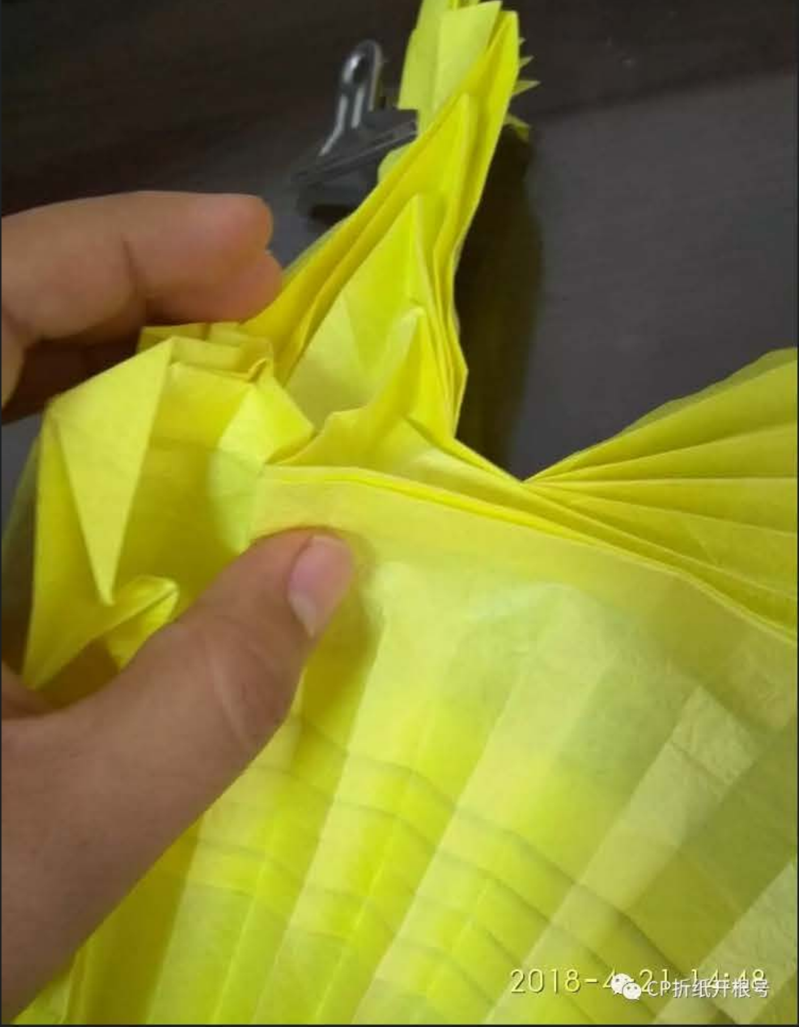
cp折纸开根号

2018-4-21 14:47
CP折纸开根号

Pull away from the right side, continue to aggregate, deal with the jagged structure in CP

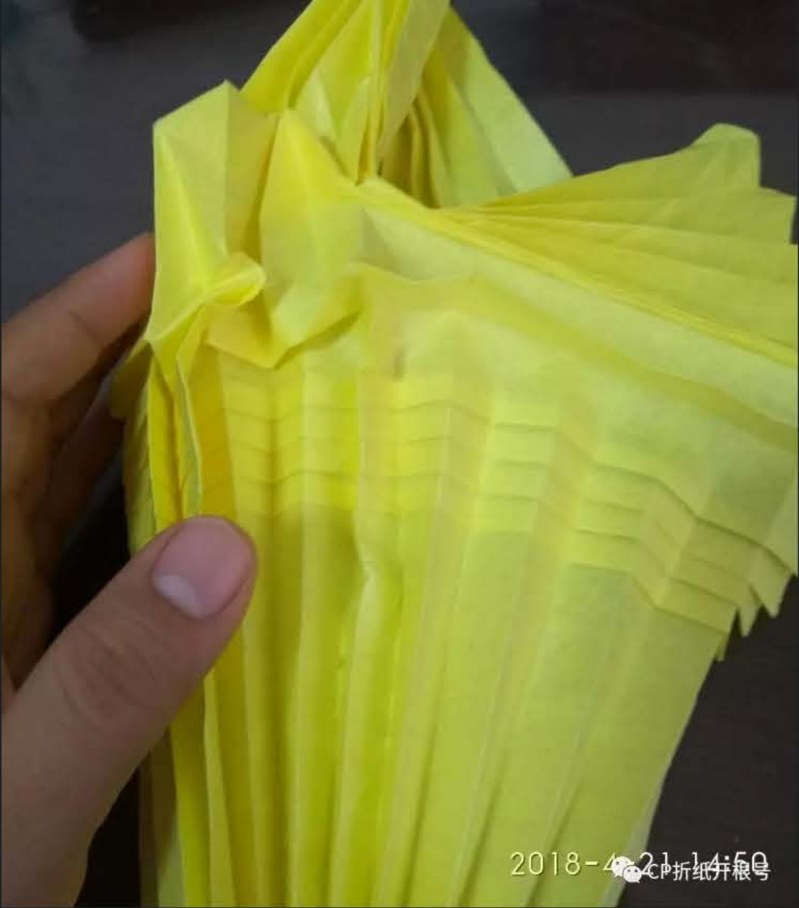


CP折纸开根号



2018-4-21 14:48

CP折纸开根号



2018-4-21 14:50
CP折纸开根号

Everyone should be familiar with this kind of treatment. If there are still students who can't do it, please look at the CP warming knowledge to make up for it.

2018-4-21 14:52

2018-4-21 14:57

cp折纸开根号

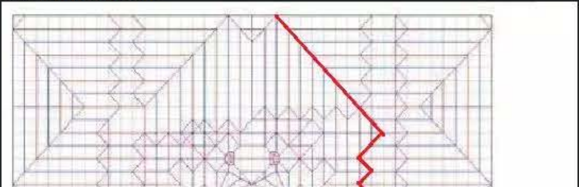
2018-4-21 14:57

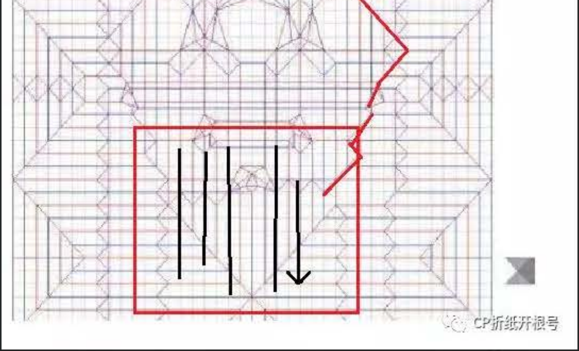
CP折纸开根号

Let me show you the paper layer structure on the inside

2018-4-21 14:59
CP折纸开根号

At this point, we have processed the jaggies. As for the related structures at the bottom, we don't need to worry about them first, but just put them in the vertical direction in the black box as shown below.



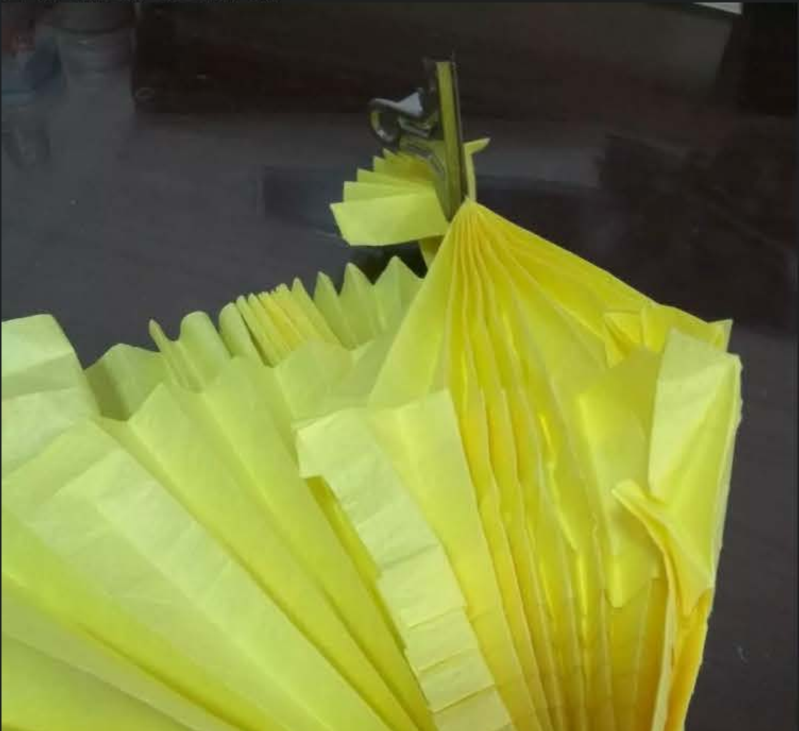


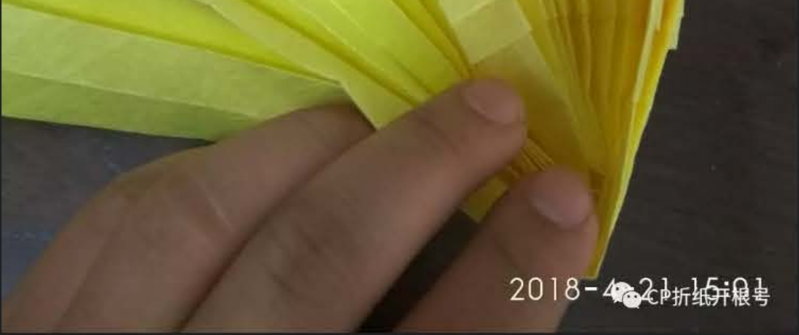
CP折纸开根号

2018-4-21 15:01

cp折纸开根号

Do the same for the other side





2018-4-21 15:01

CP折纸开根号

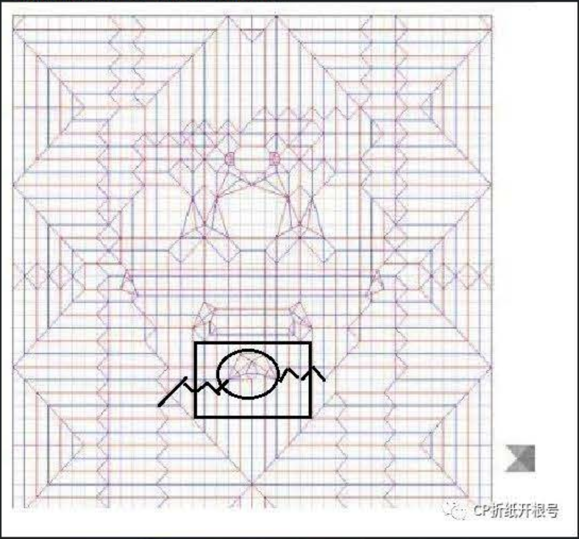
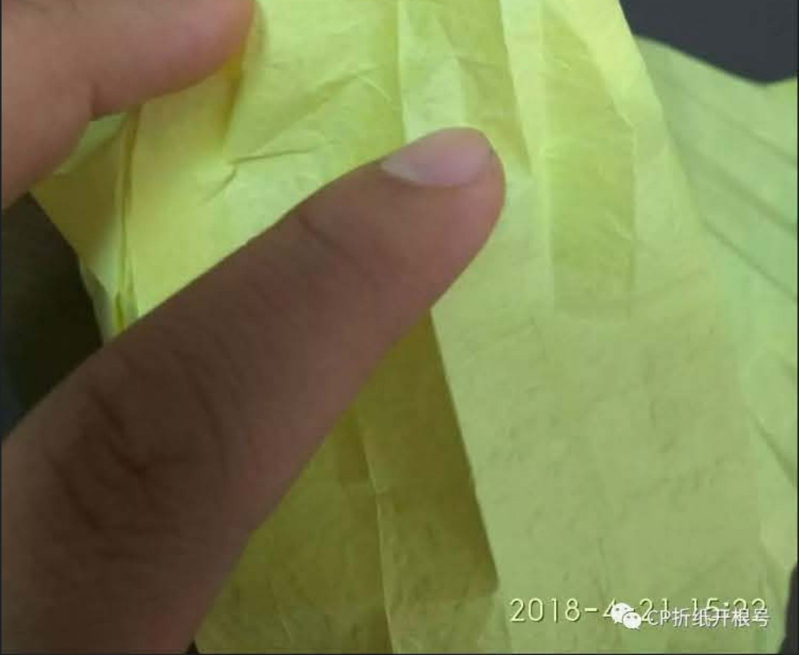
2018-4-21 15:21
CP折纸开根号

After the serrations on both sides are gathered, we then fold down, and the lower part is a bit difficult.

As shown in the following figure, we first aggregate the multi-graph related structures in the circle in the figure below, and then turn by the small sawtooth on both sides to complete the aggregation of a pair of pliers.



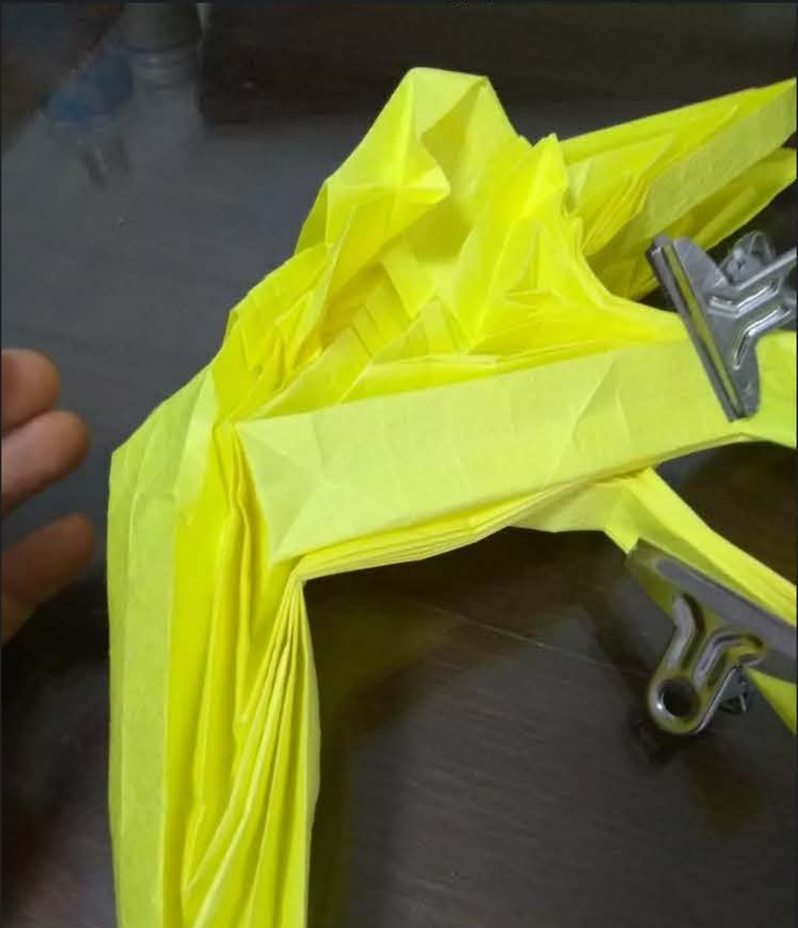
CP折纸开根号



2018-4-21 15:22
CP折纸开根号

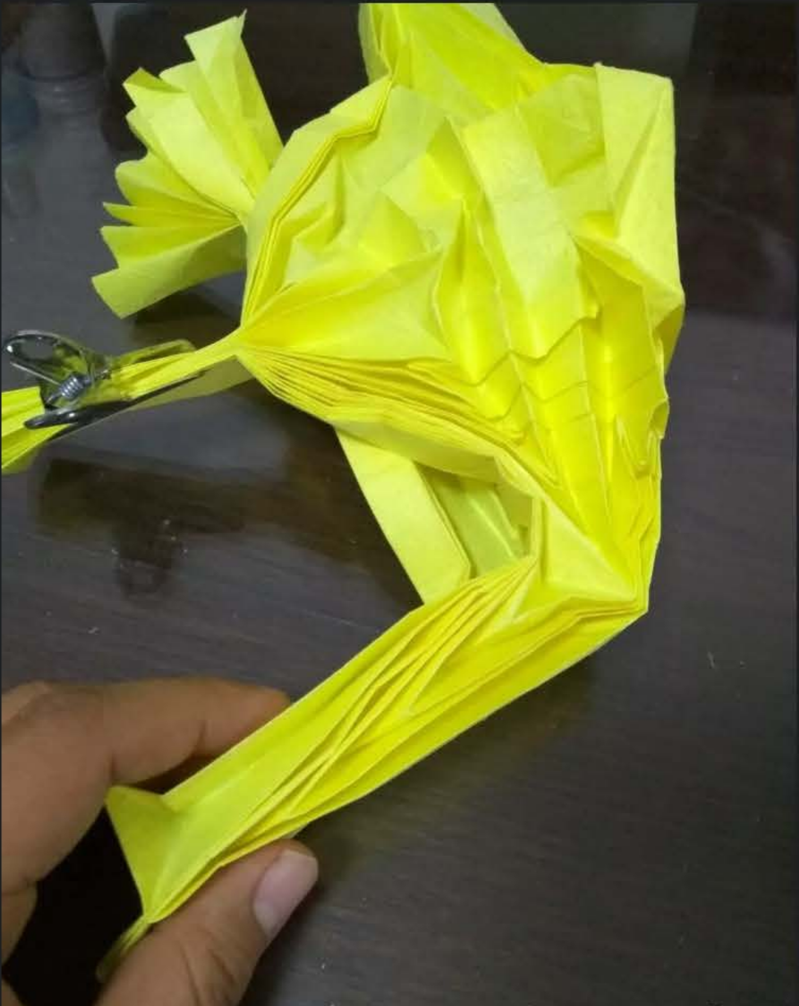
2018-4-21 15:24
cp折纸开根号

Here, for the sake of convenience, we will first aggregate the lowest pliers.



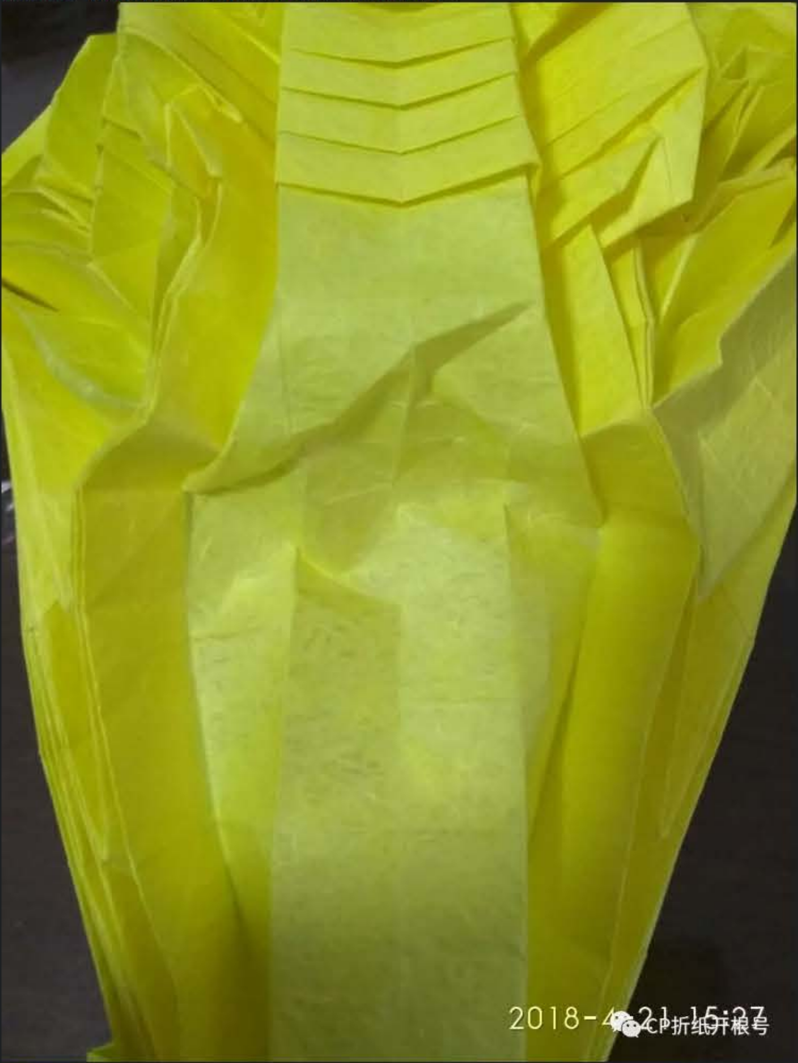
2018-4-21 15:27

CP折纸开根号

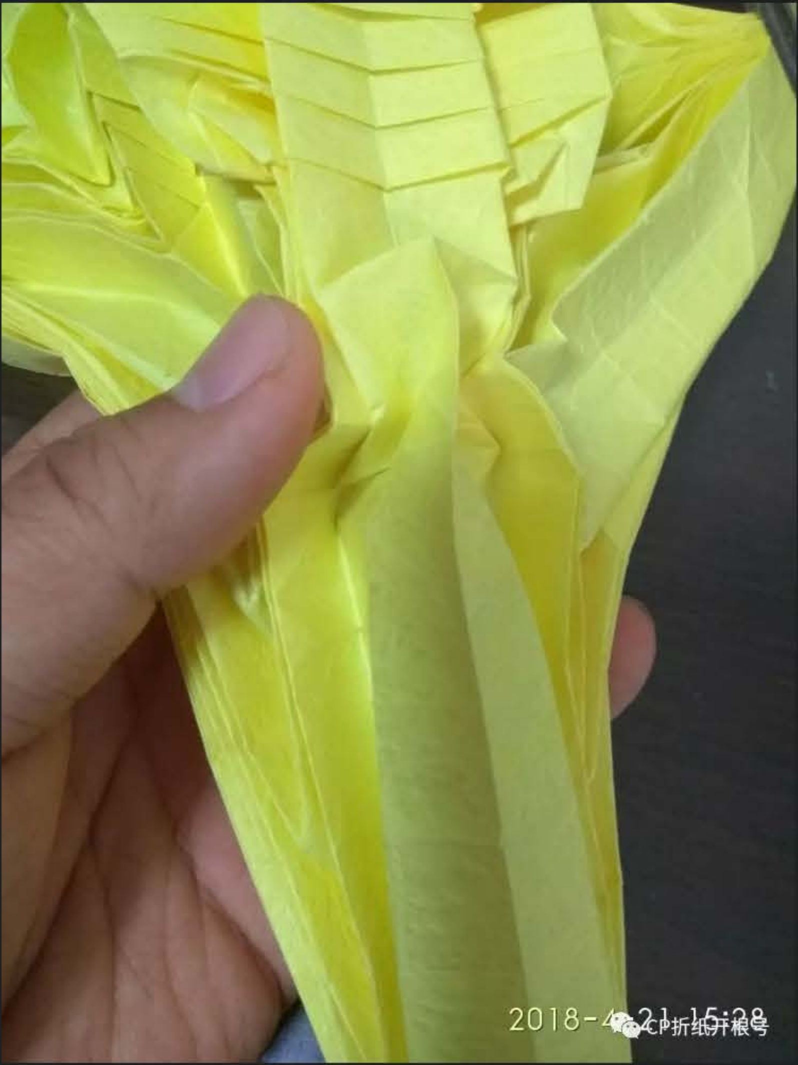


2018-4-21 15:27
CP折纸开根号

Next, we will pull the newly aggregated part from the middle to complete the multi-graphics related part of the CP mentioned above.



2018-4-21 15:27
CP折纸开根号



2018-4-21 15:28
CP折纸开根号

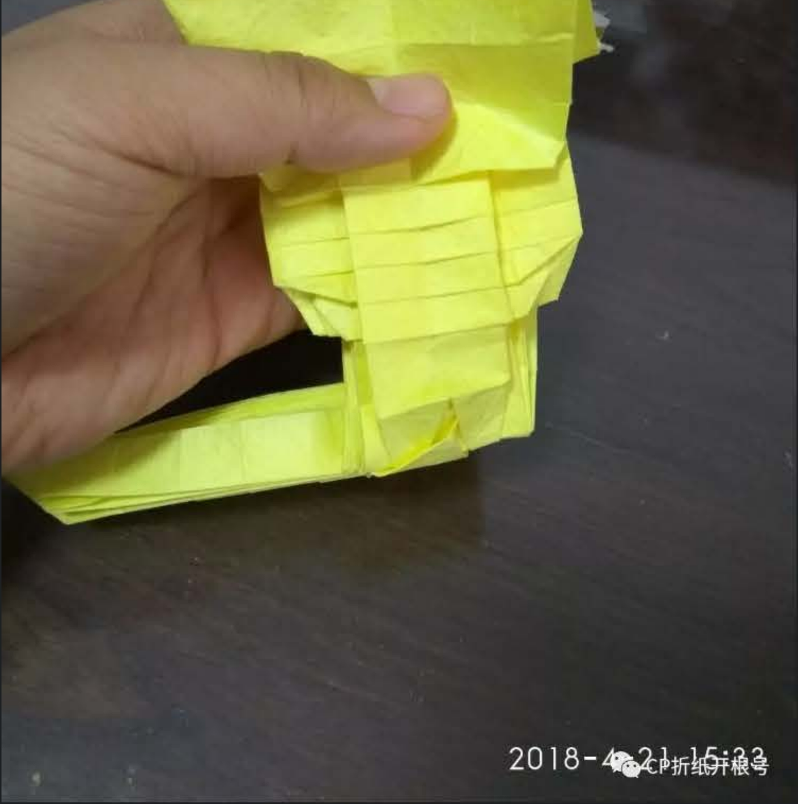
The aggregation here must pay attention to the way the paper layers are stacked, and carefully look at the peak and valley lines.

2018-4-21 15:29

CP折纸开根号

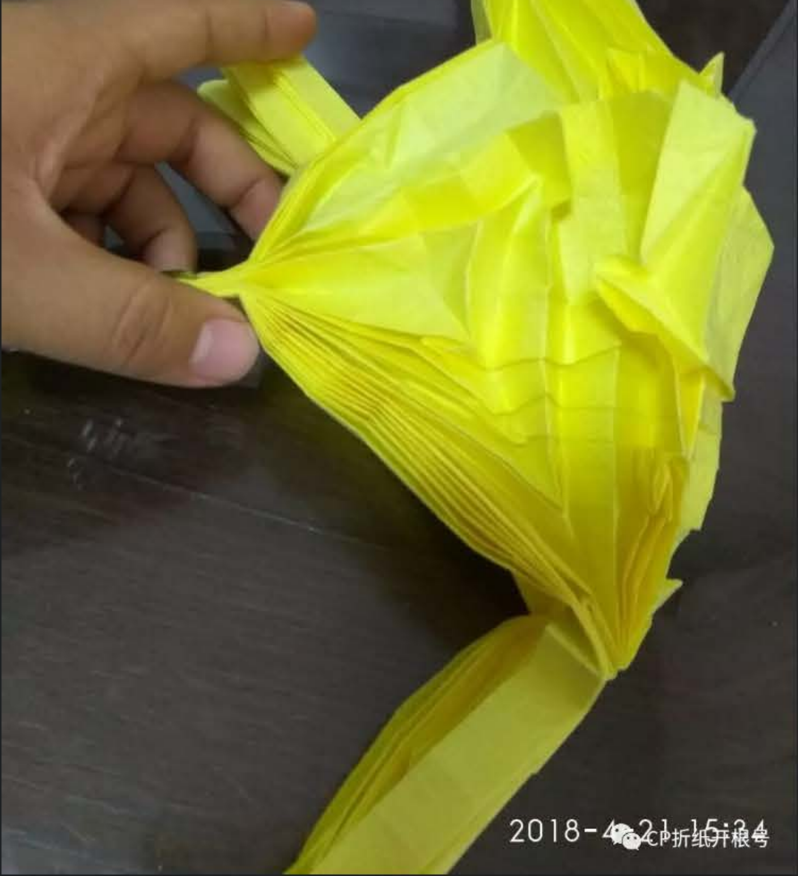
2018-4-21 15:23
CP折纸开根号

Below is a view of steering with short sawtooth



2018-4-21 15:23
cp折纸开根号

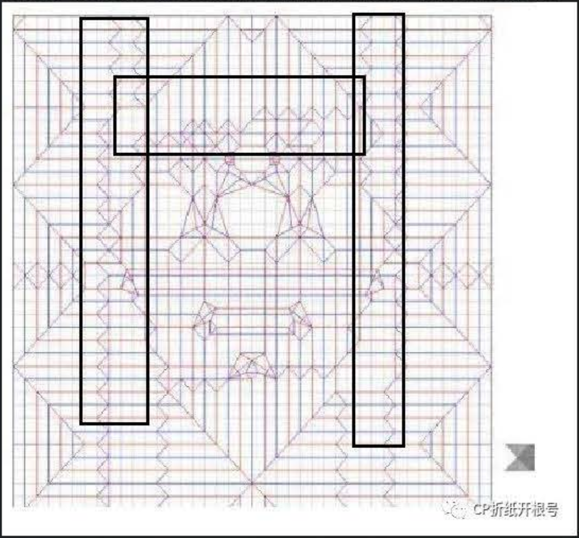
Let 's organize the lower side and put both sides in

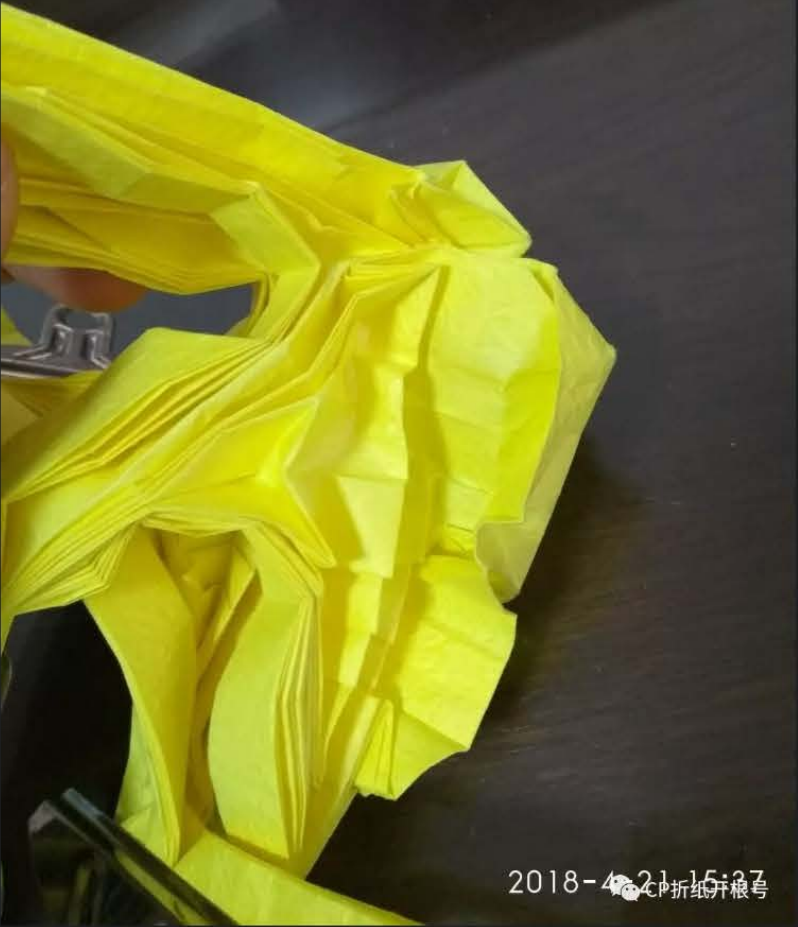


2018-4-21 15:34

cp折纸开根号

Next, as shown in the figure above, fold the upper part backwards, and then deal with the upper part separately. The basic idea is the short sawtooth in the three black boxes in the figure below. Let's use these lines in turn to turn in multiple layers .



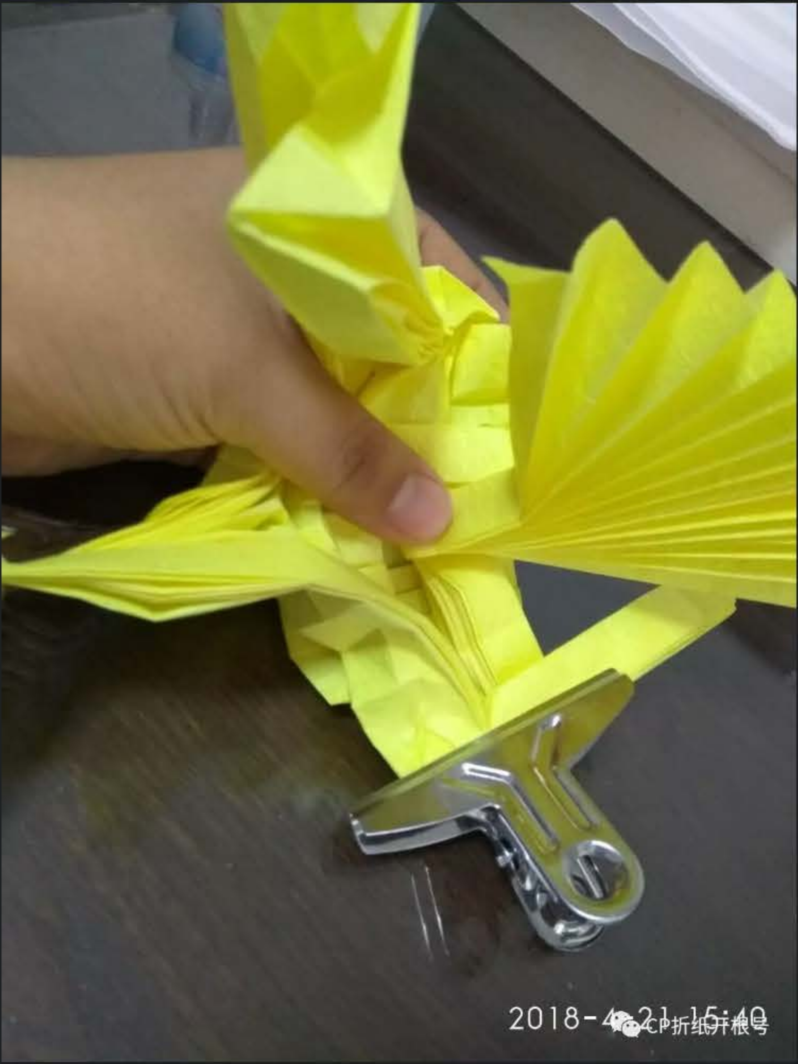


2018-4-21 15:27
CP折纸开根号

Here is also a multi-paper layer transfer using short sawtooth

2018-4-21 15:39

CP折纸开根号



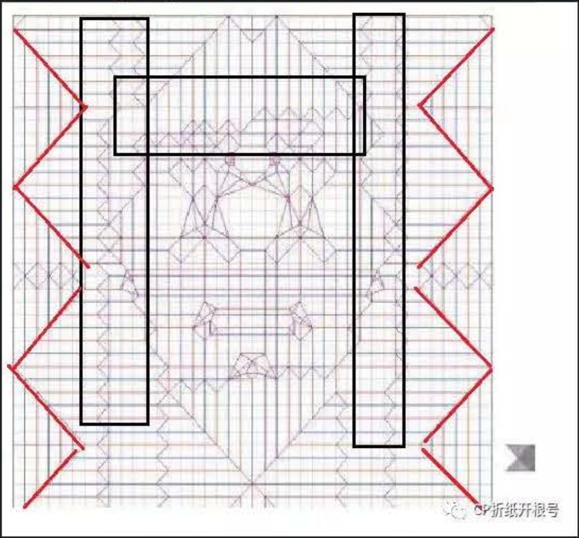
2018-4-21 15:40
cp折纸开根号

Steer the same way to the left and right

2018-4-21 15:41

cp折纸开根号

Finally we separate the eight legs from the sides



2018-4-21 15:42

cp折纸开根号

2018-4-21 15:42

CP折纸开根号

As shown in the picture above, we have finished the polymerization, and the plastic surgery is relatively simple. First, fold the abdomen in the picture above, then fix the eight legs with glue, and finally arrange two pliers and the head.

I believe everyone will be fine as long as the polymerization is successful, come on!

So, this issue is here!
See you next time!
