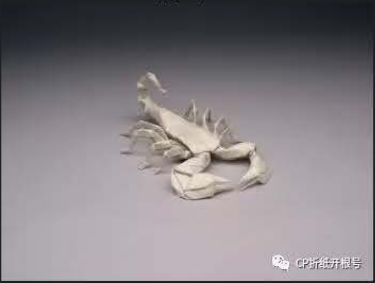
Origami Sharing Series No.23 Issue 74 Scorpion 05

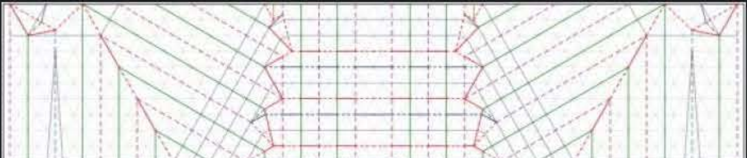
Original Origami Student Takayama CP Origami Opening Number 2018-12-22

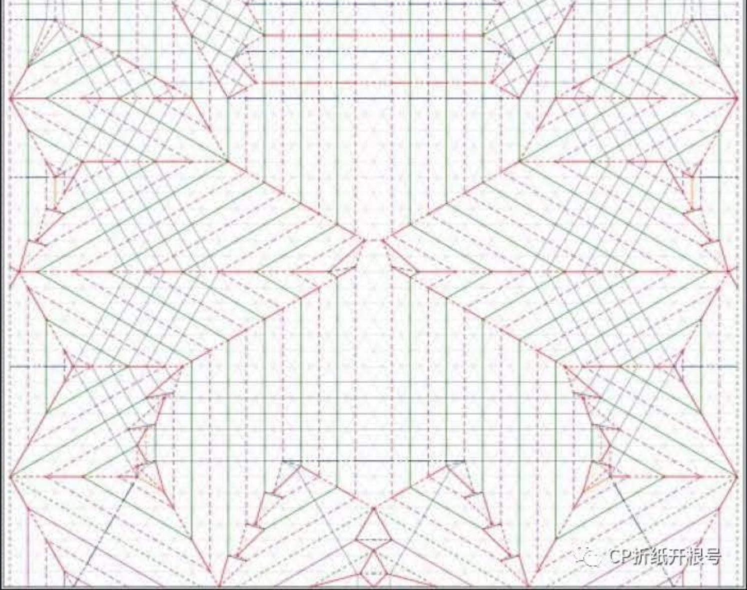
Welcome to CP Kaigan!

Today we continue to scorpion. Many people say that the scorpion is so scary. When do you finish it? I want to say, come on!😳
Let's get to know this drawing
The drawings in this issue are still Lao Luo's works. According to the classification, it is a unique computer design of Lao Luo. Usually such drawings are the idea of regular triangles that Lao Luo likes. Look carefully at the drawings and come horizontally. It is said that they are integer multiples of the side length of a regular triangle, but the vertical is an integer multiple of the height of a regular triangle, so my personal suggestion is that we find a rectangular piece of paper, first find a 60-degree parallel line from the angle, and then cross it first Create a regular triangle group, and divide it according to the drawing needs!

My personal suggestion is to first make a grid with regular triangles as a unit, then draw lines, and then aggregate.







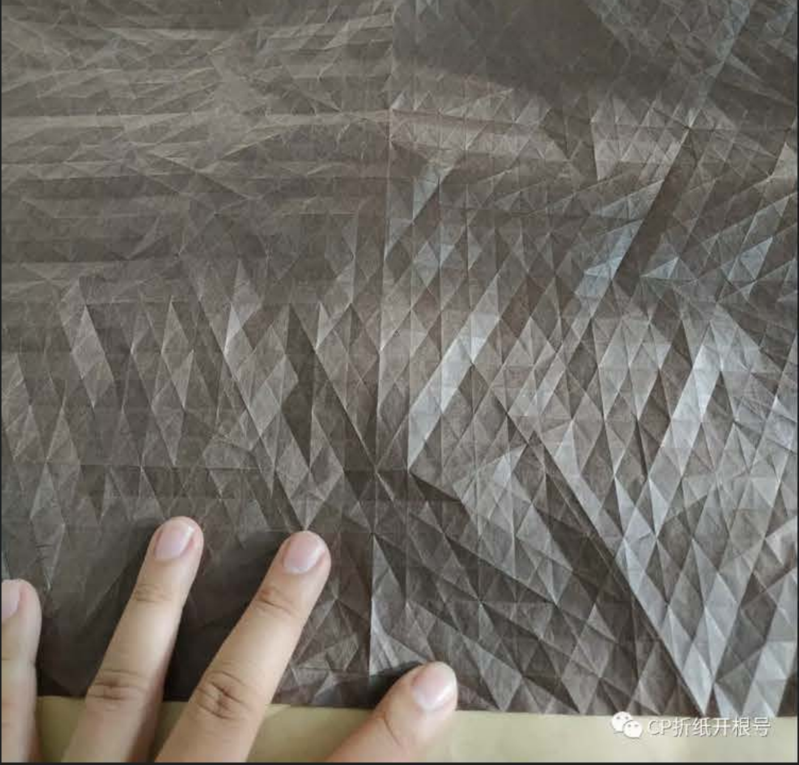
CP折纸开根号

Drawings in this issue: 40 sides and 47 heights

Are you ready? I believe that this work will cause a lot of headaches for friends!

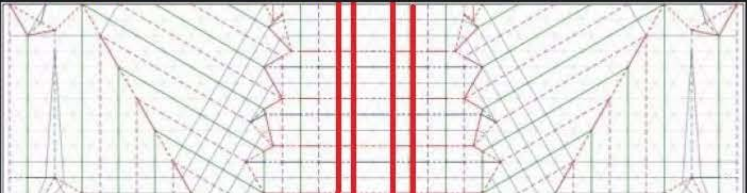
But I believe that there will still be someone who can persist until the end, because if you give up this time, you will be discouraged from encountering the same type of works in the future! So come on!

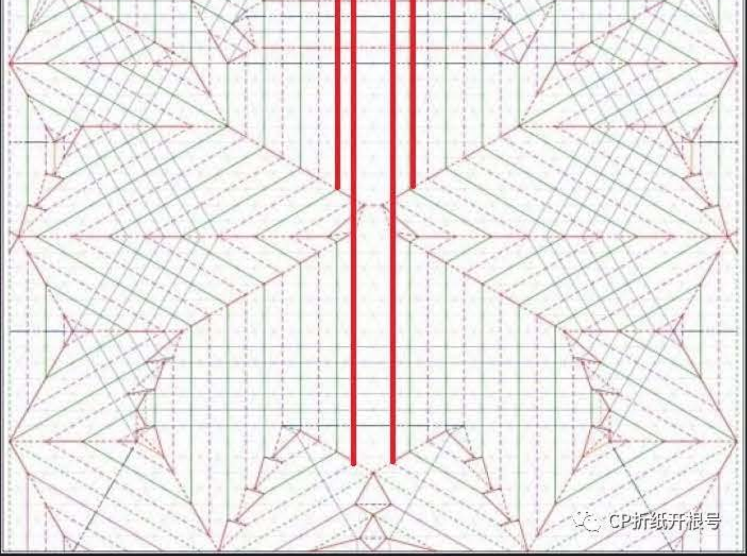
Next, please make friends with the line to do aggregation with me, flatten the paper.



CP折纸开根号

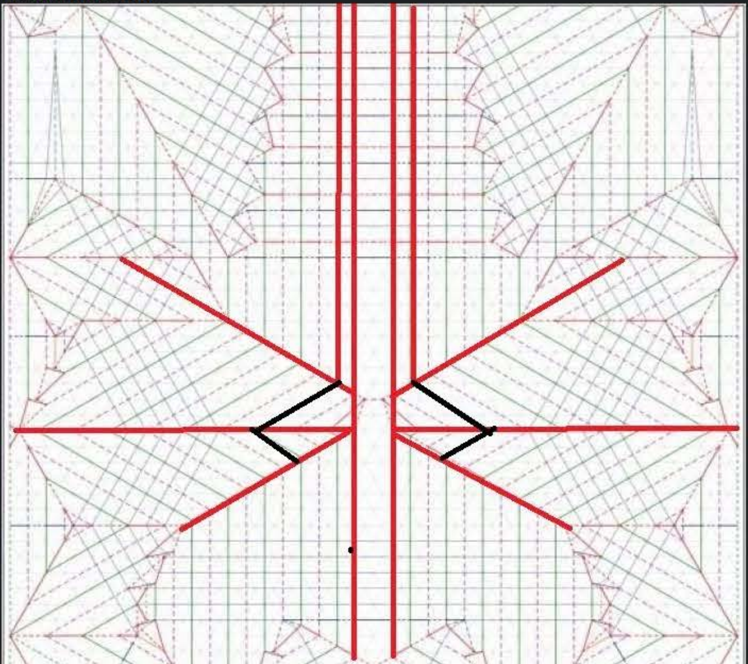
In the following, we still start from the middle according to the opening method of insects, but since the works in this issue are based on triangles, the direction of convergence has become a cross between three directions, so everyone is converging Always pay attention to the author's design ideas.





CP折纸开根号

We divide the overall drawing according to the change lines on both sides of the center line as shown below.

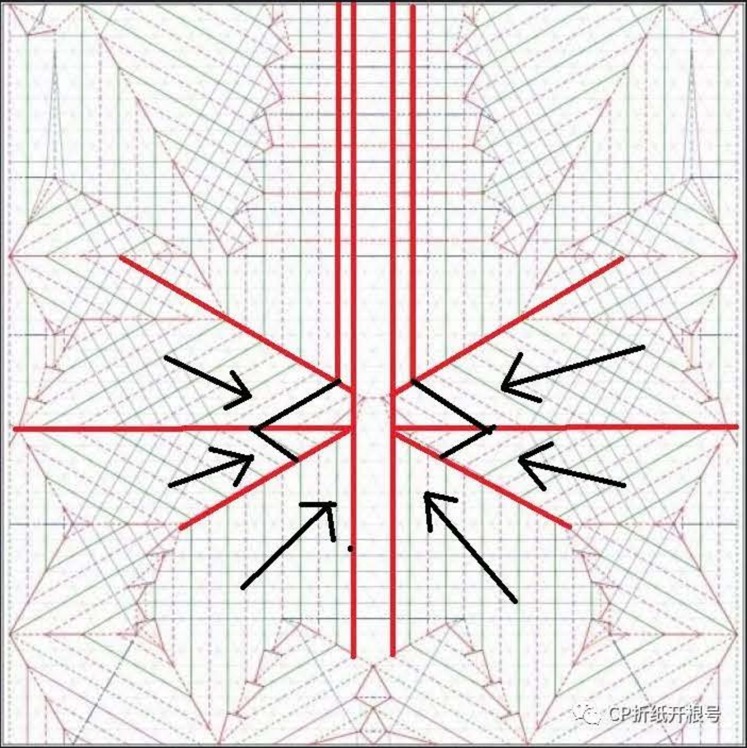


CP折纸开根号

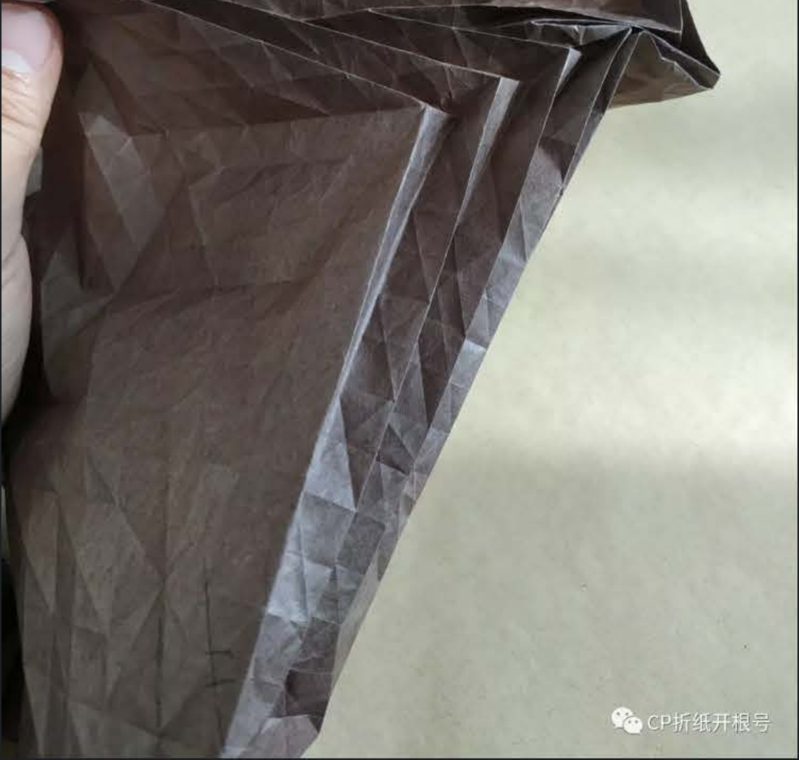
CP折纸开根号

CP折纸开根号

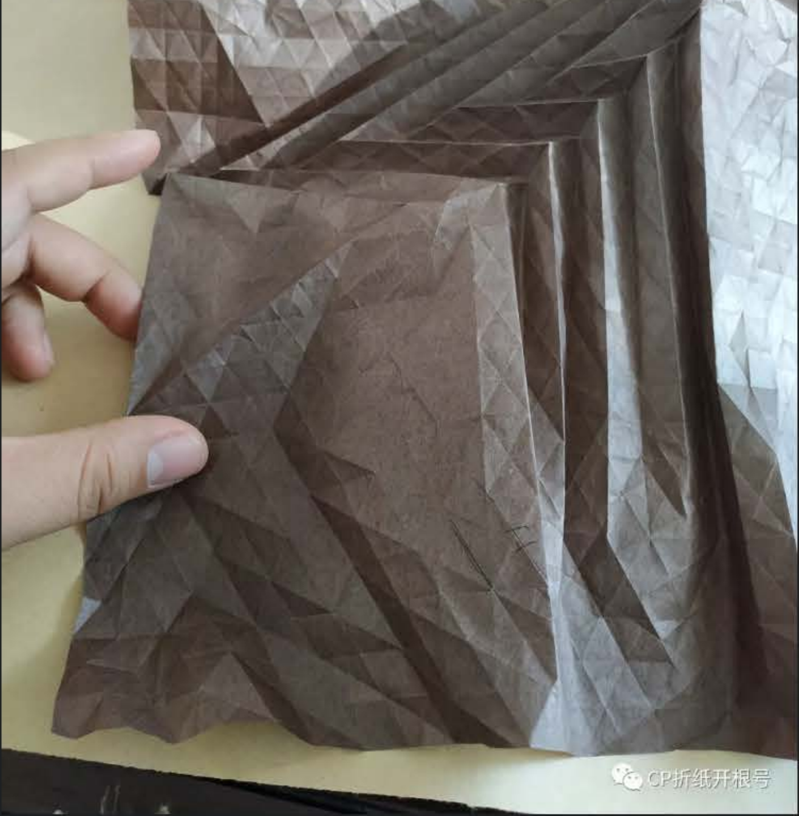
The way we partition is similar to the original square rice. After dividing the area, we will collect it in several directions.



CP折纸开根号

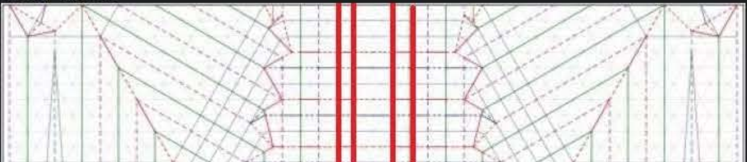


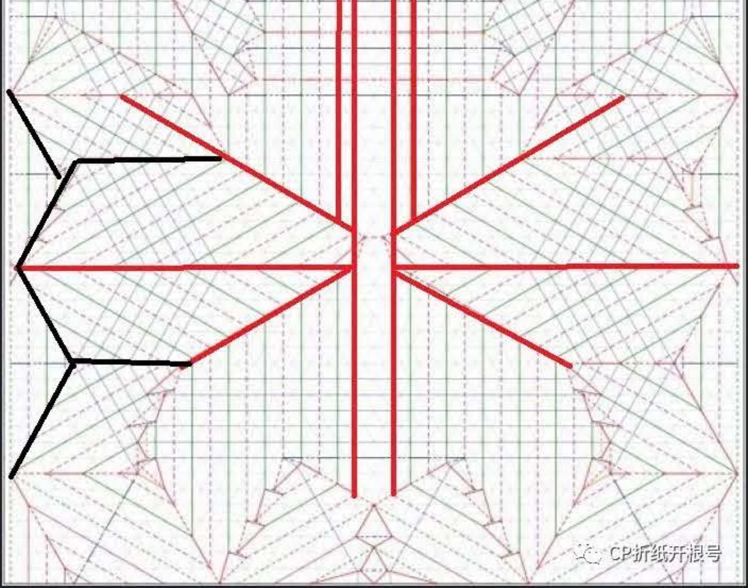
The process of aggregation is slow and neat, because here are not exactly using the sides of the regular triangle and the high lines, there are many lines between the vertices of the triangle, so please pay attention!



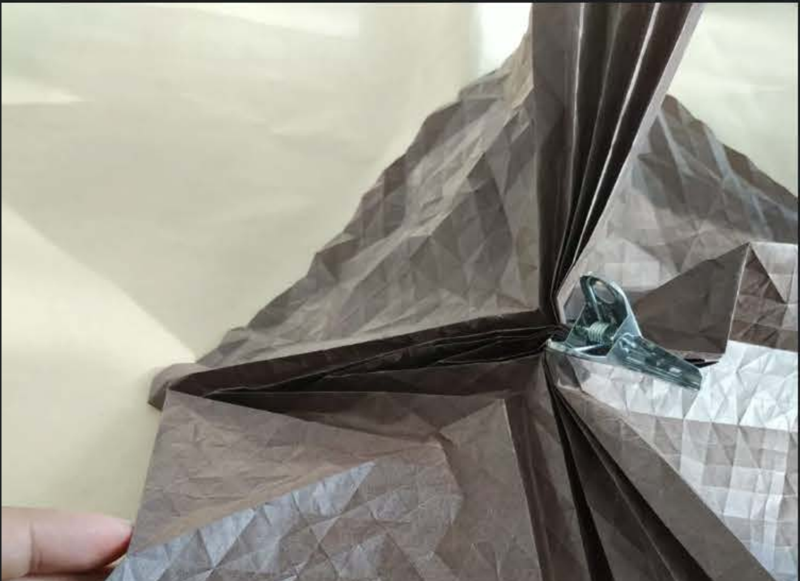
CP折纸开根号

After collecting each part, we will separately deal with the black line according to the following figure.





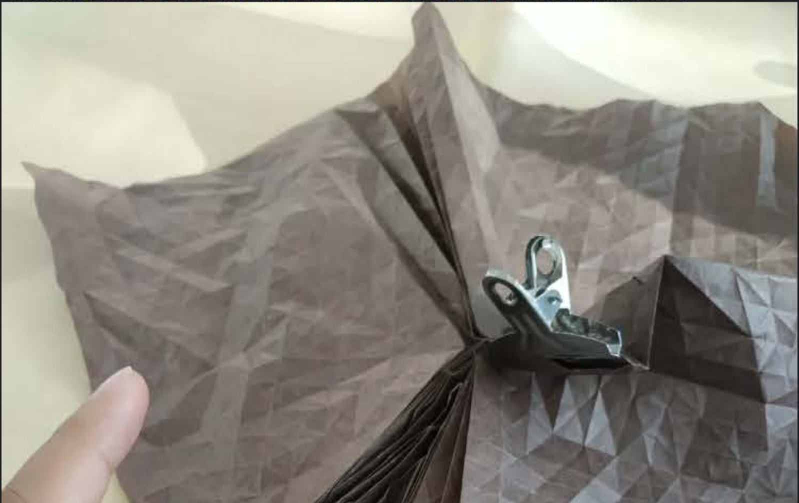
CP折纸开根号



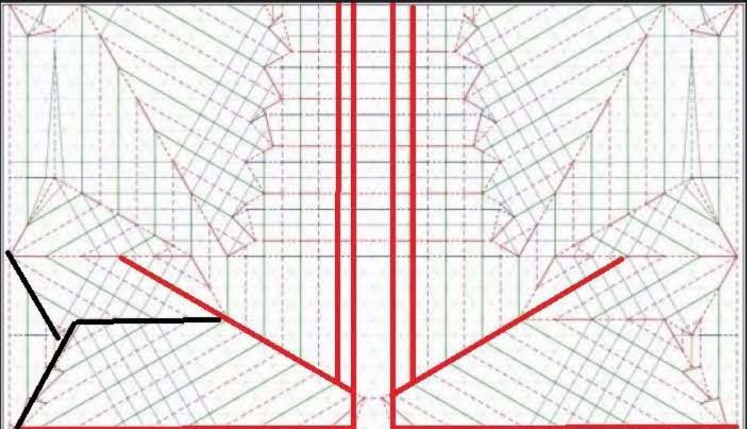
CP折纸开根号

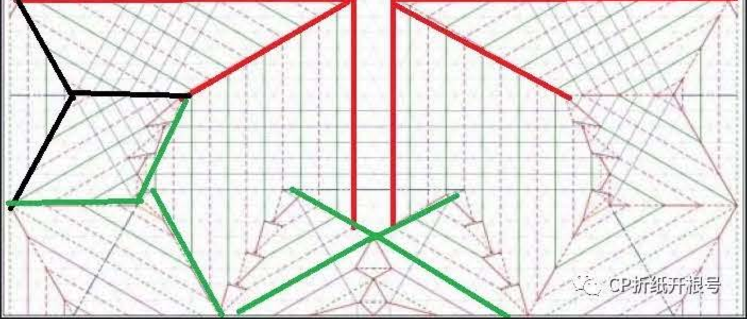
CP折纸开根号

Here you have to deal with up and down, the most important thing is neat.

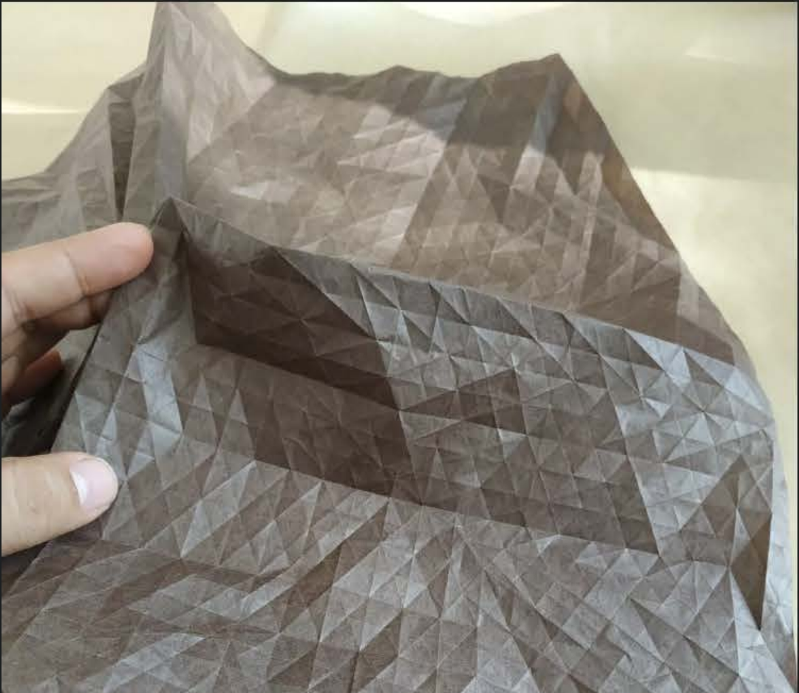


We next aggregate the green part in the lower left corner of the image below, and then aggregate the right part in the same way.





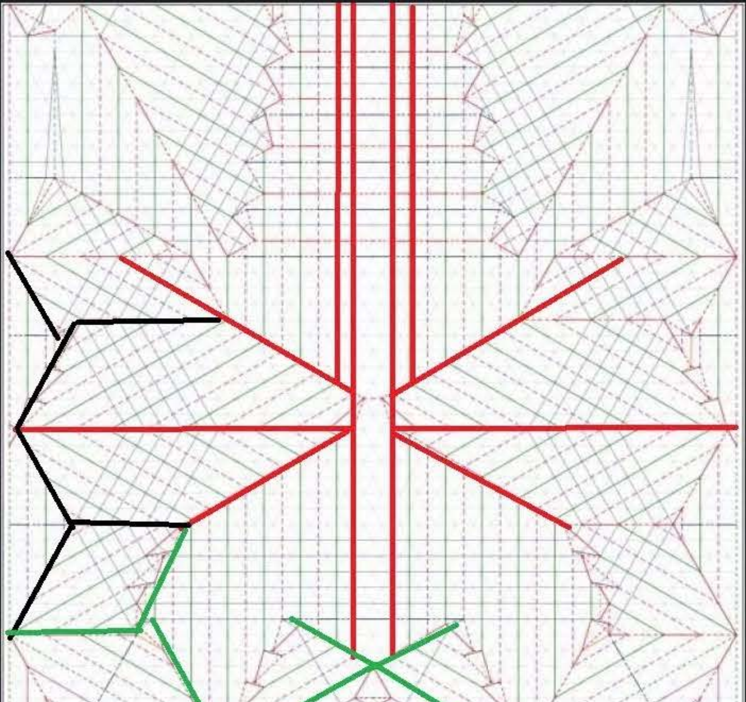
CP折纸开根号



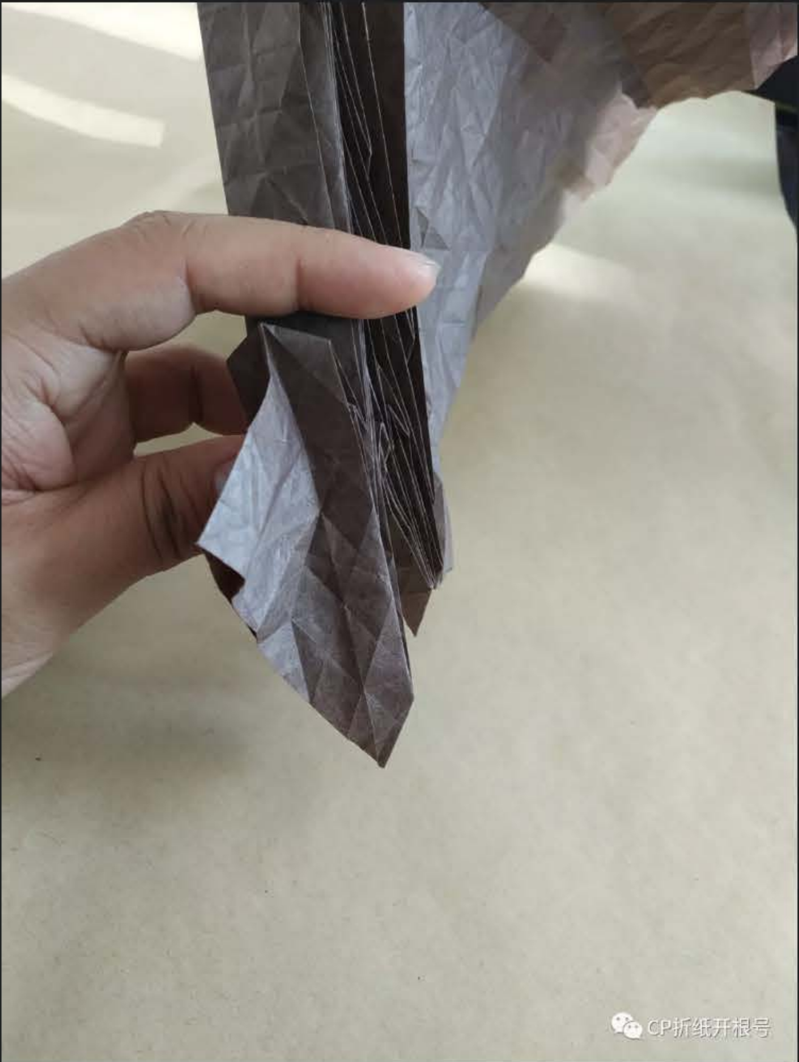
CP折纸开根号

CP折纸开根号

Next we aggregate the green lines in the bottom and middle sections of the image below.

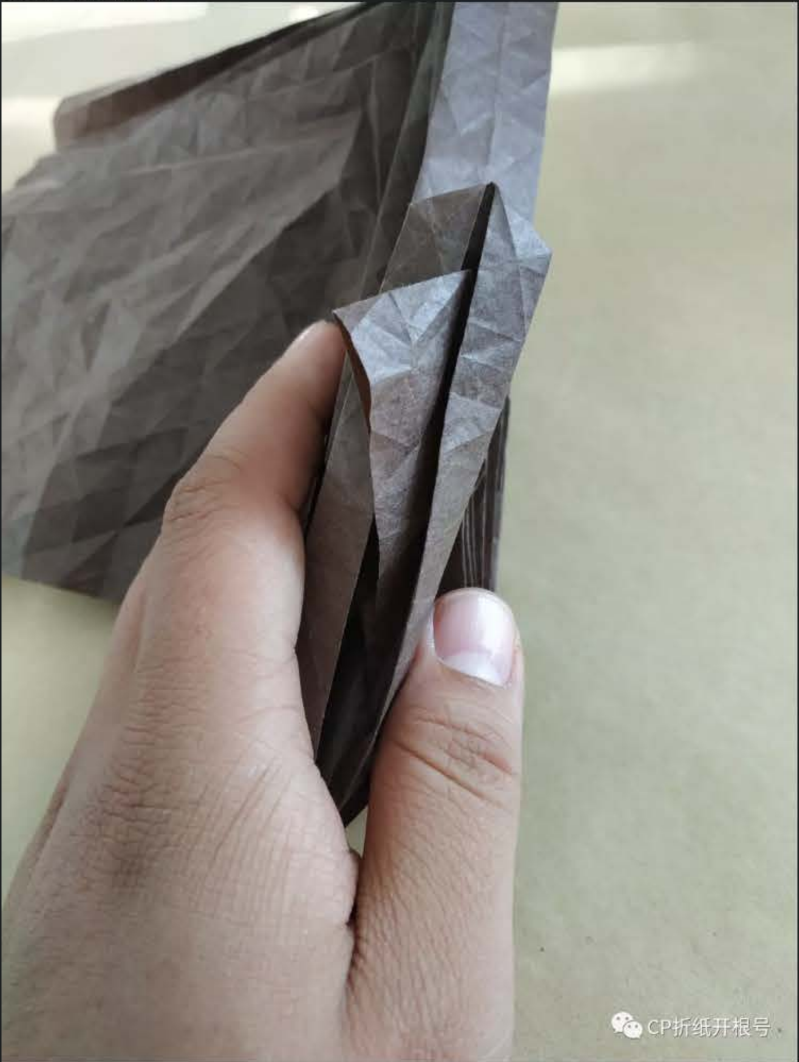


CP折纸开根号



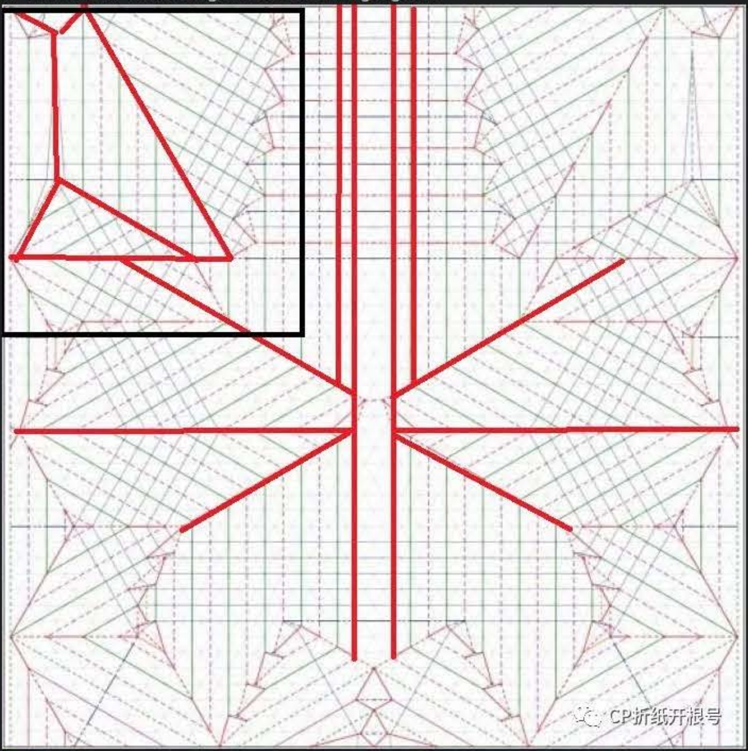
CP折纸开根号

The lines here are continuous peak lines and continuous valley lines, so pay attention when converging.



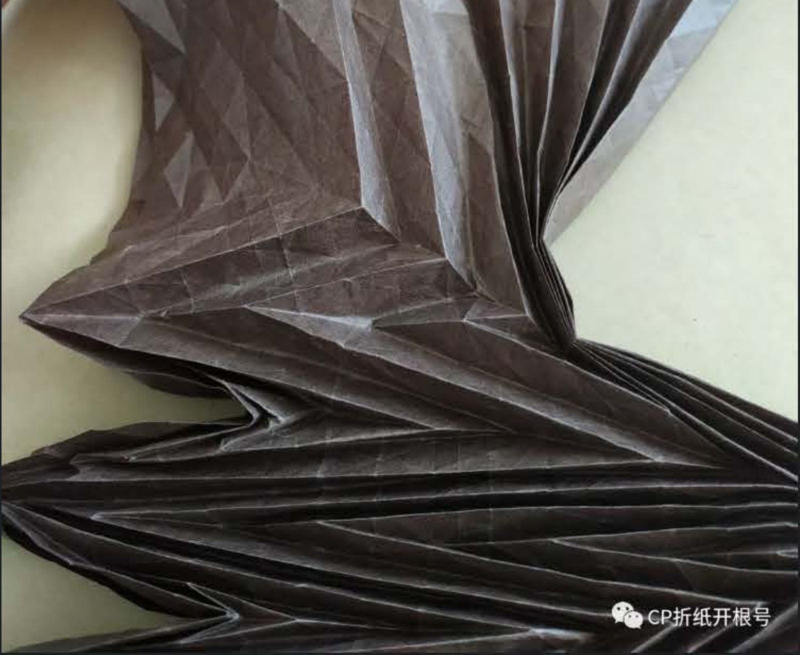
CP折纸开根号

After the aggregation is done below, we process the long lines in the black box in the upper left corner according to the following figure.



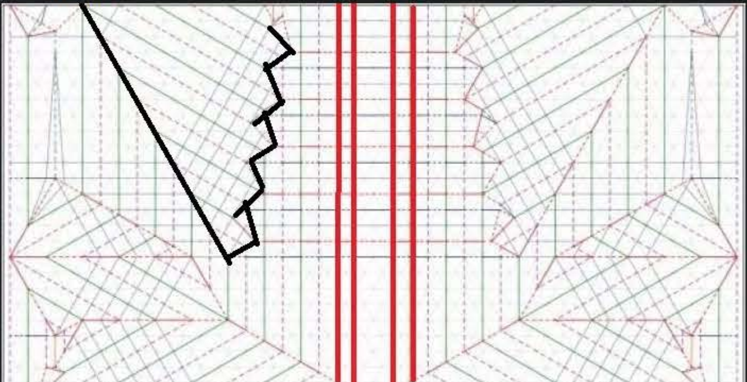
CP折纸开根号

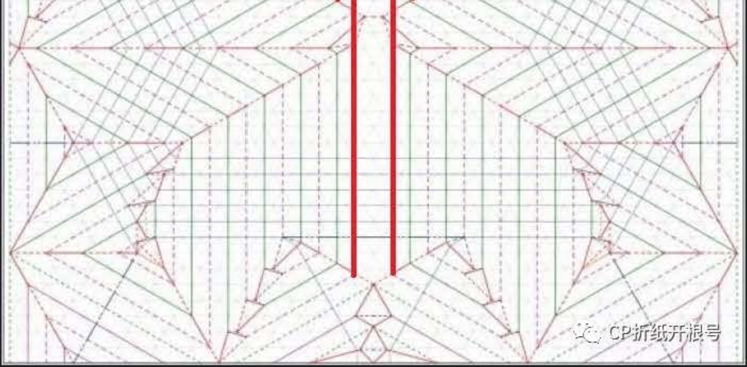
CP折纸开根号



Handle the long wires first, then the pliers section will not fold first. The same folding method on the right.

Below we deal with the last and most difficult part, the abdomen section, which is the jagged structure.





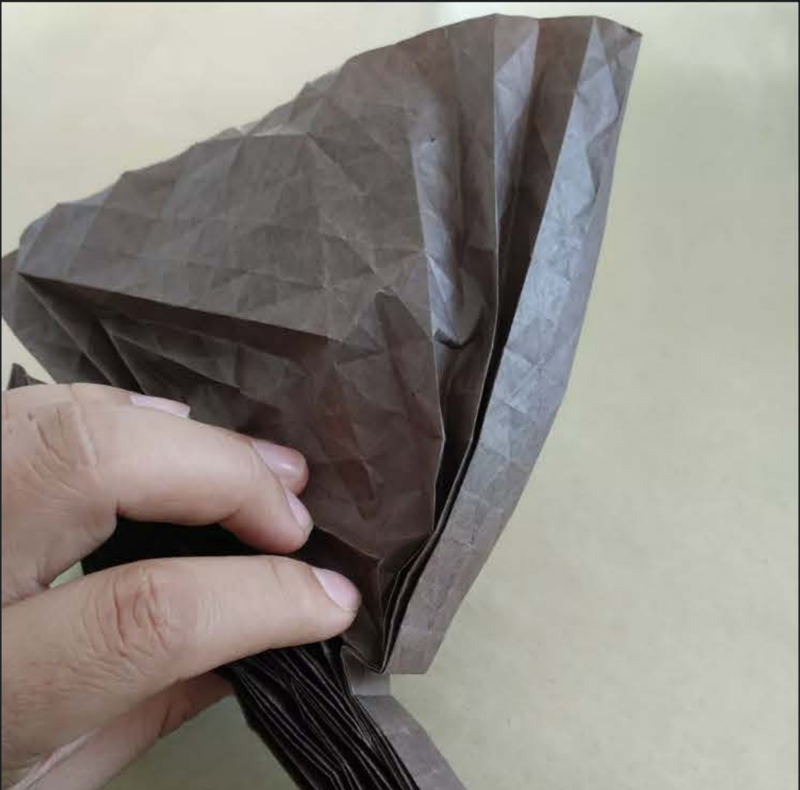
When converging this part, everyone must fold from layer to layer.

CP折纸开根号

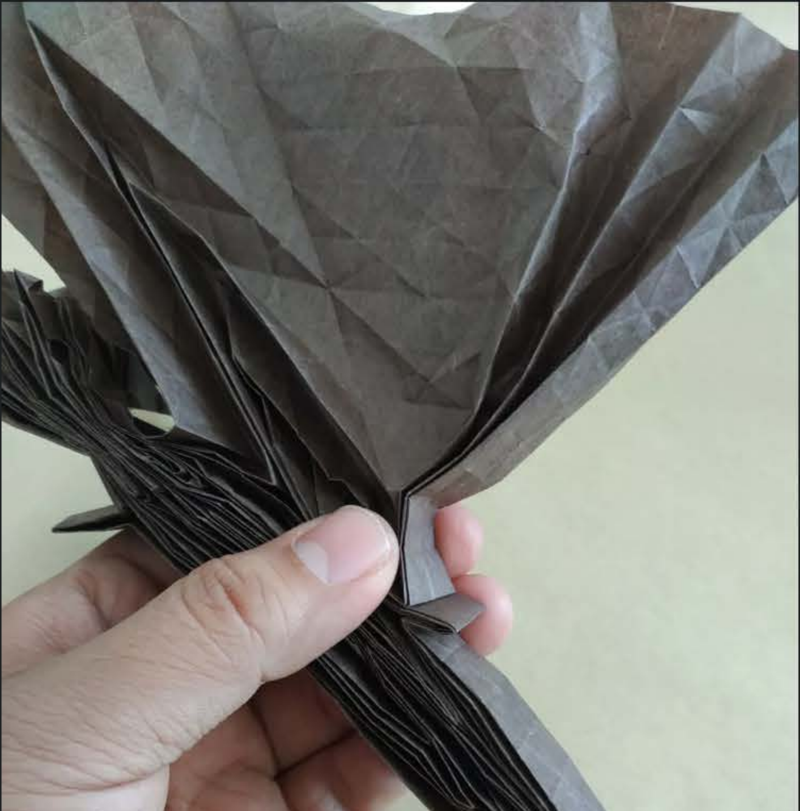
CP折纸开根号

CP折纸开根号

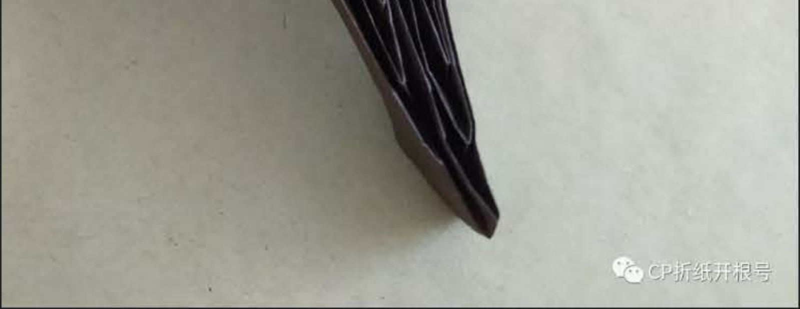
Although the long line is from the outside to the inside, the processing of the knot is from the inside to the outside.



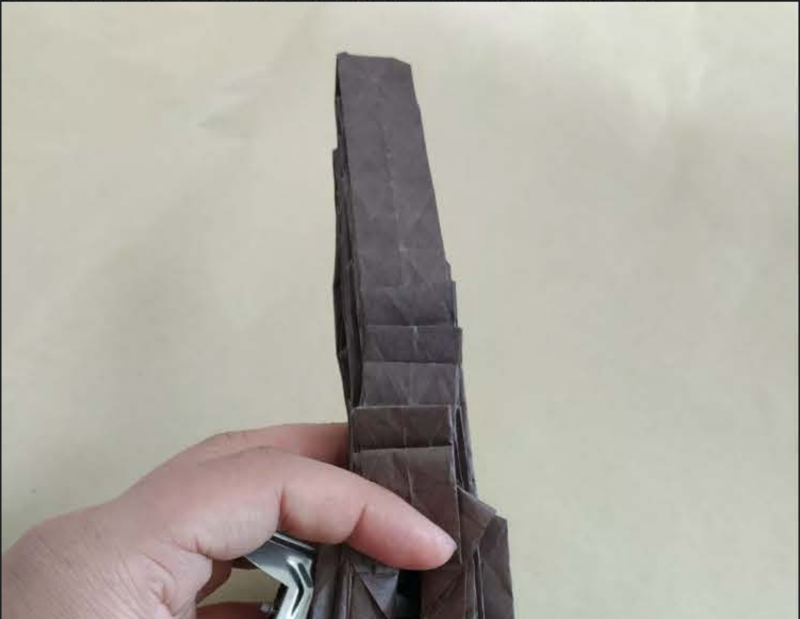
CP折纸开根号

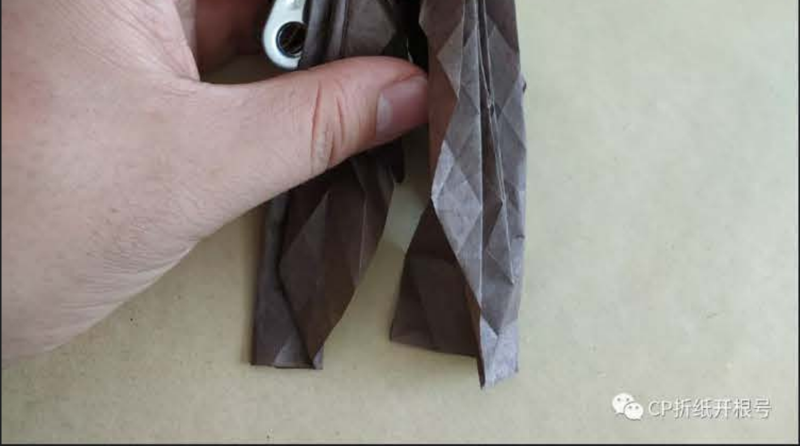


CP折纸开根号

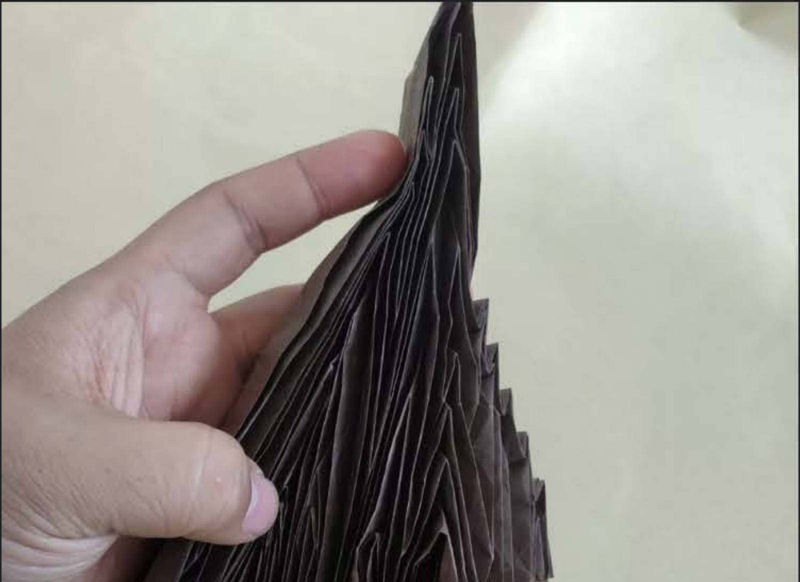


After the festival is handled, please work neatly and observe the branch.





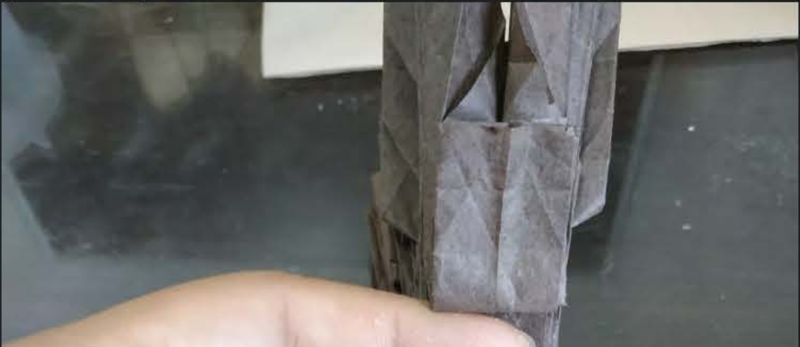
The figure below is a side view.

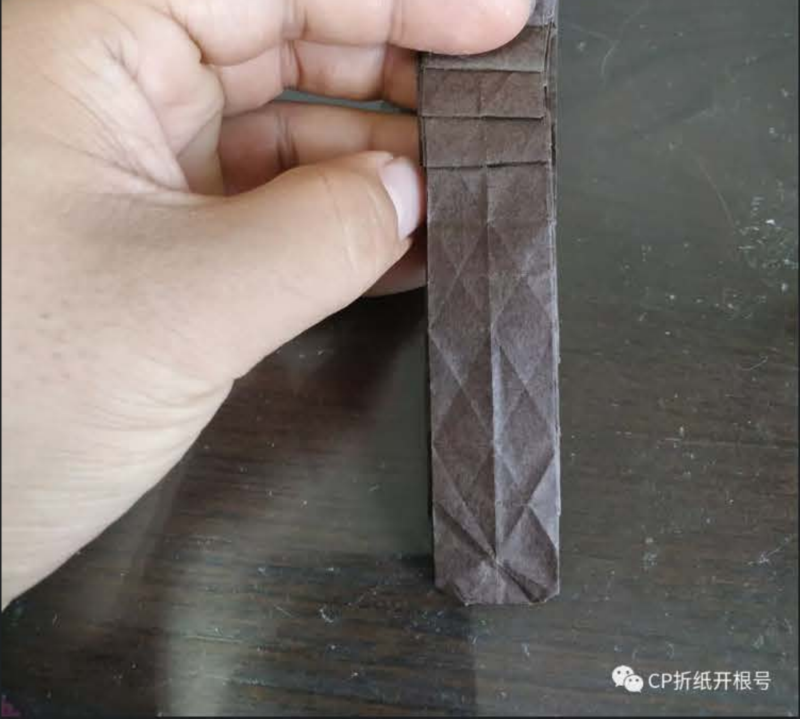


Next we open the branches and paper layers and prepare for the integer!

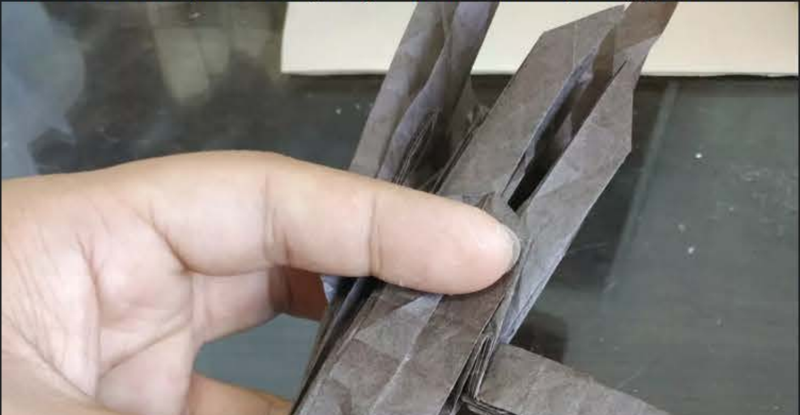
CP折纸开根号

My personal suggestion is to start with the sections below the abdomen, and then use glue to fix the position of each section.

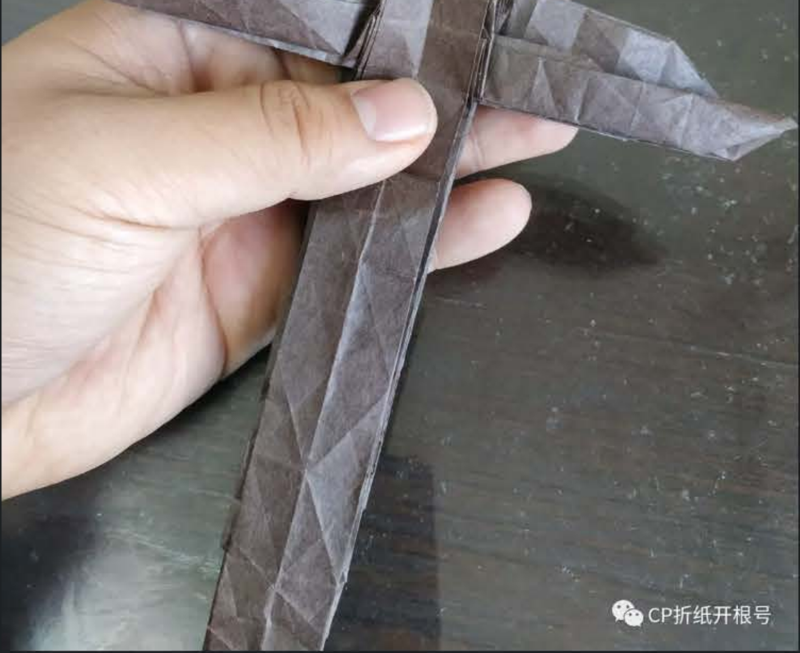




Then turn back to separate the eight legs and find the corresponding position.

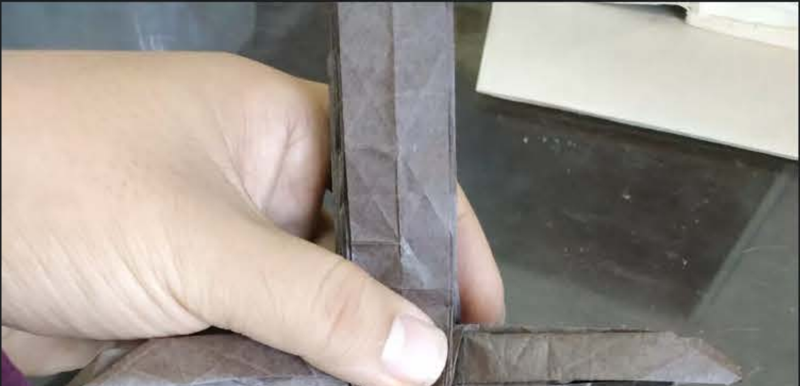


CP折纸开根号



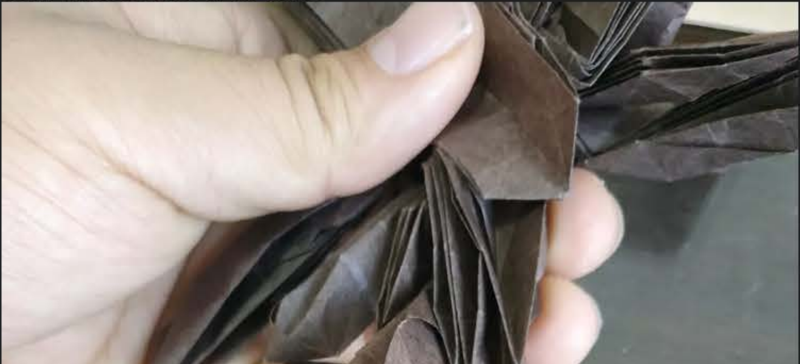
CP折纸开根号

Finally, see if the reserved pliers are in the right position!

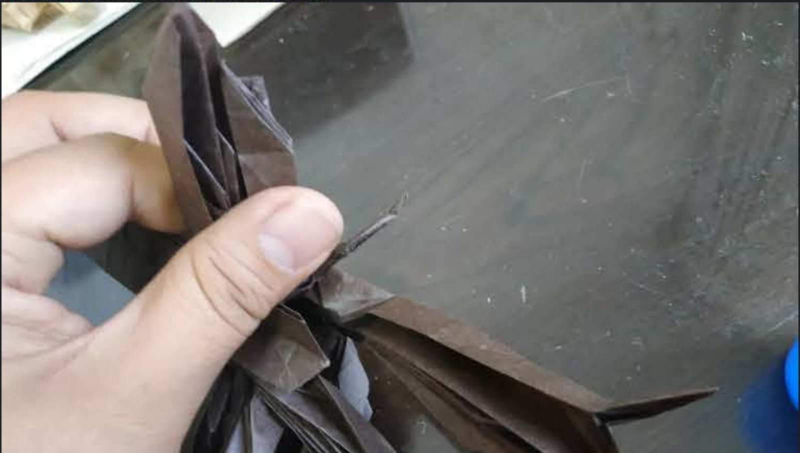


CP折纸开根号

Break down the parts of the pliers.

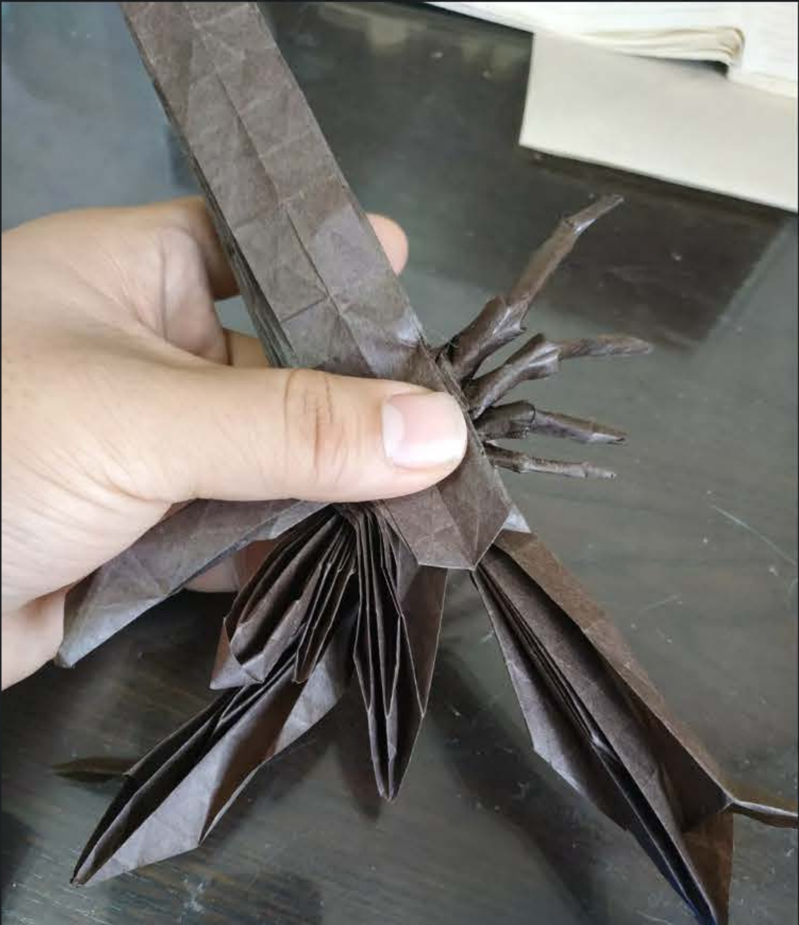


Below, we start to shape leg by leg.

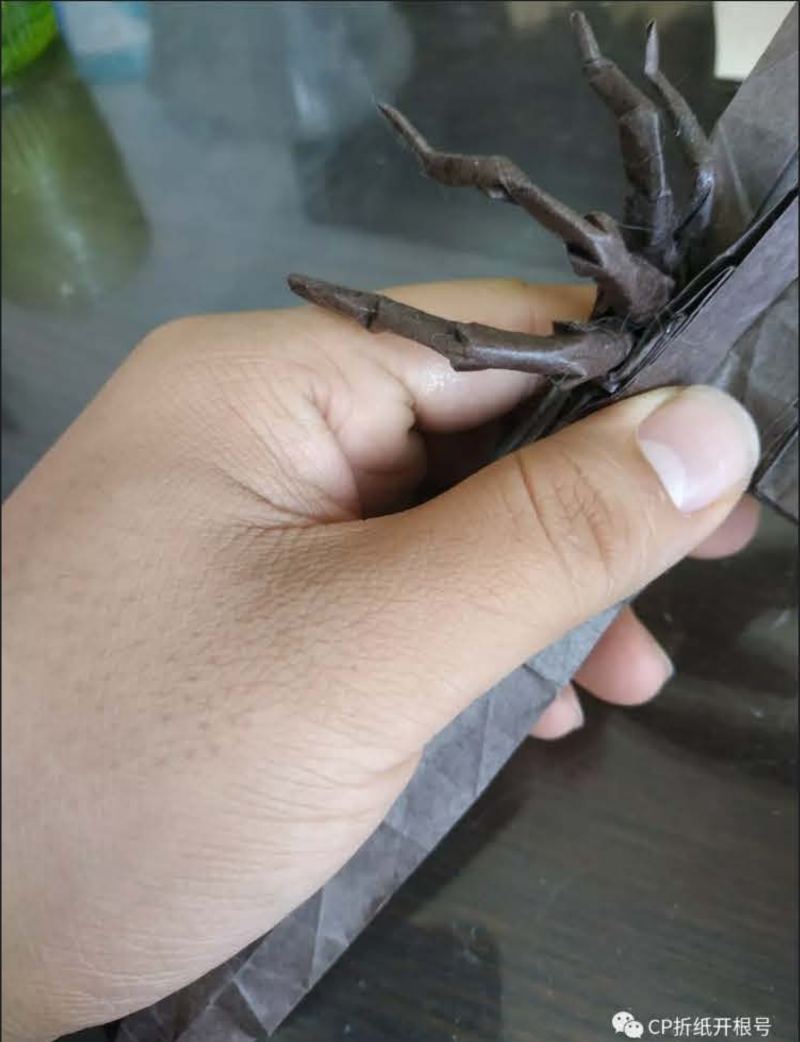


CP折纸开根号

The recommendation is to start with the shortest.

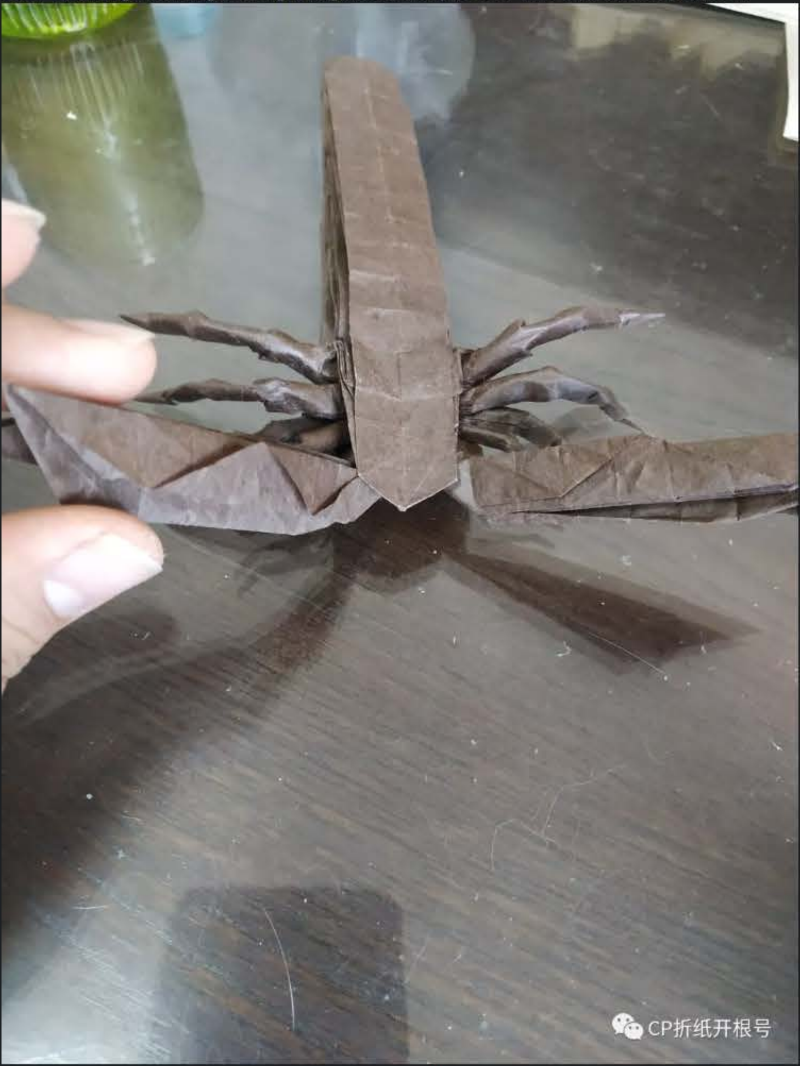


CP折纸开根号



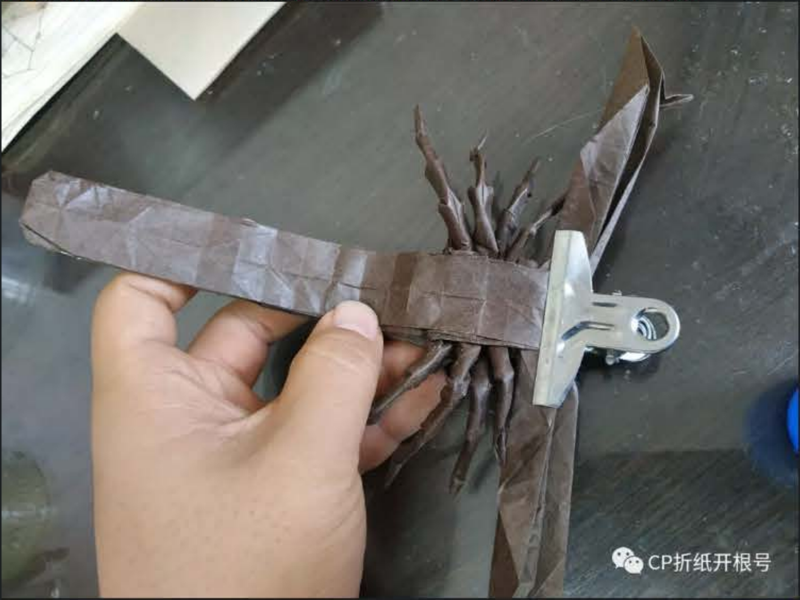
CP折纸开根号

After finishing finishing the eight legs, fold the pliers to find the correct position.



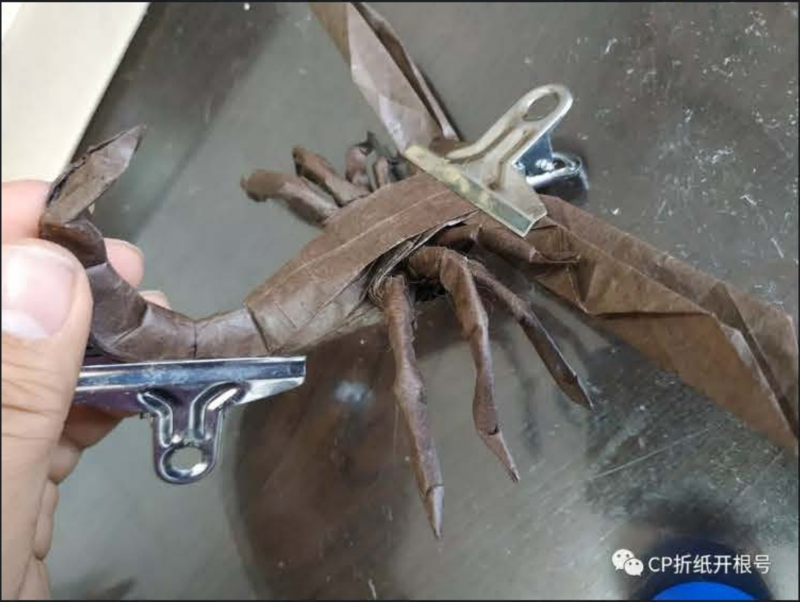
CP折纸开根号

Next, apply glue to the paper layer in the middle of the body to fix the tail.



CP折纸开根号

CP折纸开根号



Finally we shape the pliers according to the previous position.

CP折纸开根号

CP折纸开根号

CP折纸开根号

Finally, the little scorpion is glued and fixed. The above picture seems to be feeding glue to the scorpion.🤔

So this issue is over. Has anyone discounted it?

See you next time!

I posted a lot of life sketches and origami sketches, and of course there are original works on display🤭
My Taobao Online Store
Although there is no decoration in the online store and the pictures are not very beautiful, the works are still complete, and I can order CP works that are not in the store. Of course, it also includes the aggregated semi-finished products and finished products of almost all the works explained by the public account. And line paper for sale.
