CP Share Series No.54 Total 138th New Year Egg Dragon CP

Original Origami Student Takayama **CP Origami Opening Number** January 1

Hello everyone, welcome to CP Opening!

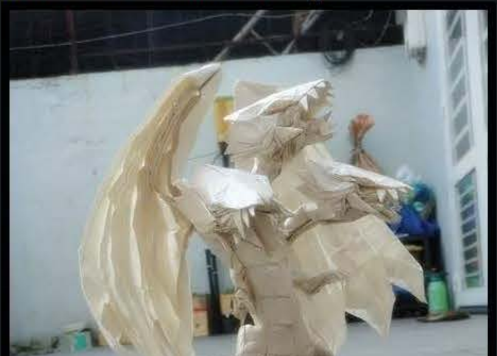
2019 is over so quickly. I decided to send out an egg period in the evening. A friend wrote to me a while ago and wanted me to make an issue. It was originally planned to be issued in the second issue in February, but after all, think about it. Tomorrow everyone will have a holiday one day. Maybe someone will want to fold it off, so maybe add some text to sort it out. I hope everyone can take the time to discount it, and of course take a look at it!

CP origami itself is not a particularly difficult technology, but many people find it difficult. In fact, most of them are afraid of spending a lot of time on the wire, so they are more afraid of the time before the aggregation and shaping problems. Therefore, the hardest thing to say is not the origami itself, but the energy expended in folding a difficult work.

On the first day of the new year is still cheering everyone, Origami gentlemen, be brave!

Let's take a look at this work today!

In this issue, the specific name of Feilong is not very clear. The picture below may be the author's original picture. The friend who left the message did not specifically say, but the scene is quite cool.
The original author's name is introduced in the CP picture. I don't know how to translate. Please send me a message.



CP折纸开根号

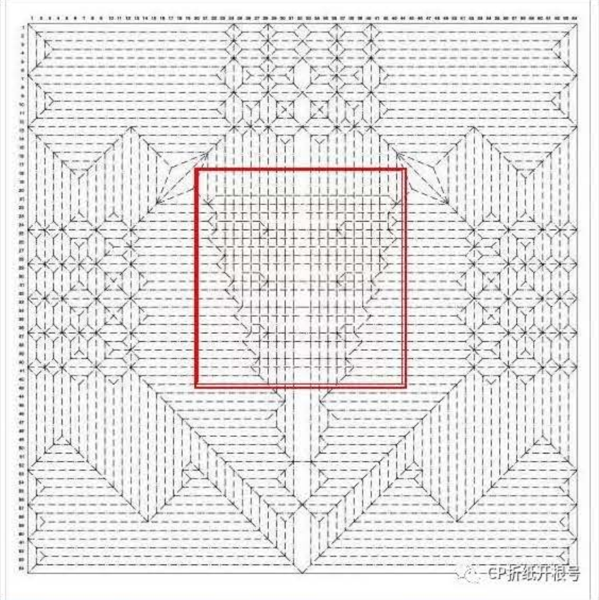
Works in this issue: 64 --- 64 square

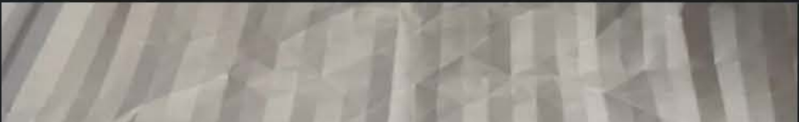
If you have time in the New Year, you can make a line with me, and let's get together!

CP折纸开根号

First, as shown in the figure below, the horizontal lines in the red frame are compacted according to the peaks and valleys of the photo.



CP折纸开根号



CP折纸开根号

After that, we gathered from the sides to the center in a single unit.

After the zigzag structure on both sides is folded, we start to make a large closed figure.

The red line part in the picture below, here by the way to complete the foot part

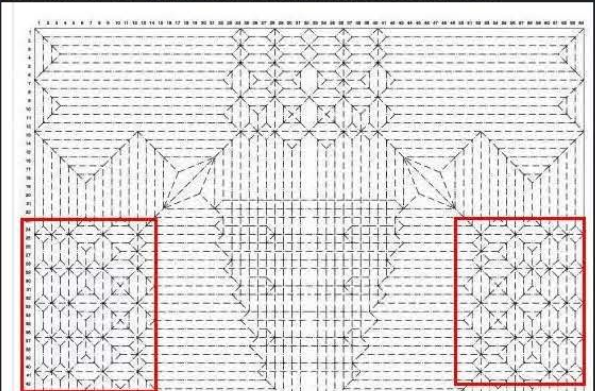
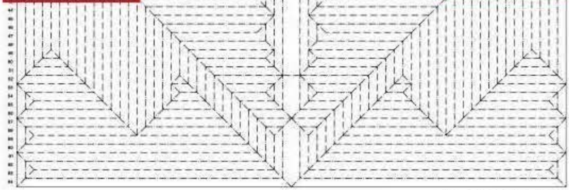
Let 's aggregate one of the heads and then process the other side





CP折纸开根号

It does n't matter if you really have no clue or upset in the aggregation part, just pinch the lines you want to converge, and you can also do secondary processing when shaping.

Next we entered the convergence of the two shoulders and the head in the middle.

Here, just like the two heads just now, there must be a few branches on the left side and a few branches on the right side.

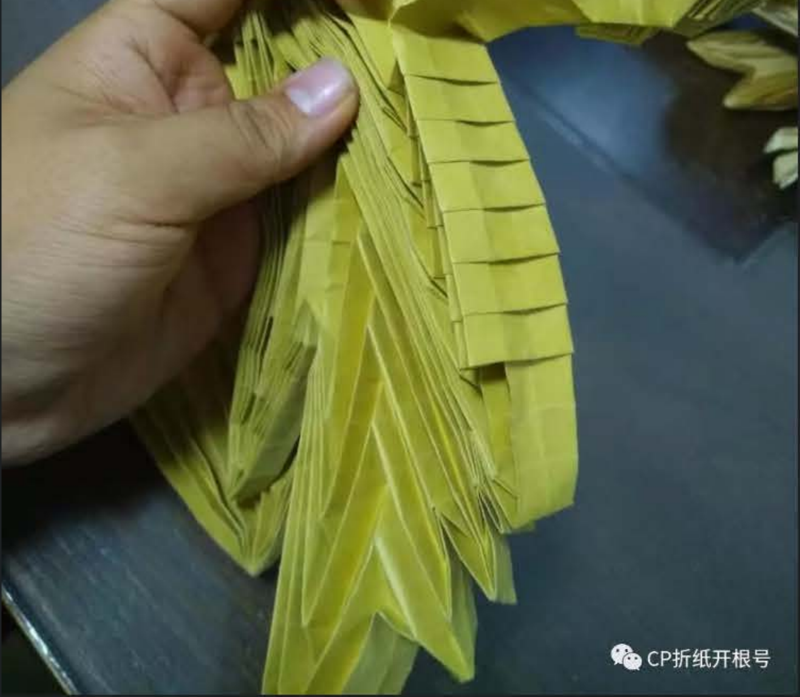
At this point, the parts we want to aggregate are aggregated!
In the whole process of aggregation, it is worth to say that there are three heads. In fact, the method of each head is roughly the same. Be sure to grasp a little during the aggregation, that is, symmetry. If it cannot be handled well, it will be in the subsequent shaping. Very difficult.

Let's talk about plastic surgery.

As for this stack of paper, it takes a bit of thought to get it right, so first of all, it is recommended that you use a large piece of paper.



CP折纸开根号

First flatten somewhere else, and then talk about the head in the middle. Here's one thing that everyone should pay attention to is that the top of the head is cracked. The whole head still looks like a whole because there are several The branches can be used to support the layers of paper above. When we sort out a few teeth, we can naturally form this part into a head. You have this impression first!
Let ’s take a look at the general shaping process!

I need to organize the clips here, wait for the glue to dry, and then organize them further.

My paper seems to be a bit small, but the process is okay. You can see from the test that the paper for the entire work is still larger, it is best to open the paper, and the paper is the best. Don't exceed 50 grams. There is no problem in terms of time, this work is easy to fold!

I hope that the origami gentlemen will succeed in 2020!

Come on, origami gentlemen!
See you next time!
