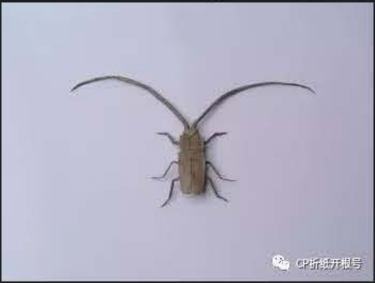
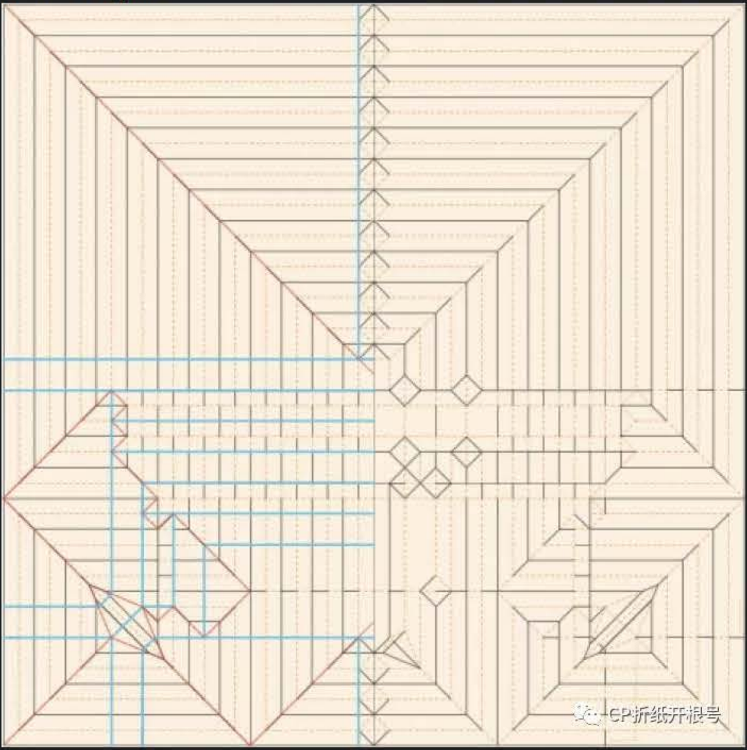
Original Origami Student Takayama CP Origami Opening Number 2019-01-21

Hello everyone, welcome to CP Opening!
Although it is almost New Year, most of the origami sharing this month is all delicious, but in order to continue the introduction of the series of origami, a special issue of difficulty is added this month. !!
👻👻👻👻👻👻👻👻👻👻👻👻👻
Talk about this issue:

Beetles are Polyphaga CERAMBYCIDAE general term for insects, chewing mouthparts, have long antennae, often exceeding the length of the body, there are around more than 20,000. Some species are pests whose larvae live in wood and can cause harm to trees or buildings .
Herbivorous insects is the beetles will harm woody plants , most of pine, cypress, willow, elm , nuclear peaches , citrus , apples, peaches and tea, some cotton , wheat, corn, sorghum , sugar cane and hemp, a small number Timber, construction, houses and furniture are major pests on forestry production, crop cultivation and construction wood.
The Coleoptera Cerambycidae beetle has a common English name derived from the extremely long antennae of most species. Distributed globally, but most tropical. It is 0.4 to 18 cm long, but if the antenna angle is included, the length can be increased by 2 to 3 times. Many adults (such as the European bee-shaped tiger beetle [*Clytus arietes*]) collect pollen and have yellow, black, and orange colors that resemble wasps; some tropical species of the genus *Clytus* (*Clytus*) look like ants; The cow (*Pterognatha gigas*) is like a moss or lichen with a few lines (outstretched antennae).
So is the beetle a pest? ? ? ? ? ? ? ? ? ? ?
Everyone think about it,
Let 's take a look at today 's work CP!



CP 48 * 48 square



After observing the CP, of course, please take out a piece of black hand-kneaded paper or oily paper of about 40 cm, and make a grid with me, thread, and then spread out to prepare for polymerization!

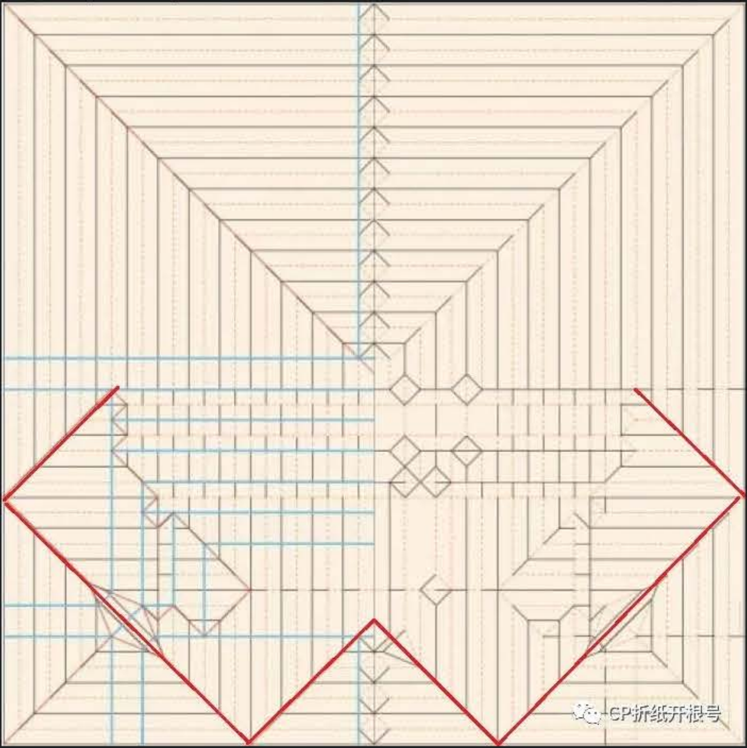
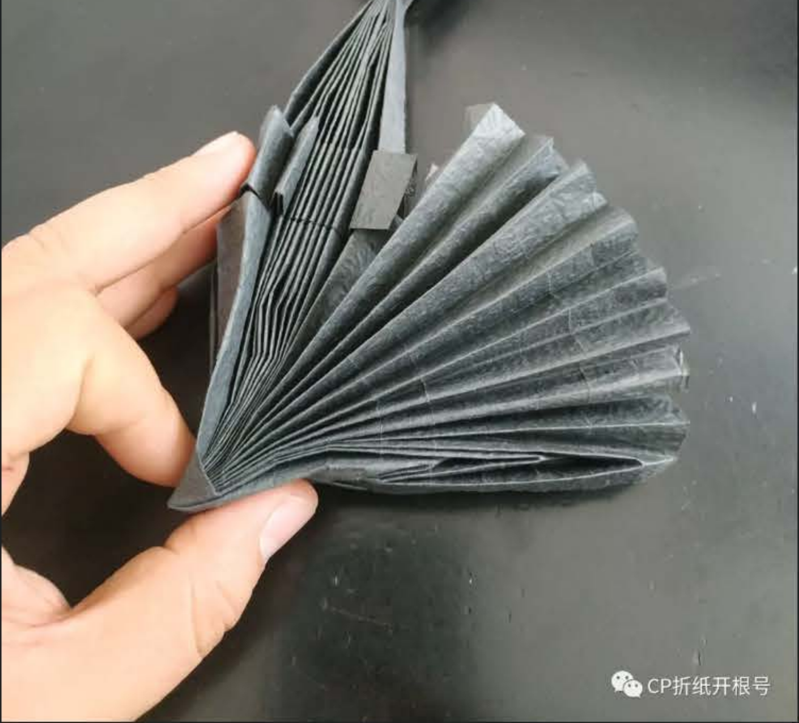
Next, we will open the red line part as shown in the figure, and some special graphics will also be opened together.

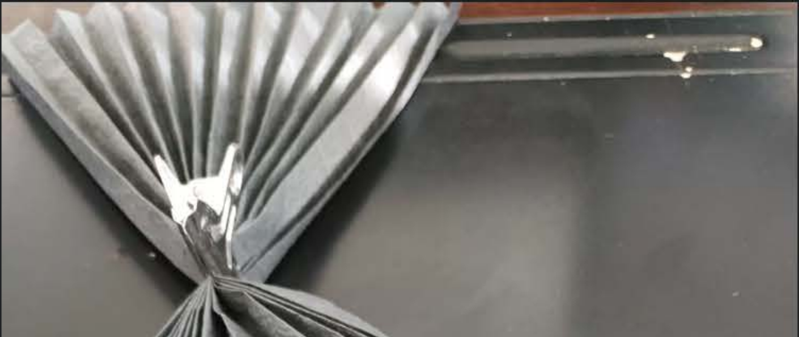


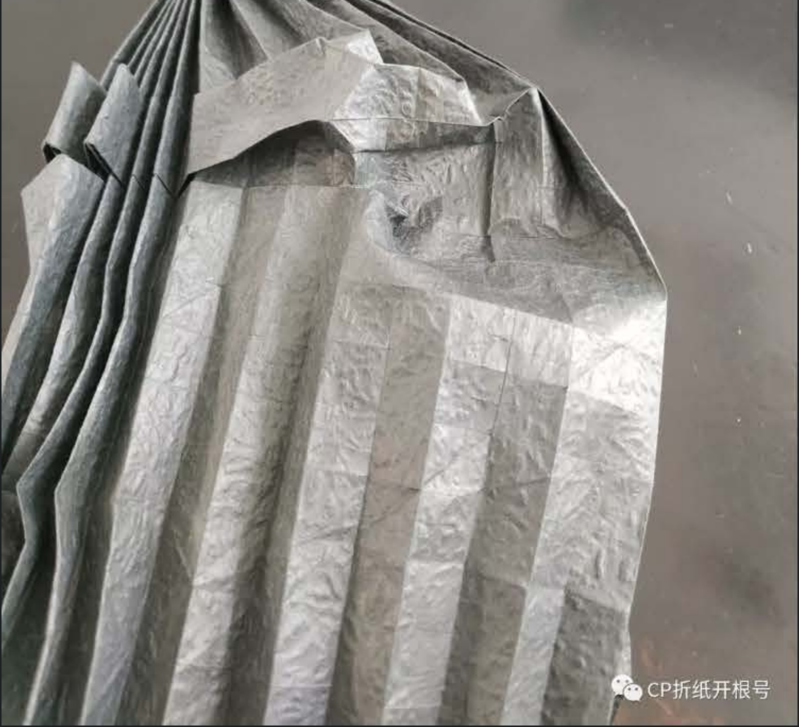
Start in the middle

CP折纸开根号



In the figure below, the overall zigzag structure of the CP should be considered when pulling out the multiple paper layers.





CP折纸开根号

As shown in the figure, pull one by one and simultaneously collect and aggregate the sawtooth structure.

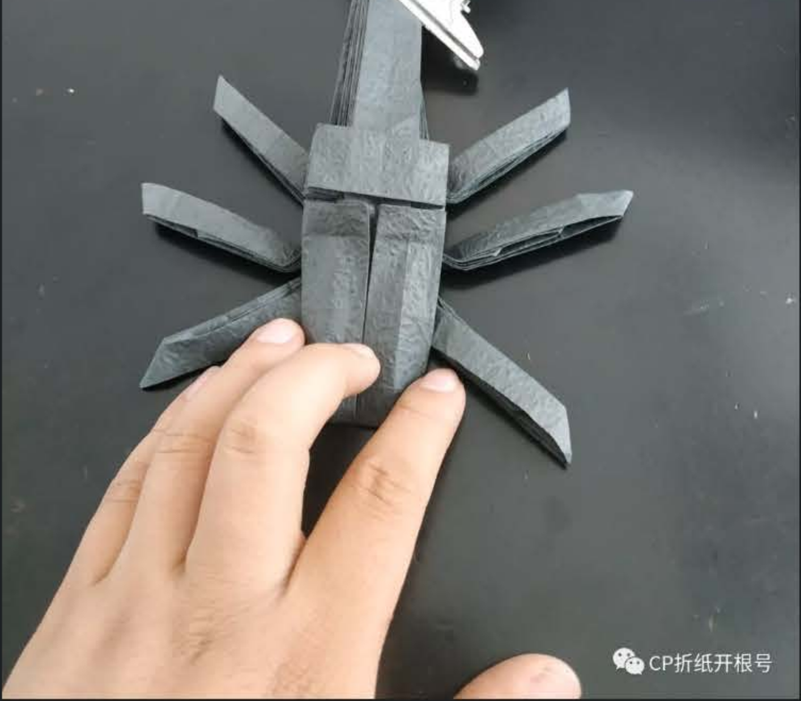
So far, we have processed all the legs. Everyone separates the eight legs to determine the structure and position.



CP折纸开根号

Finally, we aggregate the two long whiskers

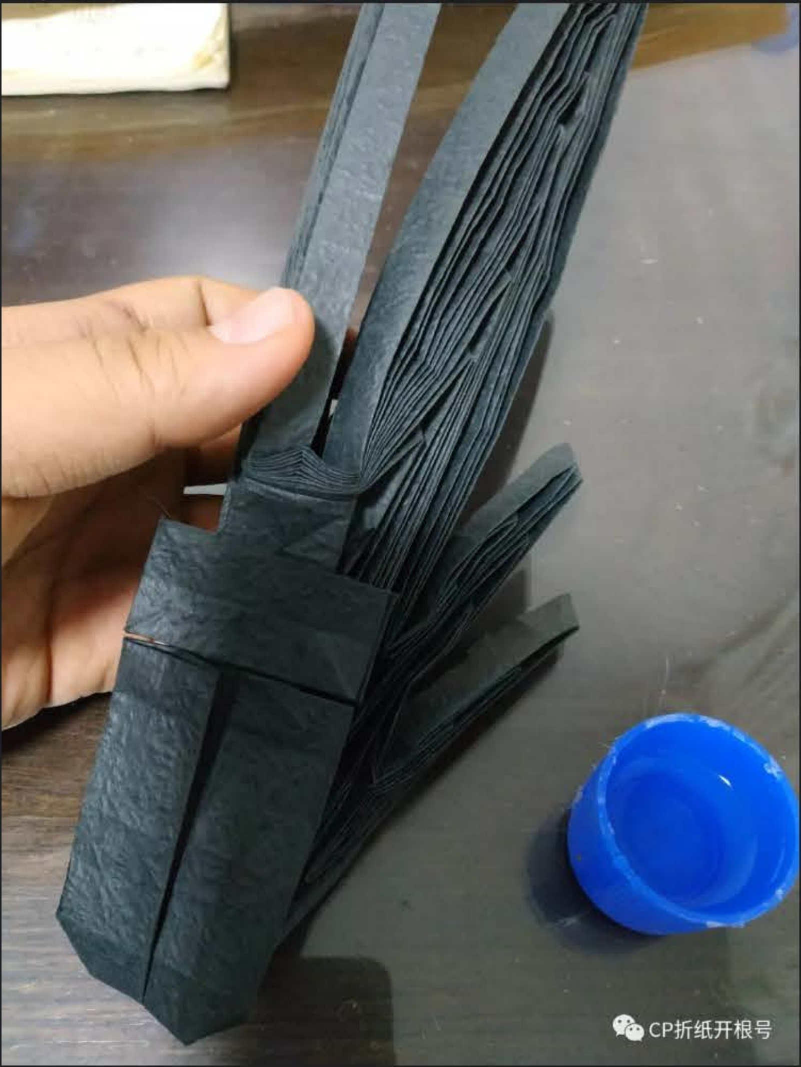
The picture above is a side view, look at the structure of each layer



Now we start to shape, first fix the legs on one side with glue, and then position and organize the other side according to the position.

Finally, make the long horns look different according to your preferences, and wait for the glue to dry!

You did it!
So, this issue is here!
See you next time!
