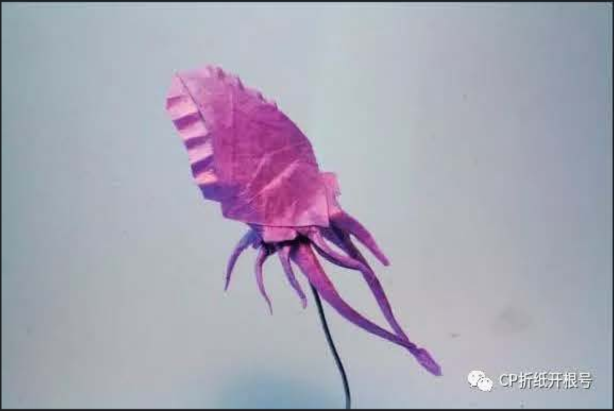
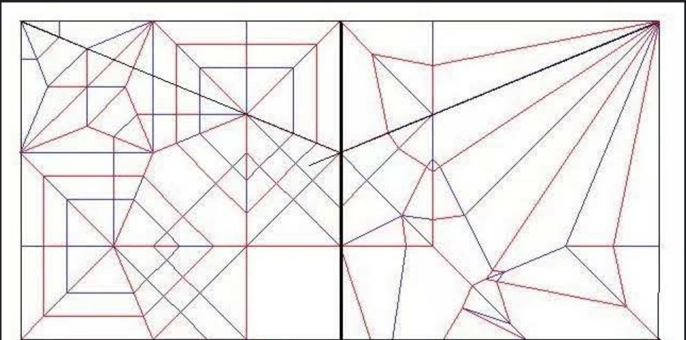
Origami Interactive Series No.14 Total 51st Issue

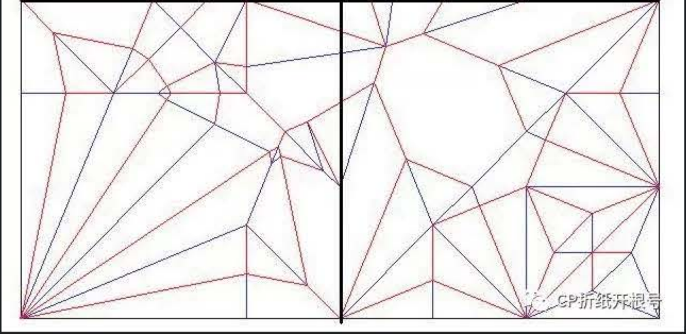
Origami students Takayama CP origami opening number 2018-08-14

Today, I will fold a non-snake-like work with everyone. This work was sent to me by a friend shortly after the public account was launched, but it has not been sent out. I recently organized it and finally met with you.



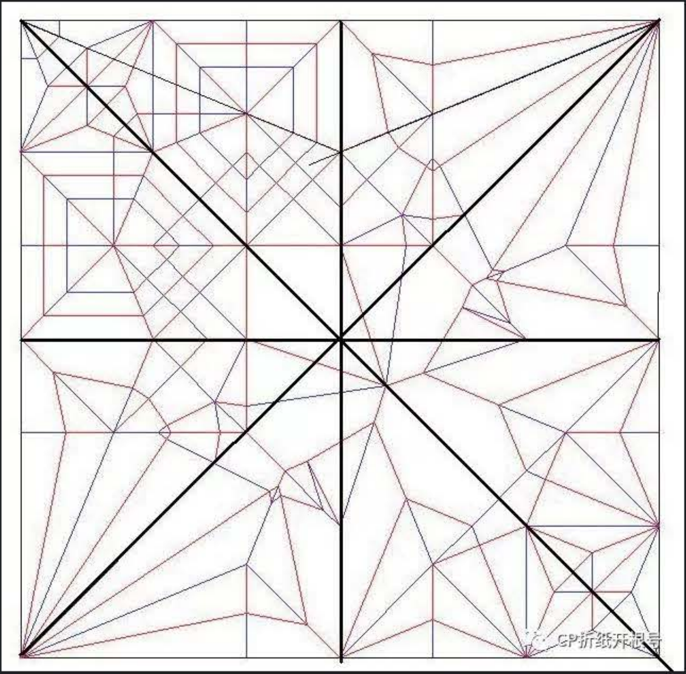
CP折纸开根号



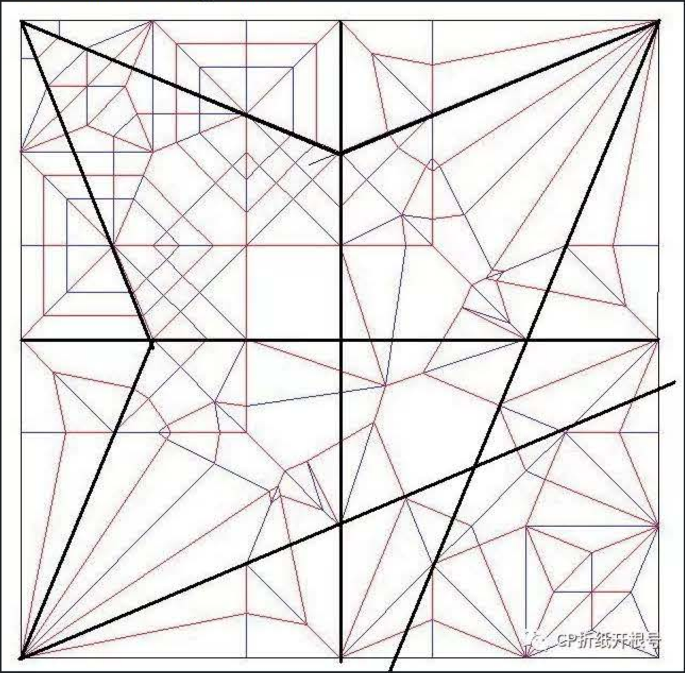


I have seen this picture, I believe that everyone has a little count, let's talk about the line

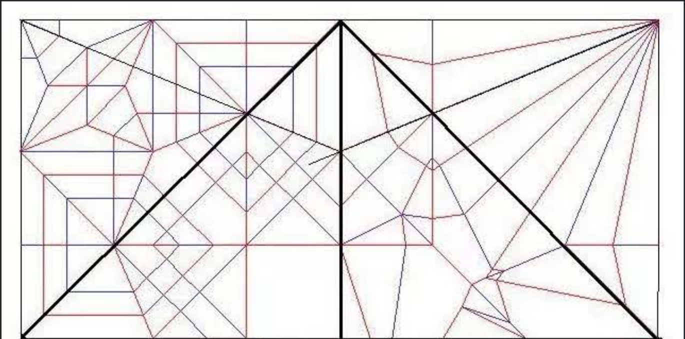
The first is the rice crack

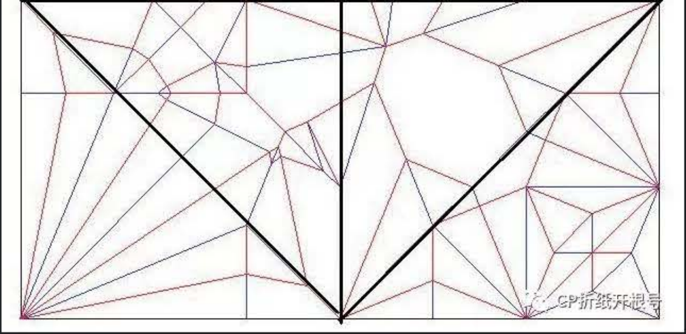


Next do a few 22.5 degree lines



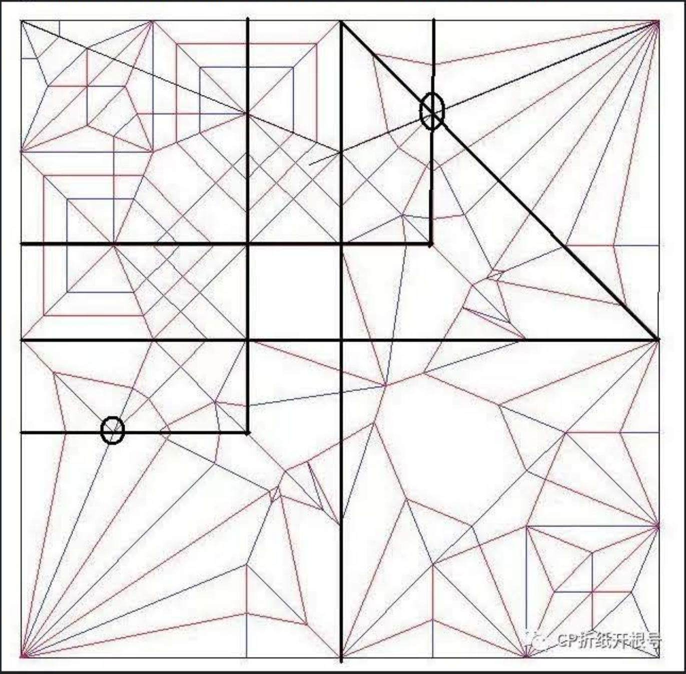
Four corners crease towards the center





CP折纸开根号

Pay attention to the retention of the intersection from here



CP折纸开根号

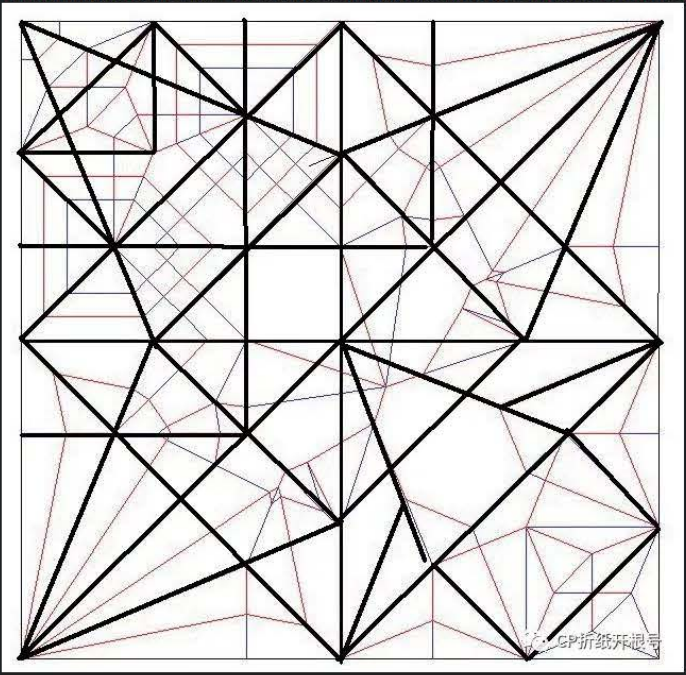
So far, as shown in the figure below, we have completed most of the lines. The remaining students with obsessive-compulsive disorder still have to work harder.

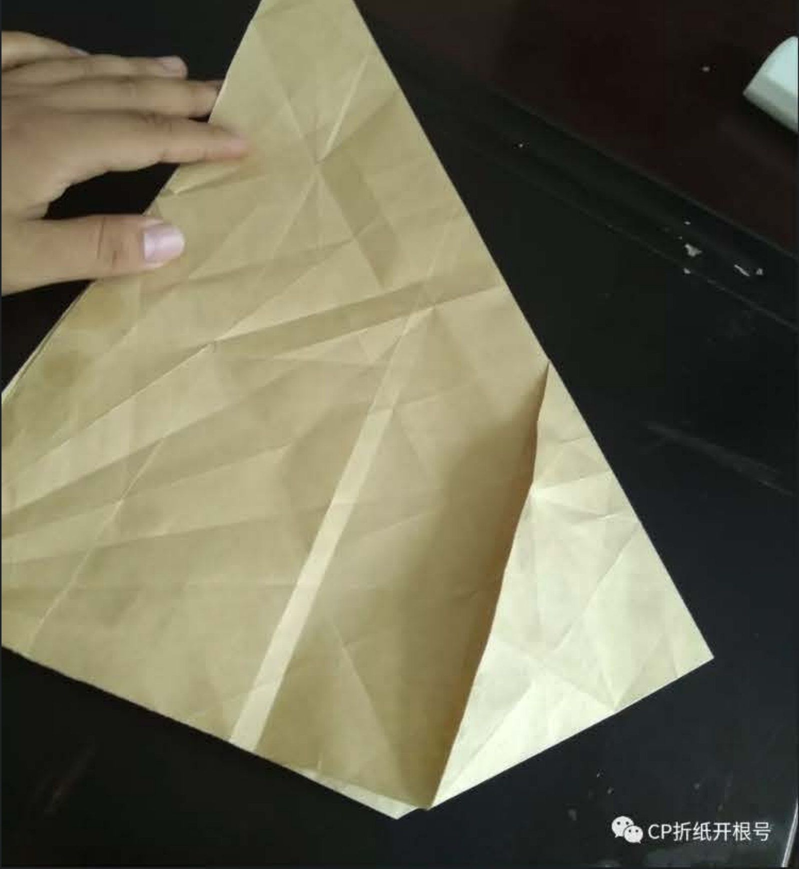


After hitting most of the lines, we can start to converge.

CP折纸开根号

Start diagonally and fold up

CP折纸开根号



CP折纸开根号

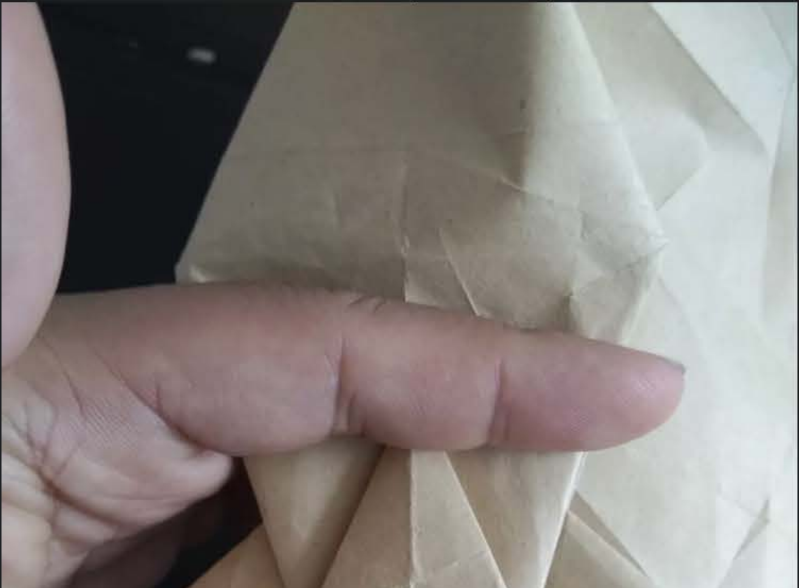
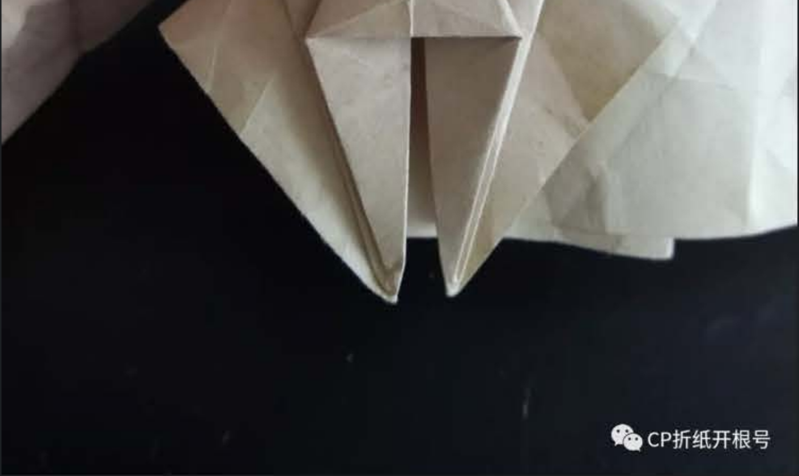
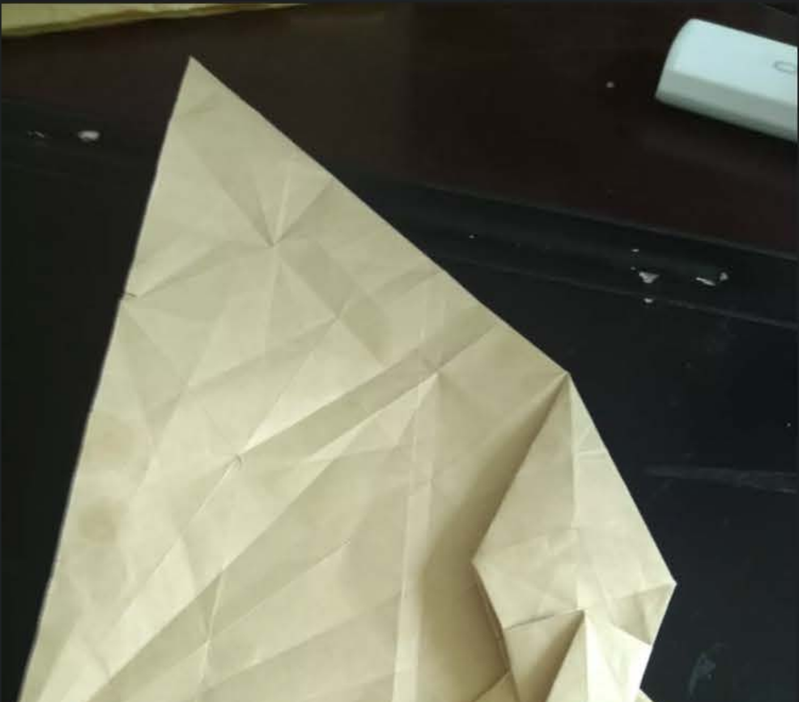
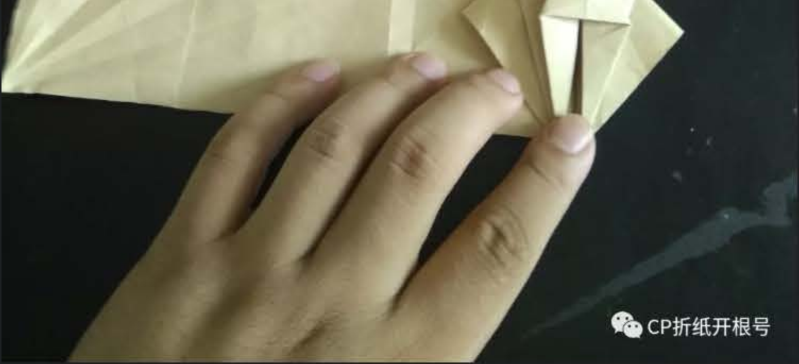
Here we want to fold inward instead of doing the basic shape as before





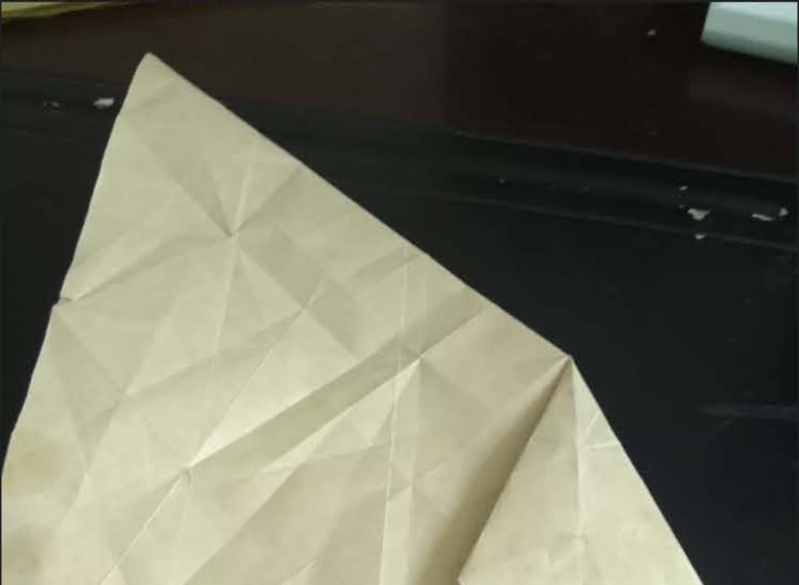
CP折纸开根号

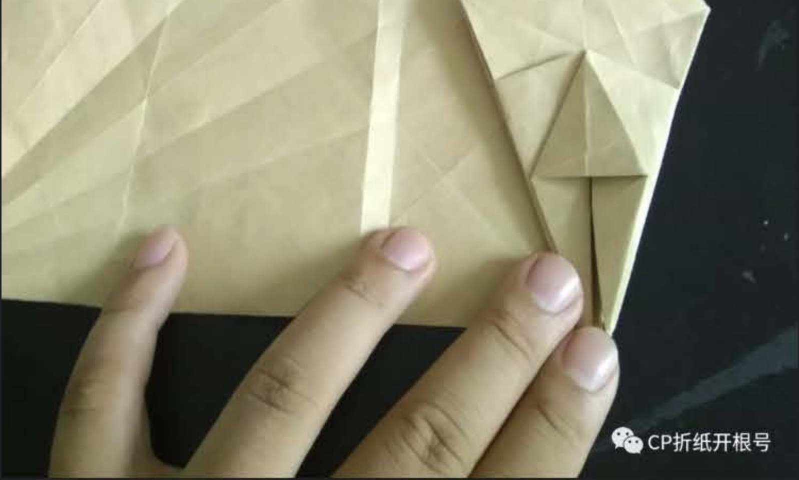




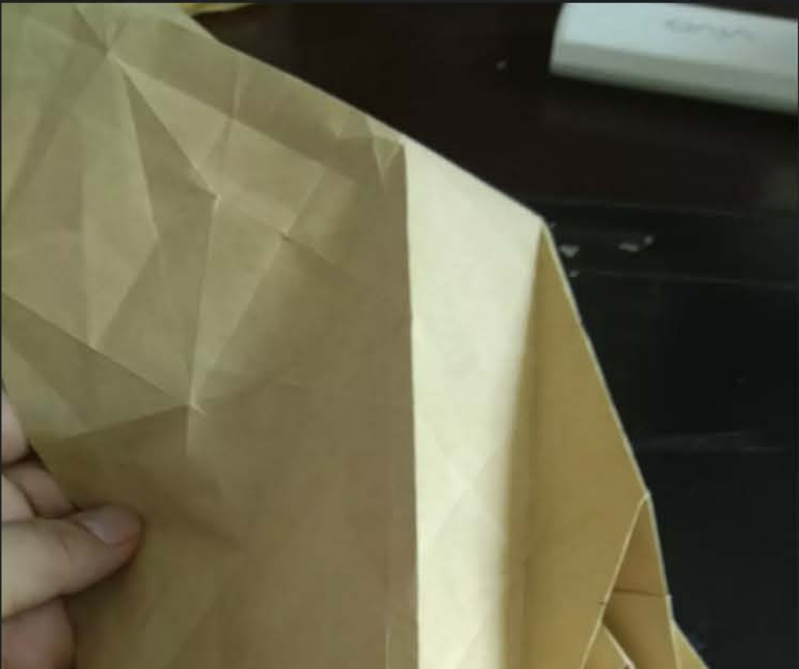
CP折纸开根号

Fold inwards on both sides



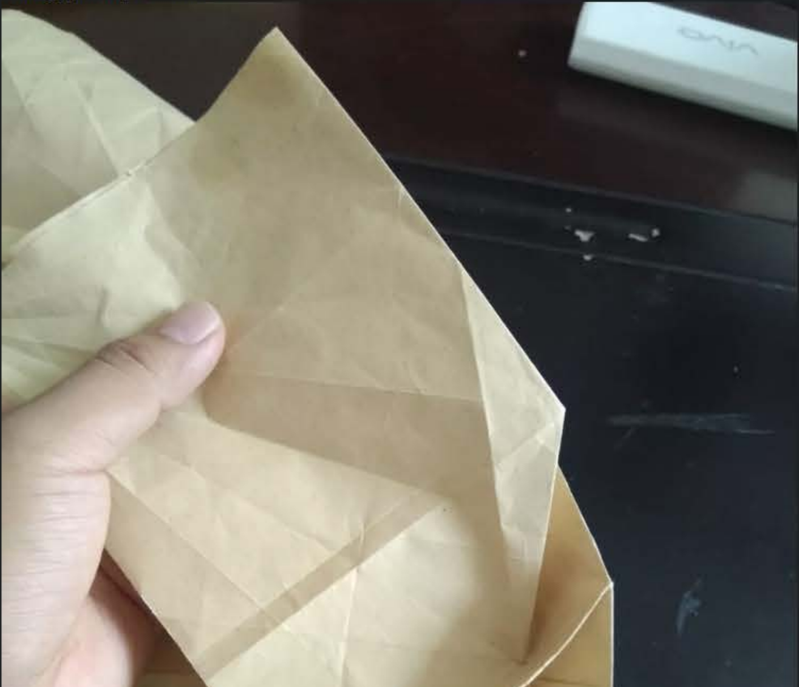


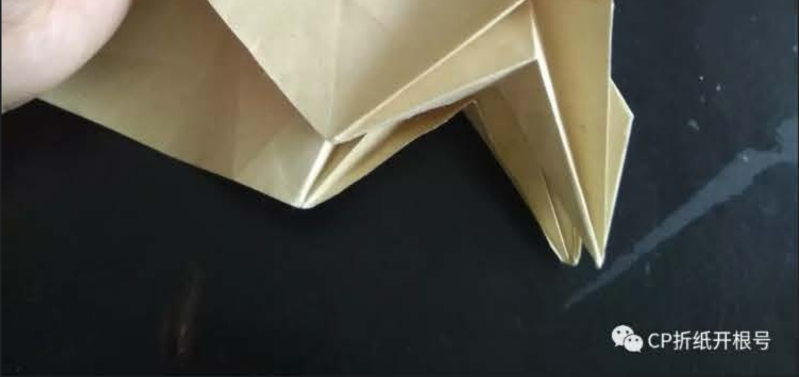
CP折纸开根号



CP折纸开根号

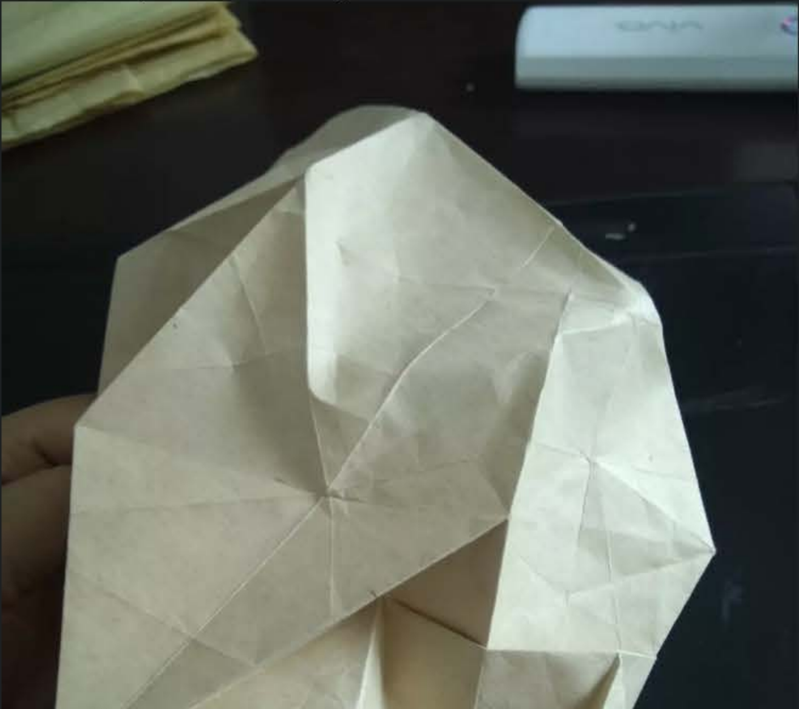
Gently pull up a corner

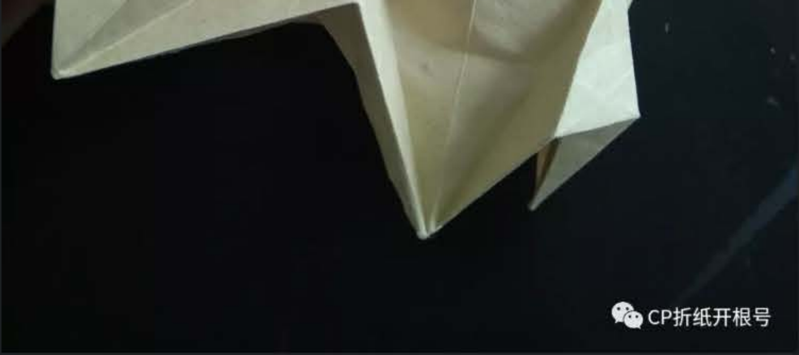




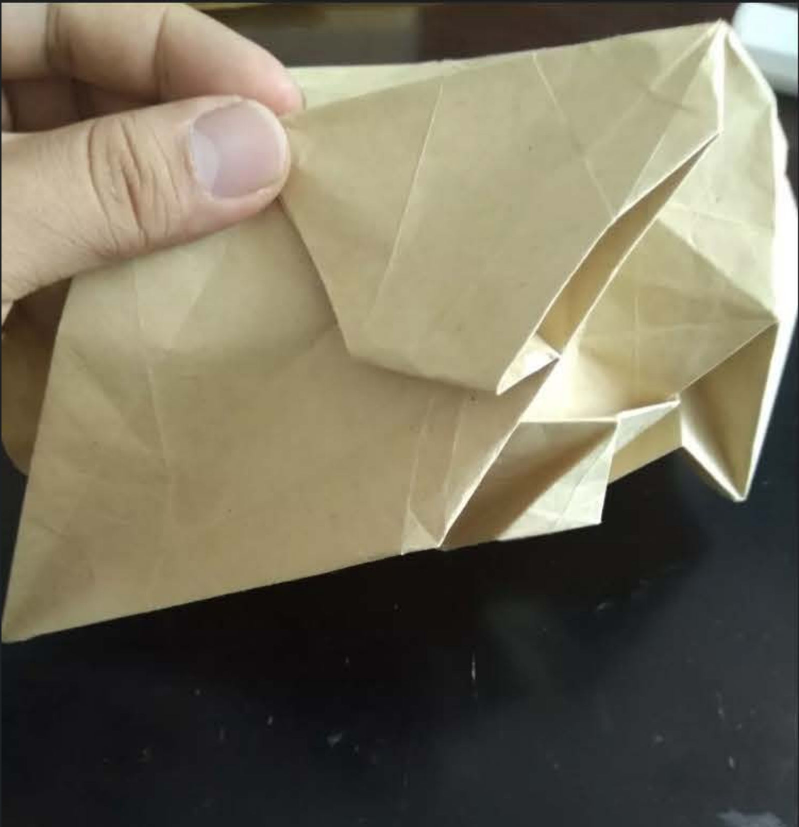
CP折纸开根号

Fold this side up and down according to the crease

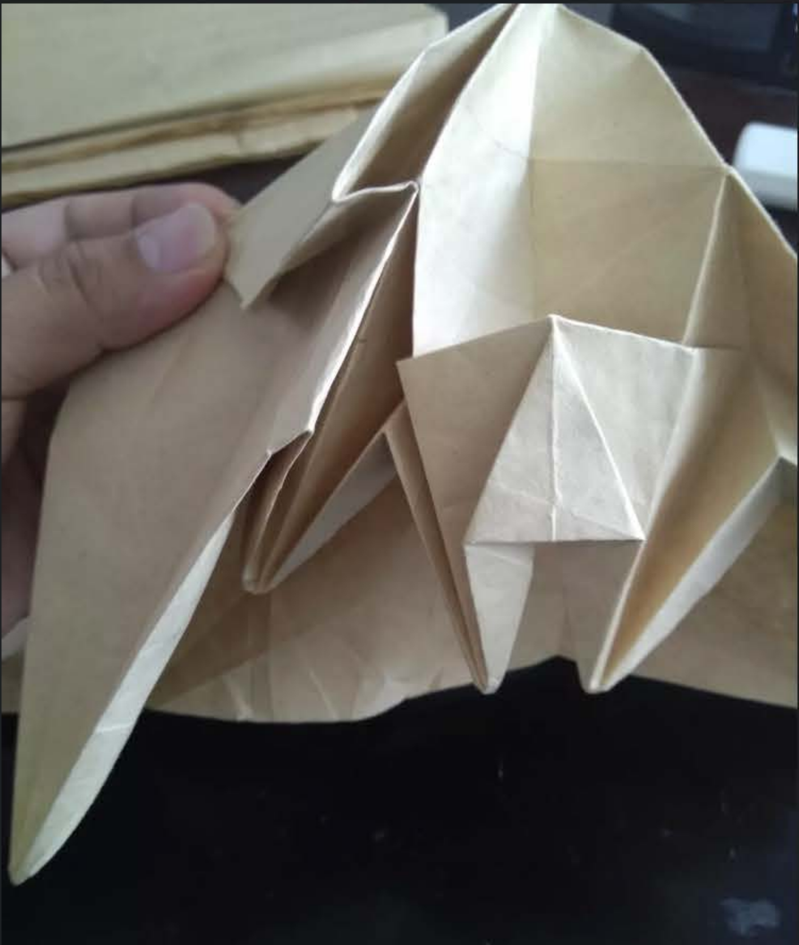


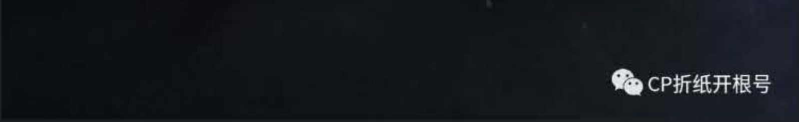


CP折纸开根号



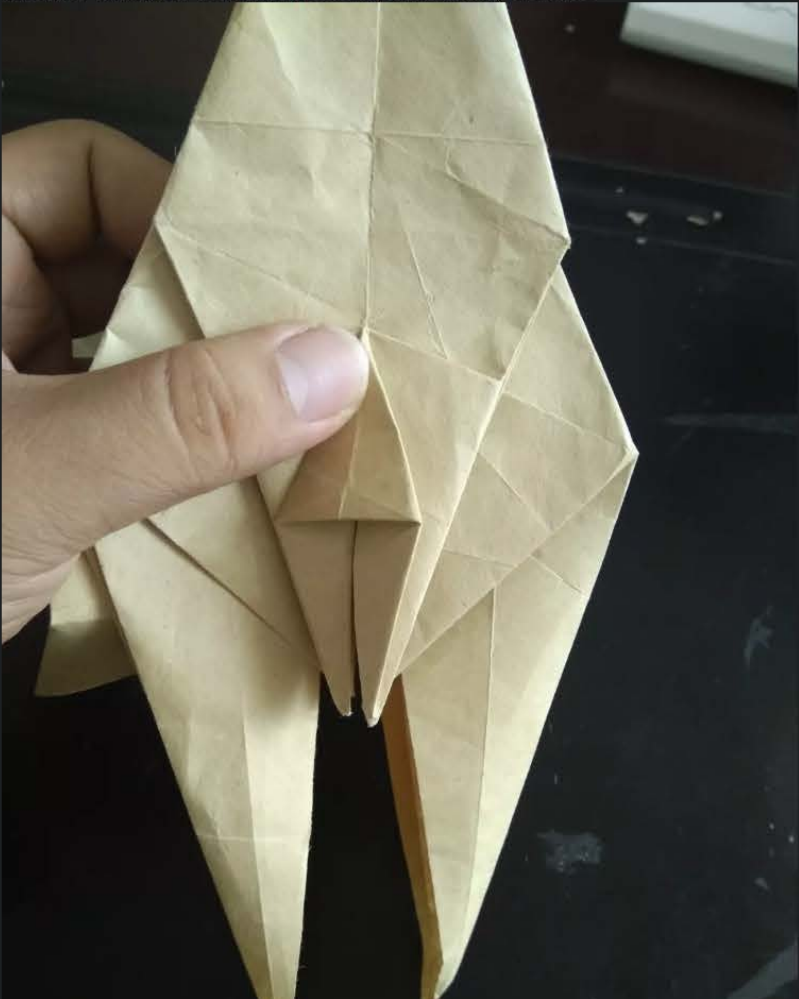
CP折纸开根号

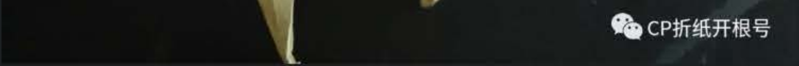




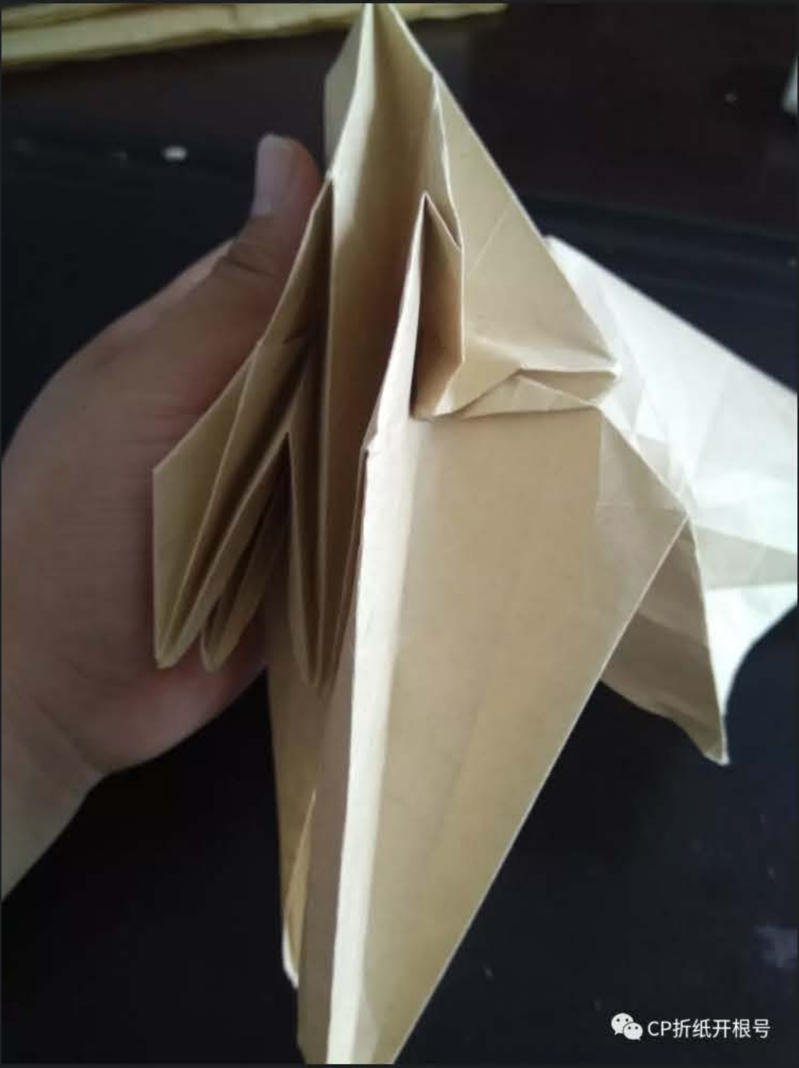
CP折纸开根号

The same folding on both sides, pressing out two long branches

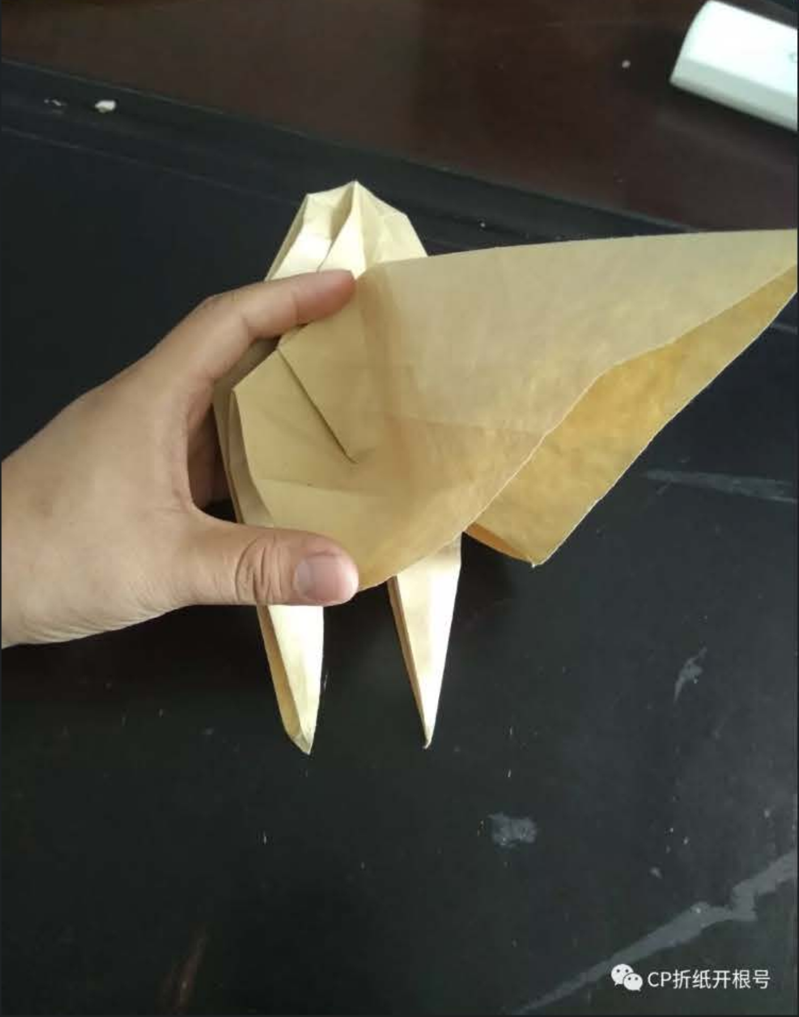




CP折纸开根号

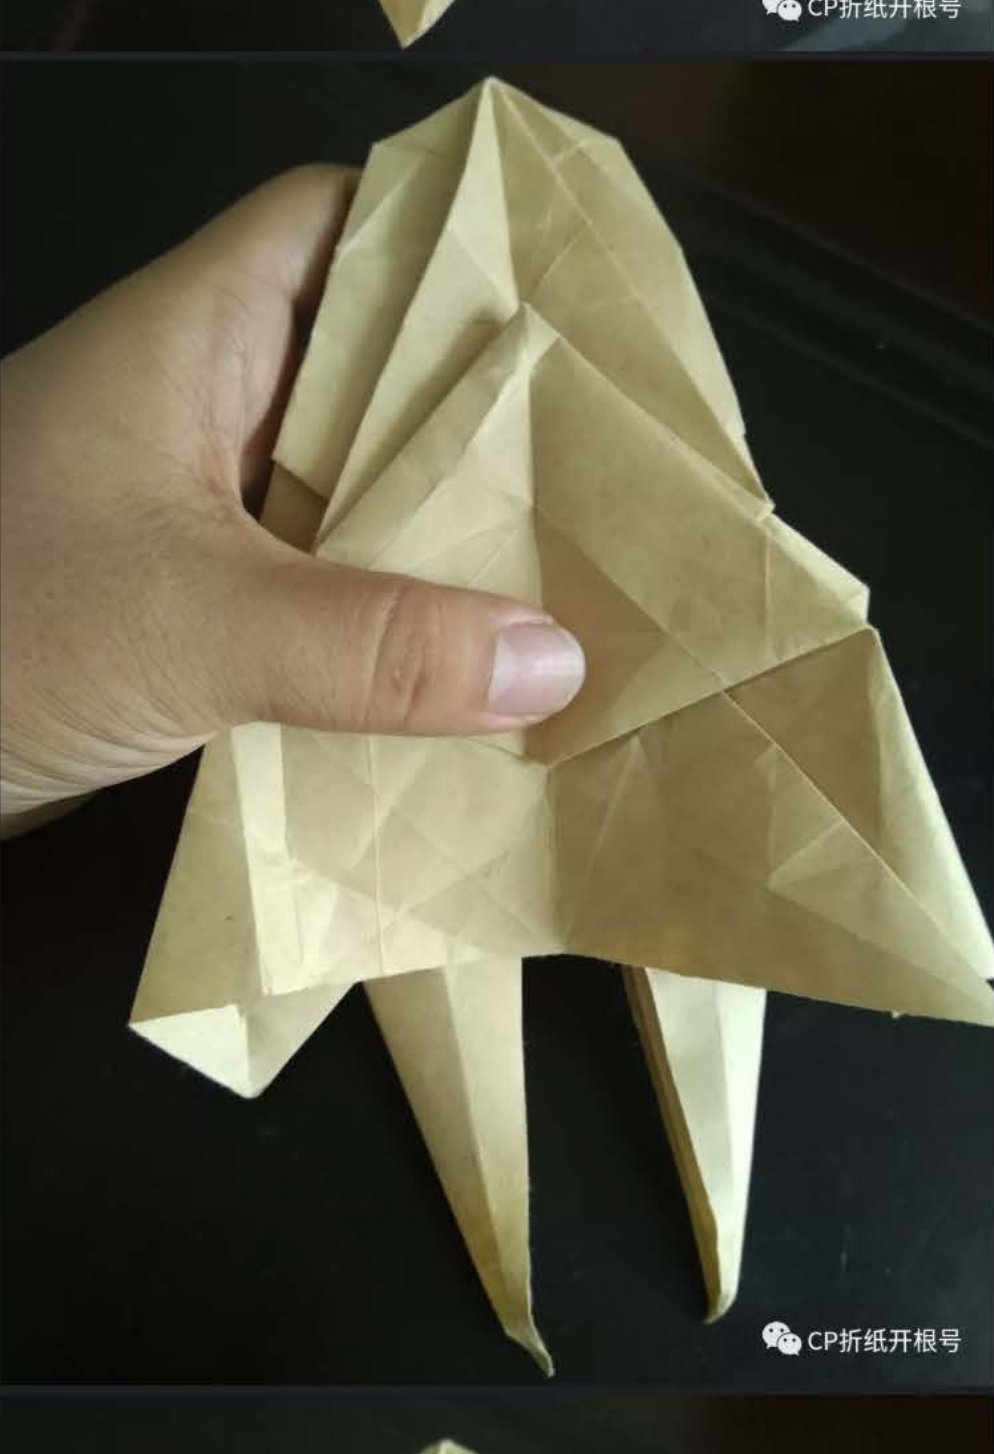


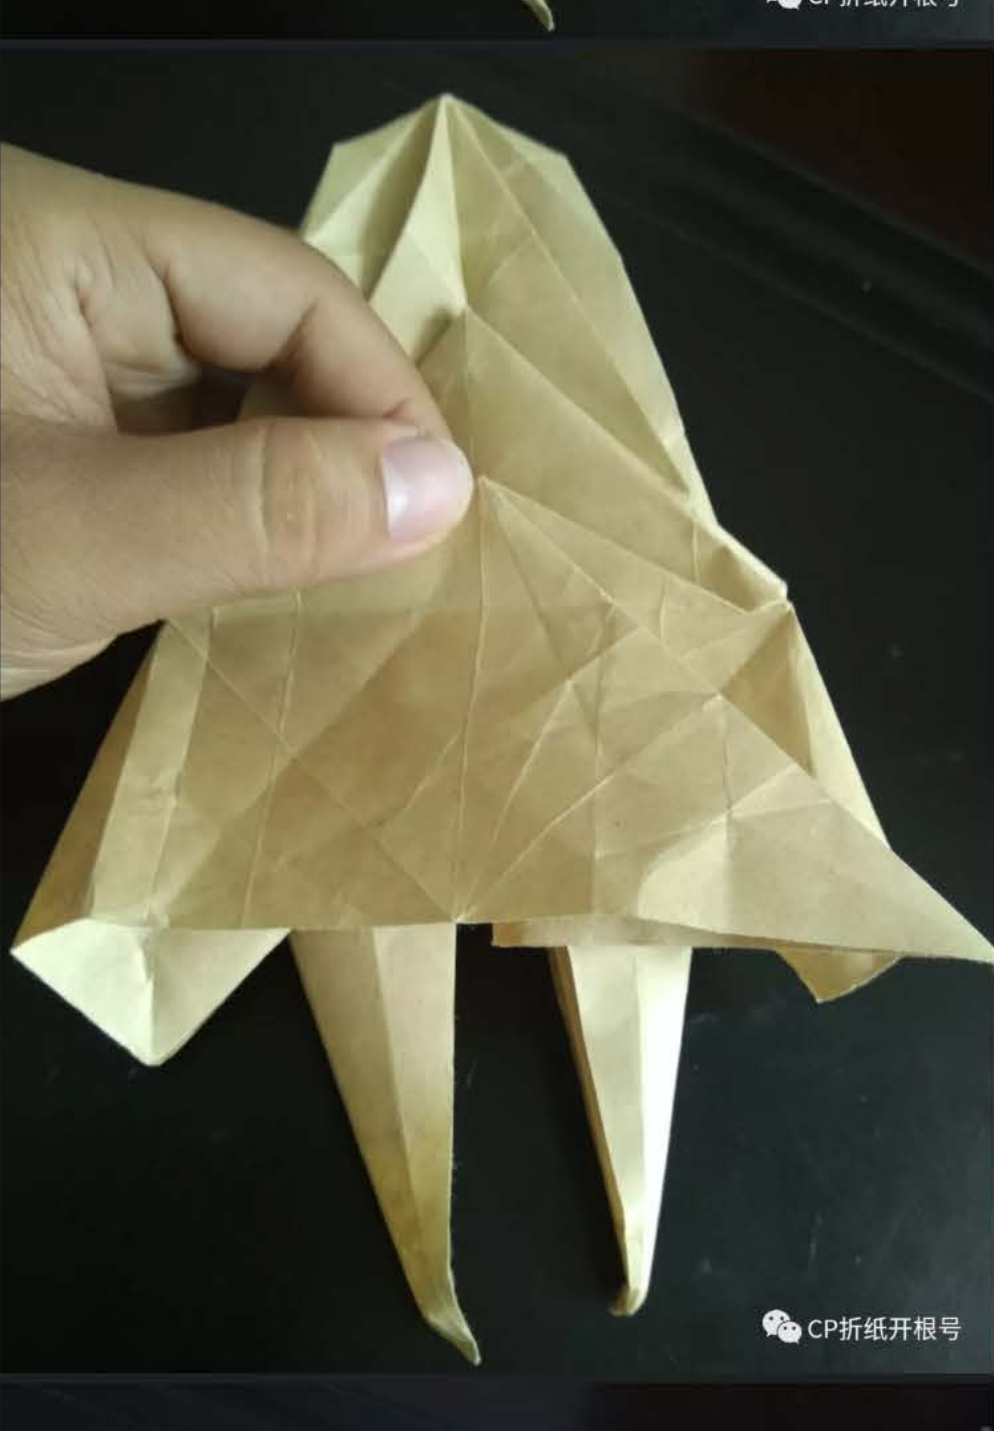
CP折纸开根号

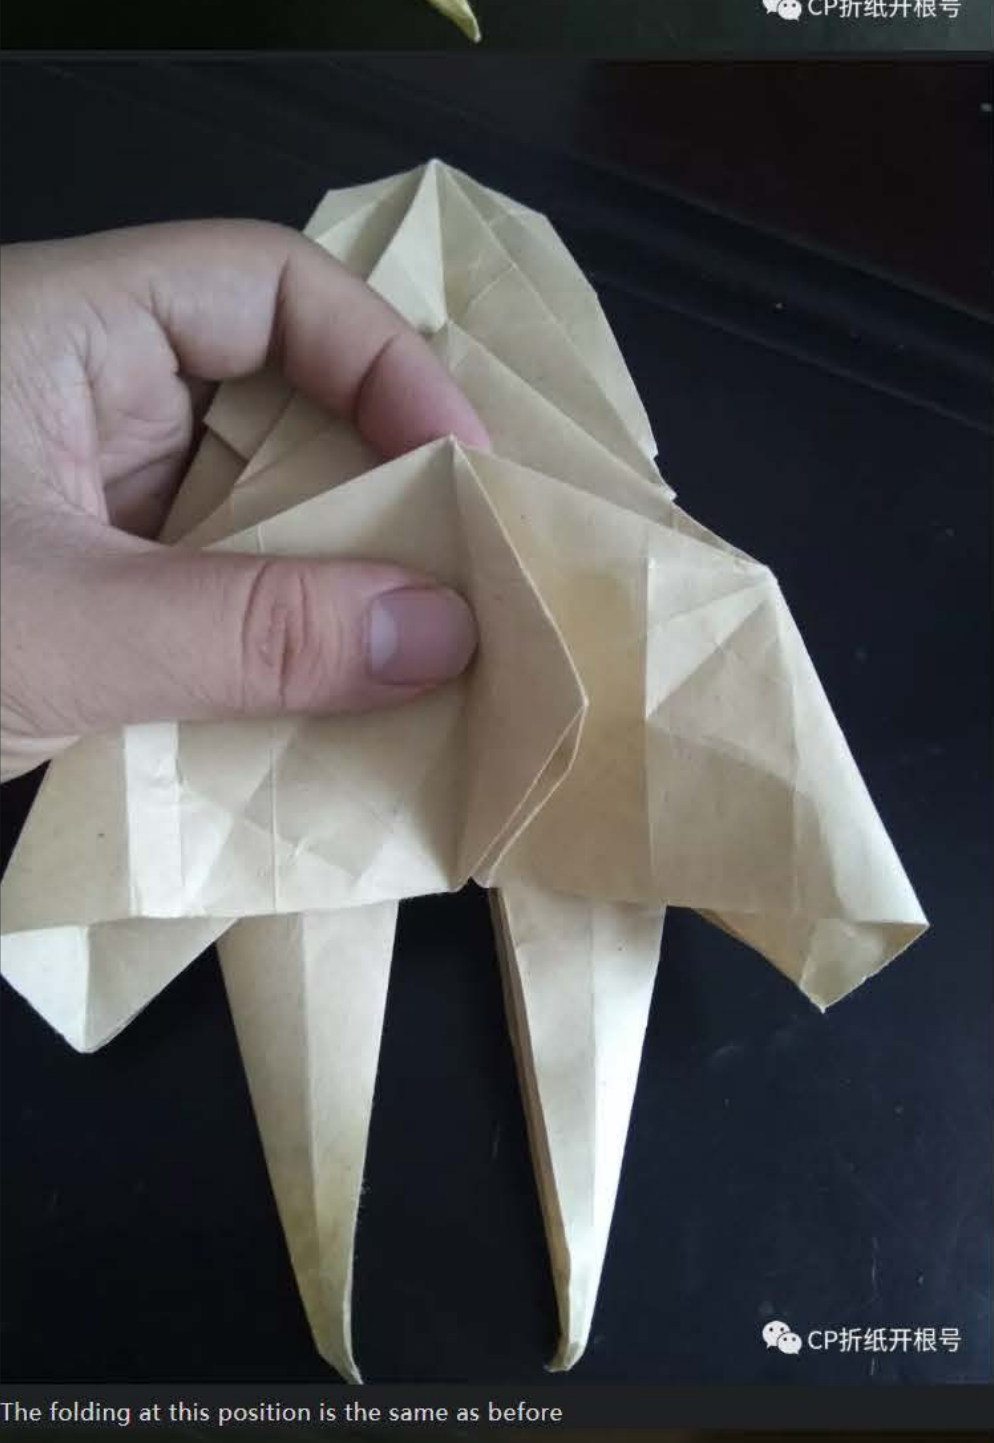


CP折纸开根号

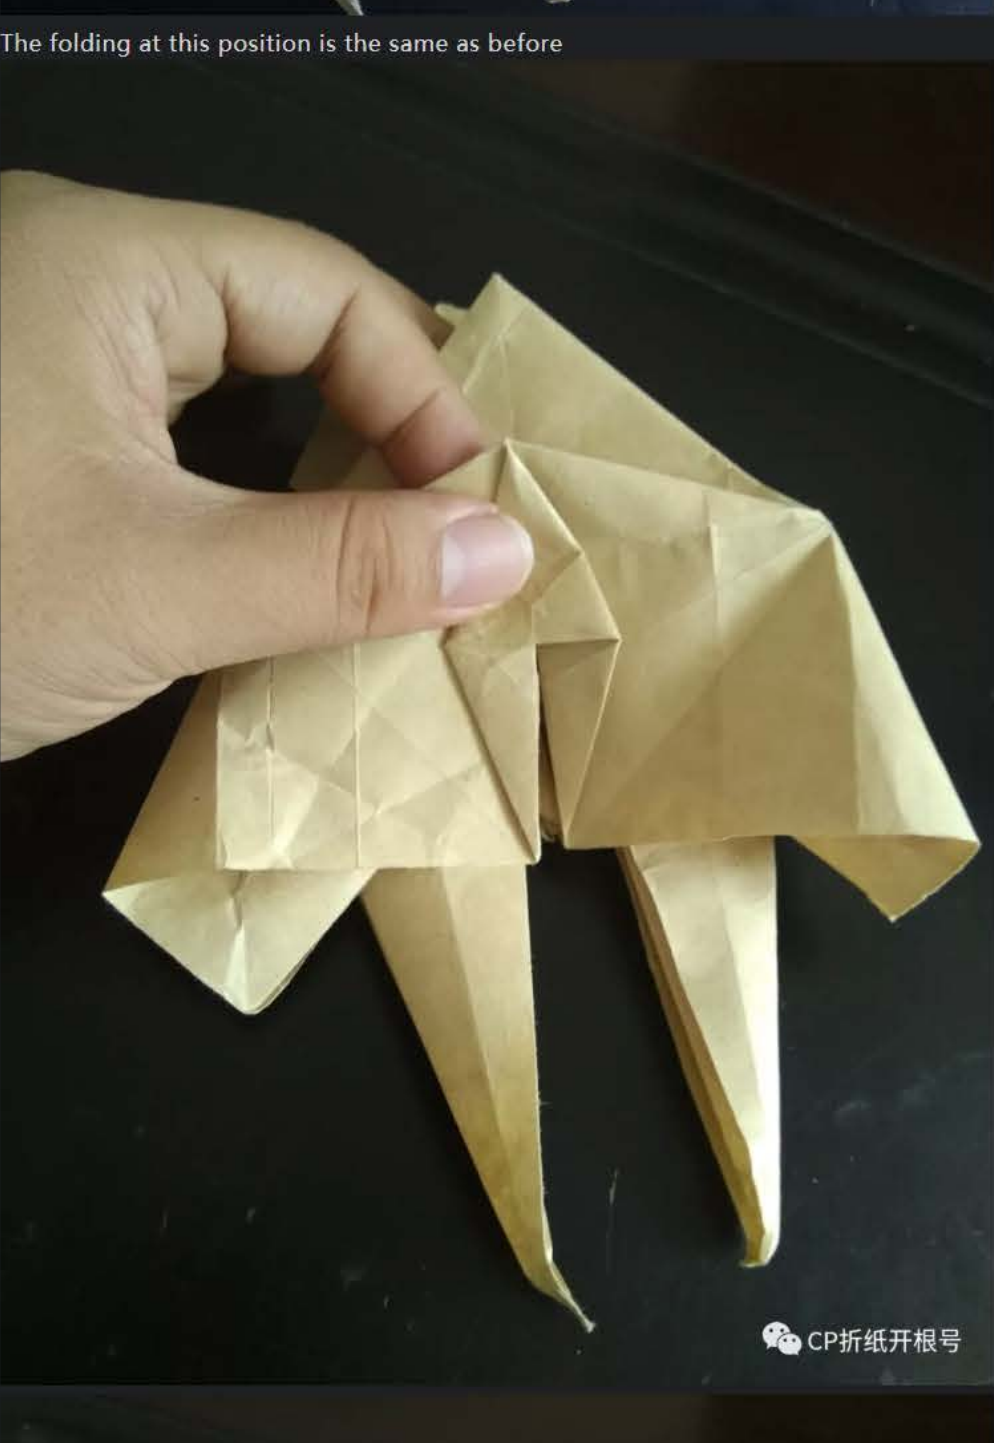
Flip and process the back square

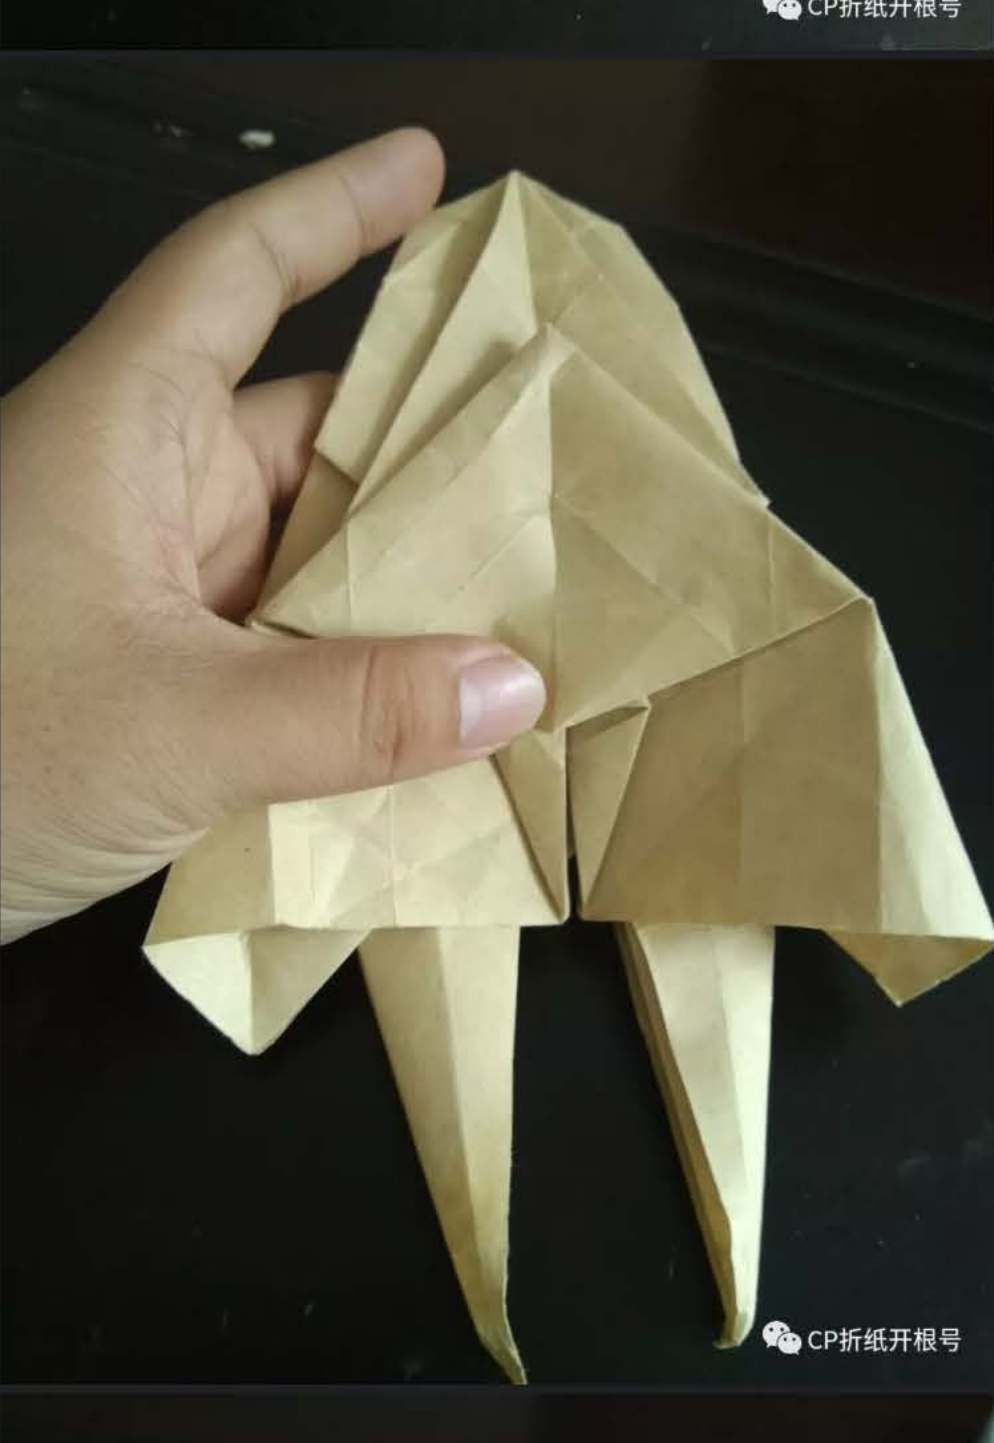


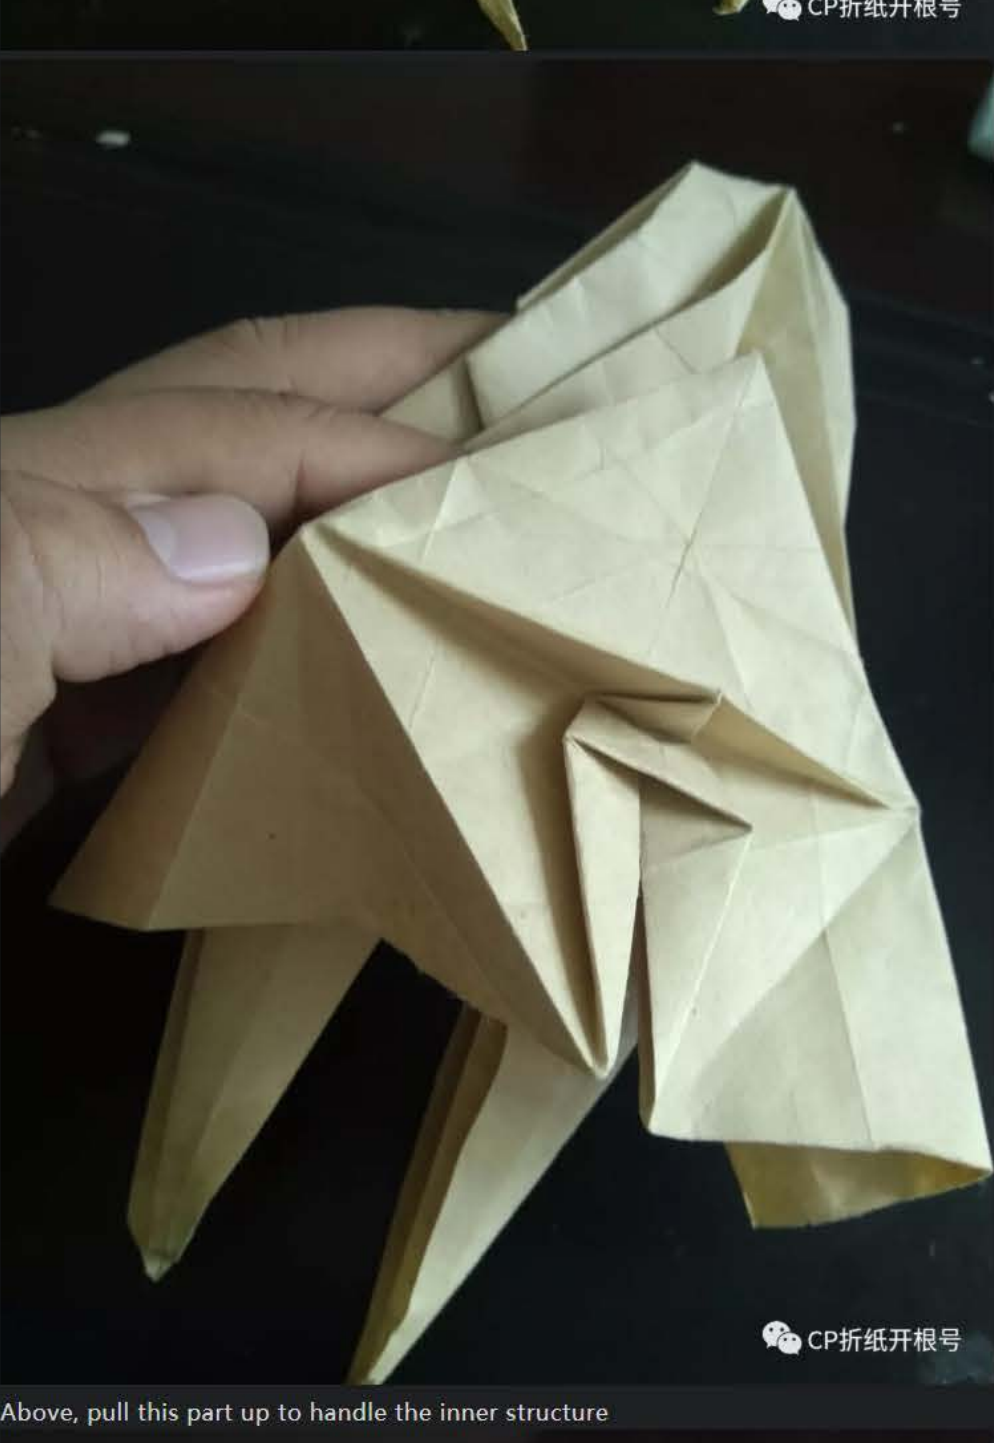




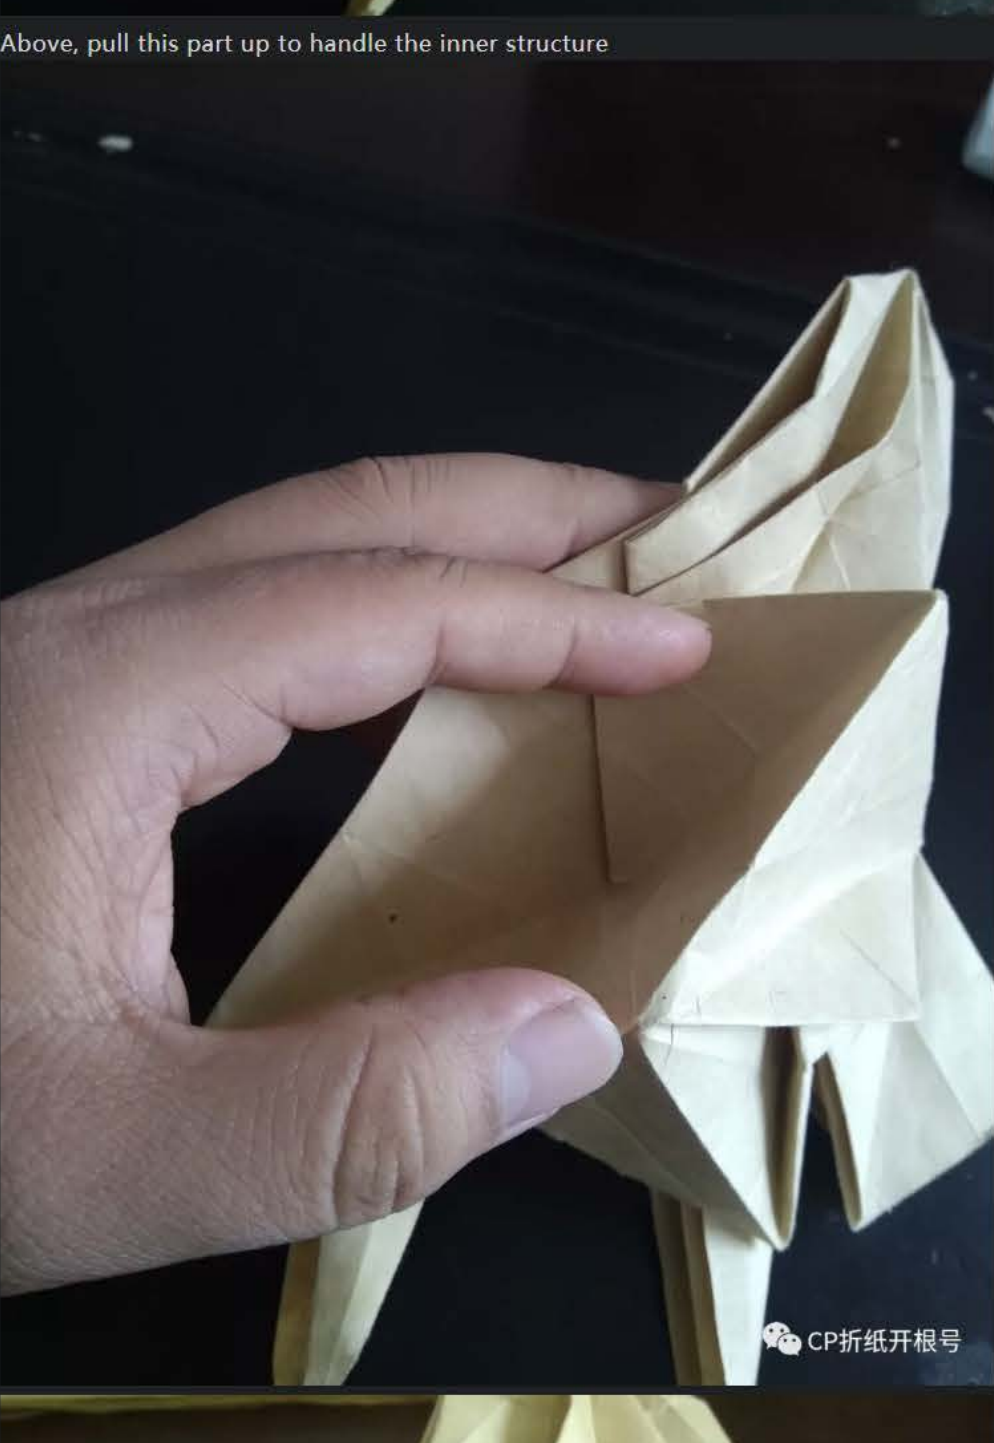
The folding at this position is the same as before

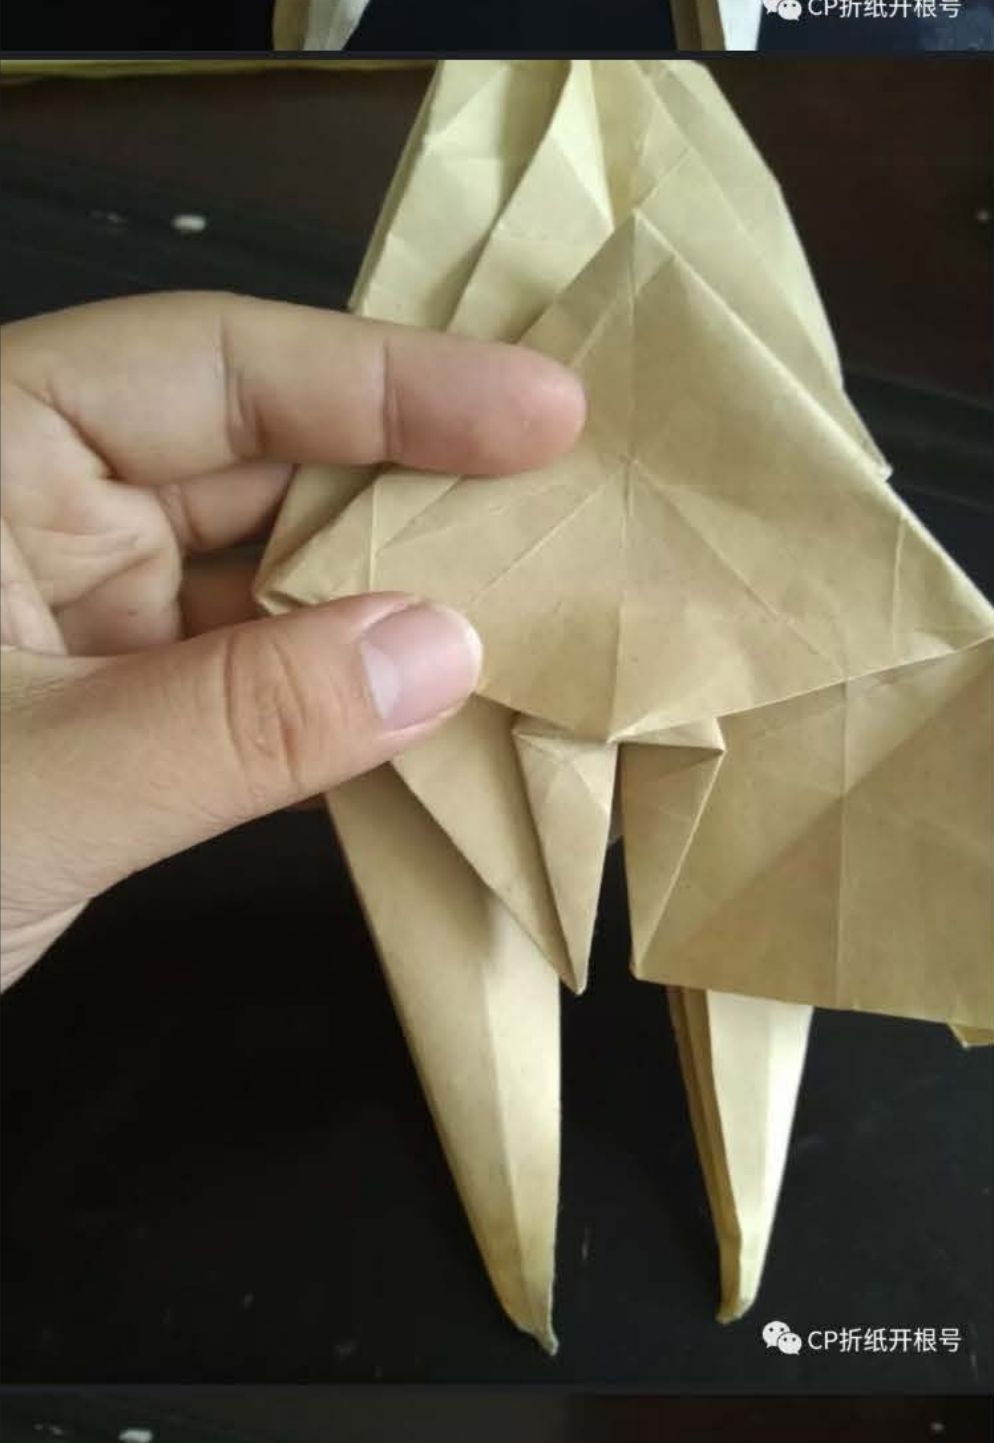


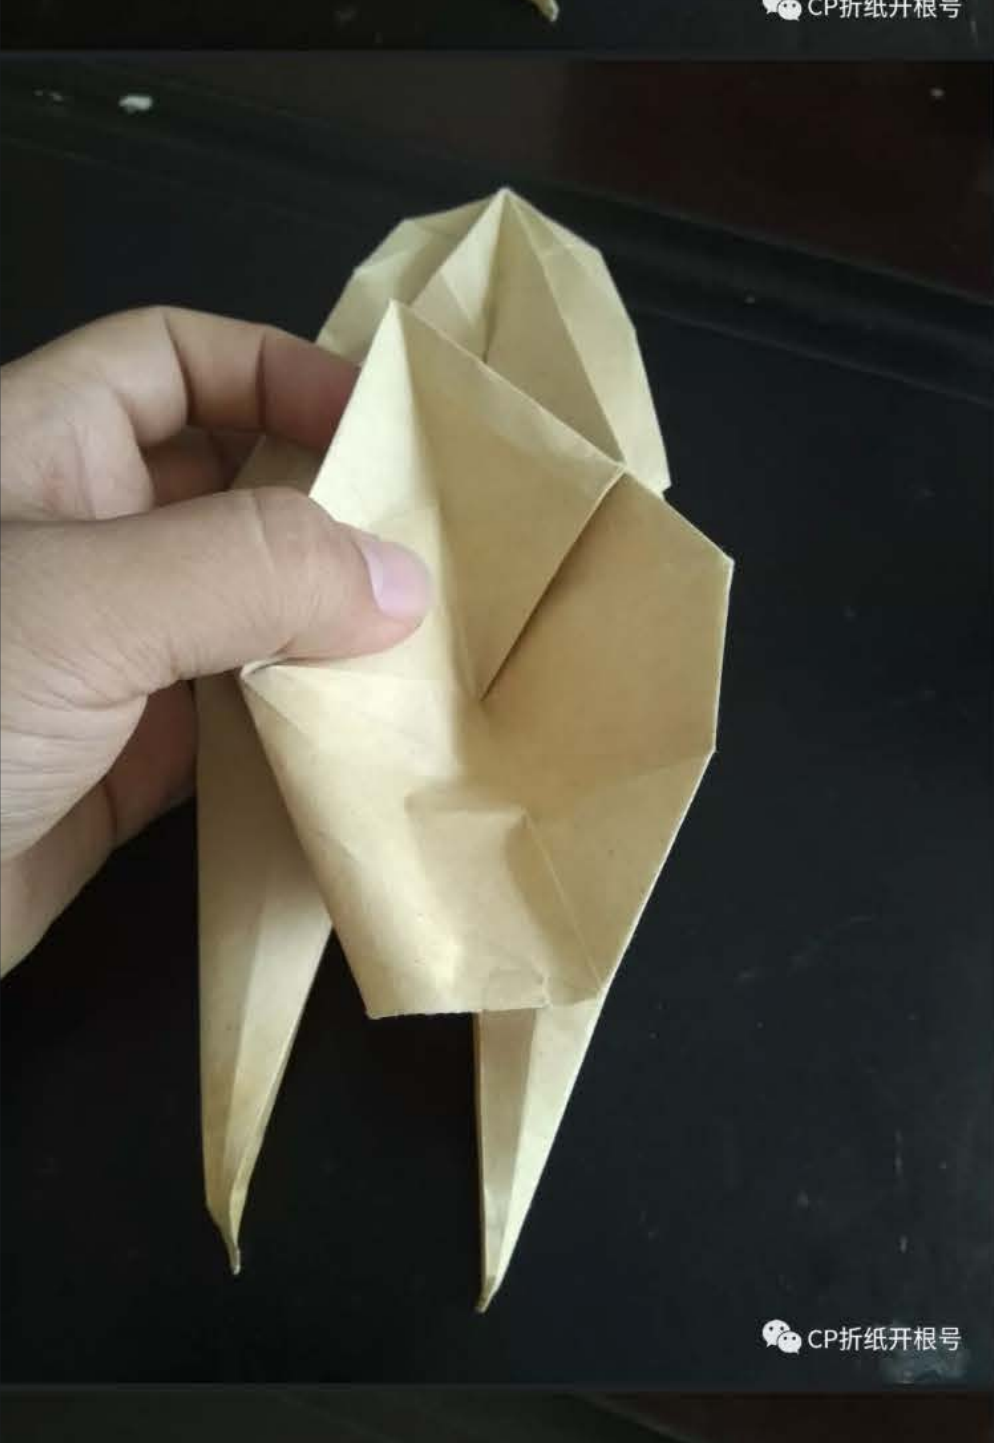


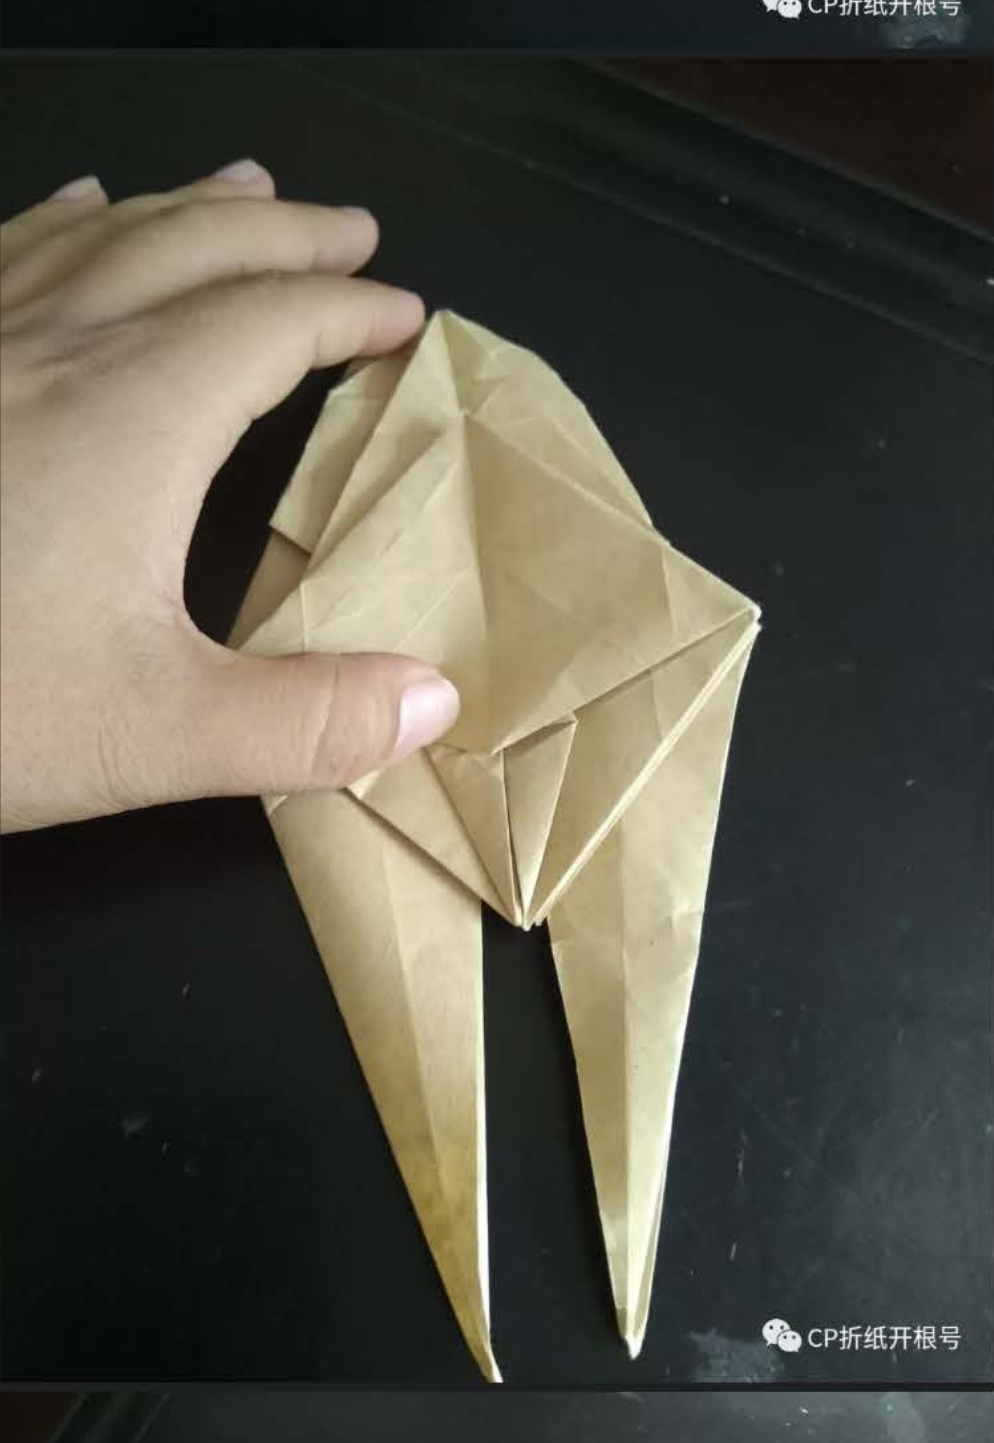


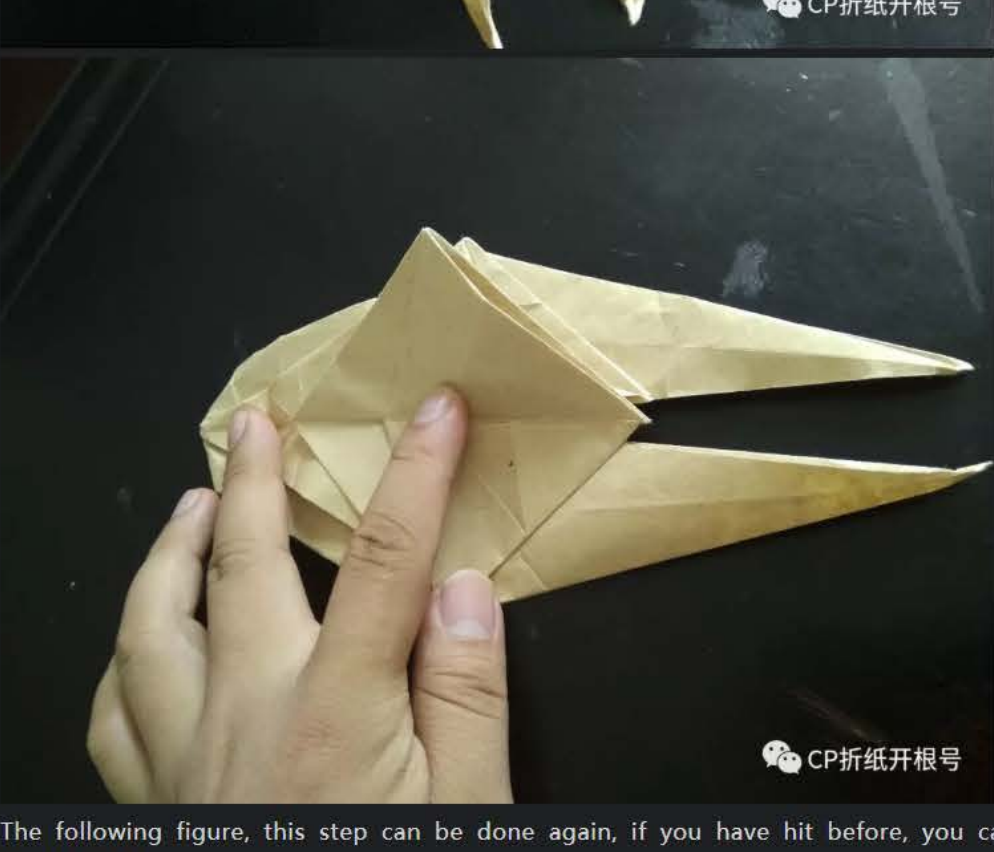
Above, pull this part up to handle the inner structure



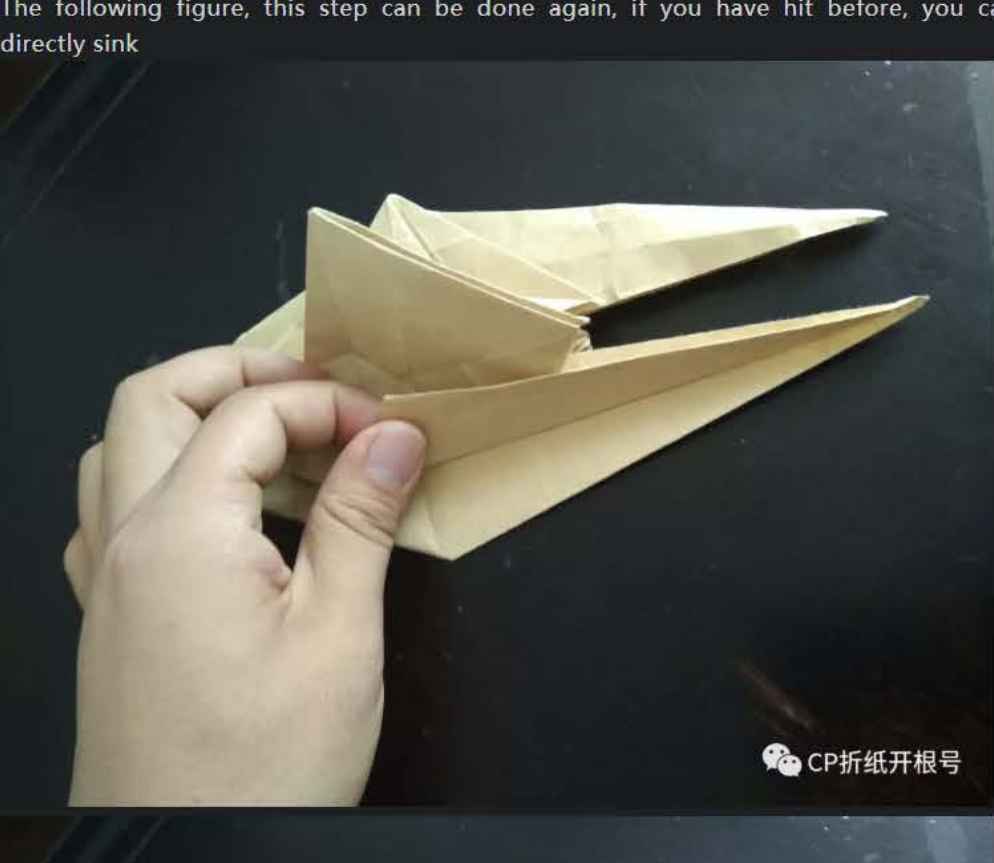


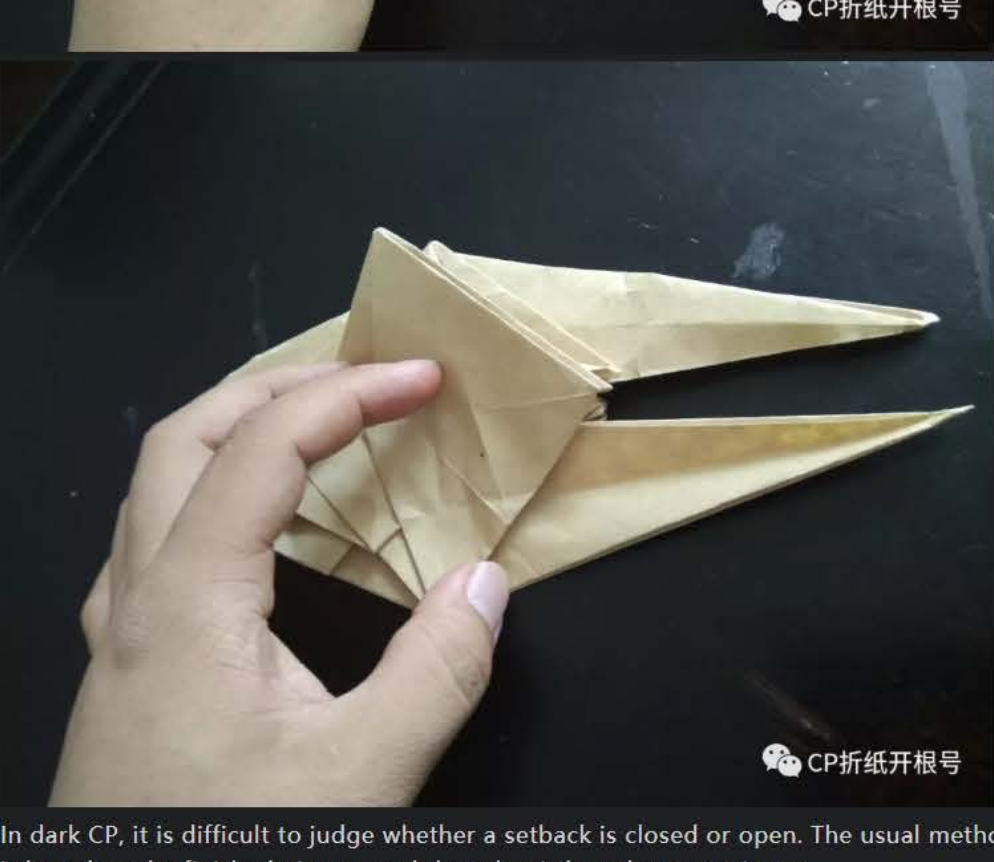




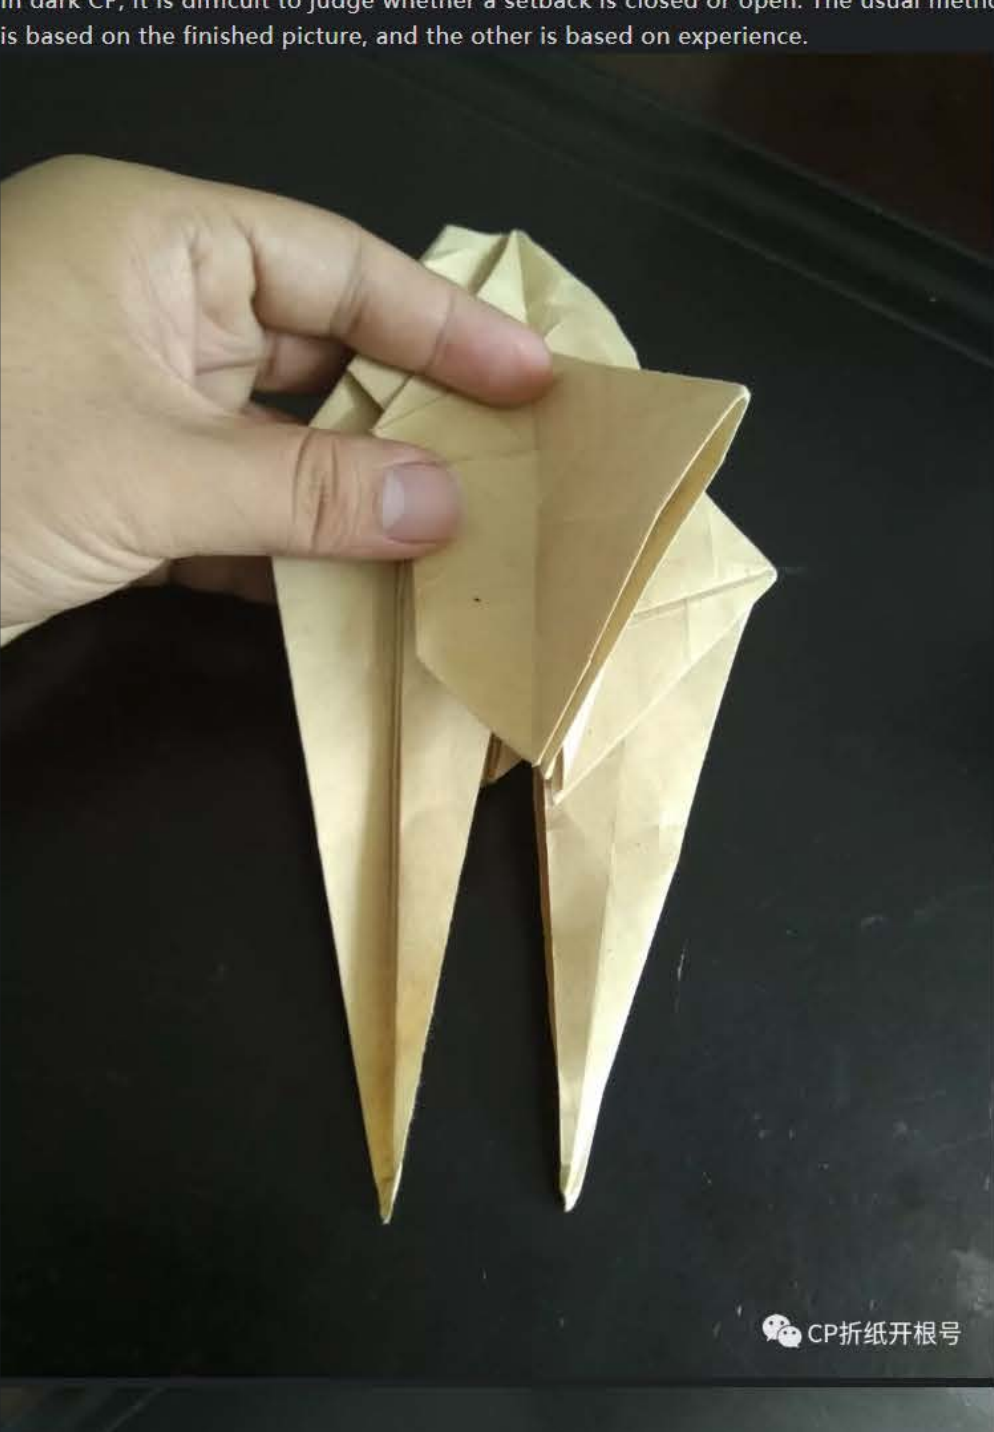


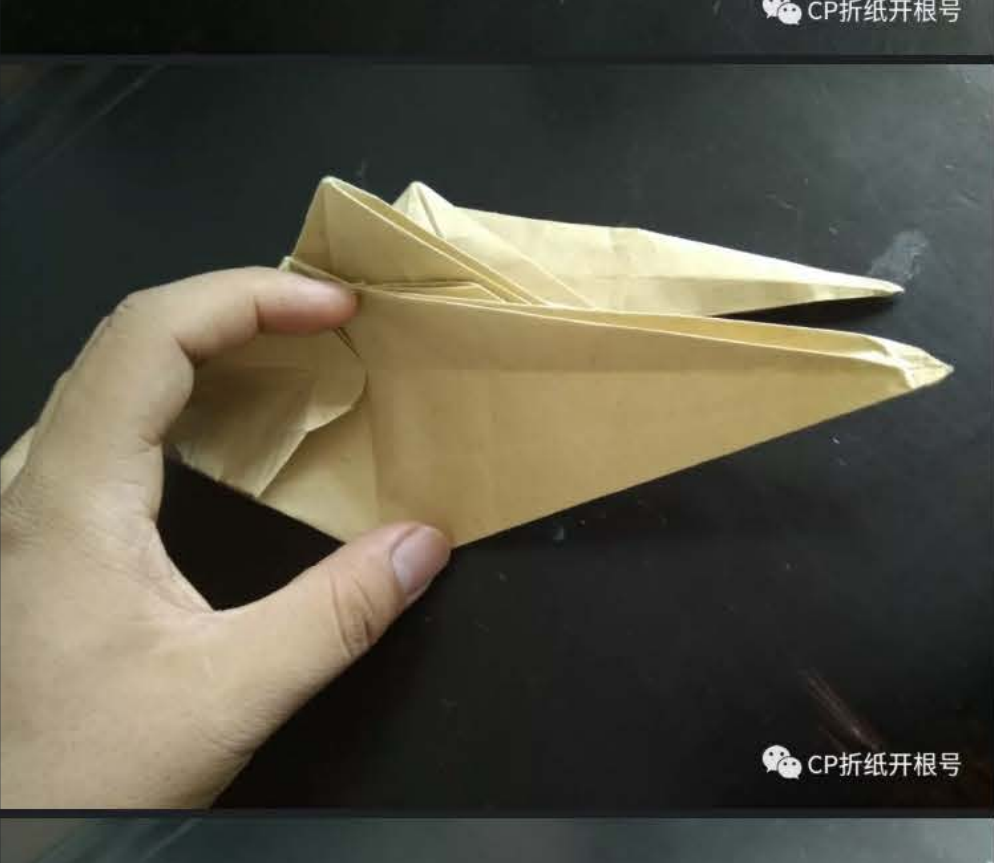
The following figure, this step can be done again, if you have hit before, you can directly sink

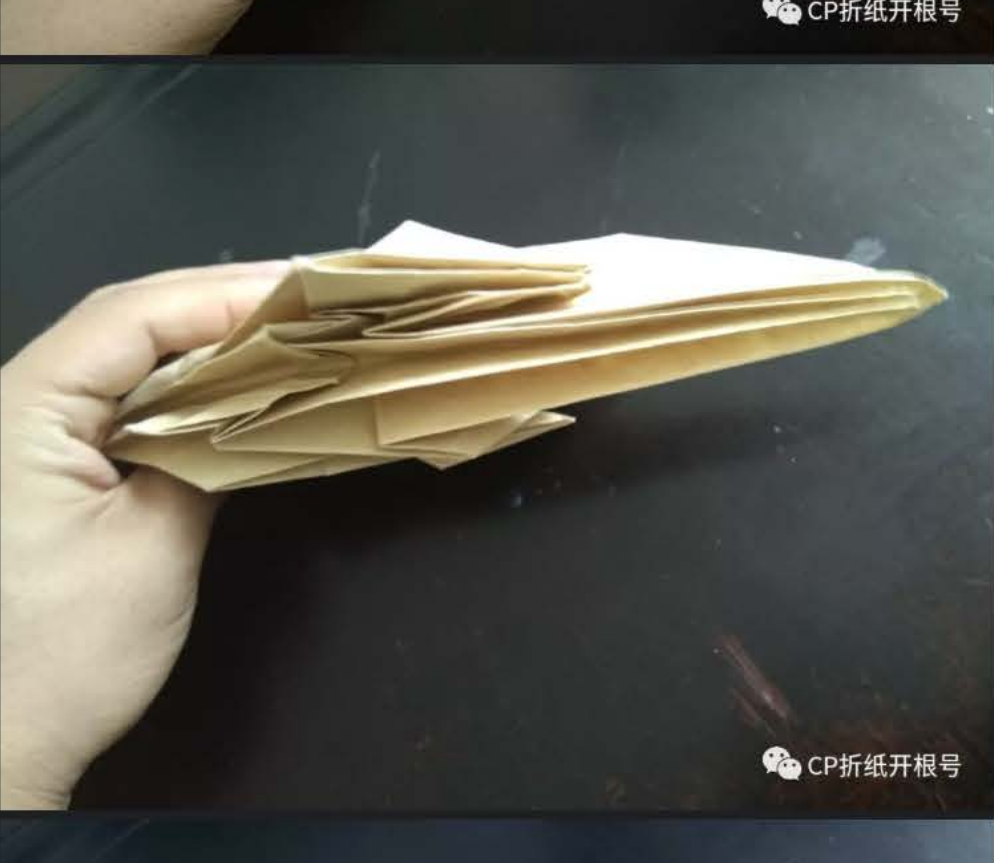


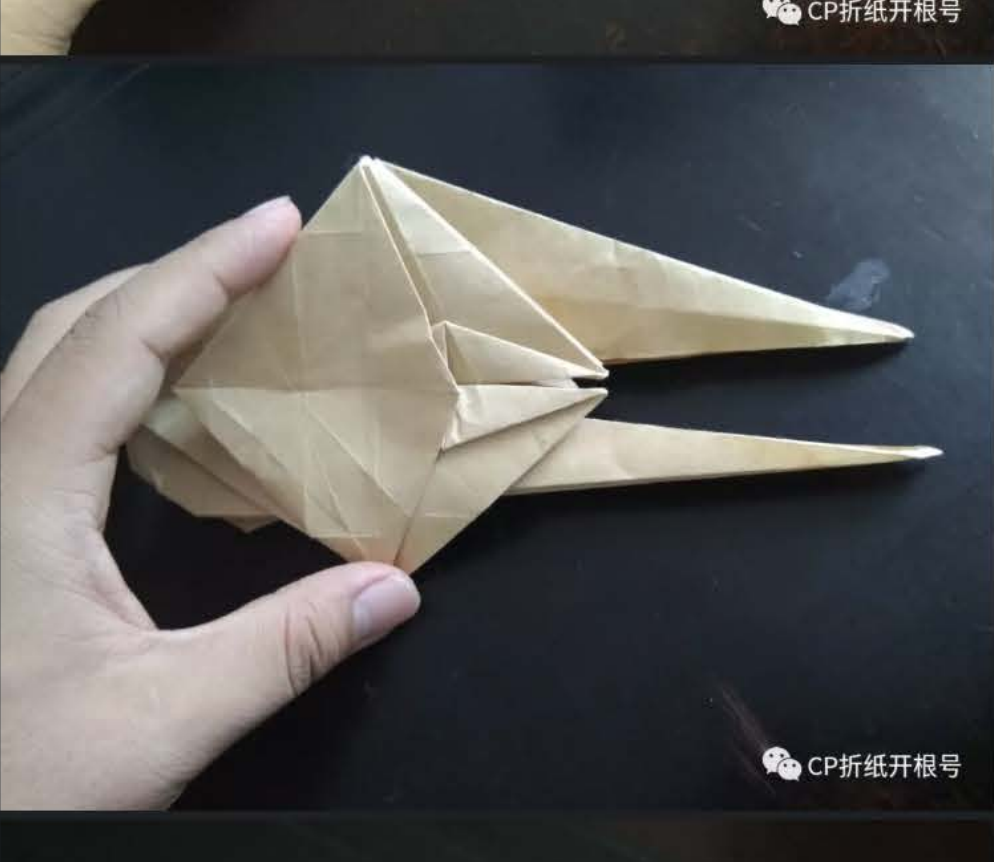


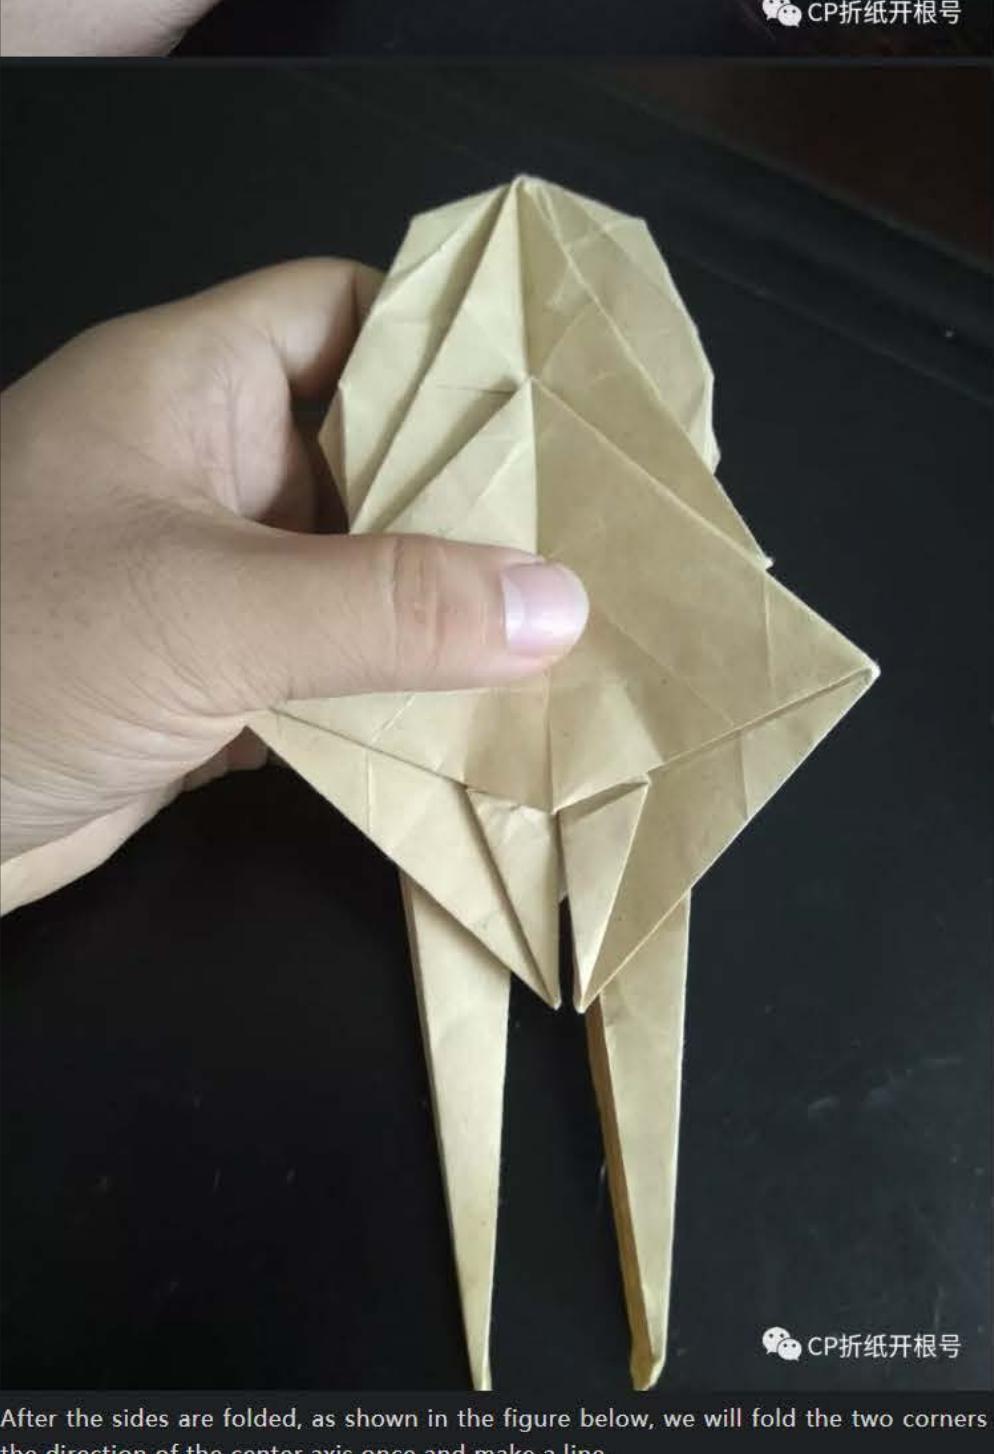
In dark CP, it is difficult to judge whether a setback is closed or open. The usual method is based on the finished picture, and the other is based on experience.



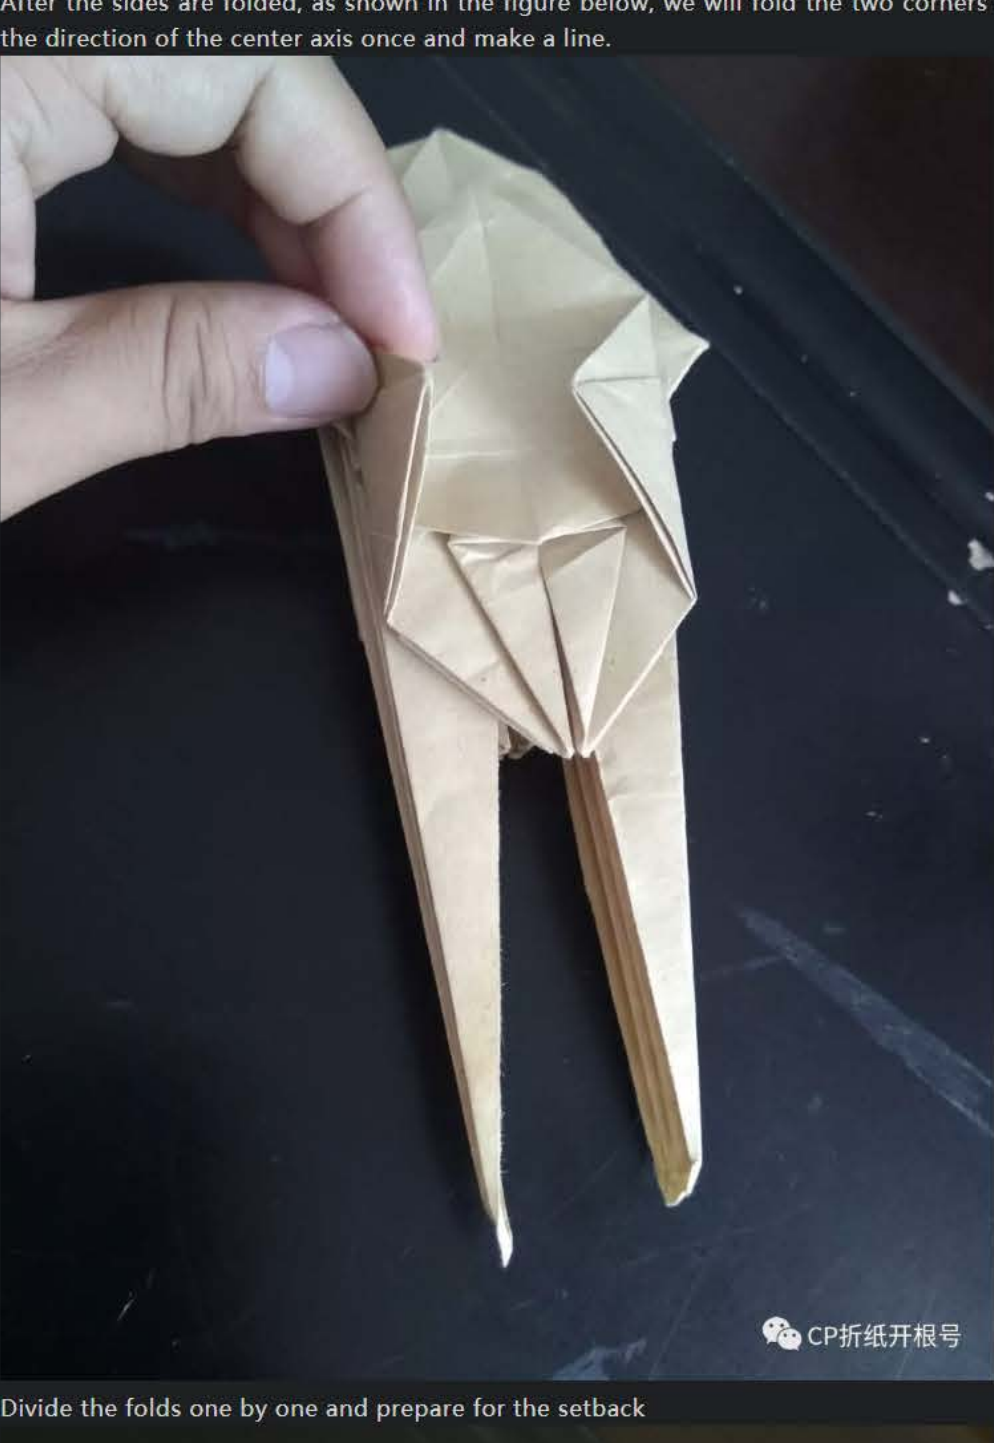




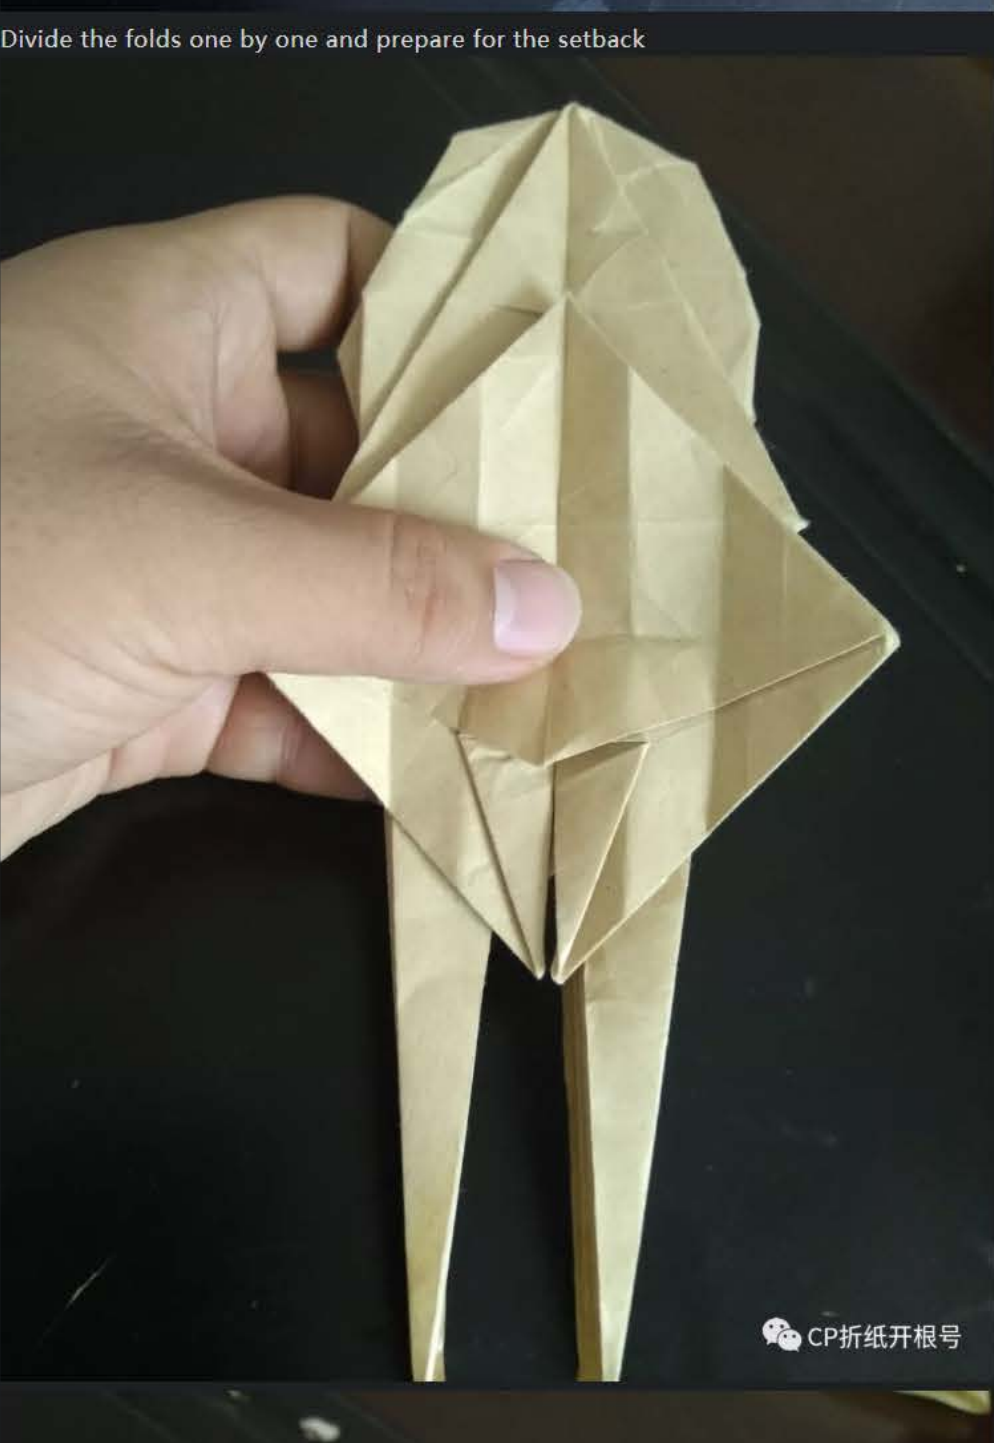


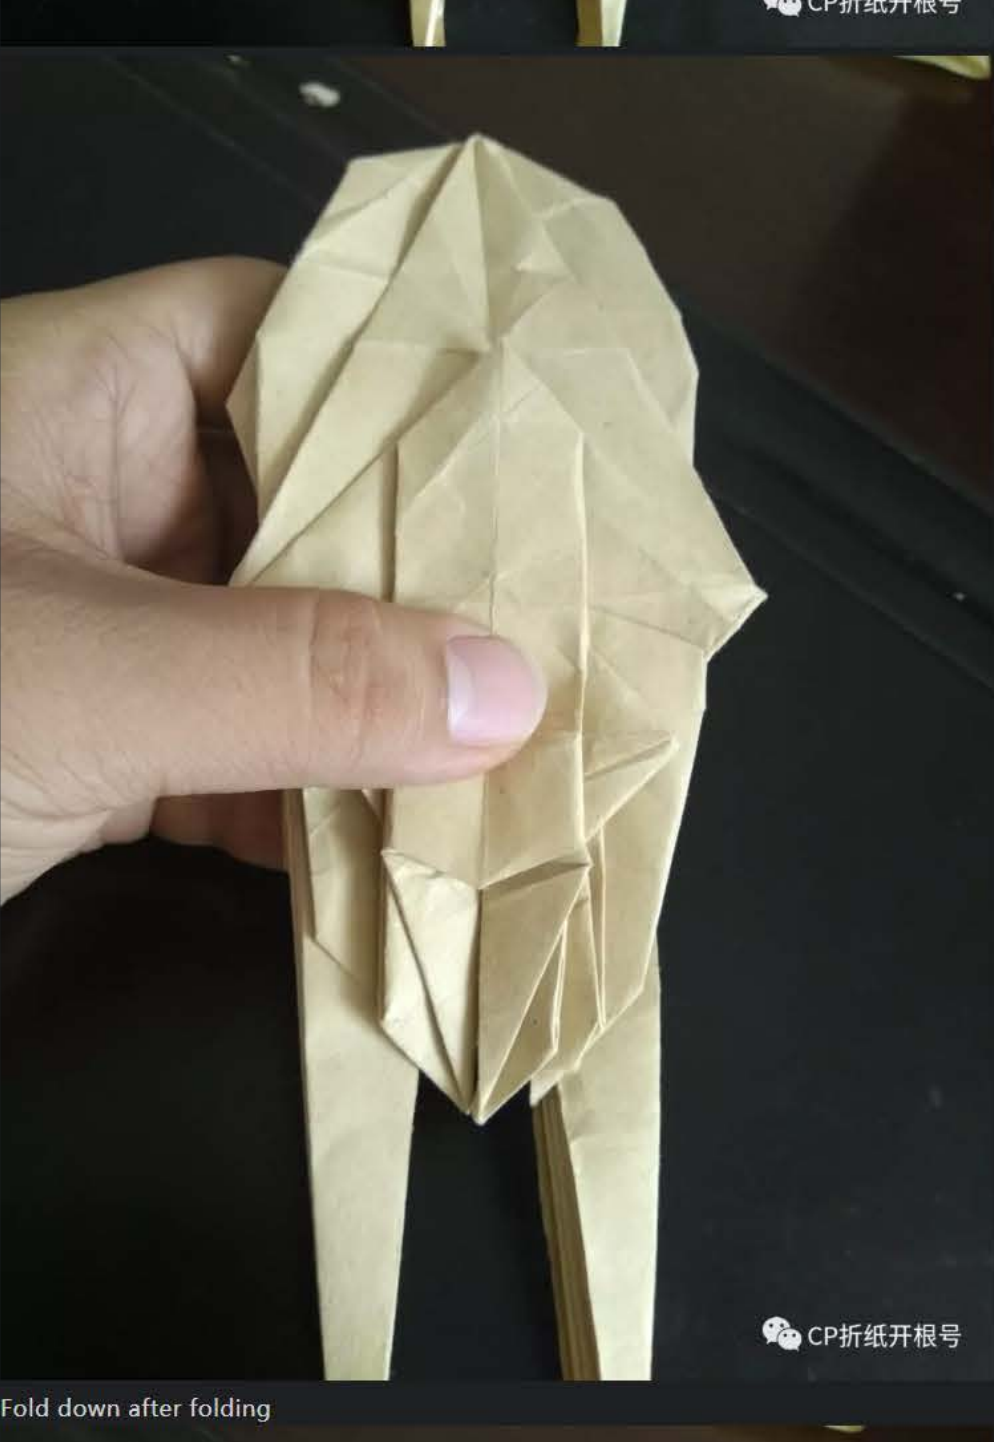


After the sides are folded, as shown in the figure below, we will fold the two corners in the direction of the center axis once and make a line.

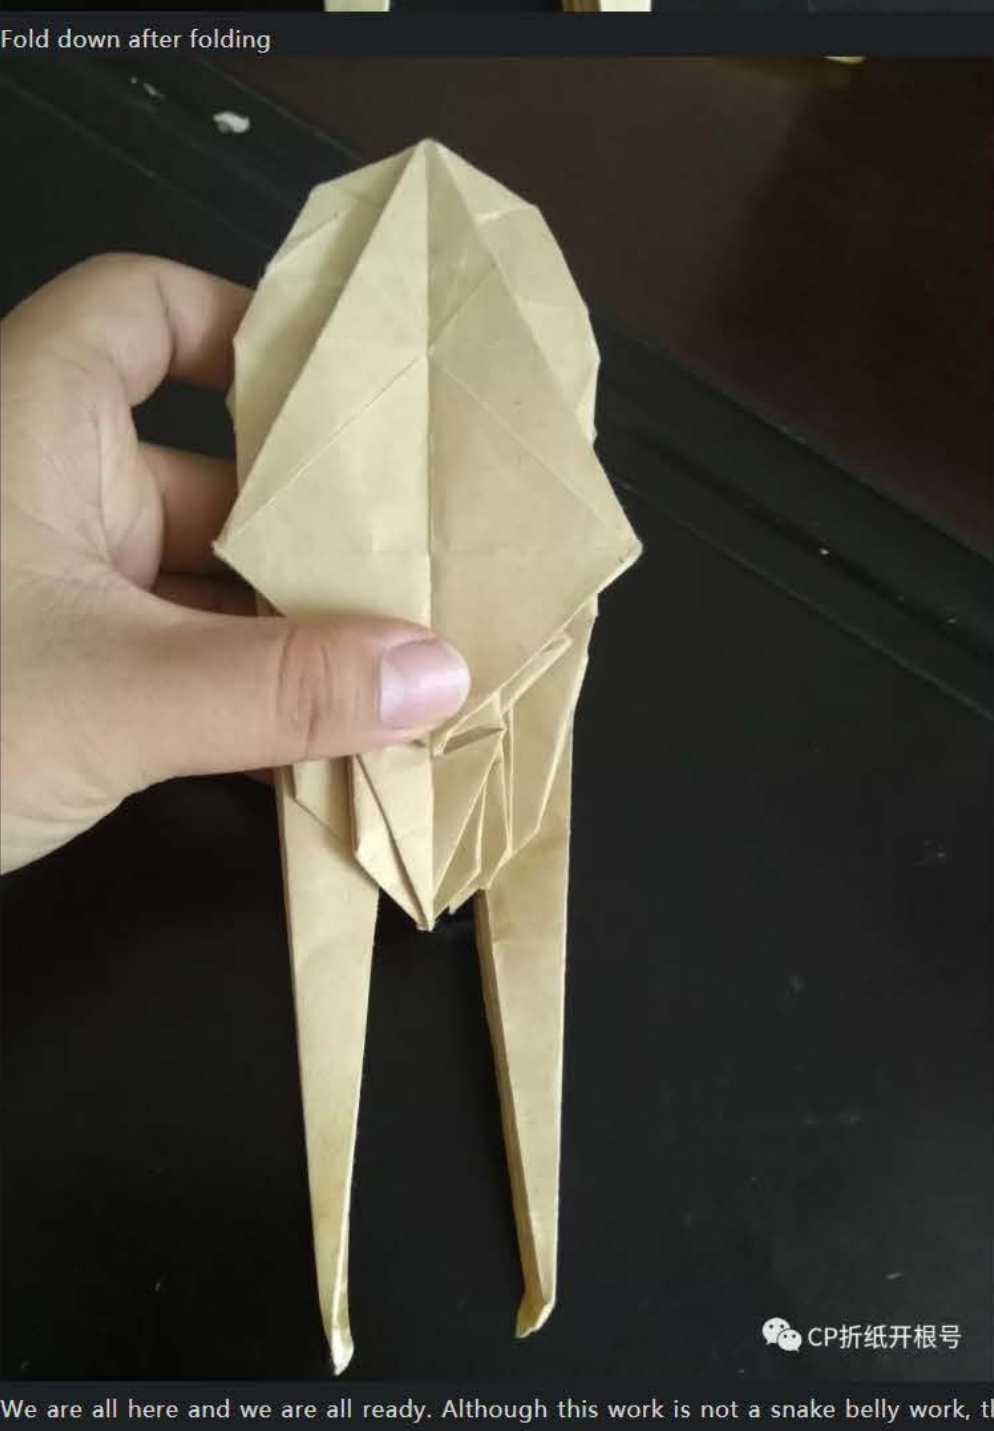


Divide the folds one by one and prepare for the setback





Fold down after folding



We are all here and we are all ready. Although this work is not a snake belly work, the branches are very clear. You can easily distinguish the corresponding finished products based on these aggregated branches, so continue to cheer for everyone!
See you next time!

Recently, some people said that they would reward me for a certain content. First of all, I am very happy. If friends are willing to add me a red envelope! Haha no kidding, everyone can scan the QR code above to pay attention to my public account. If any friends who want to see me show the finished origami products can add my volcano video number to like me!
My number is 515650243 and my name is Alpine Origami Player.
I posted a lot of life sketches and origami sketches, and of course there are original works on display🤔
