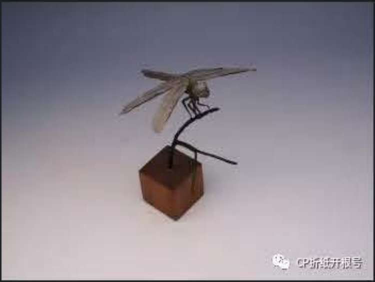
Origami Interactive Series No.34 Another Dragonfly of 110th Lao Luo

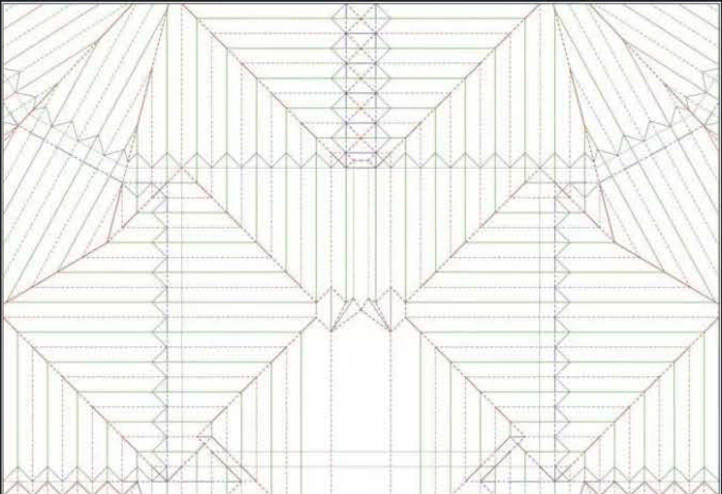
Original Origami Student Takayama CP Origami Opening Number 2019-08-31

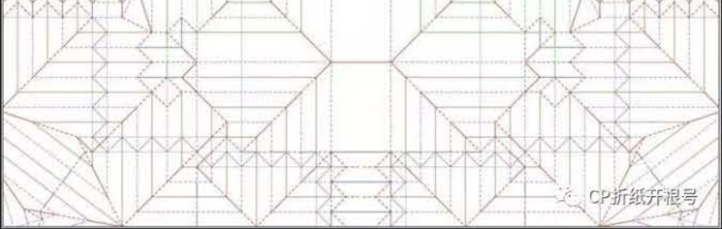
Hello everyone, welcome to CP Opening!

It 's the last day of August. I do n't have time to complete this last update as soon as possible. This issue is the second old Luo dragonfly I collected personally. If I find a new one later, I will share it with you. Now Let's take a look at today's work!



CP折纸开眼号





Works in this issue 48 * 48 square

Expected to hit the grid for 12 minutes and the line for 25 minutes
Let ’s start the classmates together. In this issue, I aggregated a piece of work, but said that I could n’t find anything, so I took a pink piece of paper and folded it again. You barely see it, I don't use this color often.

Let's start with the basic operation, gather from the middle peak and valley, then start to open the paper layer from the middle and lower part, and open a right-angle area according to the figure below.

Next, let 's go up and pull out the green area, and then focus on the several graphic connections in the middle green box. It is worth talking about the continuous operation of the peaks and valleys. Do n't make mistakes. You can follow this peak and valley line above.

Next, we start to complete the diagonal lines on both sides. Many places here are parallel to each other based on the line between the points, so be careful where you line.

Next we process the middle part inward to complete the second pair of wings.

The following is probably the hardest part of this work, because there are many short-term intersections among them. So please take care of the long line first, then the short line, first the closed figure and then the half-open figure.

To tell the truth, this work is not particularly difficult, but the aggregation process will be slightly difficult in some places. There may be friends stuck in one or two small places. As long as you slowly believe that the aggregation will succeed, however, as long as the aggregation is completed, The branches are still very easy to sort out, and plastic surgery is also a matter of natural flow. So ,,,,,,, Come on, origami gentlemen!

See you next time!
