Origami Share No.17 The penultimate period of the 53rd issue of Mantis CP

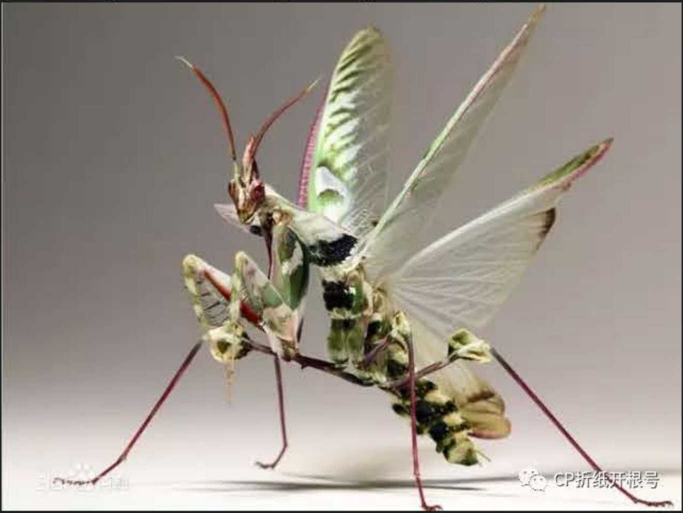
Original Origami Student Takayama CP Origami Opening Number 2018-09-05

Hello everyone, welcome to CP Opening Numbers!
We are still here to fold the praying mantis!

The praying mantis, also known as the sword mantis, is an invertebrate and is a carnivorous insect. In ancient Greece, the praying mantis was regarded as a prophet, because the praying mantis raised its forearm like a praying girl, so it is also called a praying insect.

The locust's life cycle is completed within one year, and it passes through three stages of development: eggs, nymphs, and adults in its lifetime.

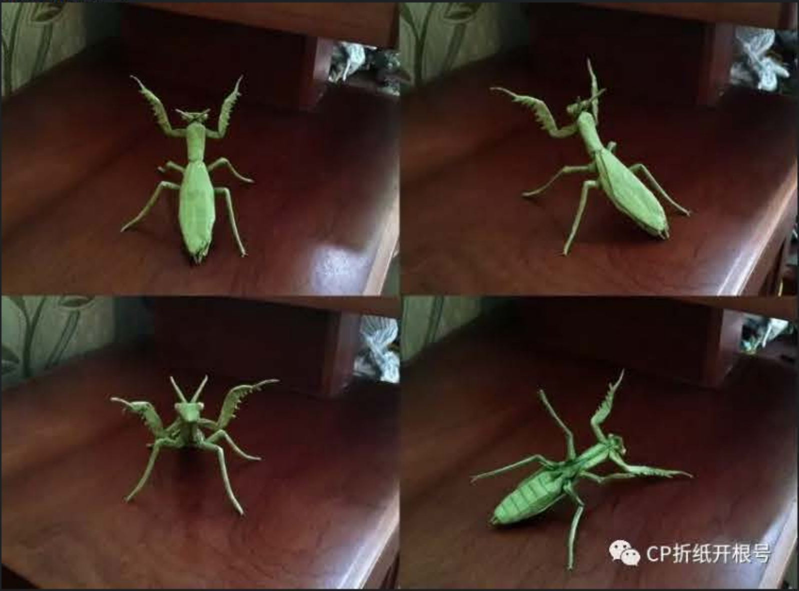
In this issue, let me introduce you to a good looking mantis.

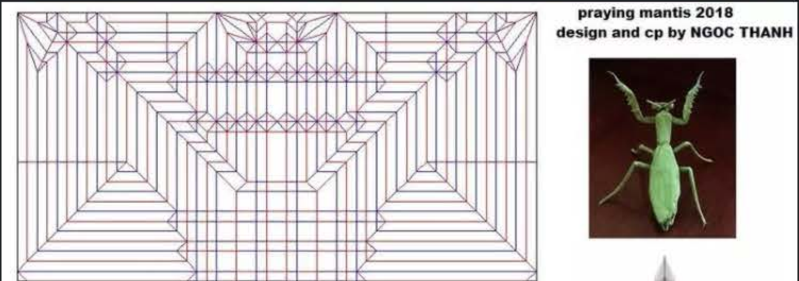


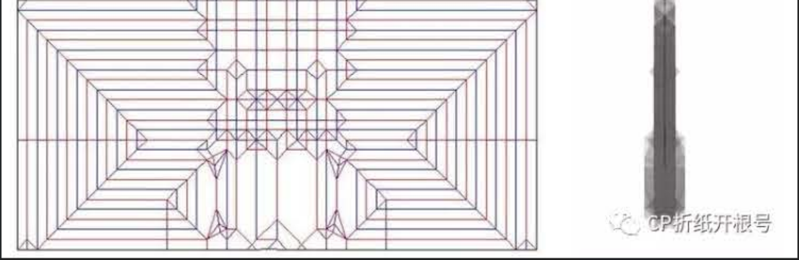
[Magic Flower Mantis] is the largest predatory mantis, with a length of up to 13 cm. The body of the magic flower mantis is multicolored, with red, white, blue, purple, and black crisscross, which is gorgeous, but such a gorgeous color is only a male's patent. Magic flower praying mantises are leaf-like when young, males grow brighter in color, while females are mainly beige, and when they are quietly dormant, they are like part of a plant. Whenever the mating season, the male will sway, dance and dance with other males to show off the gorgeous spots on their bodies to gain female favor.

Although the mantis we played in this issue is not the king of mantis, it can also be regarded as a larger type of mantis!

Let 's meet CP

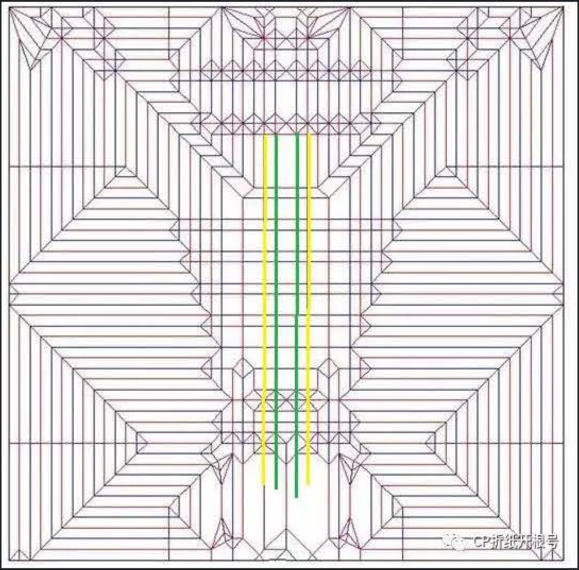






CP折纸开根号

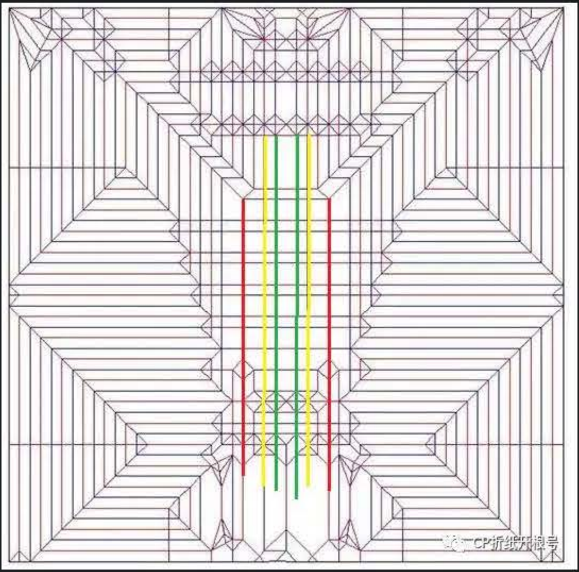
In this issue, 52 * 52 are equally divided. Please make a grid and corresponding lines, and then start from the middle to the peaks and valleys.



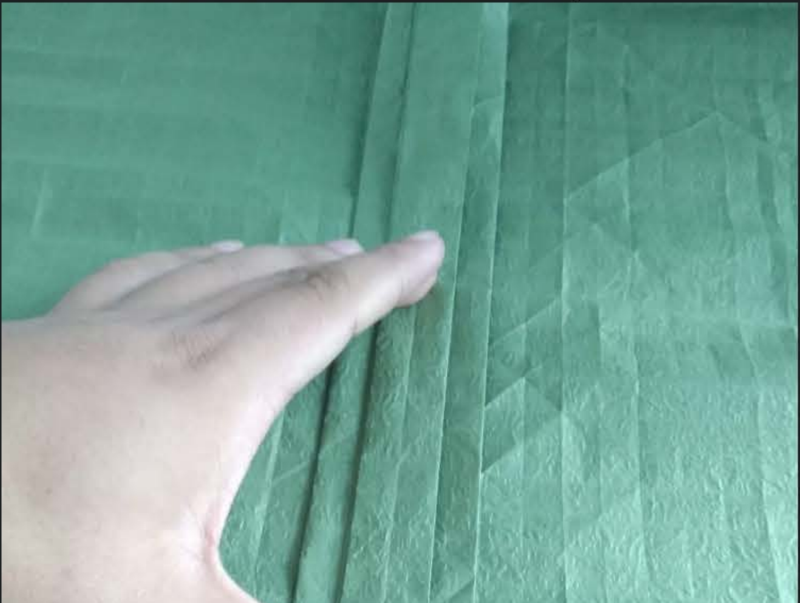
CP折纸开根号

CP折纸开根号

According to the figure below, the peaks and valleys are folded again, this time in two cells.

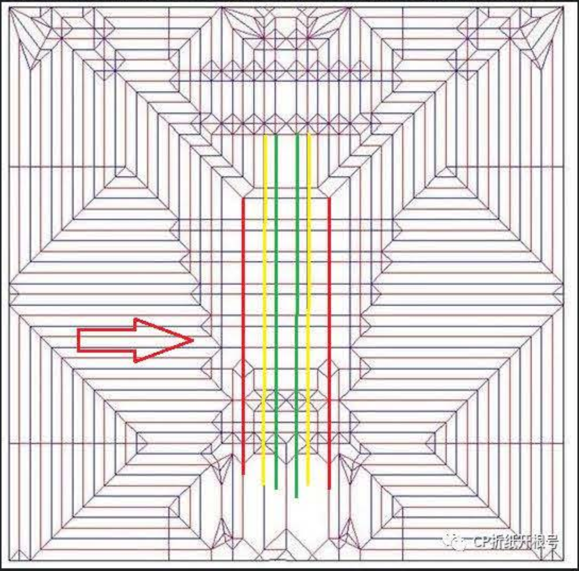


CP折纸开根号

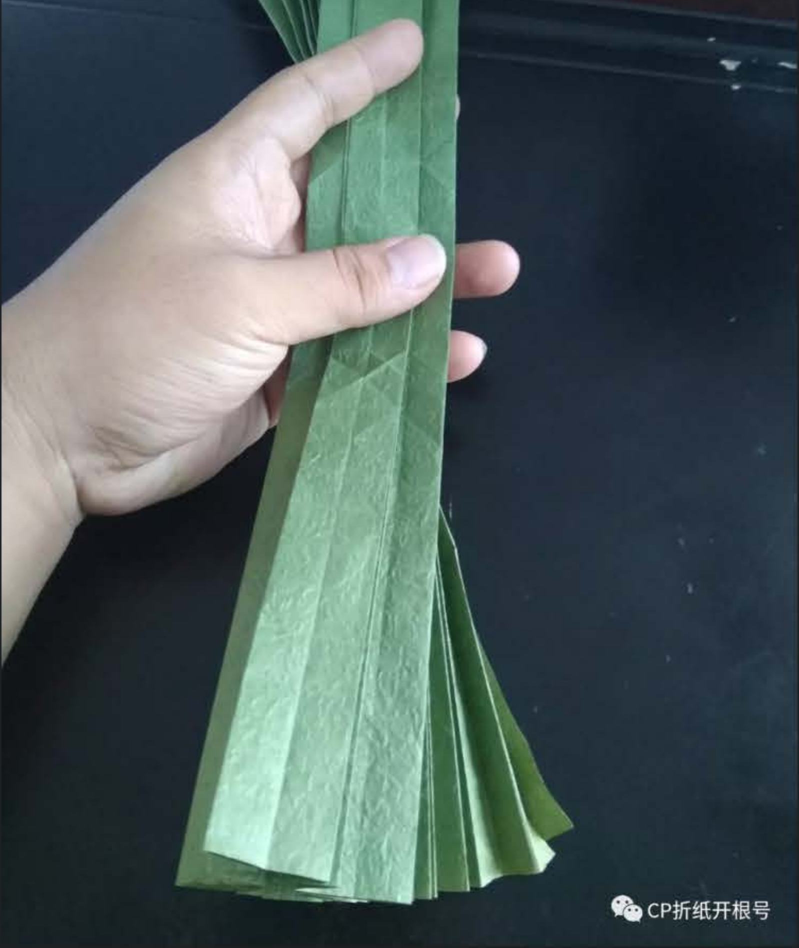


CP折纸开根号

Below, we will enter the grid on both sides longitudinally to the middle



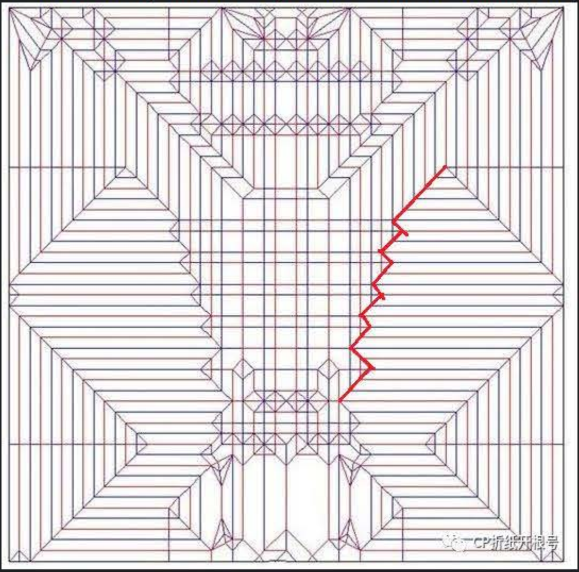
CP折纸开根号



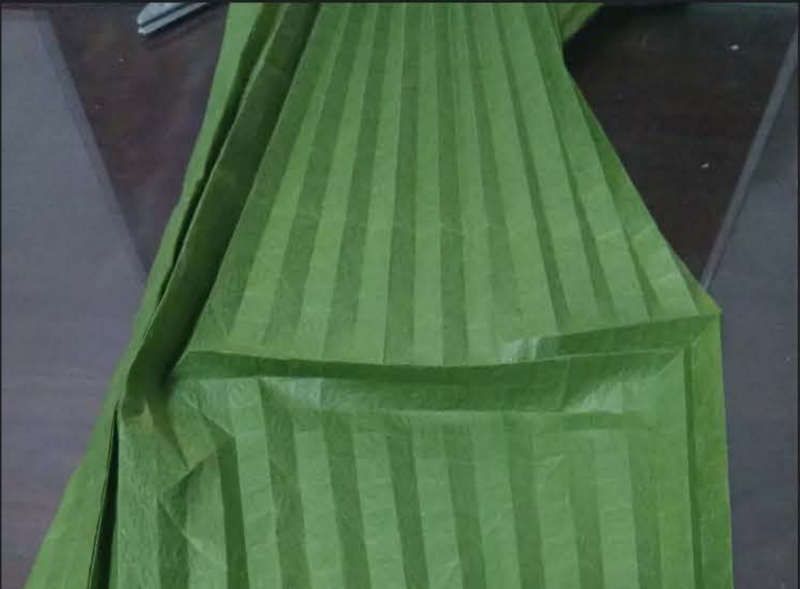
My paper was broken in the middle, so I added another one in the middle, so it looks like there are two squares in the middle, but this is not the case. Do n't be misled.

CP折纸开根号

As shown below, we first complete the sawtooth structure on the right



CP折纸天狼号

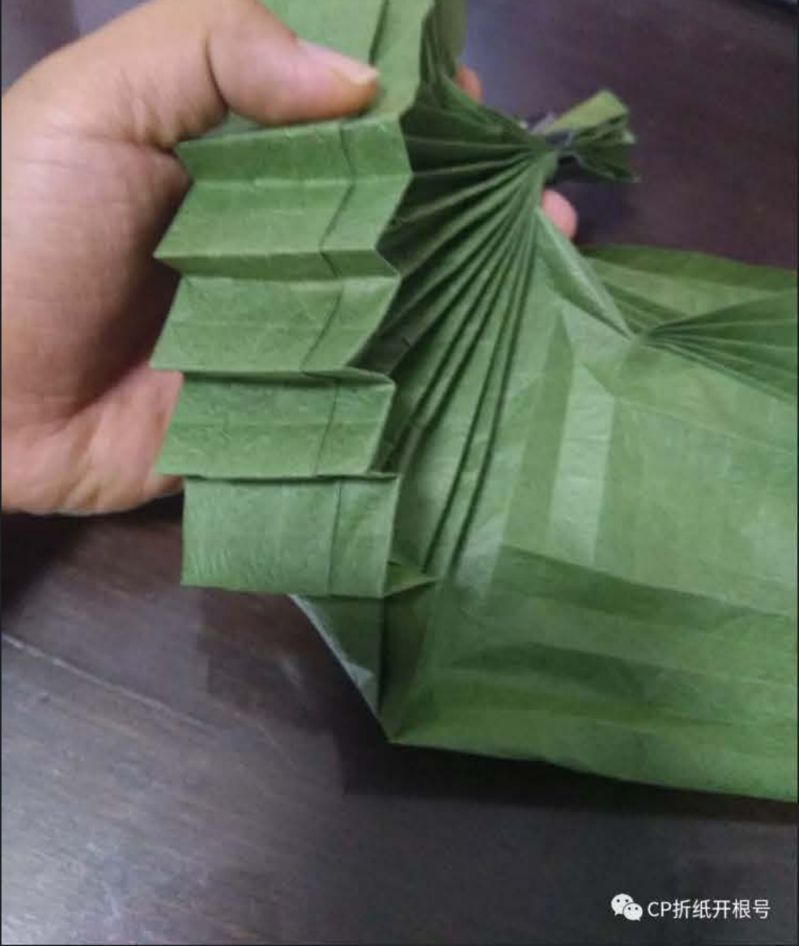


CP折纸开根号

CP折纸开根号

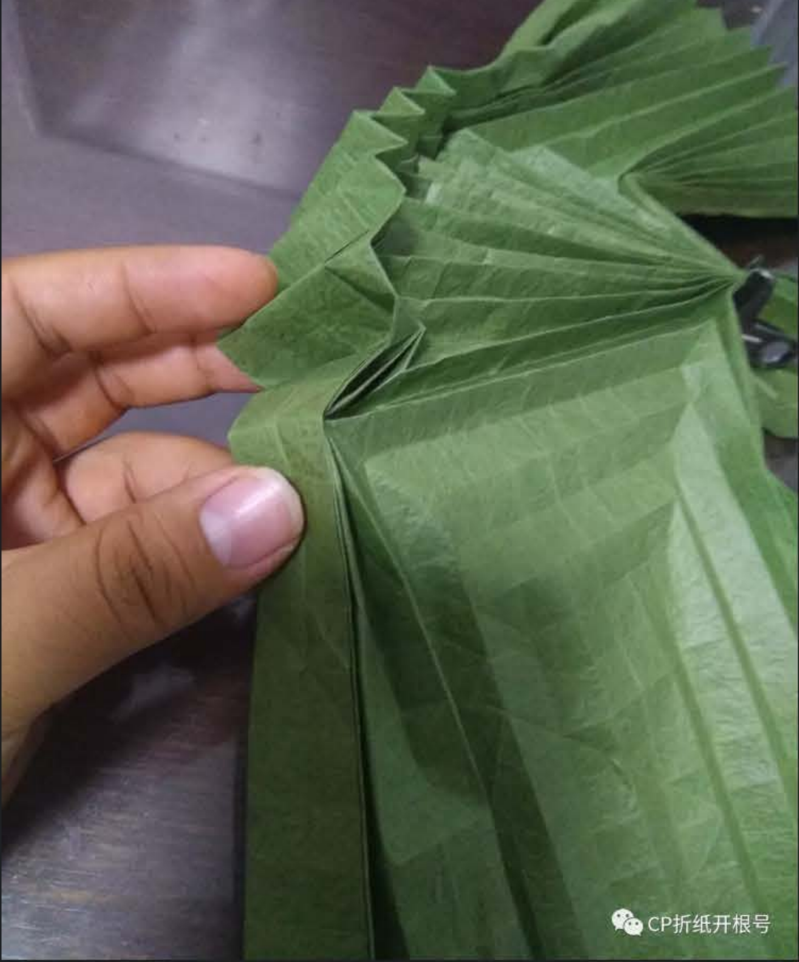
As shown in the figure below, we continue to complete the structure of the front legs, and the other side is also similarly aggregated. Close the aggregation of the box area in the figure below, that is, complete the two small corners below the belly.

CP折纸开根号



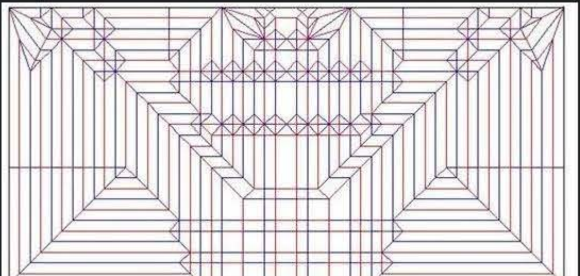
CP折纸开根号

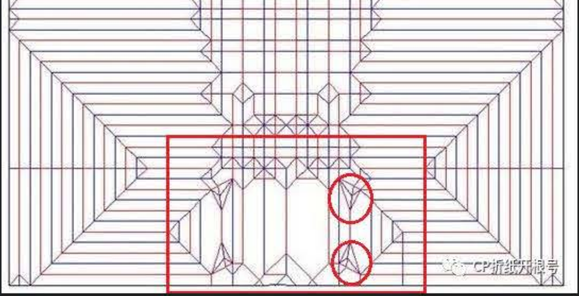
In the picture below, we are going to pull away to complete the two corners.



CP折纸开根号

As shown below, let's aggregate the positions of the back, handle the long lines and complete the diamond structure.

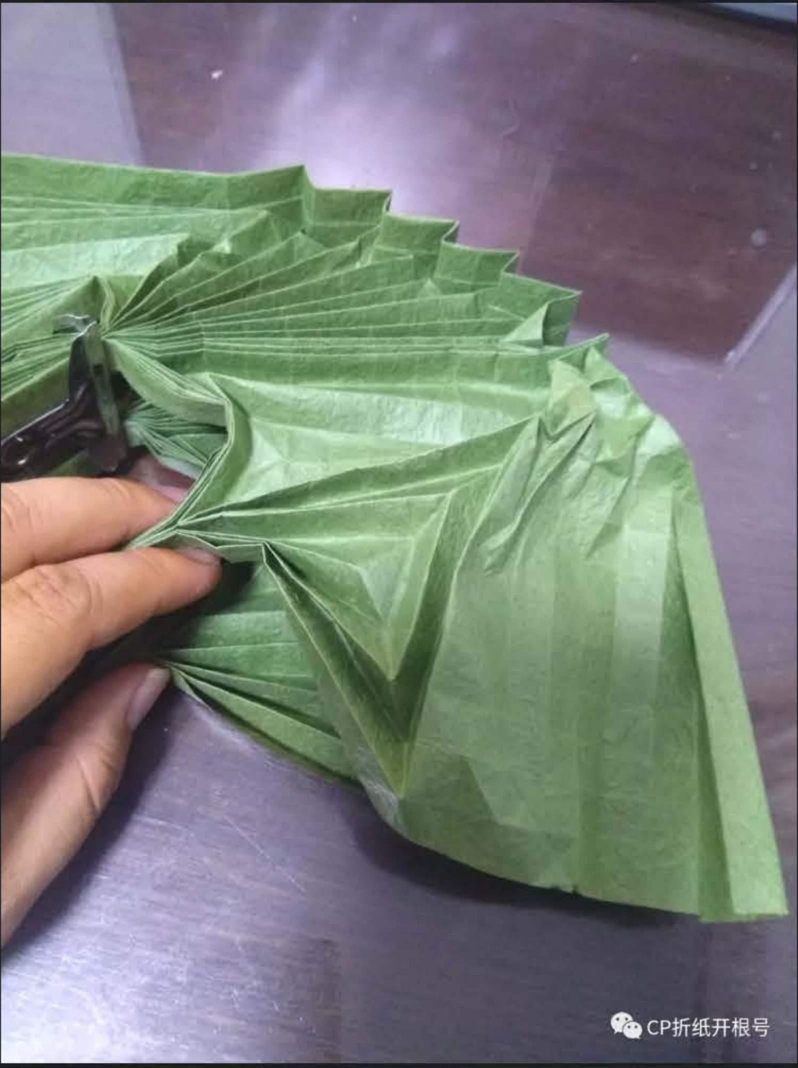




CP折纸开根号

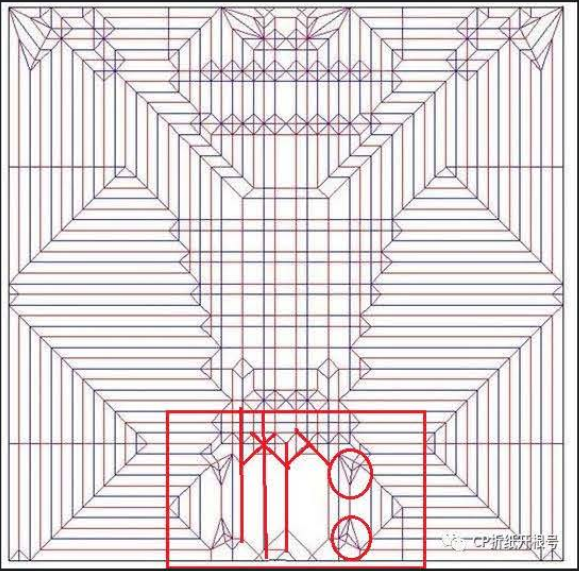
CP折纸开根号

CP折纸开根号



CP折纸开根号

CP折纸开根号



CP折纸开眼号

When you finish this part, you must pay attention to a lot of details, because there are too many short lines here, we need to take a solo shot at this position, so please take a look at the solo shot first (the solo shots in the future will also be placed in specific steps Medium, it will not appear in the forefront, because many netizens report that when they saw it, they learned it, but when they are folded, they have to go back and compare, so in the future they will be put in the steps and aggregated together. Improvements)

Solo shooting started

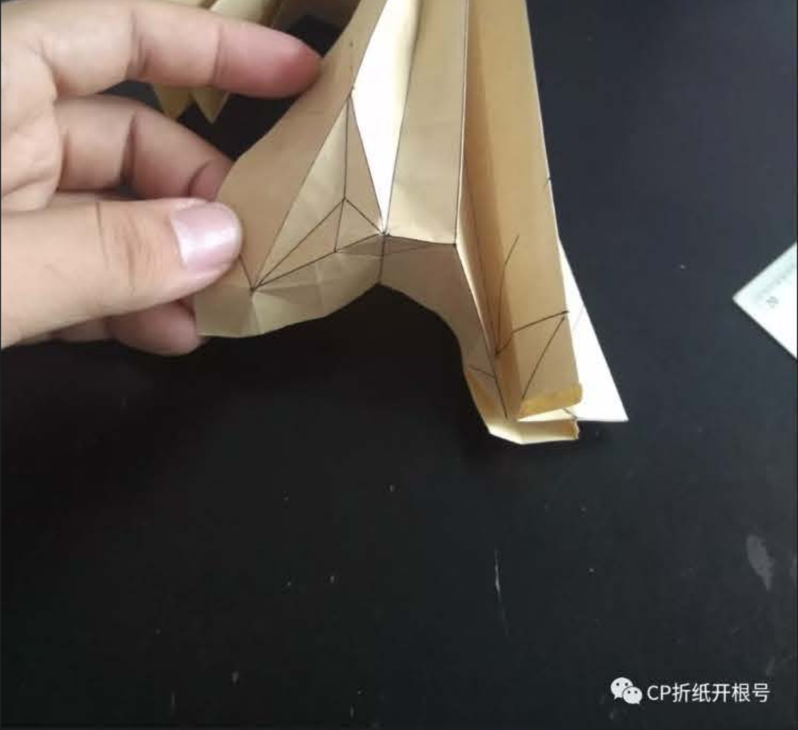
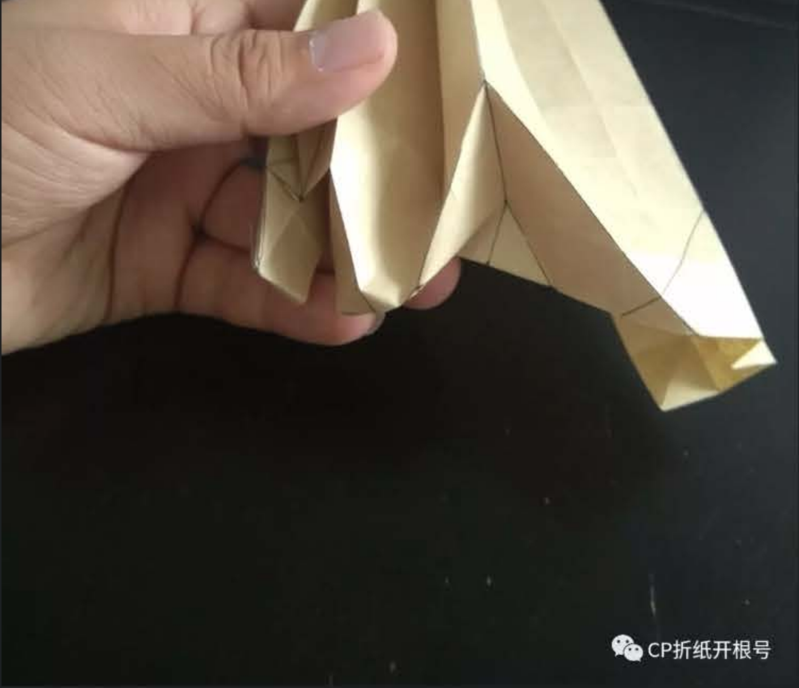
Finally finishing the following sections

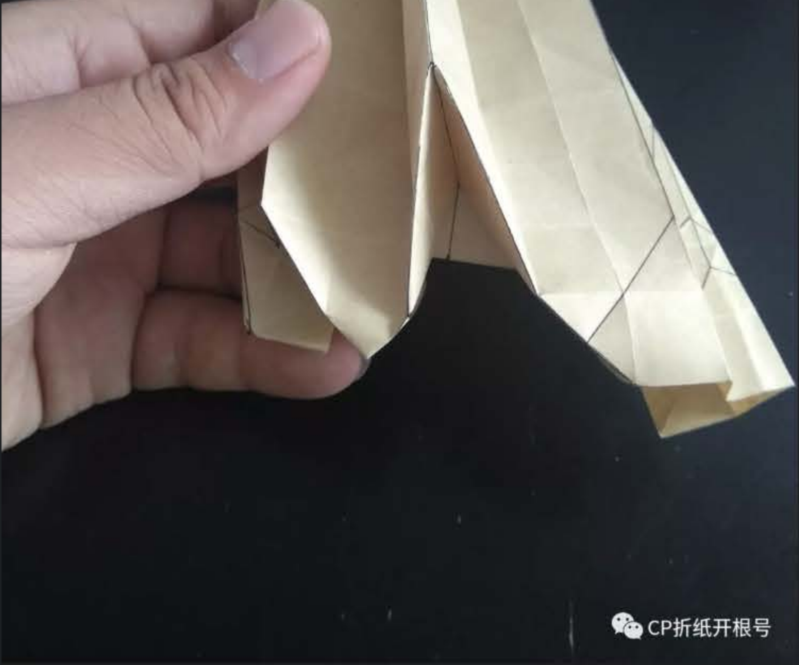


CP折纸开根号

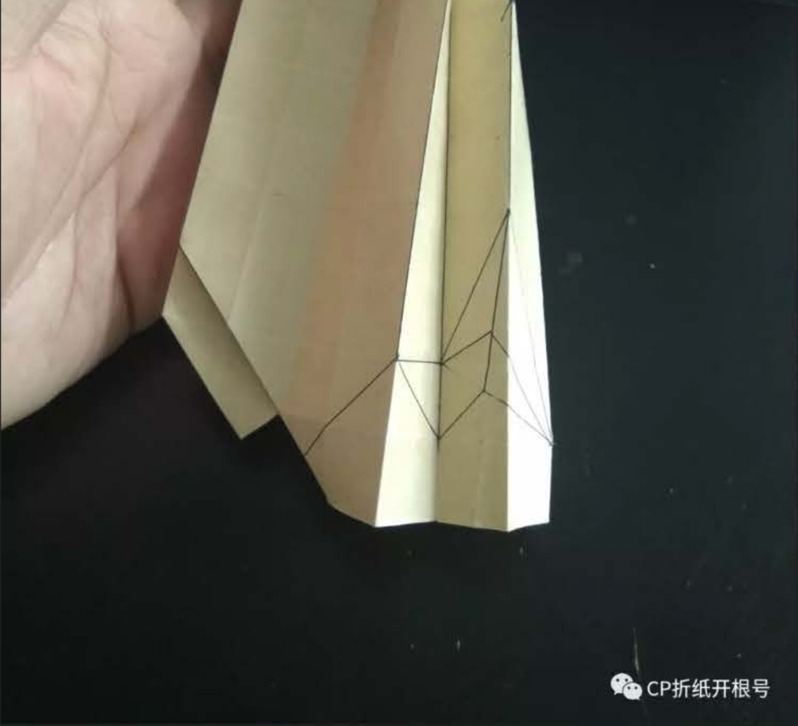
CP折纸开根号



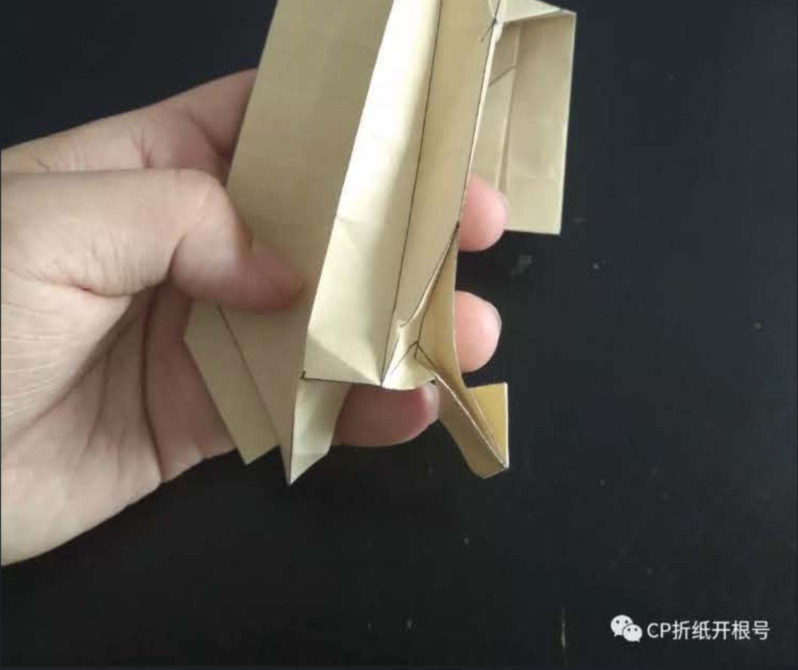
CP折纸开根号



CP折纸开根号



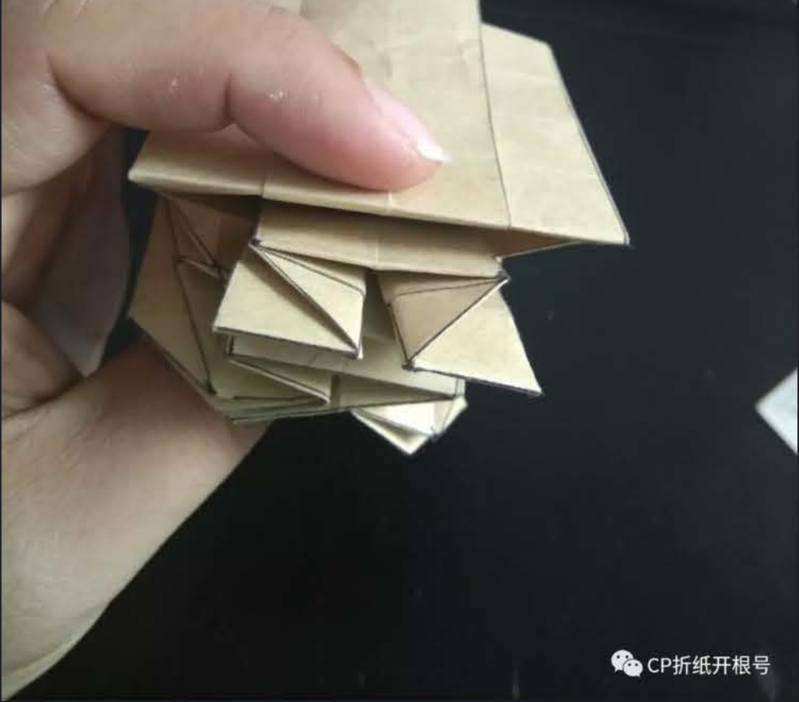
CP折纸开根号



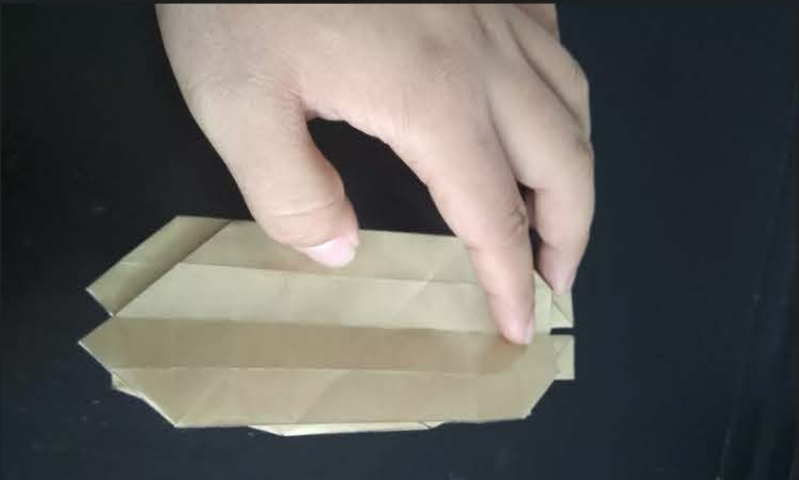
CP折纸开根号

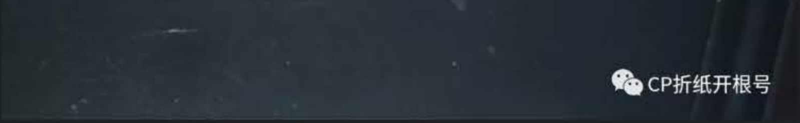
CP折纸开根号

CP折纸开根号



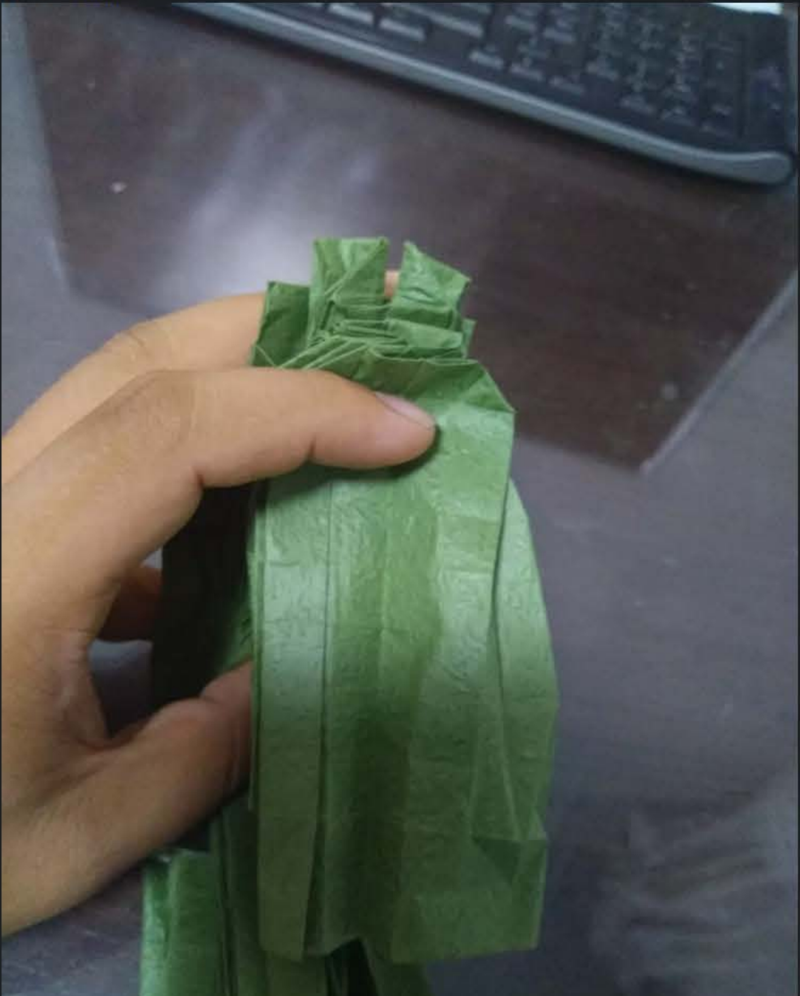
CP折纸开根号

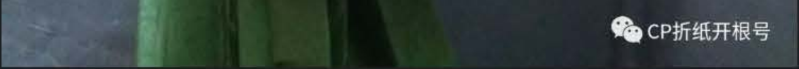




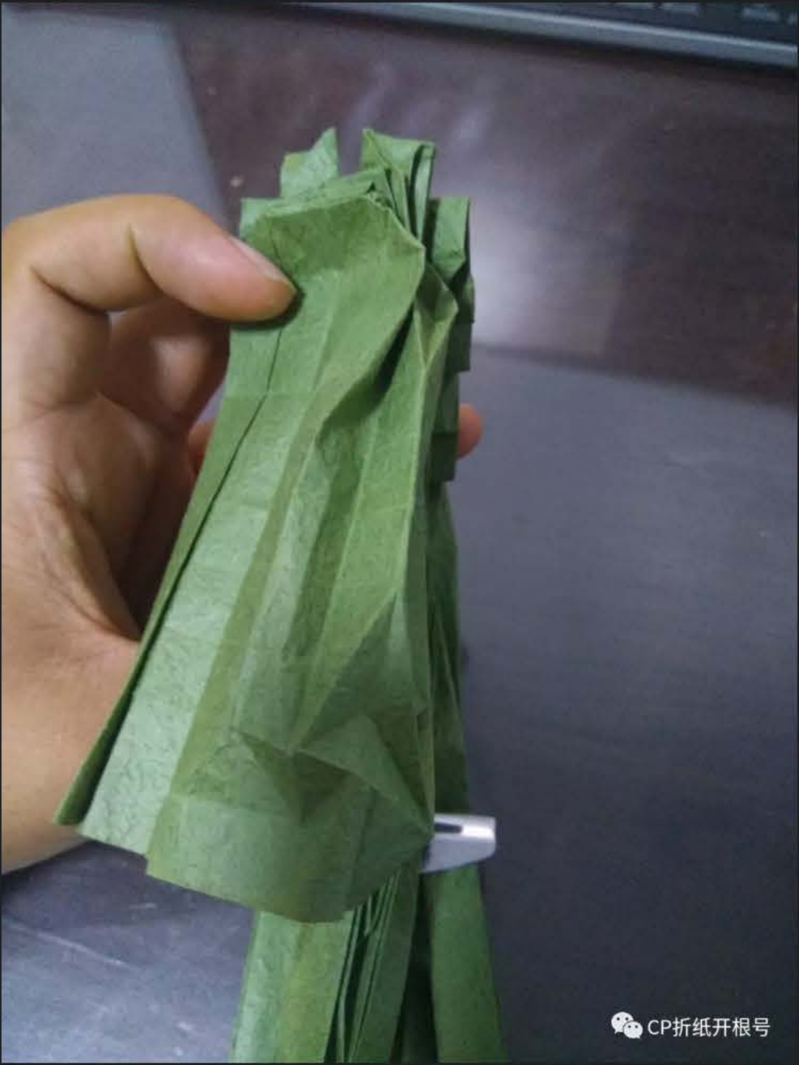
CP折纸开根号

Let 's focus on the solo shoot above, come on!
Let's continue





CP折纸开根号

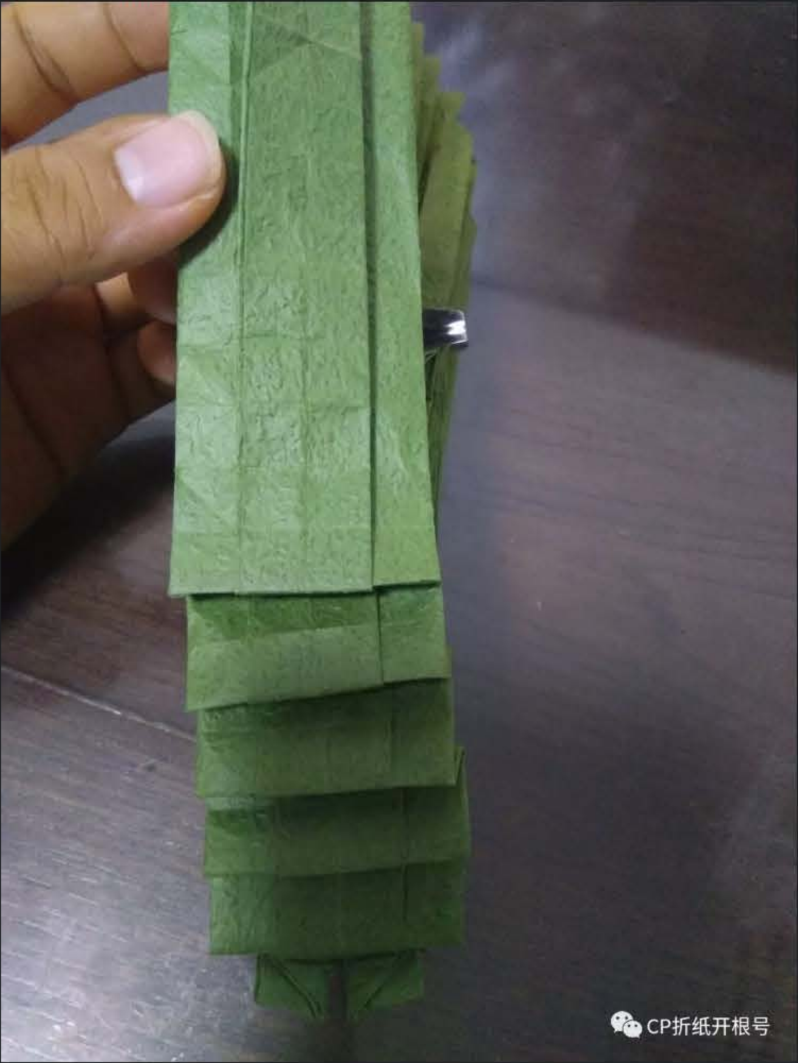


CP折纸开根号

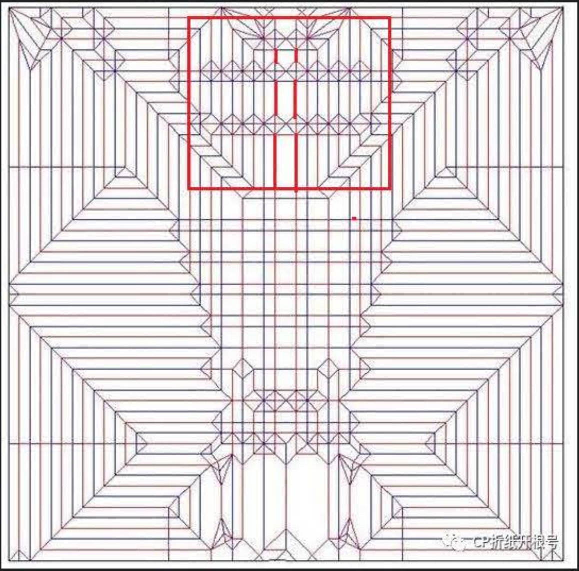
CP折纸开根号

CP折纸开根号

We start to aggregate the above



CP折纸开根号

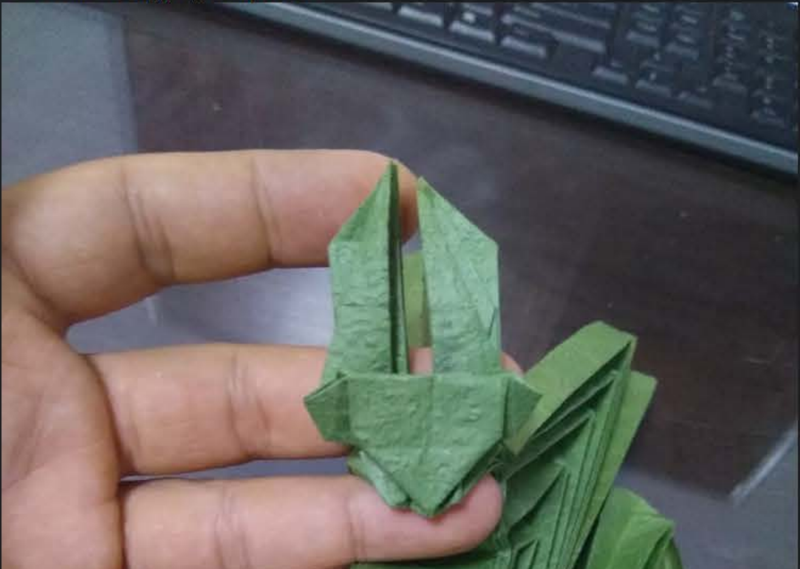


CP折纸开根号

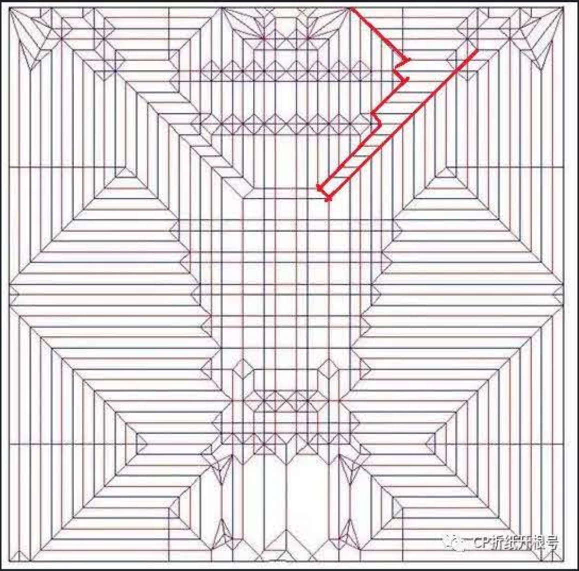
First we aggregate the head and then focus on the neck

CP折纸开根号

The aggregation of the head is easy, and the beard, eyes, and two teeth can be easily seen from the aggregated product.

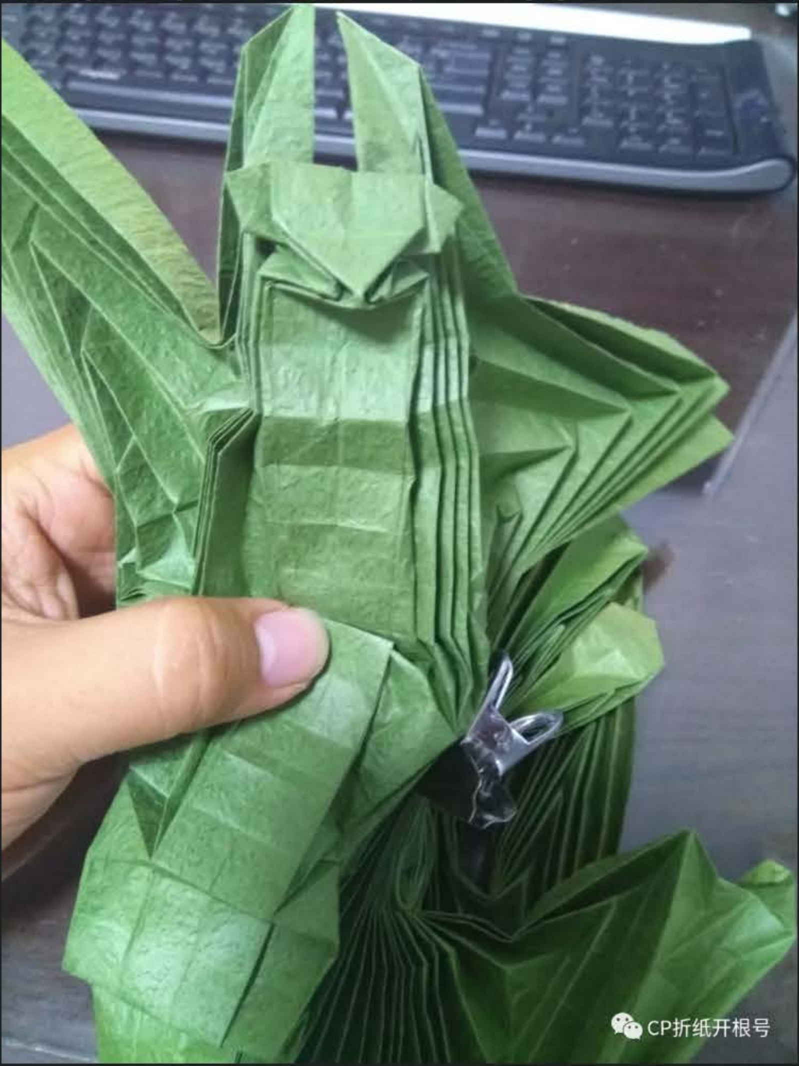


CP折纸开根号



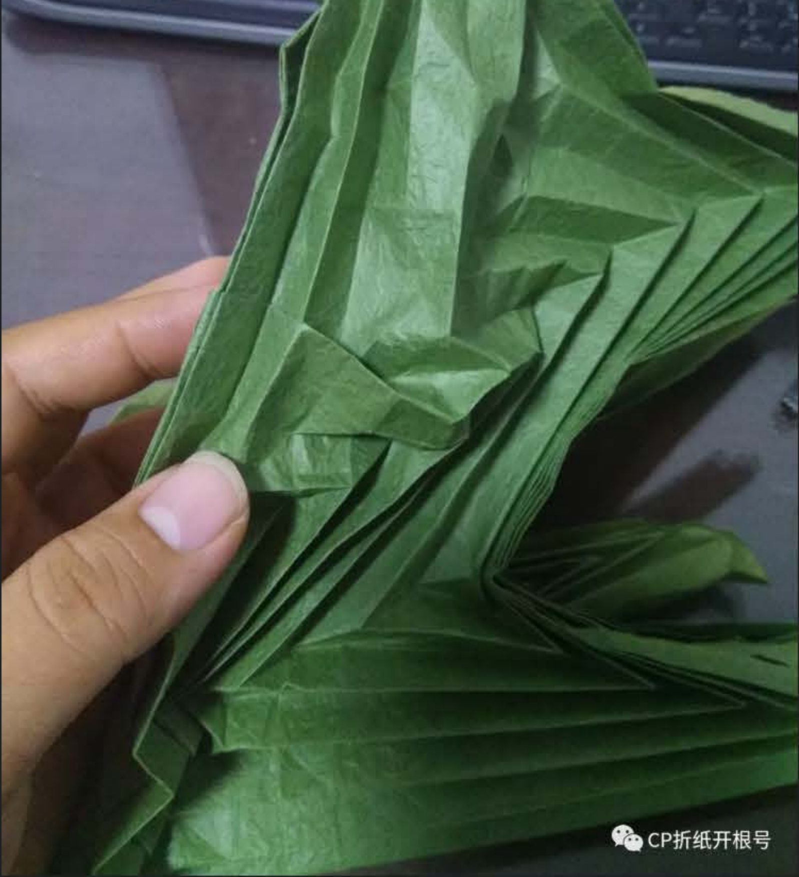
CP折纸开根号

According to the figure above, we have completed the zigzag structure on both sides.



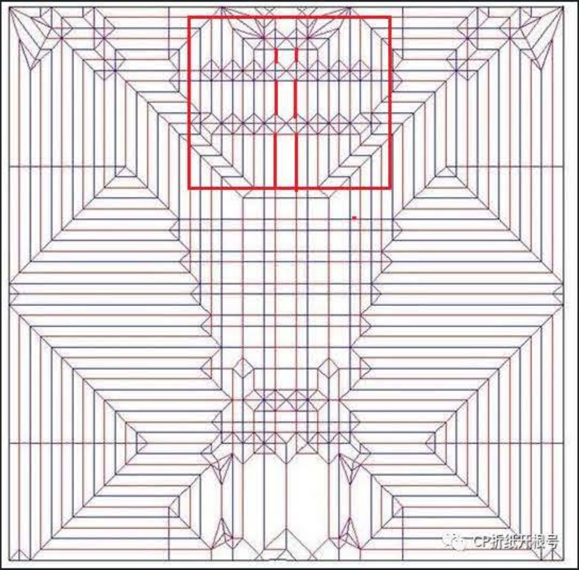
CP折纸开根号

CP折纸开根号



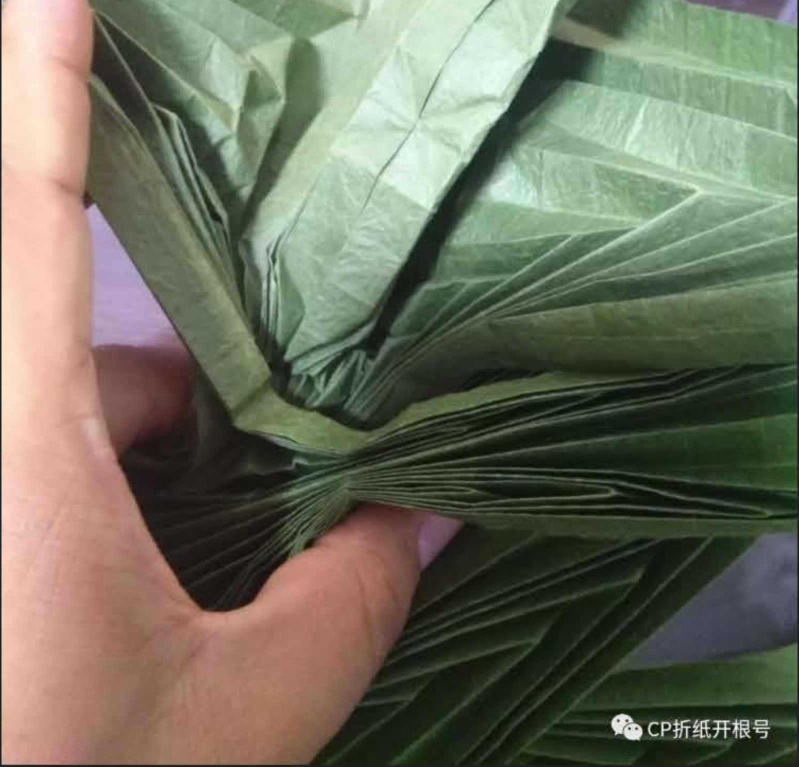
CP折纸开根号

After finishing, let 's look at the neck part again. There are a lot of lines here, but the regularity is very strong, so we will not do solo shots. You just have to pay attention to two points. One is to be optimistic about the peak and valley segmentation here, The three peaks and valleys in the figure are opposite. Using the small square + peak and valley straight line, we performed two inversions, so normally the paper that we aggregated at the bottom is the peak-break side, and it becomes the middle. The valley line sank to the back, and turned back in the upper section. The second is that during the polymerization, it can be considered that the operation on the back side may be much easier when the front side operation is difficult.



CP折纸开根号

The following figure is the operation of reversing the entire paper to the back
The split at the center line in the picture is the pasted paper I said

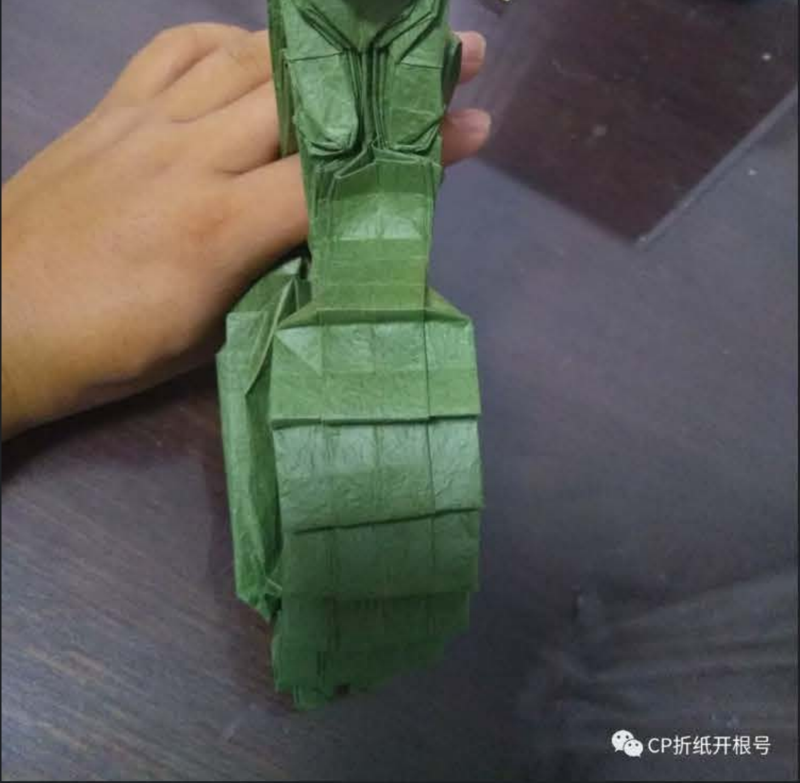


CP折纸开根号

From here we sink the upper piece of paper to the front again

CP折纸开根号

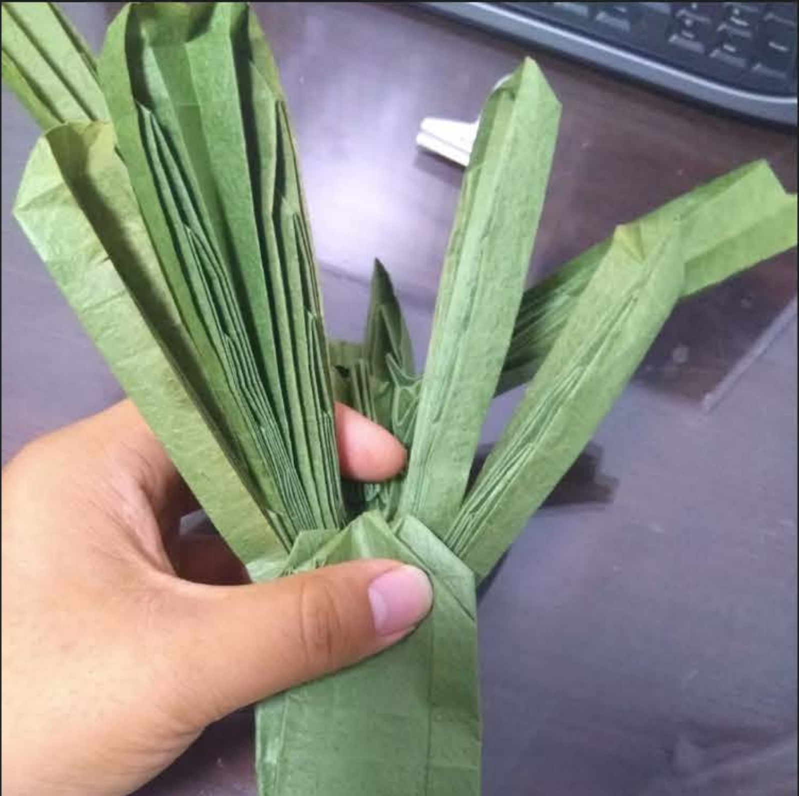
After turning it back again



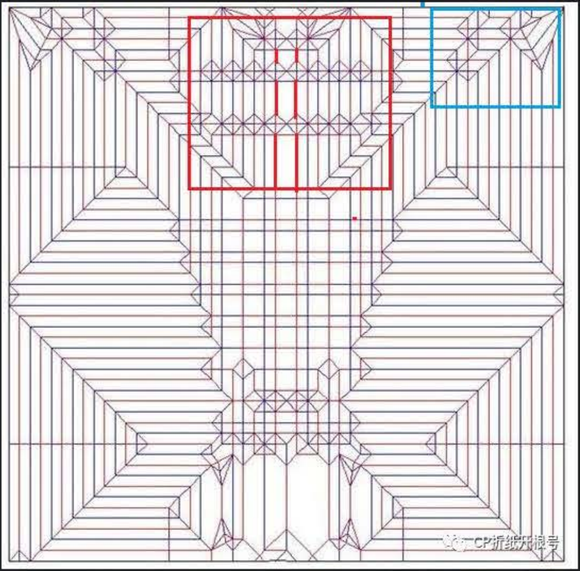
CP折纸开根号

At this point, we have basically completed the aggregation, and then we will adjust the hand knife part we just skipped. After detailed adjustment, you can shape

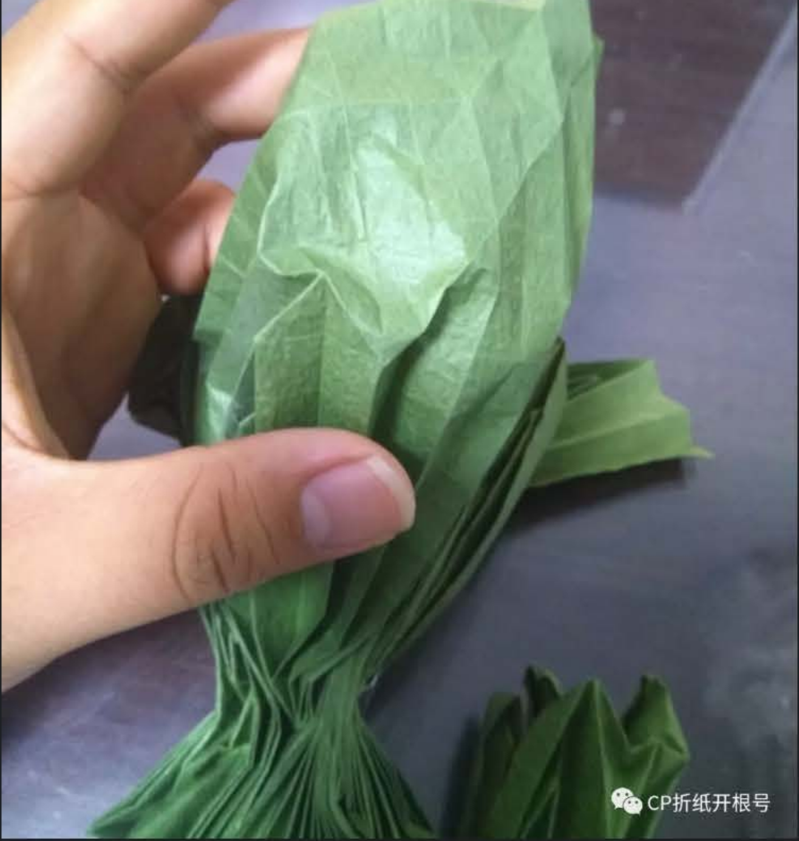
The following is the scene from the back



Below we aggregate the knife part in the blue box in the figure below



CP折纸开根号

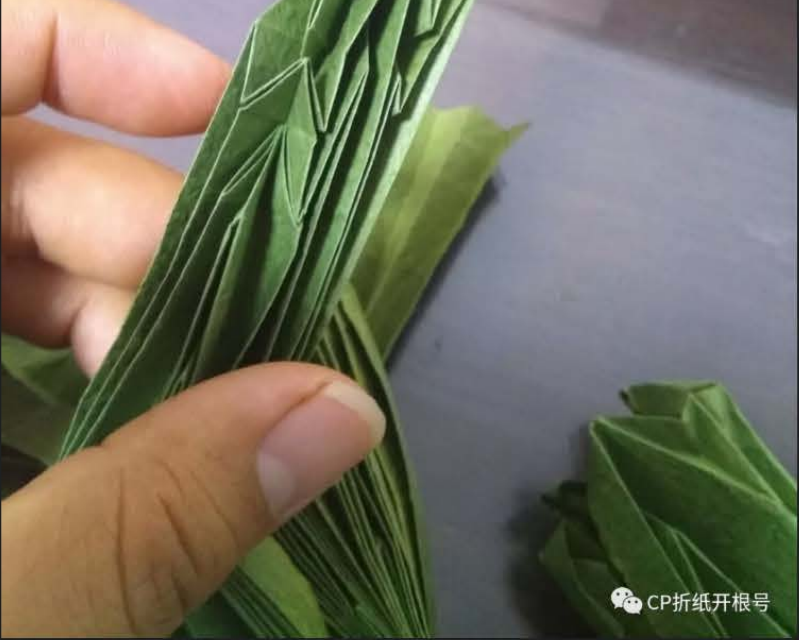


CP折纸开根号

CP折纸开根号

CP折纸开根号

CP折纸开根号

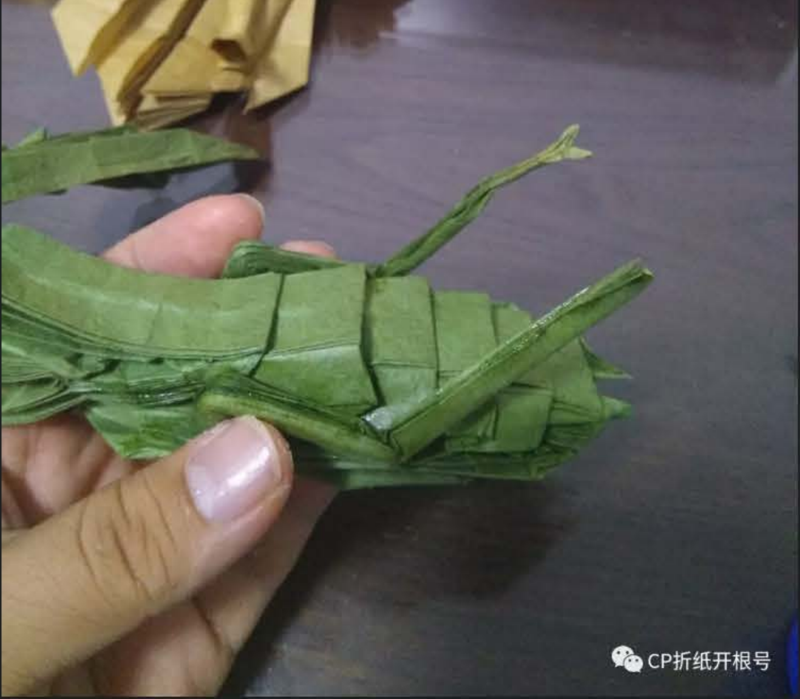


CP折纸开根号

At this point everyone should start plastic surgery!

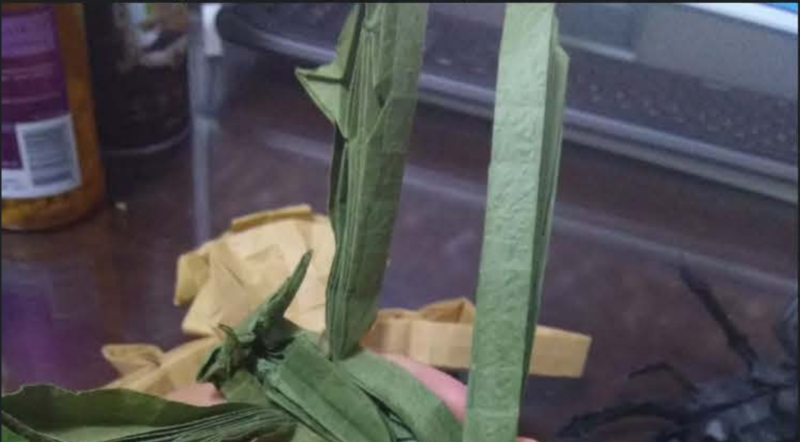
Here are some real shots of integral type. I usually deal with the legs first for such works, but at the same time, in order to make the belly look more bulging, it is recommended that you do not glue the knots of the belly like a beetle. it is good

CP折纸开根号



CP折纸开根号

Press both front legs into the back and then reshape

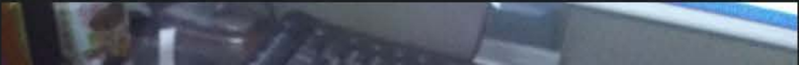


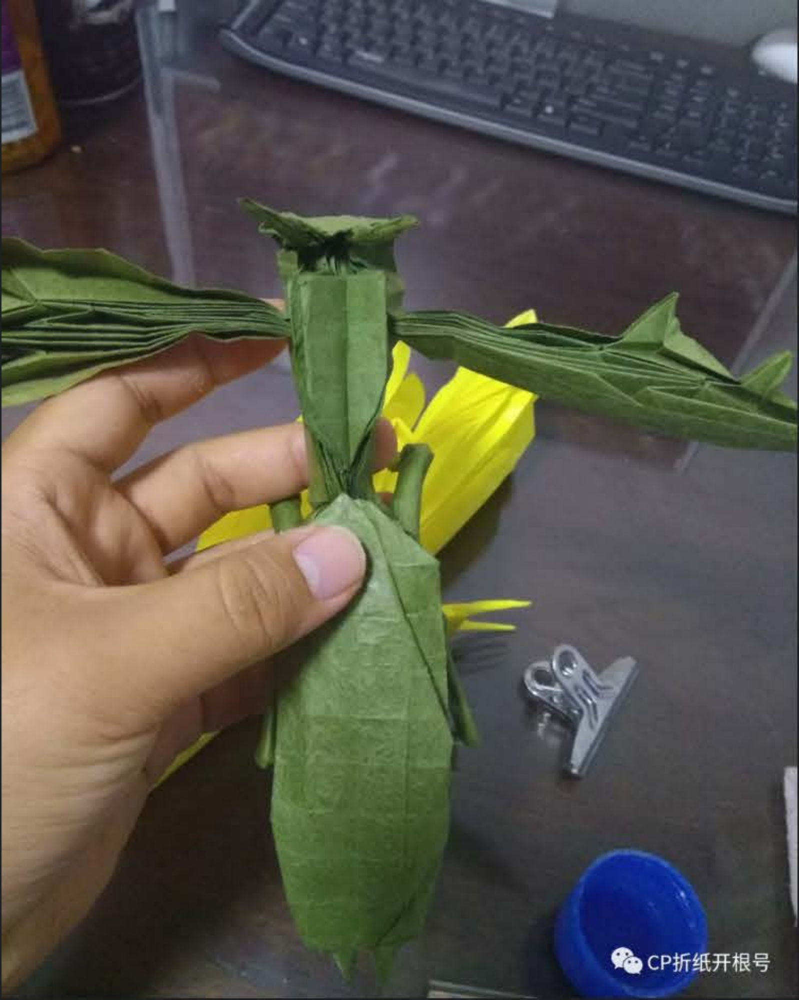
CP折纸开根号

Glue can be added to the neck, but it must be added layer by layer, preferably from the inside out, so that the outermost layer is flat

CP折纸开根号

Head grooming varies from person to person. Some people like to make their teeth more obvious, while others want to hide their teeth.





CP折纸开根号

Finalize the hand knife

CP折纸开根号

In fact, from the CP, you ca n't pull a few puppets out of the hand knife, but during the shaping process, you can pull out more puppets from the inner corner, which is more like a mantis in life

CP折纸开根号

In the end, everyone can sort out the head of the praying mantis to make the eyeballs bulge a bit, and the face is a little angular, so my thinking is like this, everyone!

See you next time!

Nth issue: Advertising
Once again, the name of the volcano 515650243 is the mountain origami player
Tremolo 29248204gaoshan name is origami player
I posted a lot of life sketches and origami sketches, and of course there are original works on display🤔
My Taobao Online Store
Although there is no decoration in the online store and the pictures are not very beautiful, the works are still complete, and I can order CP works that are not in the store. Of course, it also includes the aggregated semi-finished products and finished products of almost all the works explained by the public account. And line paper for sale.
