Origami Interactive Series NO.11 CP of the 41st Frog

Origami student Takayama CP origami opening number 2018-06-03

Hello friends, June is coming soon. However, many of the works in my interactive series still stay in March. Everyone's comments are really slow, but even so I decided to start from July every six months. The period is changed to four to five, because there are many private friends who ca n't keep up with me. Let me slow down so that they can be discounted. So I 'll slow it down a few months to see if someone really I can fold it together, or some friends can make up for the previous issues.

Now let 's talk about the work I want to share with you today, CP of Toad
The drawing is also a private letter, and the original author's name is also marked on the picture. First of all, pay tribute to the original author!
Next, please take a look at the drawings, and then wire together with me.

After reading the drawings, everyone should have such a feeling. First of all, it is not difficult. This can be seen from the equal score. The second is that the left and right corners are a bit difficult because they can't understand.

But let 's talk about these issues first!

Because this is a clearly divided drawing, I will not draw the red and green lines like the acute angle chart, let's directly draw the line chart!

CP折纸开根号

Unfold the lined paper, flatten it, and start polymerization as follows
Starting from the middle, still similar to the beetle

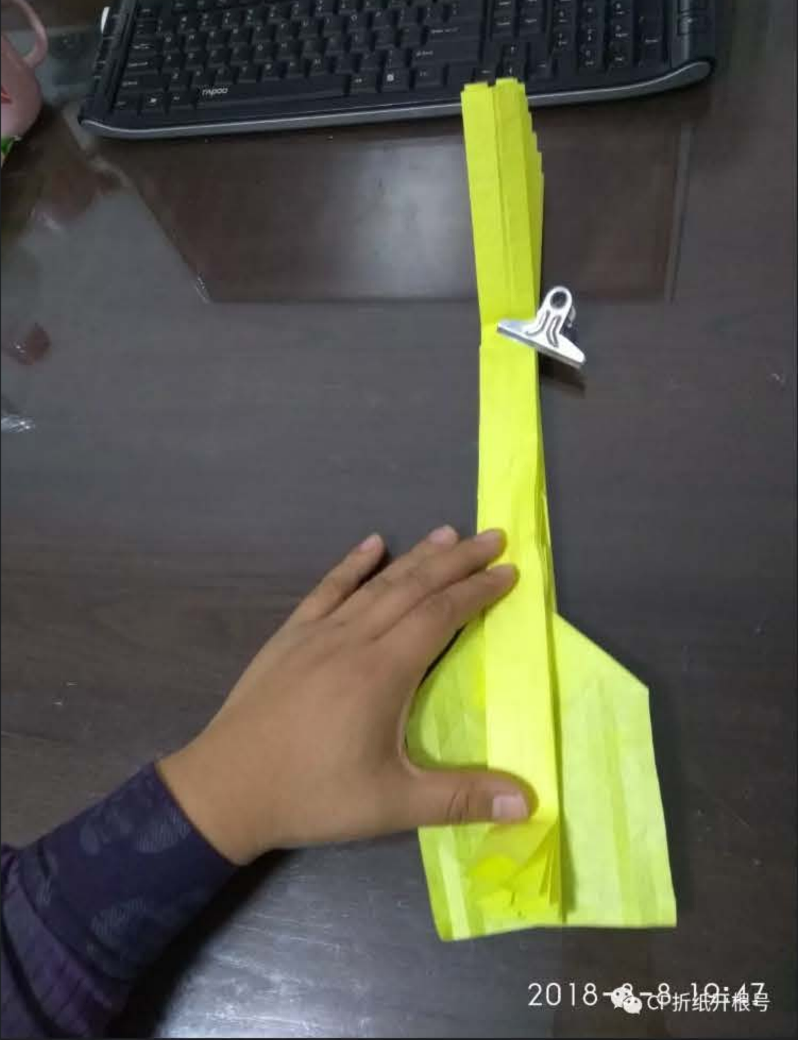
The picture below is the situation after sinking



cp折纸开根号

In the picture below, we start to deal with the middle part. We have to pull it a little and pay attention to the peak line.

Below, let's get a frontal photo together.

2018-8-8 20:15

CP折纸开根号

Let 's deal with the two hind legs together. The suggestion I give here is not to fold out all the lines at the beginning, as long as 1/2 of the grid lines can be printed

Look at both angles.

2018-8-8 20:32

CP折纸开根号

Finally, take a look at the front view, which can see the branches of the eyes and the upper and lower mouths. Please separate them one by one to study them!

Plastic surgery, you are serious!

I wish everyone a successful and happy origami! For nothing!
