Origami Sharing Series No.45 Total 114th issue

Original Origami Student Takayama CP Origami Open Root2019-10-06

Hello everyone, welcome to CP Opening!

Today, let 's talk about the folding method of the shoulder hook. Let 's first enter this issue and talk about,

Talk about this issue, pole hook

Hooks (alias, short- *necked* locust, Chinese negative locust, pointed-headed grasshopper, small-pointed grasshopper, etc.), *Atractomorpha sinensis* Bolvar, an insect of the genus Negative locust of the family *Aceridae* It is a pest widely distributed in Northeast, North China, Northwest, Central China, South China, Southwest, and Taiwan. It feeds on adults and nymphs, affects plant growth, and reduces the value of vegetable products.

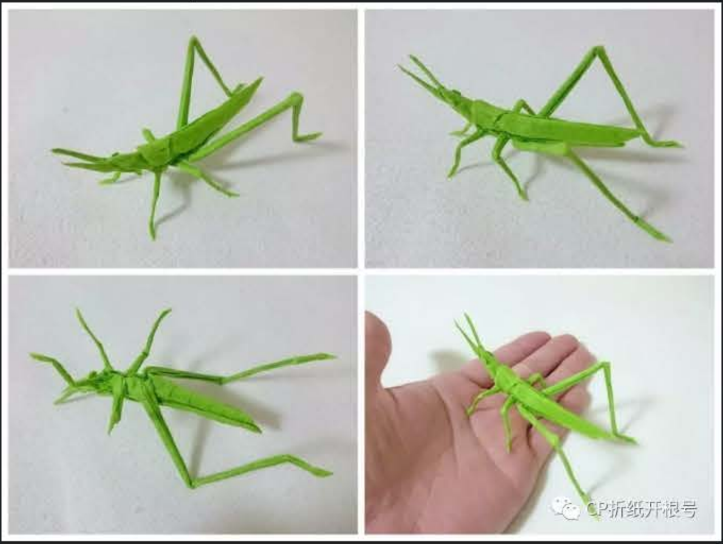
Occurred mostly in eastern China. In North China, there is one generation in one year and two generations in Jiangxi. They use eggs to overwinter in the trench soil. Late incubation period is from late May to mid-June, and emergence from July to August. It is an environment that has many habitats, high humidity, and dense dicotyledon plants, and it occurs on both sides of the irrigation canal.

In addition to harming rice, wheat, corn, tobacco, cotton, sesame and hemp, it also harms sweet potatoes, sugar cane, cabbage, cabbage, radish, beans, eggplant, potato and other vegetables, crops and garden flowers and plants.

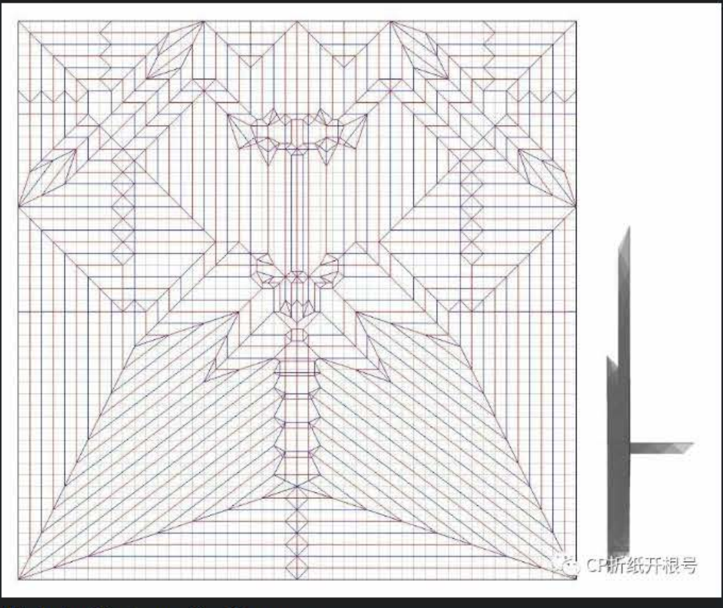
Feeding adults and nymphs on leaves affects plant growth and reduces the value of vegetable products. The eggs overwinter in the ditch edge soil; late May to mid-June is the incubation period, and they emerge as adults in July-August. The habitat that has a lot of ground cover, high humidity, and dense dicotyledon plants occurs on both sides of the shrub. Short-negative negative locusts usually occur sporadically. Fields are dominated by artificial capture.

Growing up in the Northeast, I caught them when I was a kid!😝

Below we enter today's work CP



CP折纸开根号



CP折纸开根号

Works in this issue: 48--48 squares

For the 48 equal divisions, the original author Teacher Imai used a design that almost maximized the hind legs, showing the longest thighs he thought, and using a lot of half grid designs on the back and abdomen to show more details It is really a work worthy of our common learning.

Everyone, find a relatively thin piece of paper and wire it with me!

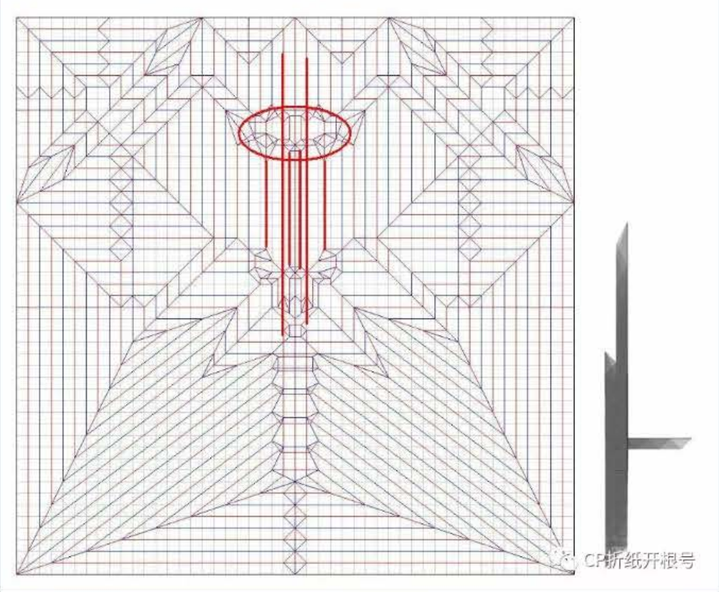
CP折纸开根号

CP折纸开根号

Unfold the paper we want to aggregate and start!

First of all, according to the figure below, we first fold the center peak, the same peak folds on both sides, and close the part outside the red line toward the center. At the same time, we gently squeeze out the circle. If you use wax paper, you can only say

"Pinch", be careful not to deform the paper.



CP折纸开根号

Below we continue to aggregate the lower part. Just now we have completed some small details of the upper part of the head. Following the figure below we make the part inside the black box to complete the shape details of the tail. After that, the longest hind legs came together.

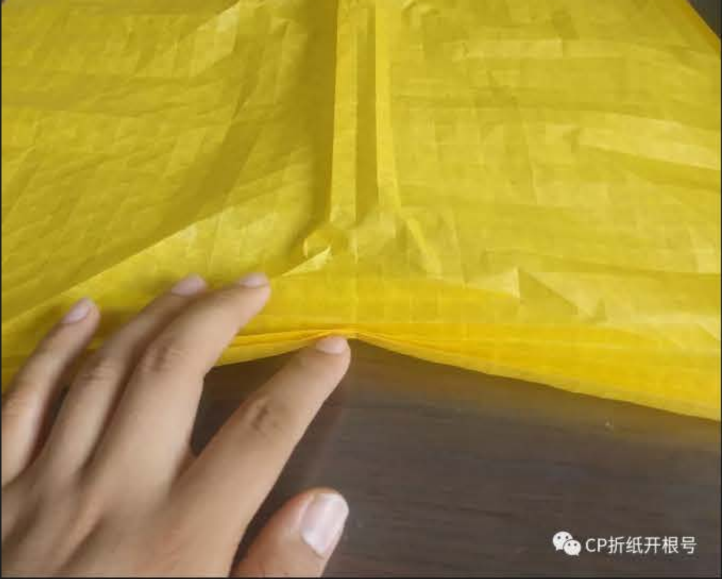
Here is a step-by-step conversion.



When the hind legs converge toward the center of the body, the jagged structure on the stomach is processed at the same time to complete the knots on the stomach.

CP折纸开根号

CP折纸开根号

The various graphic additions the author uses here are actually just to connect the shape of the tail he wants, so it may be a bit complicated.

Now we start to aggregate the upper part, first complete the part in the black box in the figure below, and then aggregate the red part.

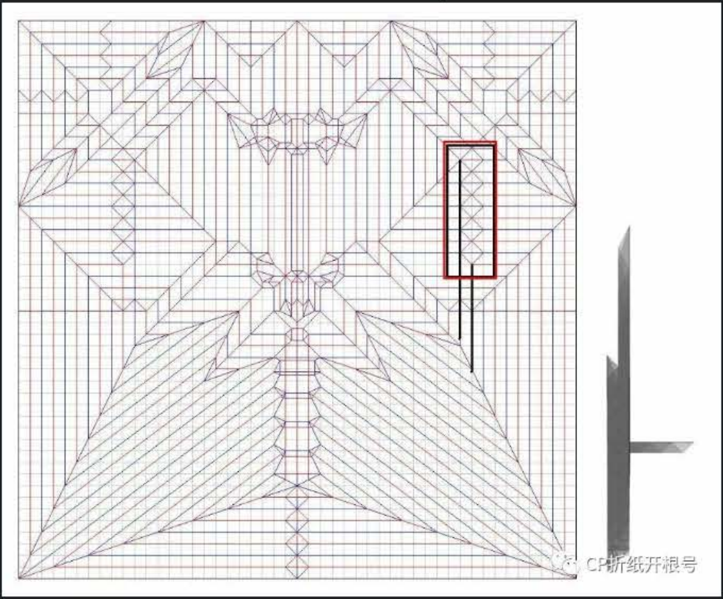
Basically, the aggregation is complete here, but there is a small place to talk about. The peak-valley break in the figure below is a short-line operation, but the small square is not completely connected to the long line, so you can try it on a small paper to understand it. How did this one-box-two-box hard operation come about!



CP折纸开根号

Let 's start shaping, here I give most of the pictures, I hope to help everyone!

An additional sentence is that I actually did n't fold so much, but I folded one for the actual shot. I really do n't know how to take small things. I do n't know how to use the phone 's camera function.

Come on, origami gentlemen!
See you next time!

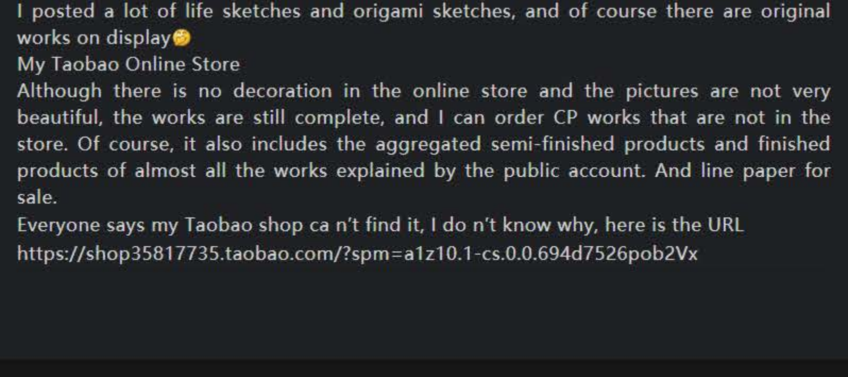
Once again, the name of the volcano 515650243 is the mountain origami player



I posted a lot of life sketches and origami sketches, and of course there are original works on display🤭

My Taobao Online Store

Although there is no decoration in the online store and the pictures are not very beautiful, the works are still complete, and I can order CP works that are not in the store. Of course, it also includes the aggregated semi-finished products and finished products of almost all the works explained by the public account. And line paper for sale.

Everyone says my Taobao shop ca n't find it, I do n't know why, here is the URL
