Origami Sharing Series No.40 Another version of the 109th Hatsune

Original origami student Takayama CP origami opening number2019-07-31

Hello everyone, welcome to CP Opening!
The image of Hatsune is no longer unfamiliar, so I will not repeat it in this issue, so let 's get into the subject right away. There will be no time. Now it is 10 o'clock in a few minutes. I watched the computer during the day. Now my eyes are not working well, I need to speed up!

Below, another version of Hatsune is more difficult than the previous ones.

The right side of the picture above is the information of the initial point of the wire. I believe that the discount friends who want to fold this work will understand it at a glance!

The picture below is the CP I cut out. With the starting point, everyone can find paper and connect with me as soon as possible!

First we fold the paper in half, here we start with the white side, then start with the following figure, flip the drawing and start from the fold down

Afterwards, we still looked at the drawing and completed the red part below.

Here we partition the green part, then we turn the drawing back to the normal perspective and start gathering from below.

While gathering the black lines in the picture below, we must synergistically aggregate the parts inside the red boxes on both sides. Here we must pay attention to the arrangement of the peak and valley lines. There are some small surprises in some places. Here we wait for the first half to aggregate and work together.

Next we start to aggregate the black lines in the figure below. Here we still flip the drawing again.

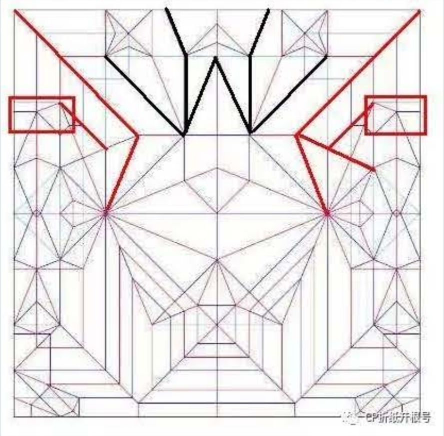
Next we deal with the red line part and fold out the black line part



CP折纸开根号

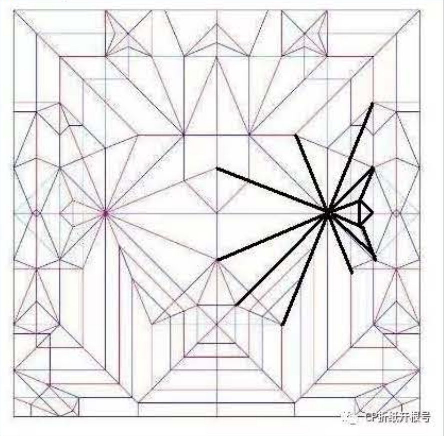
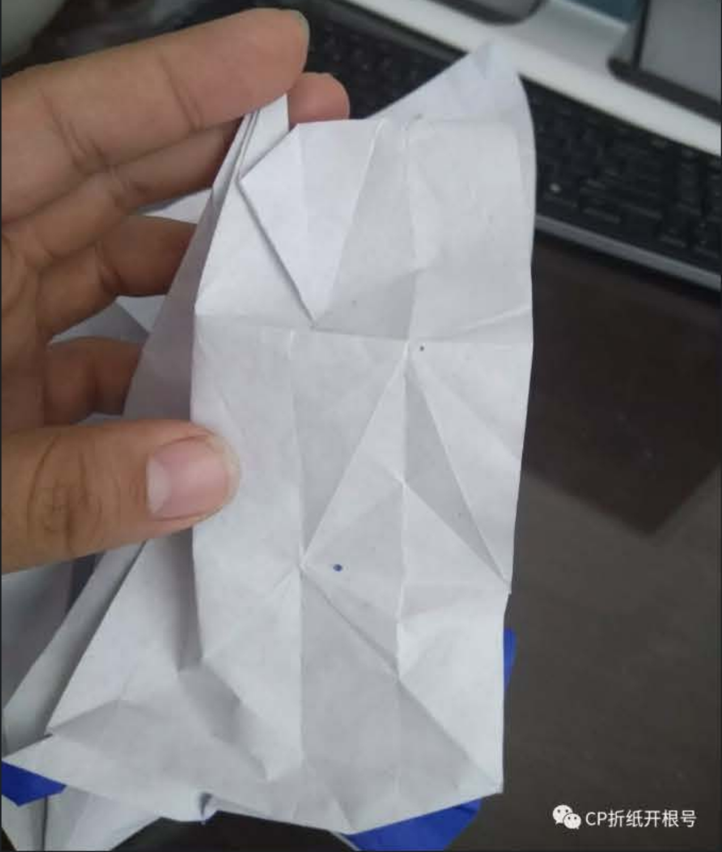
The picture above is the part of the arm. It is relatively simple, just pay attention to the continuous peaks and valleys.





CP折纸开根号

Then we combine the parts in the red box mentioned earlier with this.

Finally, adjust the position of the head in the middle. The aggregation is complete, but everyone should find that there is almost no line in the head.

The above picture is a detailed picture of the head given by netizens. You can see the connection of this part in the main picture from the position of the above picture. Pay attention when you make the line. Of course, the line in this part is generally not Many, do not need to type in advance, as long as they are completed together after the aggregation. I ’ve done some real shots here, and it ’s just fine. It ’s relatively simple.

At this point, the part we gathered is not over. In the meantime, the bottom leg part of the drawing is not mentioned, because it is too simple. I believe that everyone has no problem. Then we start to adjust the position to prepare for plastic surgery.

Before shaping, I still give a solo shot of the head, so that everyone ca n't see it clearly in the above process. In order to facilitate the call, I use the white face up, which means that the peak and valley lines are just the opposite in the following drawings. Please pay attention.

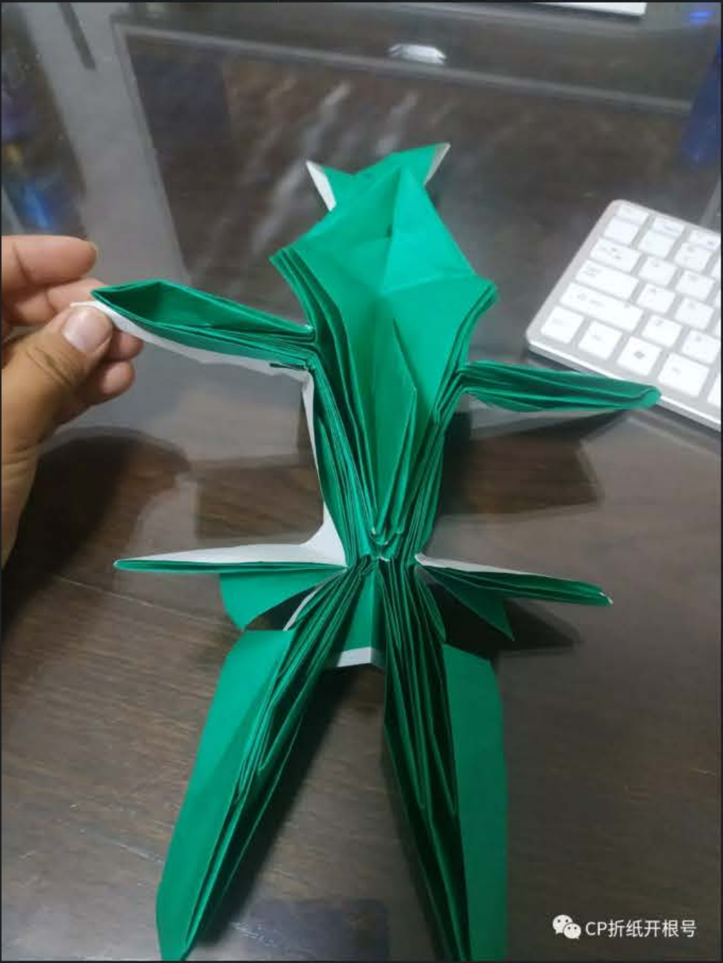
Well, solo shots are so fine, you have no reason not to discount it!

Reshaping is started below (the time is very tight, but the blue works previously aggregated are not found, so a green one is now aggregated)

The first step is to distinguish the branches, sort out the position, and then reshape from bottom to top. I do n't have much time to speed up a bit, everyone must be slower because this work has a little problem.



First clear out the branches, then fold out the face

The head here is obviously folded at the back, so the shaping must be twisted. The other parts are not too big. So, let 's get started.
First tie the middle tie

Next is the position of the dress

The following is the small problem I said. This work uses a small branch above to complete the eyes, but it is absolutely impossible if the glue is not used for styling, but if the glue is not dry, then the plastic surgery will cause the face to be deformed. Because the structure here is a little bit, nervous, be sure to take your time. I 'm a little bit fast to catch up. Later, you will find that the eyes are a bit deformed, and the face is a little bit. This makes the whole character less cute. A bit fierce🤔

I posted a lot of life sketches and origami sketches, and of course there are original works on display

My Taobao Online Store

Although there is no decoration in the online store and the pictures are not very beautiful, the works are still complete, and I can order CP works that are not in the store. Of course, it also includes the aggregated semi-finished products and finished products of almost all the works explained by the public account. And line paper for sale.
