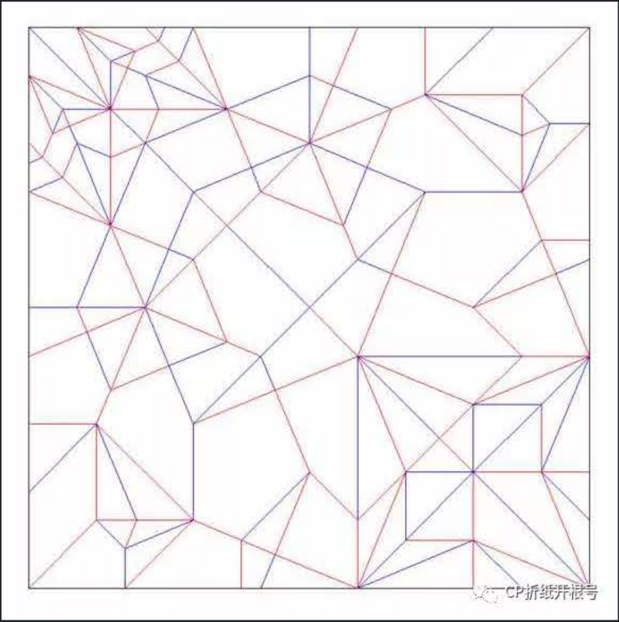
Interpretation of the eighth issue of the public rhino CP

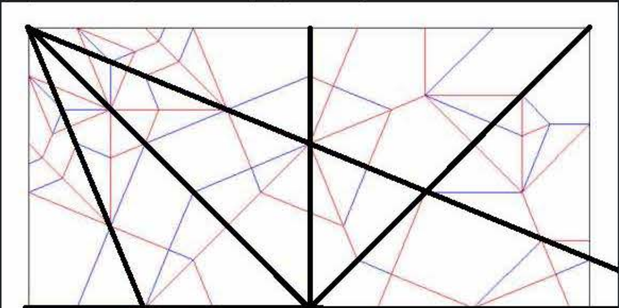
Origami student Takayama CP origami opening number 2018-02-10

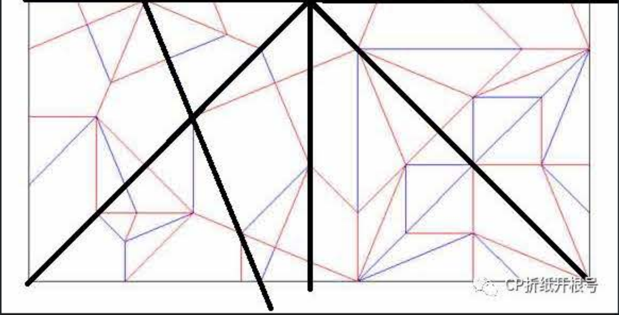
To do this issue at the request of Zheyou Yuyue, Rhino's interpretation, (It is said that it is the design of OB, and I personally like OB works very much. Thank you in advance. If OB himself sees my CP, I hope not to mind ,) Oh, yes, my plan was disrupted again. There is no way to be meaningful without some interaction. Let's get to know the folding chart first!



CP折纸开根号

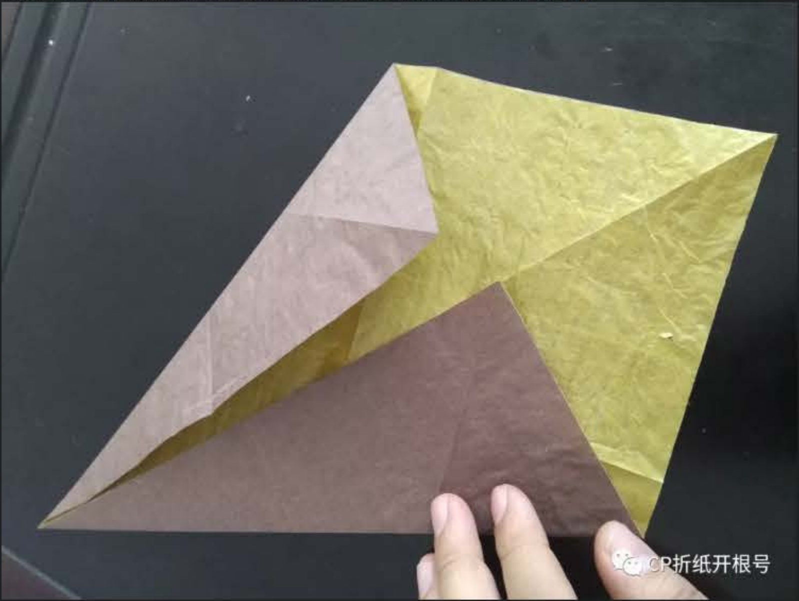
This is a relatively simple folding chart. The number of lines is not very large. If you want to type all the lines, it will not take too long. Of course, the master may directly fold them out. Maybe this time, I will follow the first one. After a short order come and play with everyone. Please prepare a square below 30 cm and make a rice-shaped fold.



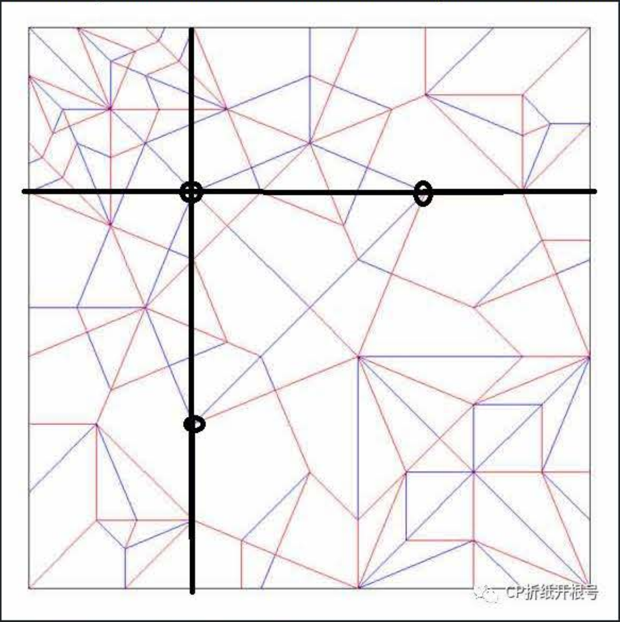


CP折纸开根号

After folding the rice, we choose a corner and fold it diagonally.

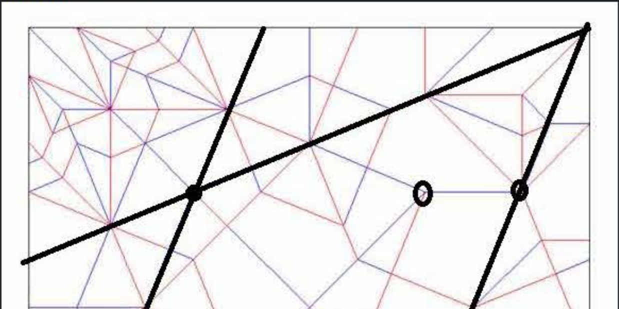


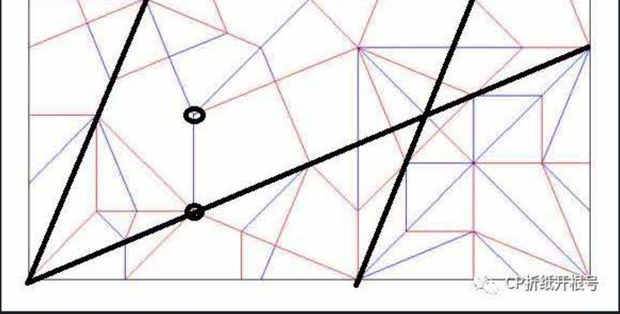
Make two parallel fold lines for the two folded points. As shown below.



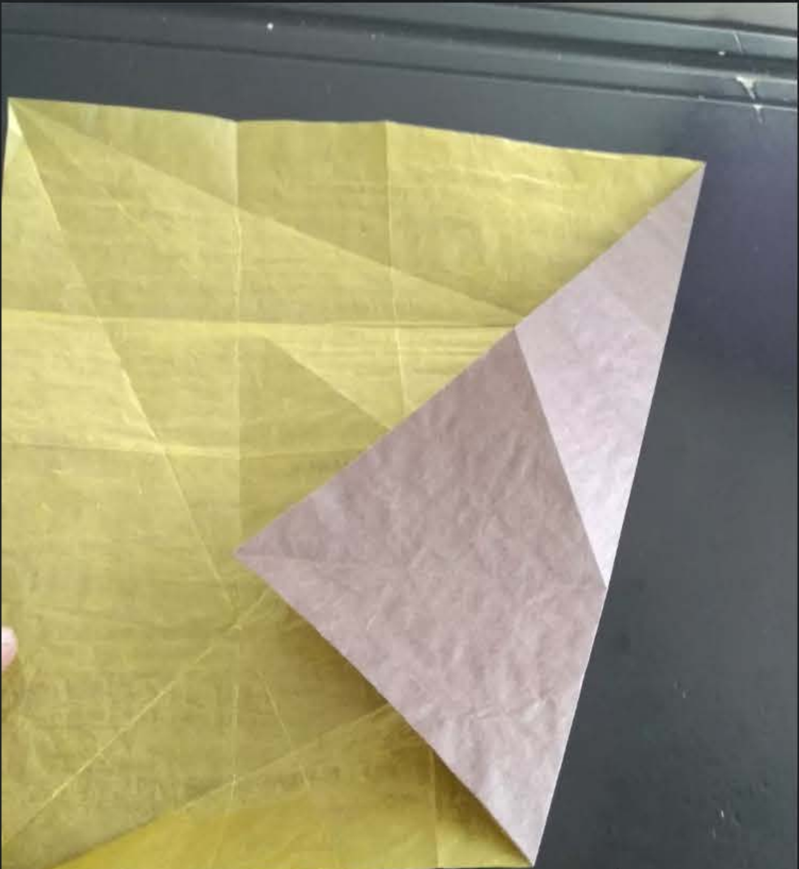
CP折纸开根号

Next, make the other two corners in the same phase to make diagonal folds. See the icon line below.

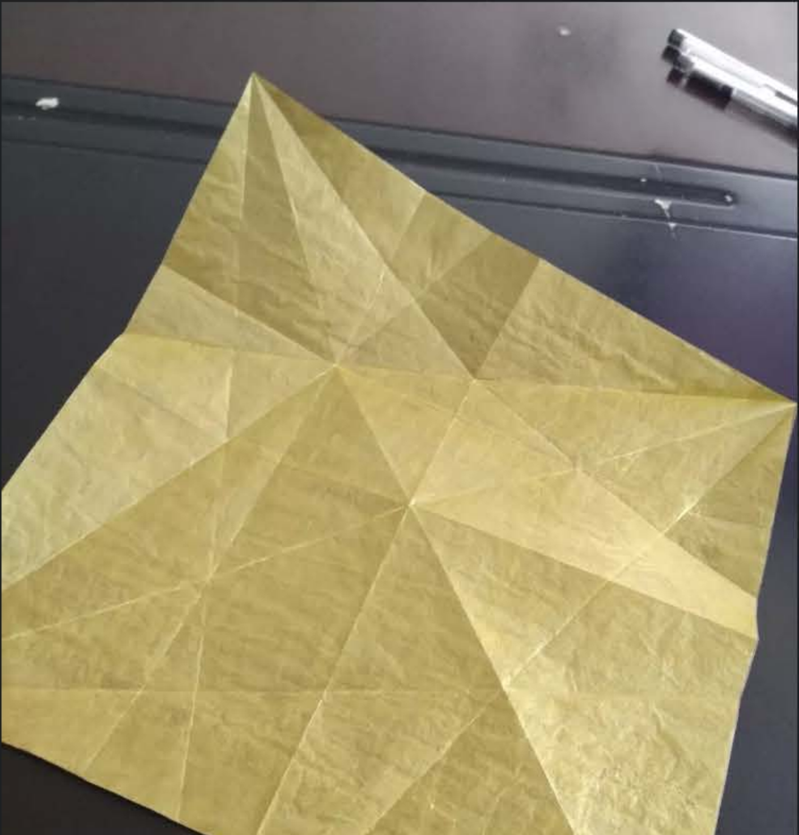




CP折纸开根号

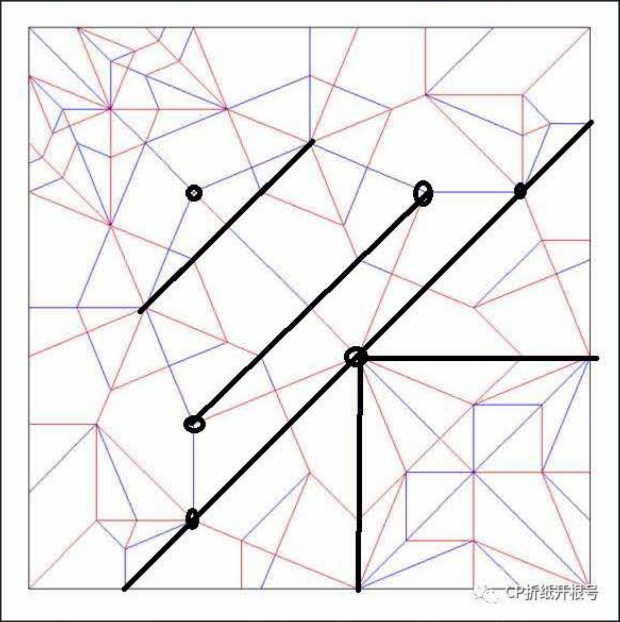


CP折纸开根号

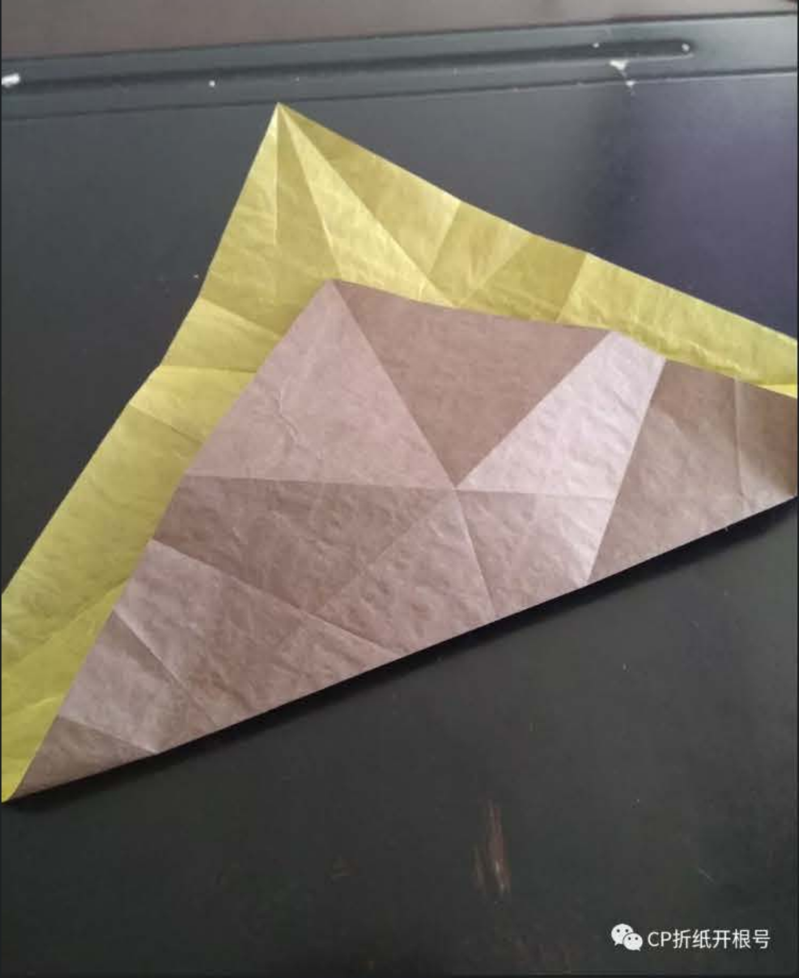


CP折纸开根号

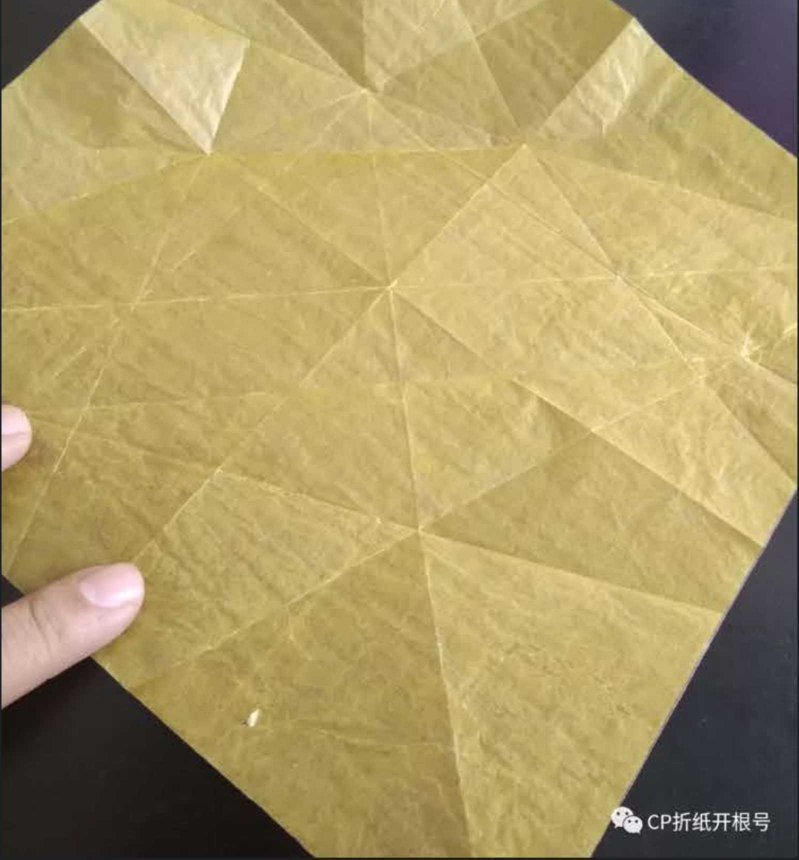
As shown in the figure below, fold out some points, the middle of which is the folded midline. Then type the square edge on the bottom right.



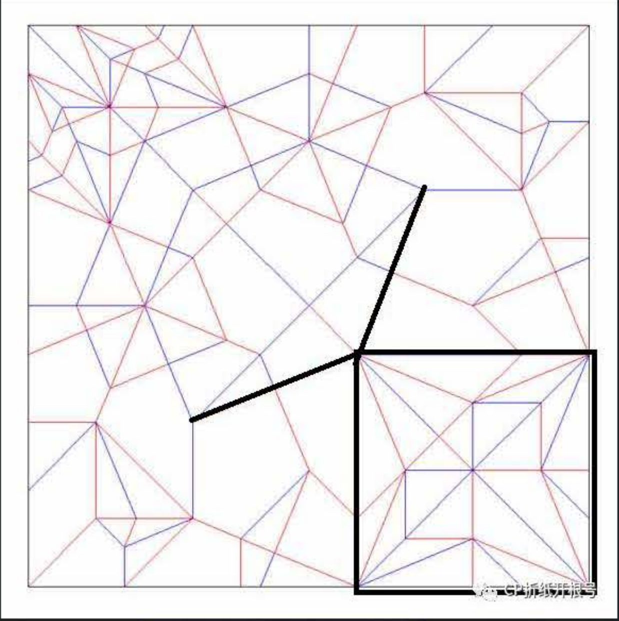
CP折纸开根号



CP折纸开根号



As shown in the figure below, type the two diagonal lines above the square, and type all the lines in the square (of course, this step can be omitted), but please pay attention to the characteristics of the peaks and valleys in the small square.

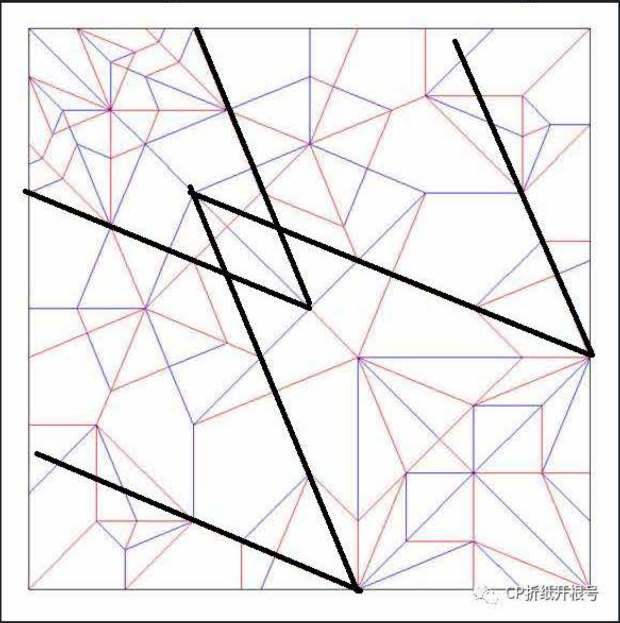


CP折纸开眼号

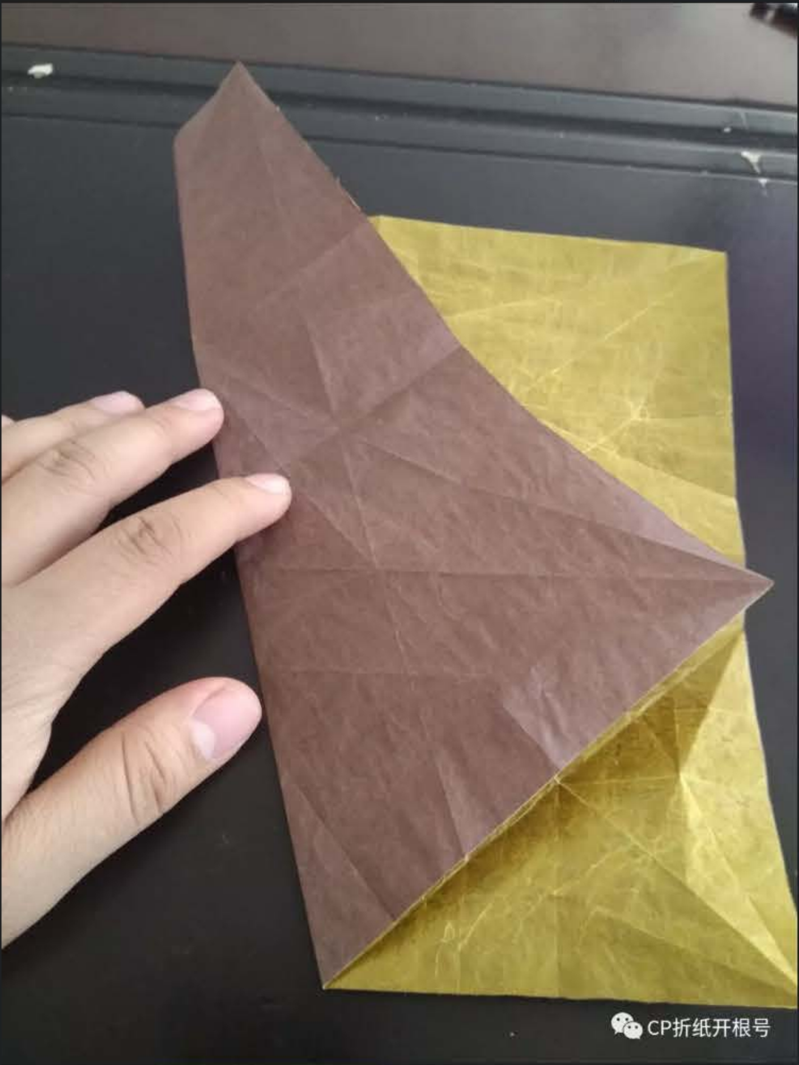
CP折纸开根号

CP折纸开根号

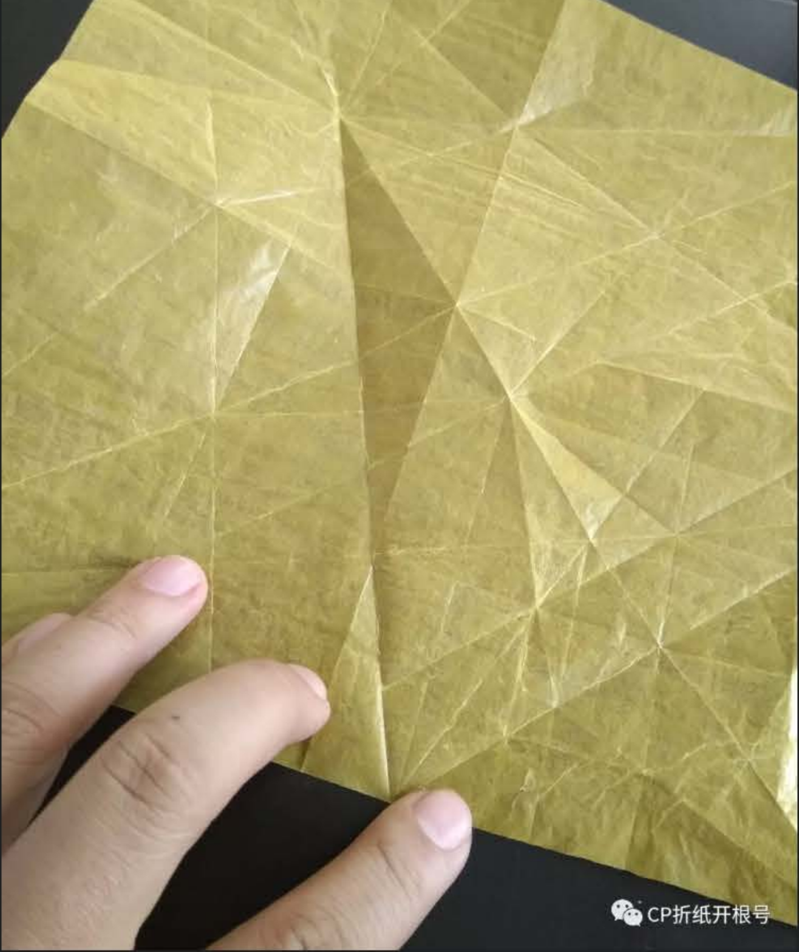
As shown in the figure below, we will draw a few 22.5 degree lines.



CP折纸开根号

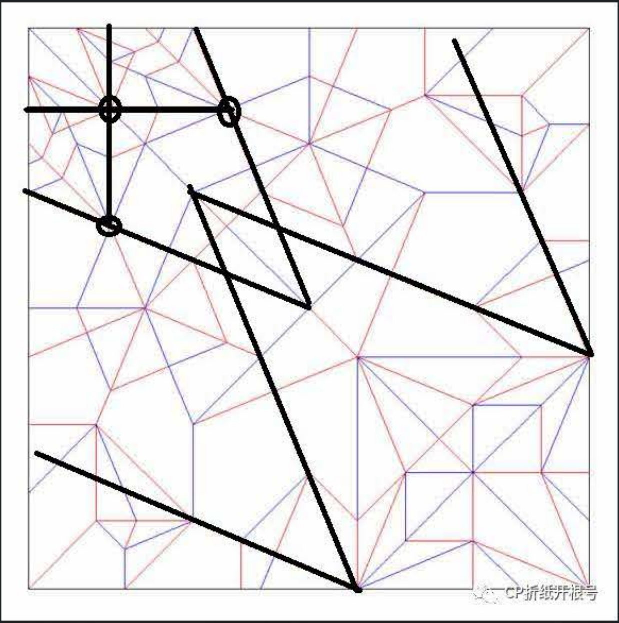


CP折纸开根号

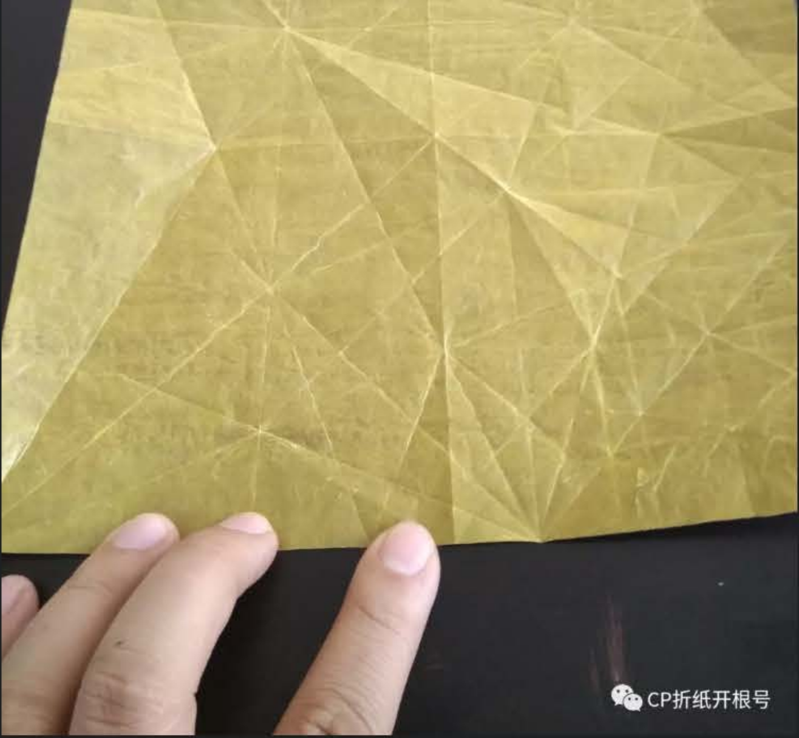


CP折纸开根号

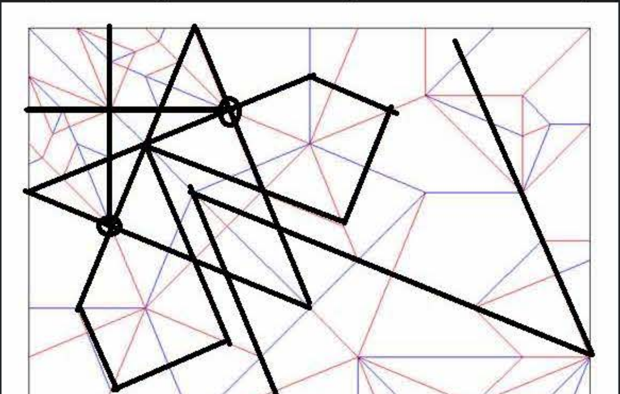
Connect two parallel edges. As shown below

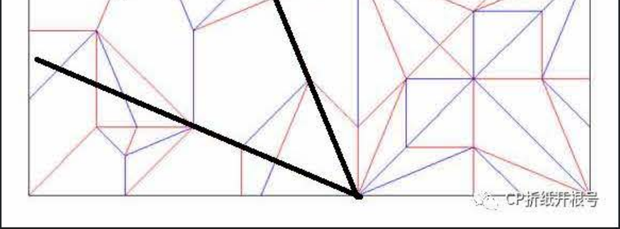


CP折纸开根号

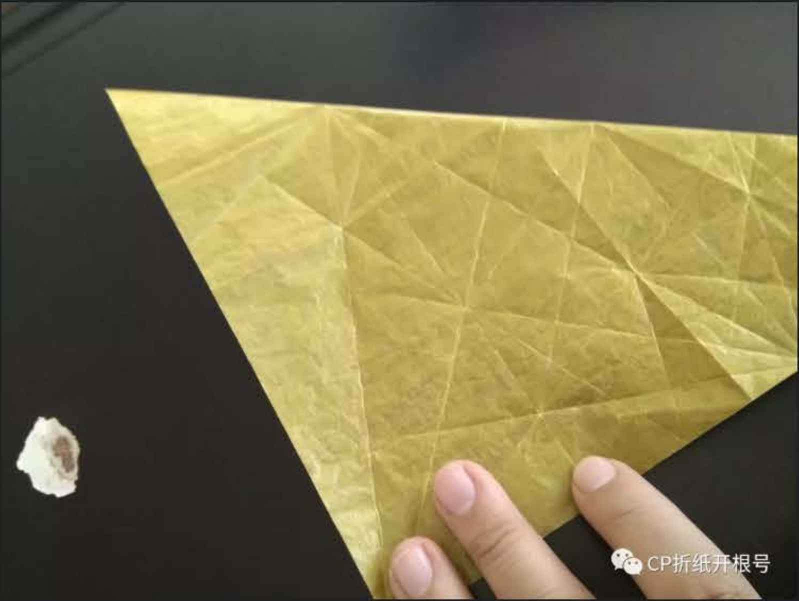


Next, make two symmetrical closed figures with a little difficulty.

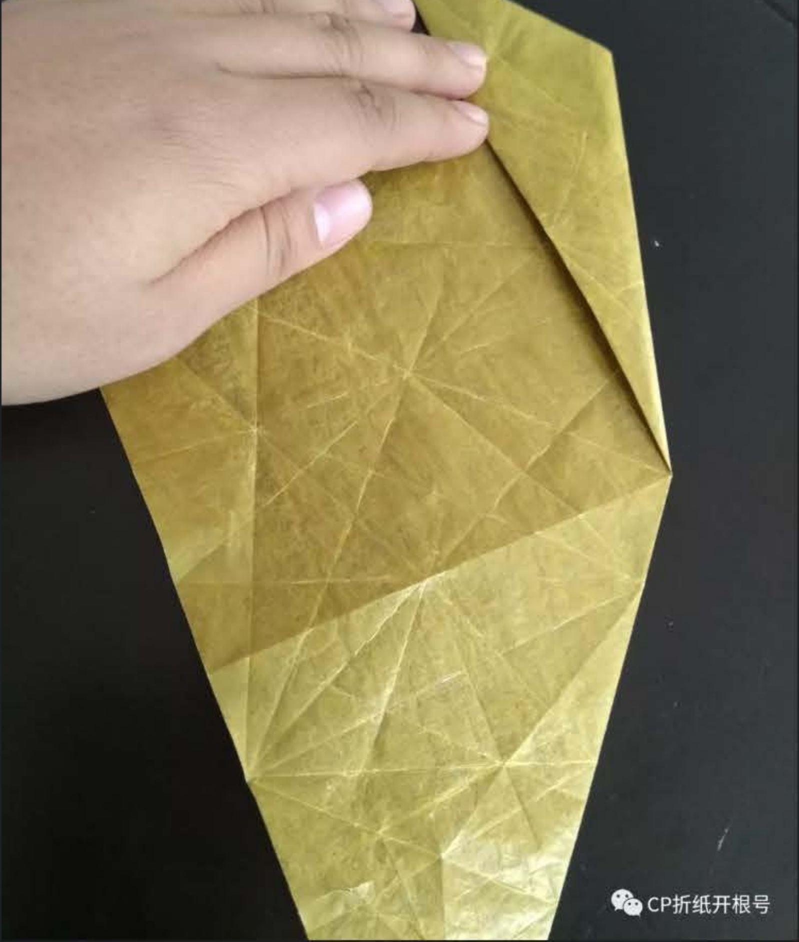




CP折纸开根号

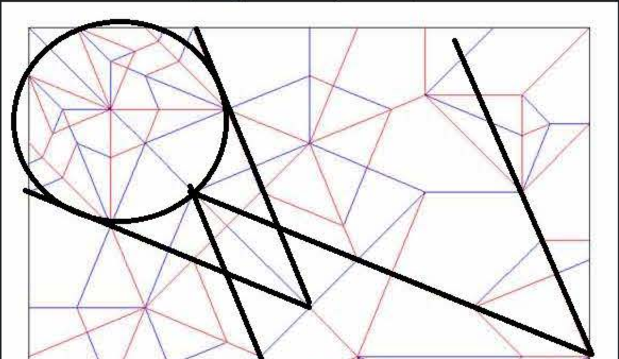


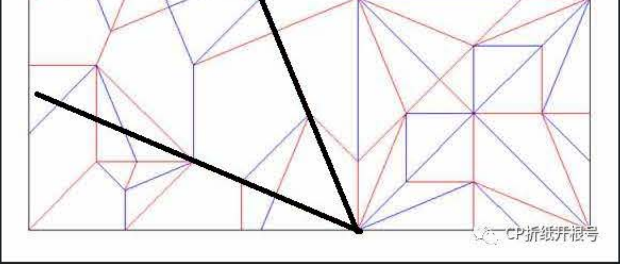
CP折纸开根号



CP折纸开根号

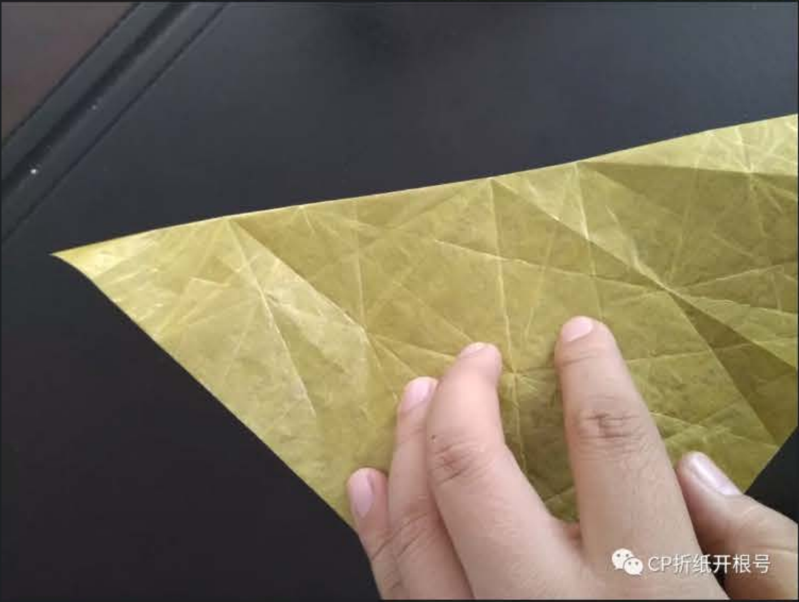
The main thing used here is the intersection of 22.5 degree lines. Below we are making some lines on the top left, of course, this step can also be left out.



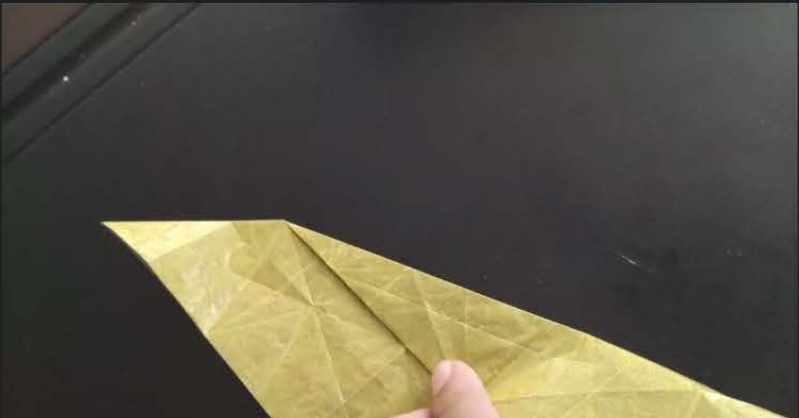


CP折纸开根号

CP折纸开根号



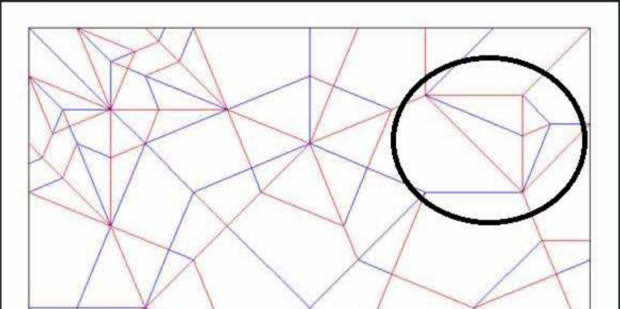
CP折纸开根号

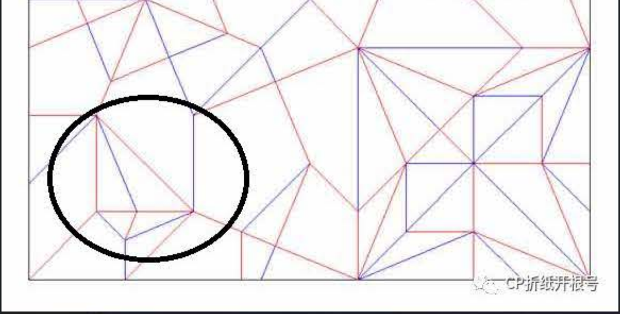


CP折纸开根号

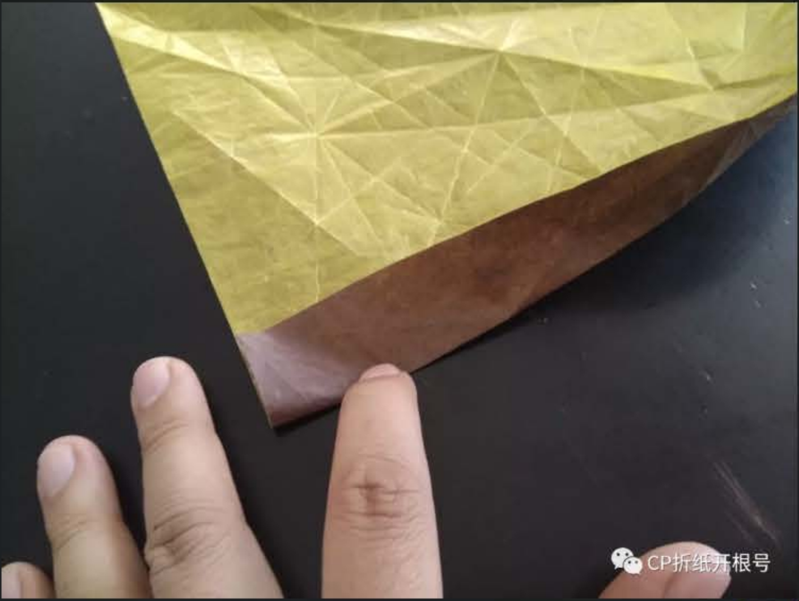
CP折纸开根号

Finally, draw a line here. This step recommends that you at least draw the edges of the right triangle.





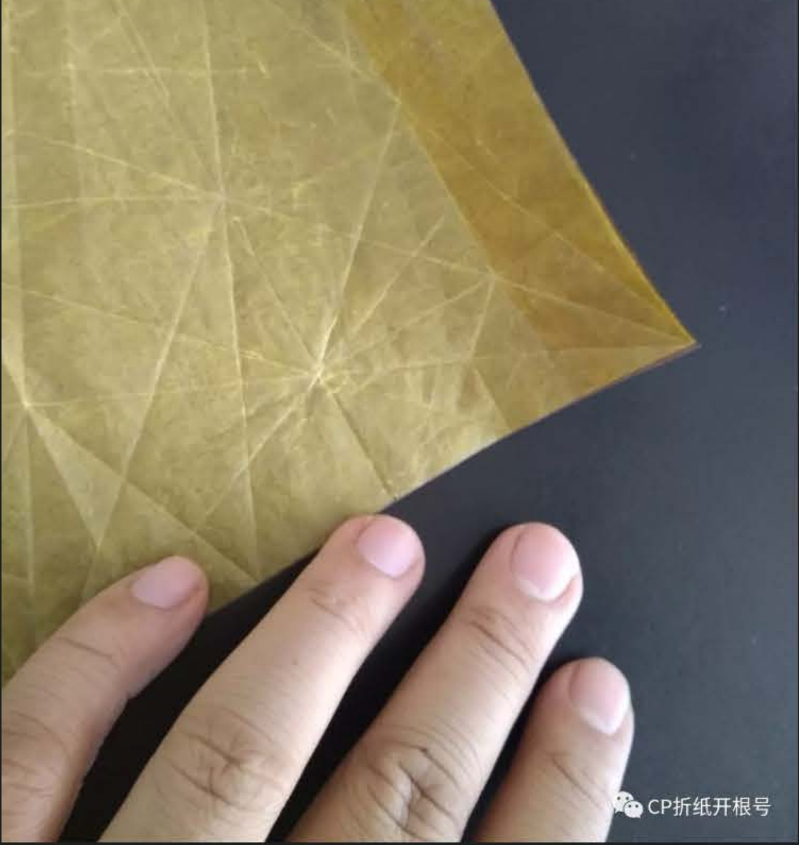
CP折纸开根号



CP折纸开根号

CP折纸开根号

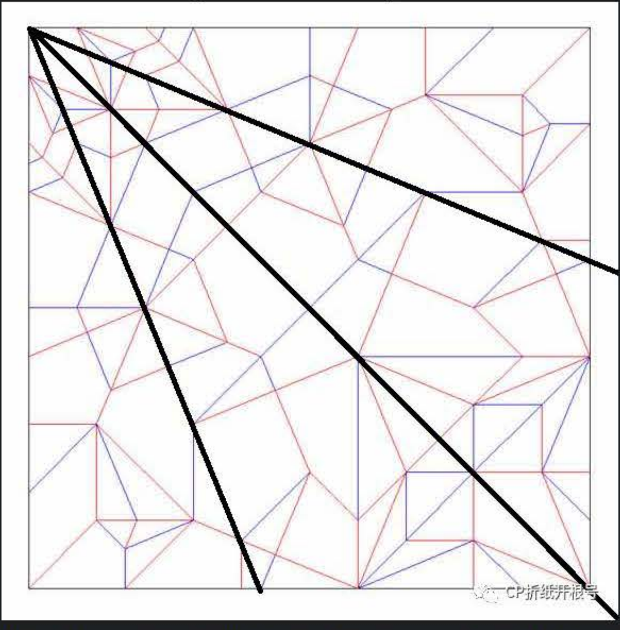
CP折纸开根号



CP折纸开根号

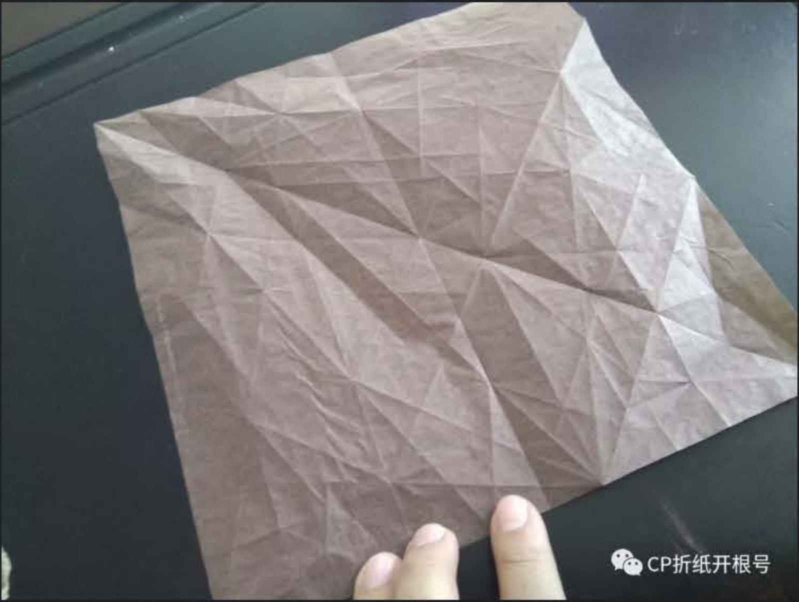
CP折纸开根号

Next we continue to go down and converge.

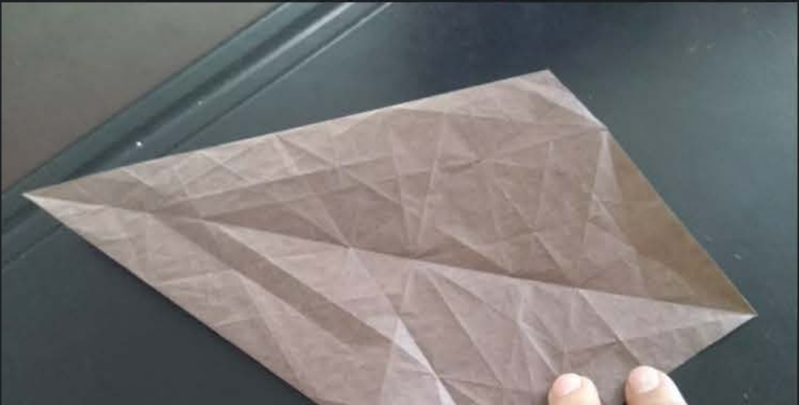


CP折纸开根号

We must remember the first step of the aggregation, find the long-term. But in order to show more, this time I will make the diagonal first, the center line will not be broken first. Let 's turn around and start!

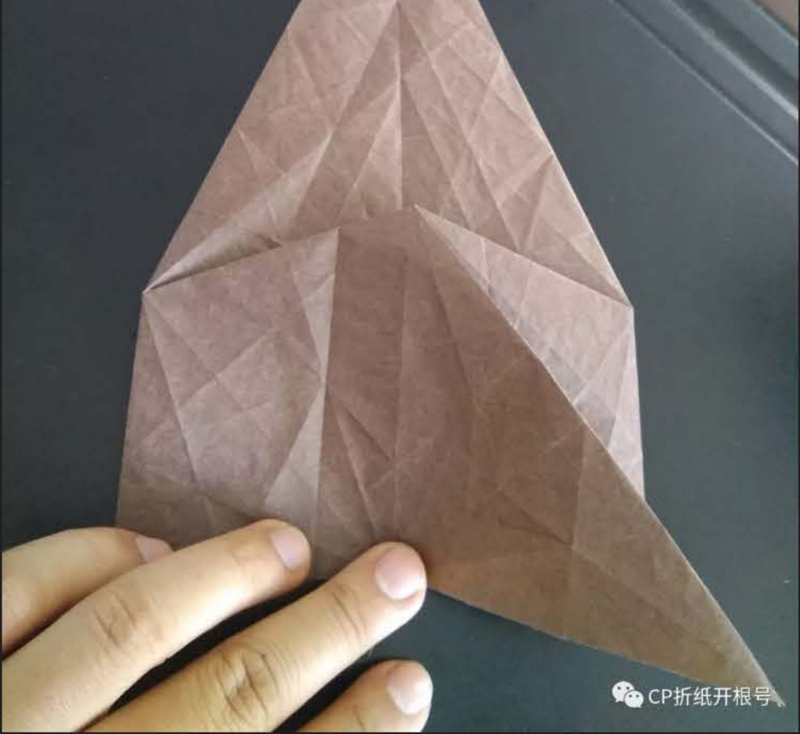


CP折纸开根号



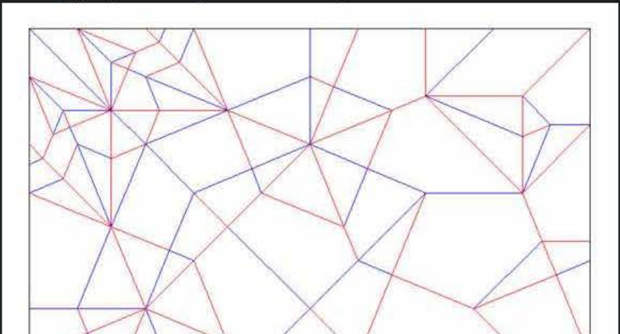
CP折纸开根号

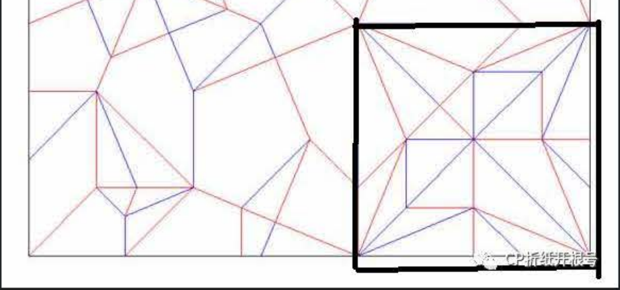
Aggregate the following sections.



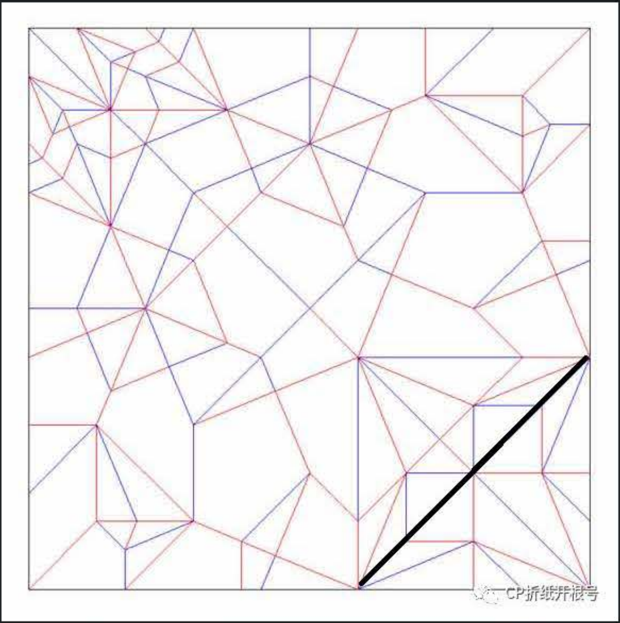
CP折纸开根号

Let's aggregate the squares in the figure below.



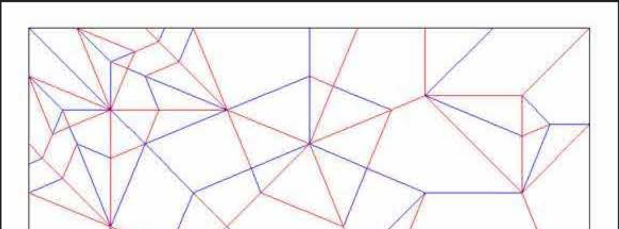


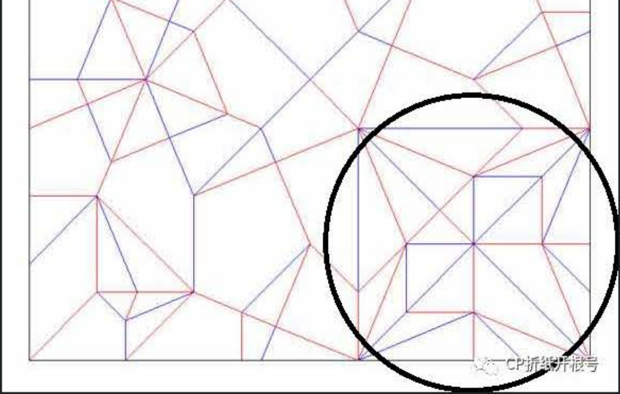
CP折纸开根号



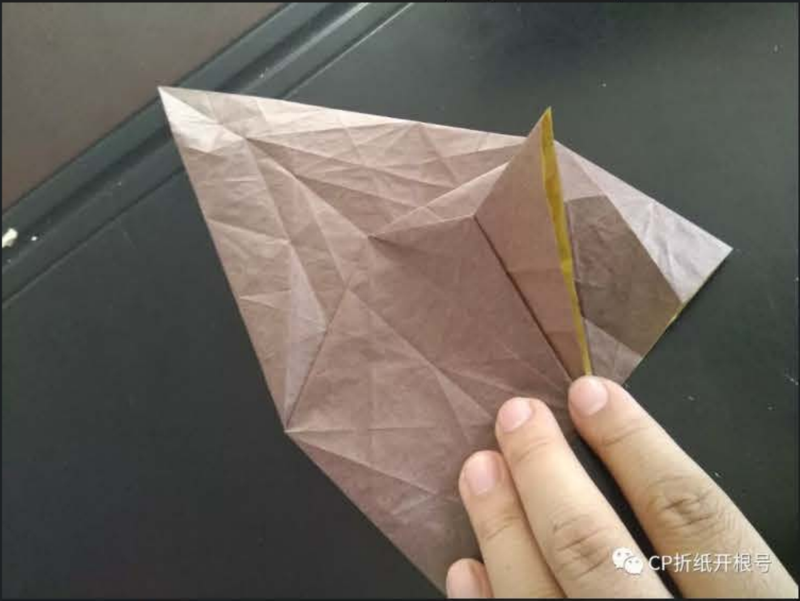
CP折纸开根号

CP折纸开根号

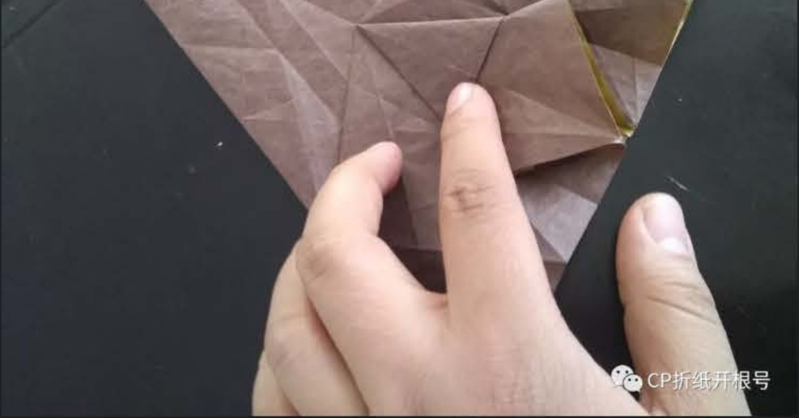




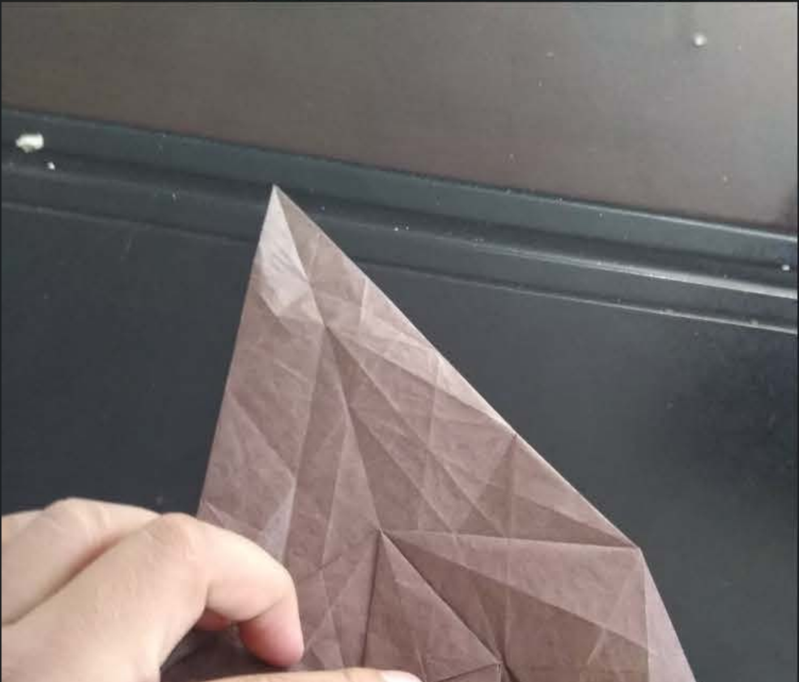
CP折纸开根号

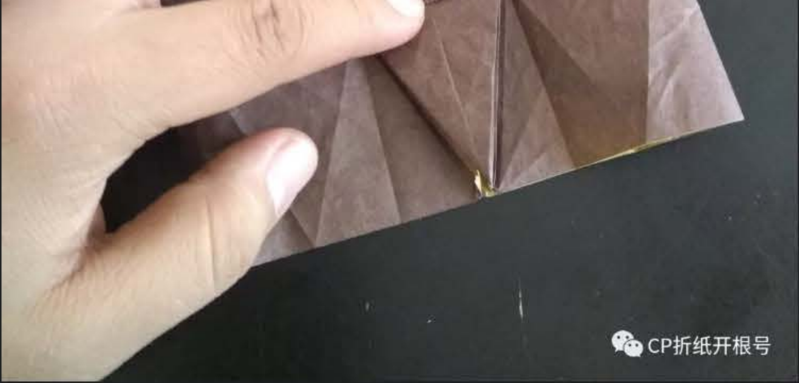


CP折纸开根号



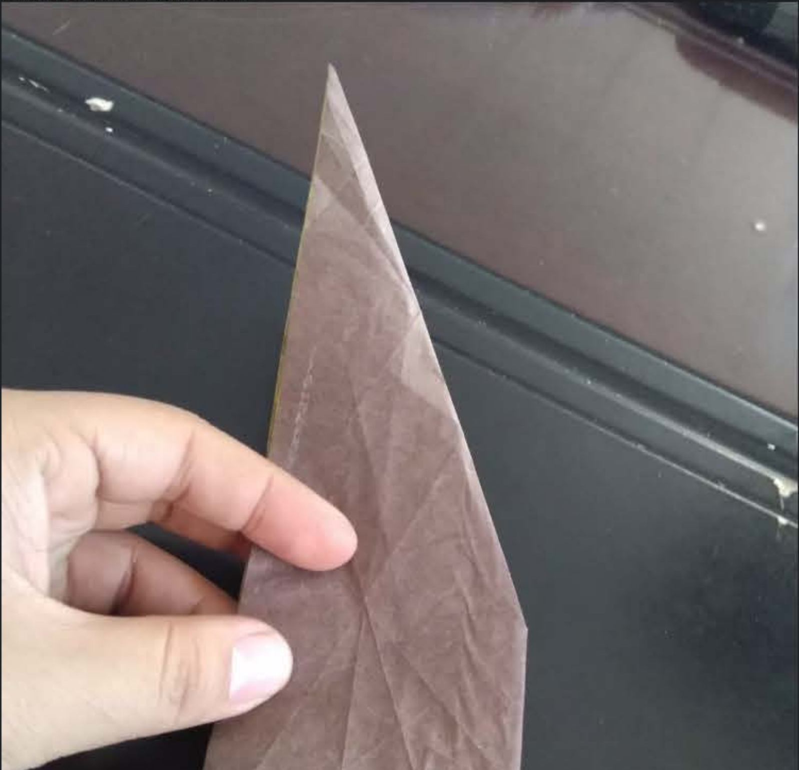
CP折纸开根号





CP折纸开根号

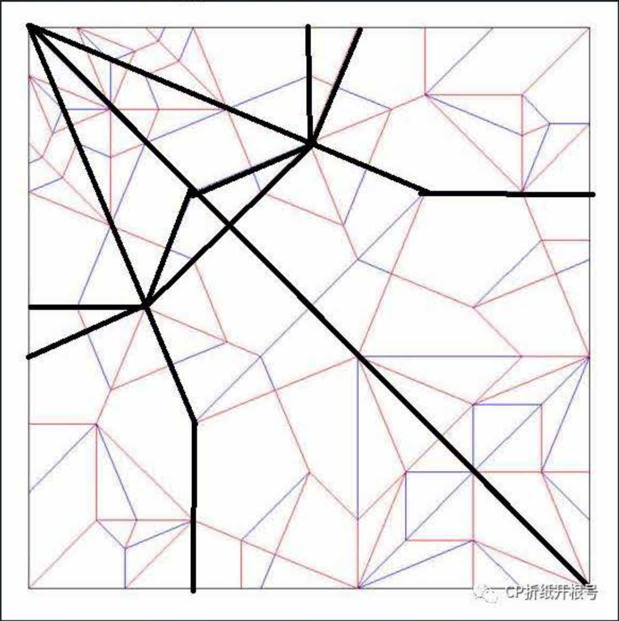
Fold the center line in half.



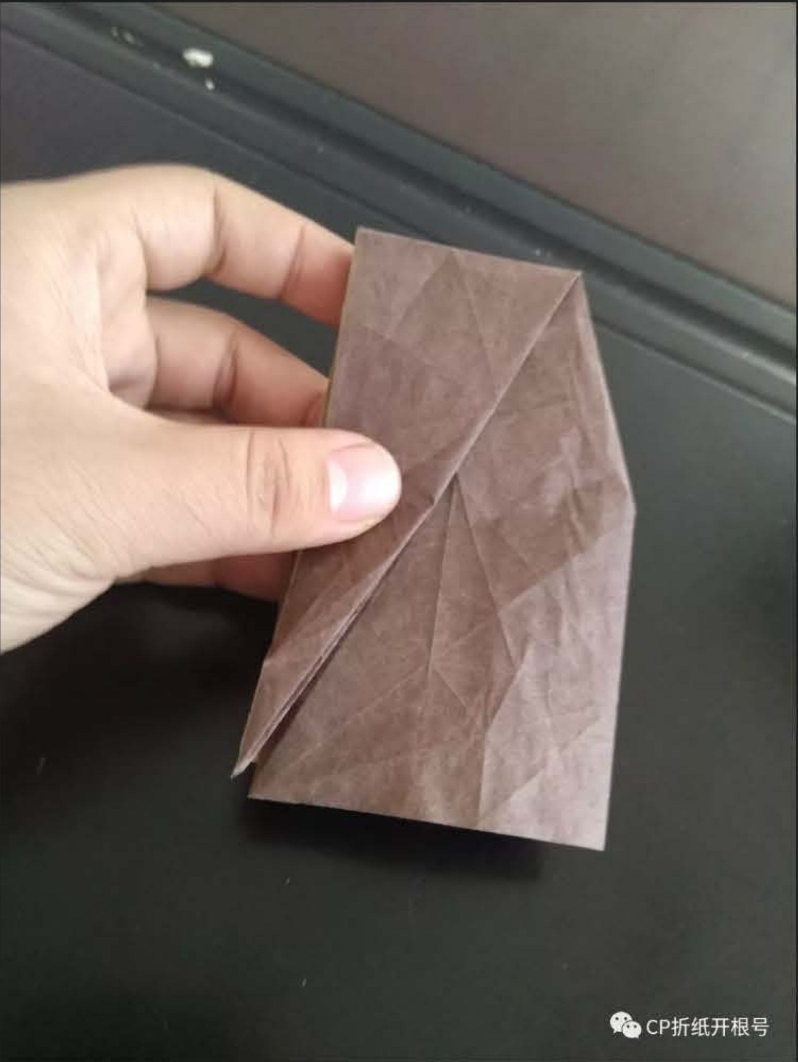
CP折纸开根号

Fold in half now, it doesn't matter if you fold in half at the beginning!

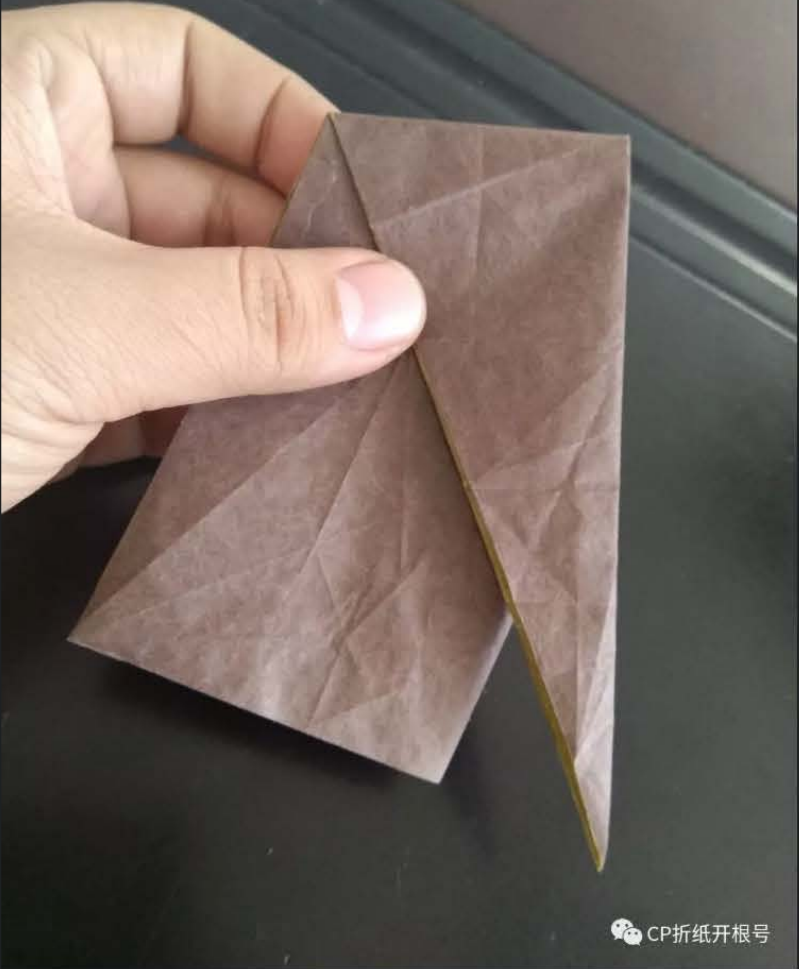
Next, fold out the upper left fold.



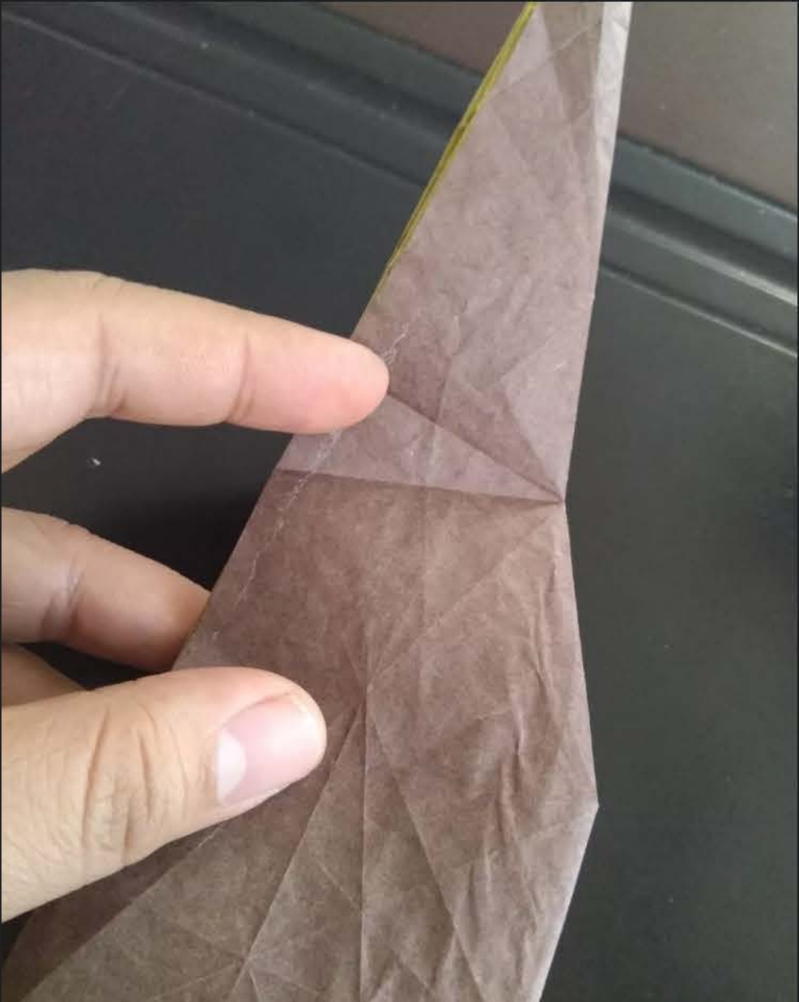
CP折纸开根号



CP折纸开根号

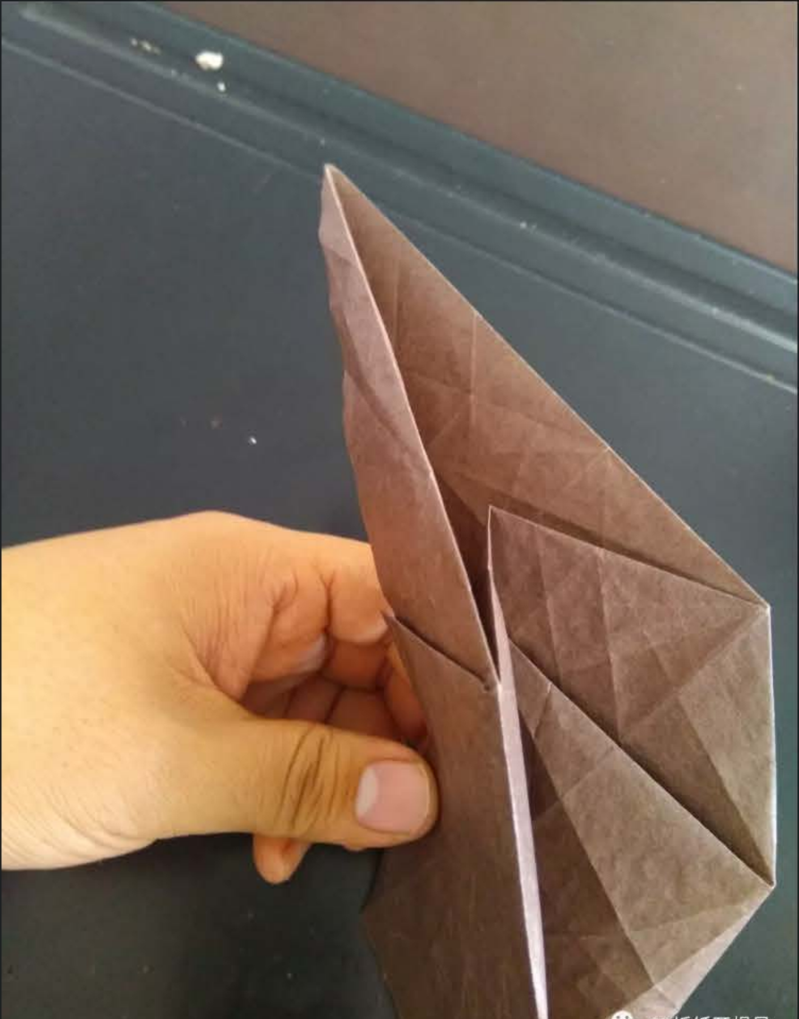


CP折纸开根号



CP折纸开根号

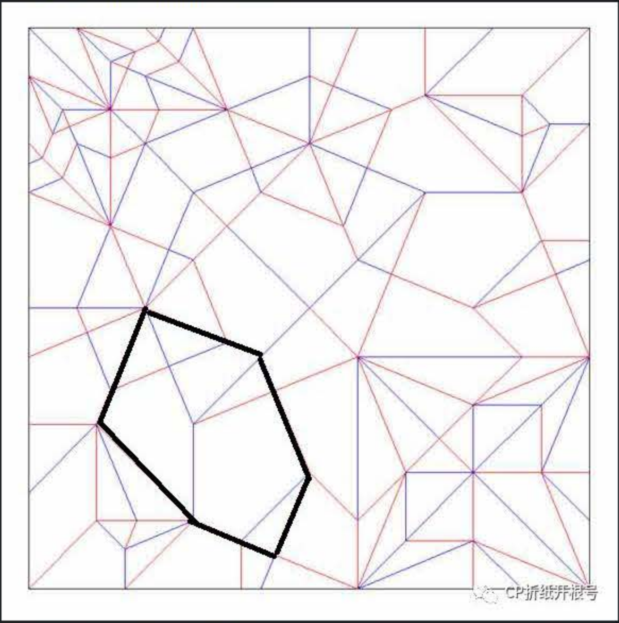
CP折纸开根号



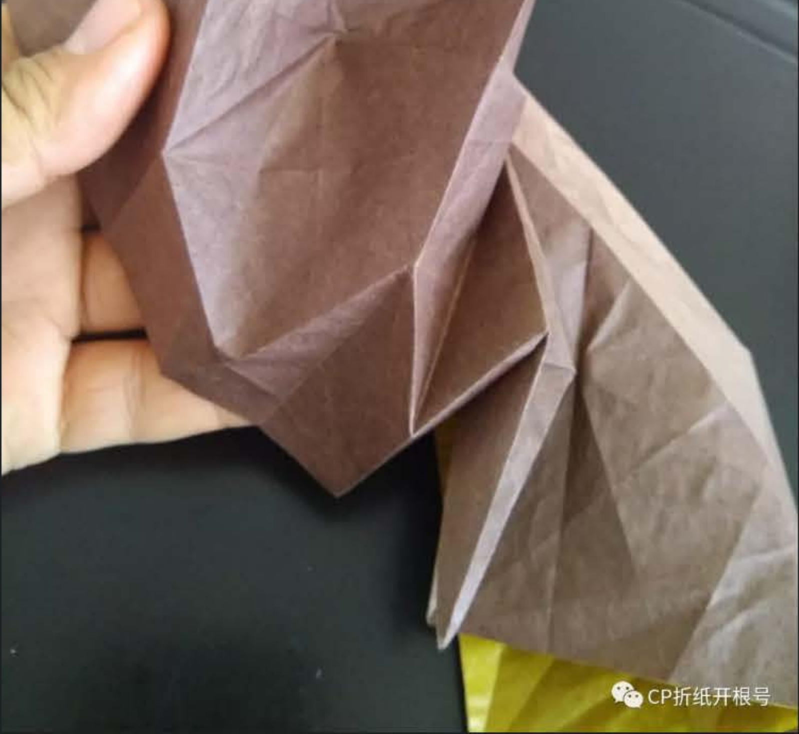
CP折纸开根号

The figure above is the top view.

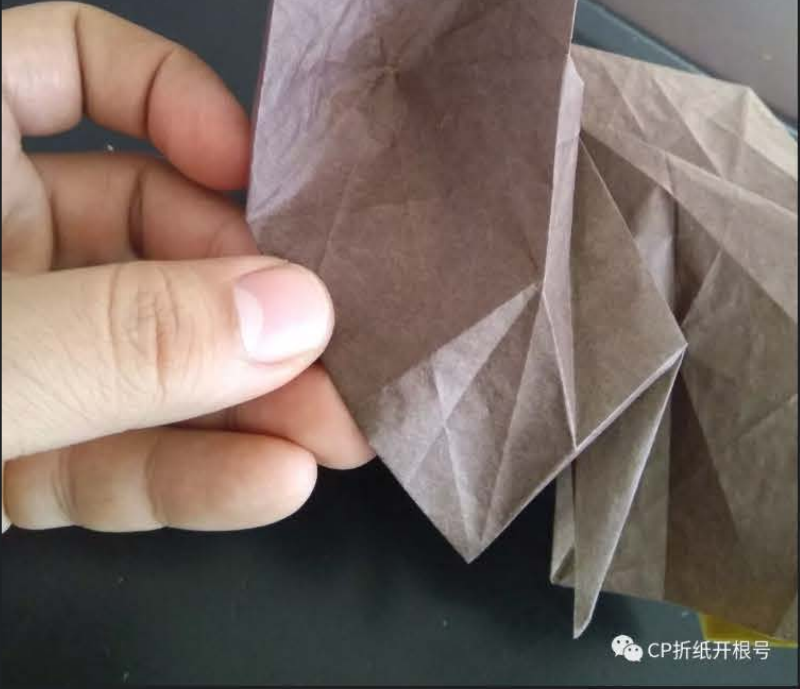
Next, continue to complete the closed sinking in the figure below, and simultaneously fold out some small lines below.



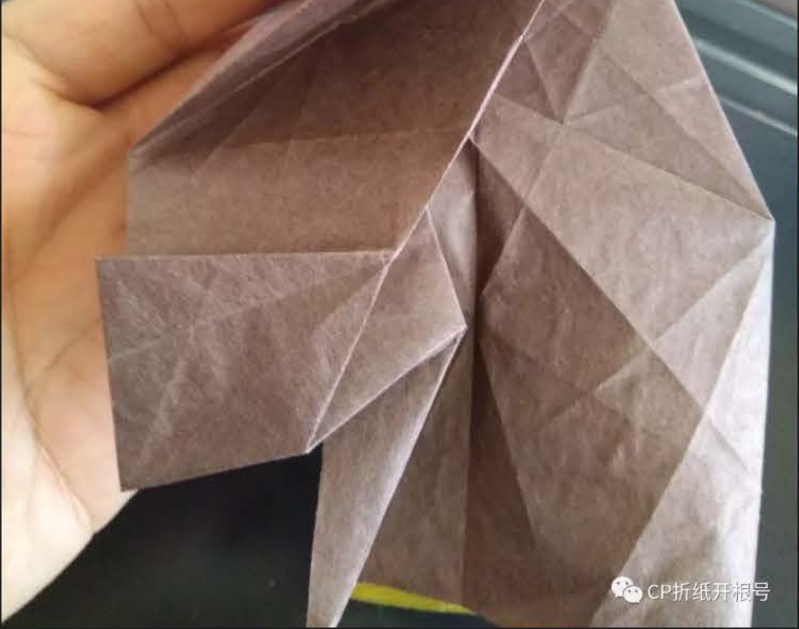
CP折纸开根号



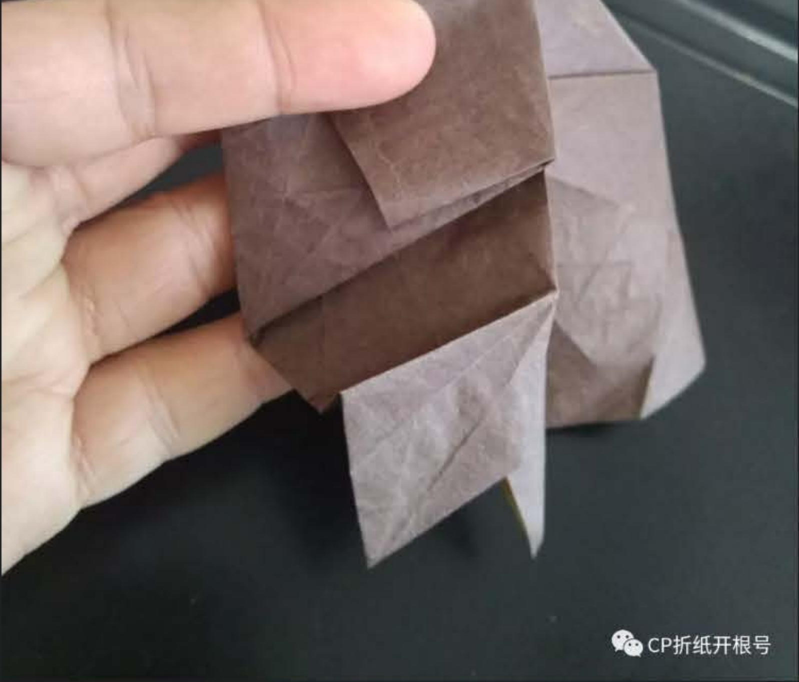
CP折纸开根号



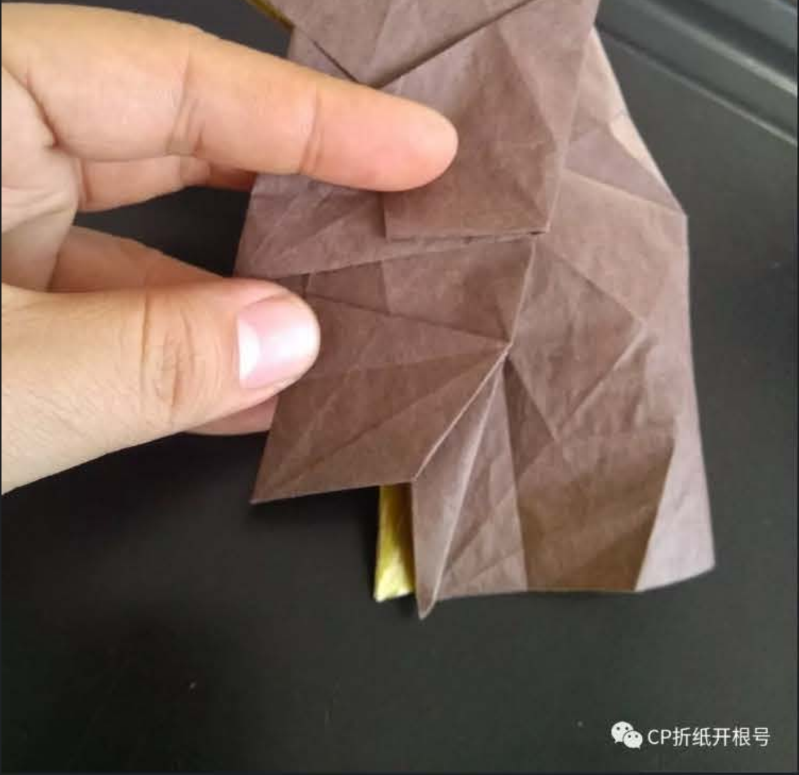
CP折纸开根号



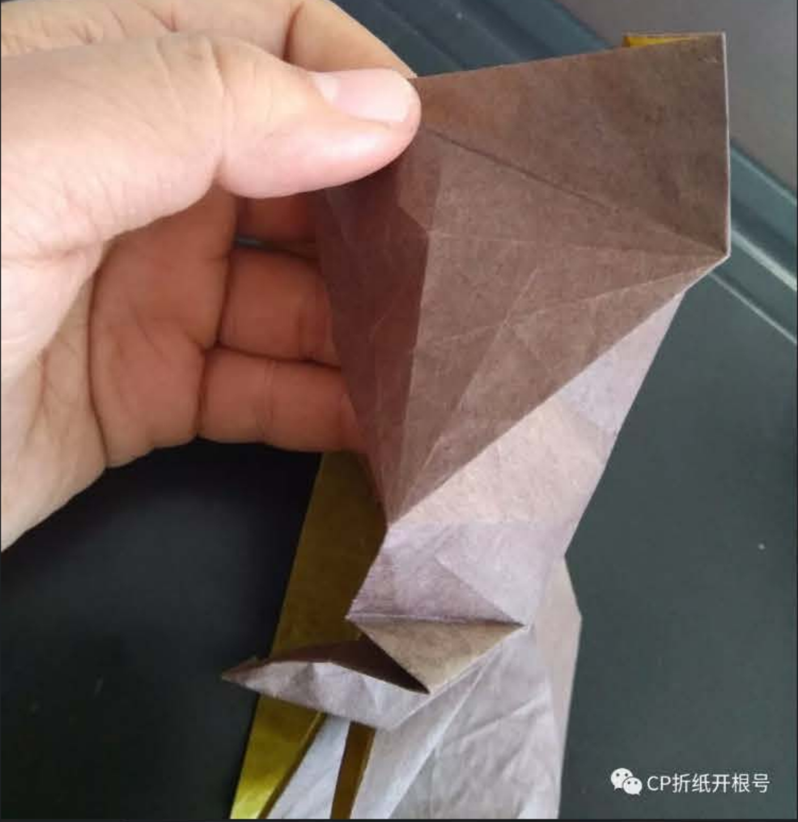
CP折纸开根号



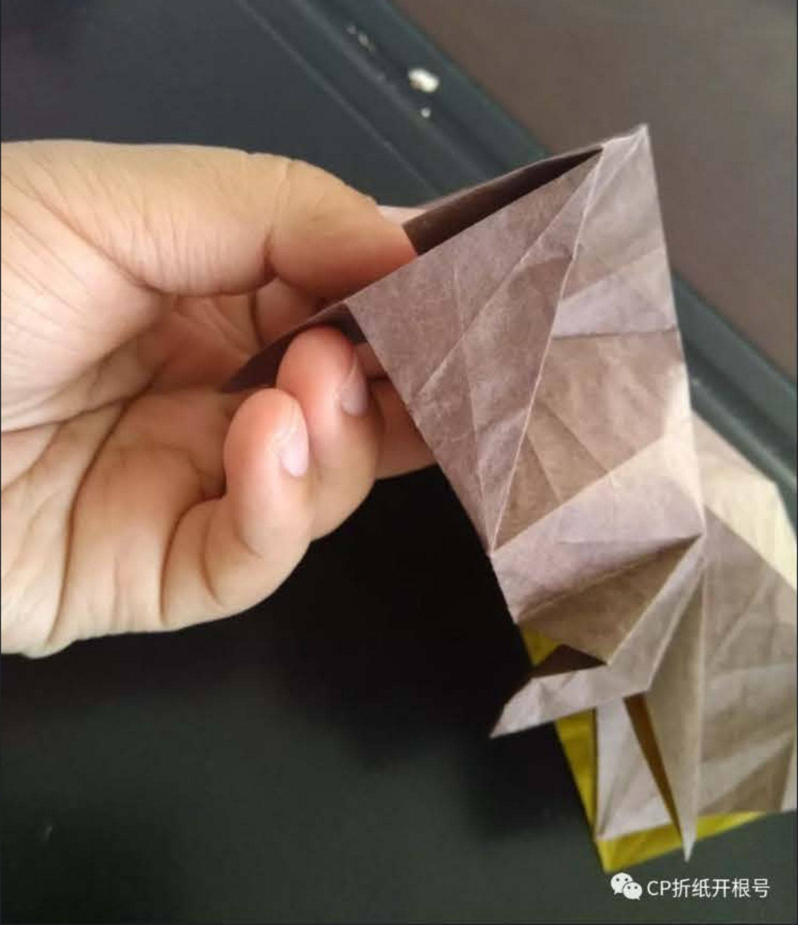
CP折纸开根号



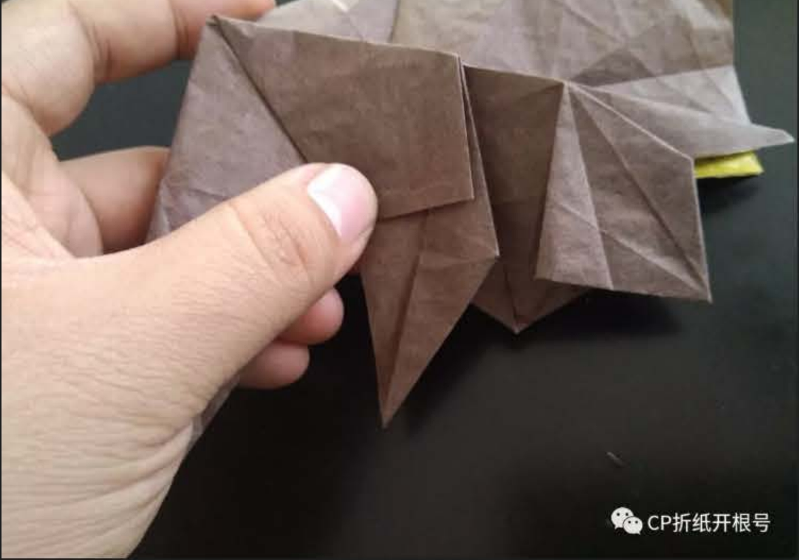
CP折纸开根号



CP折纸开根号

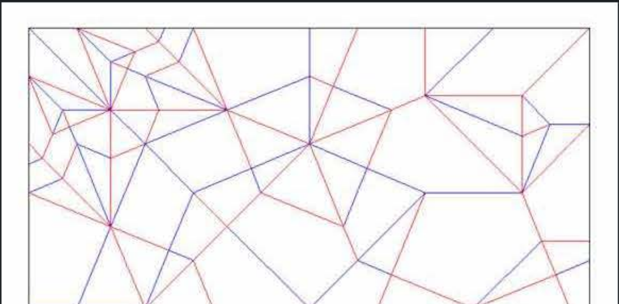


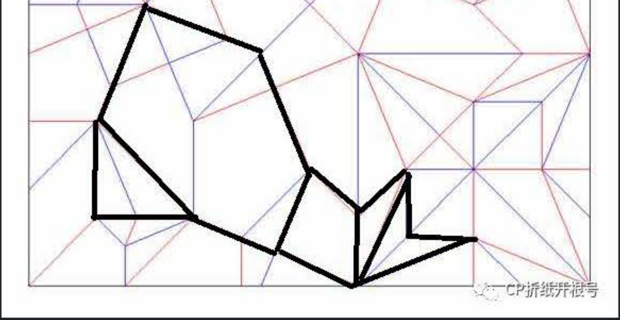
CP折纸开根号



CP折纸开根号

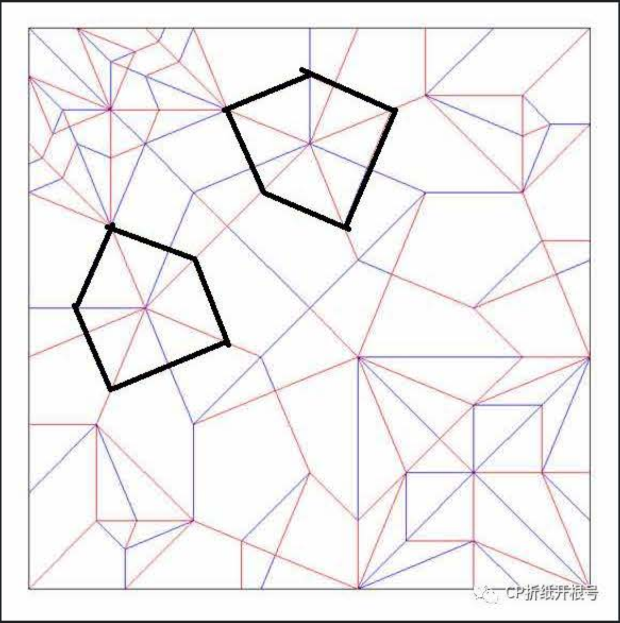
Here I would like to remind everyone again to pay attention to the graphics associated with the sinking just closed.



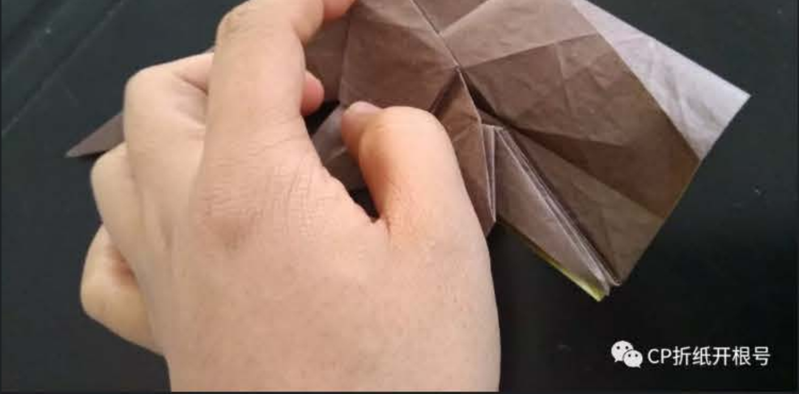


CP折纸开根号

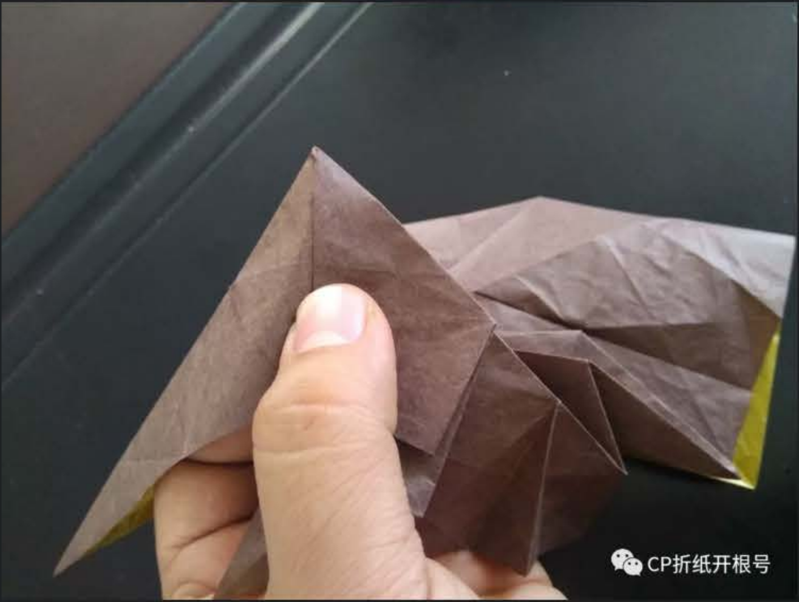
Then another closed sink.



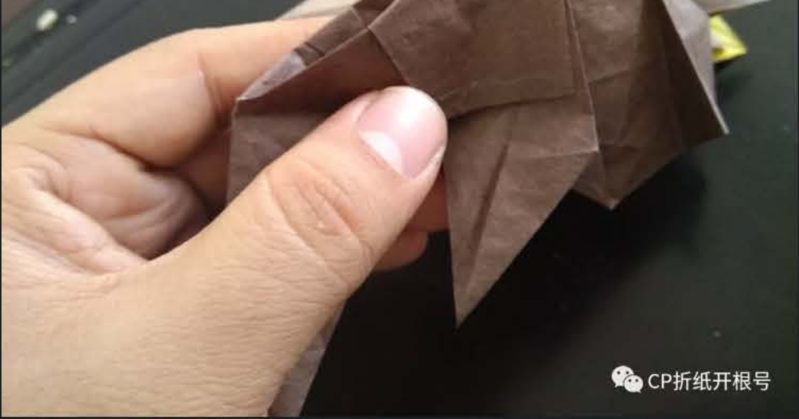
CP折纸开根号



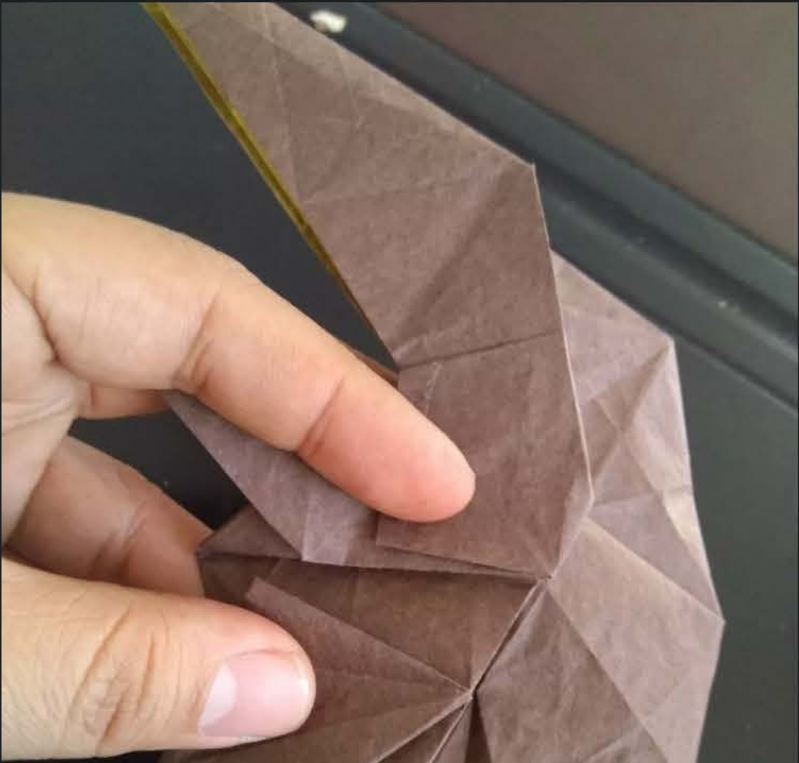
CP折纸开根号

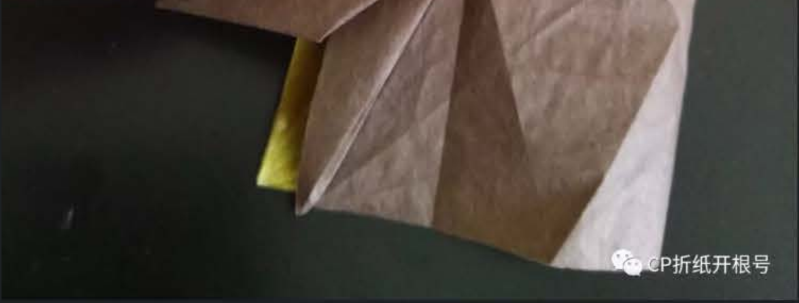


CP折纸开根号

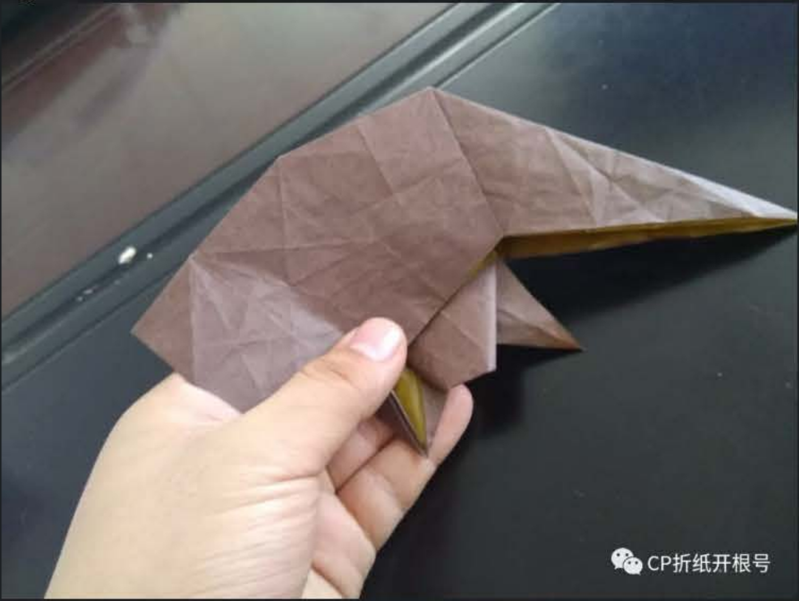


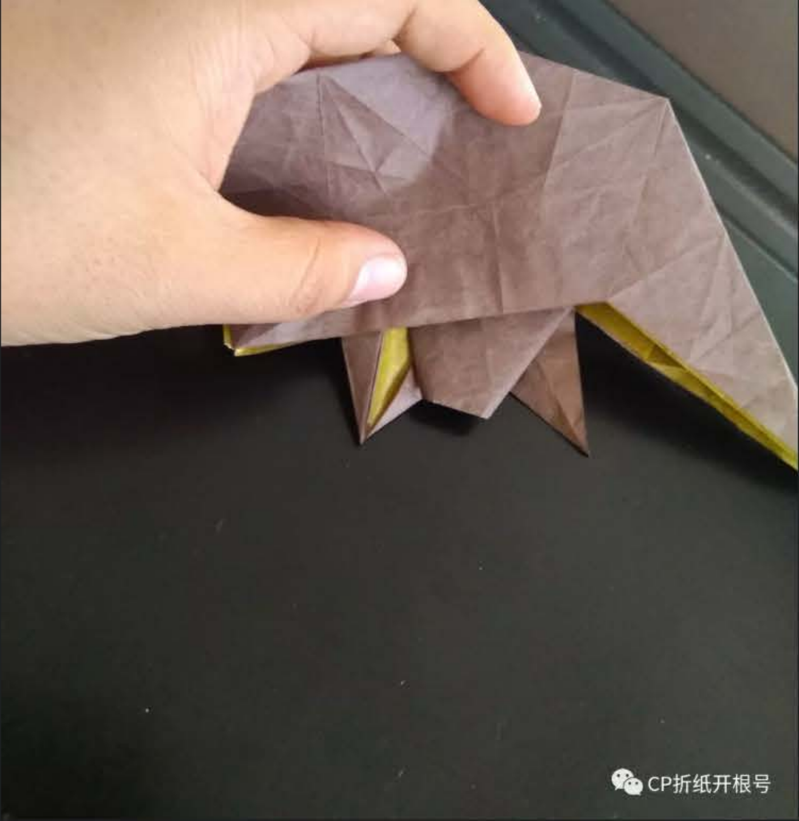
CP折纸开根号





Adjust after the setback, flatten it, and do the same on the other side.



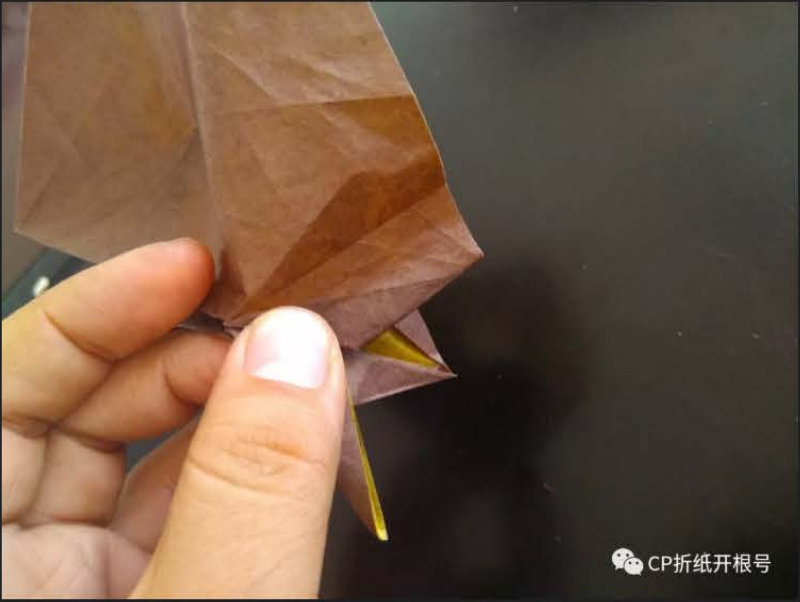


CP折纸开根号

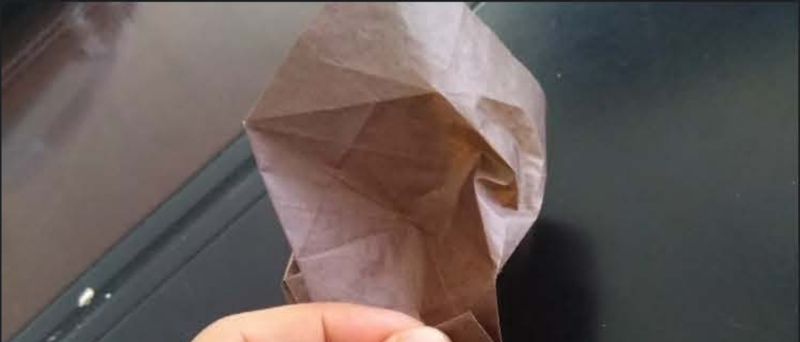
CP折纸开根号

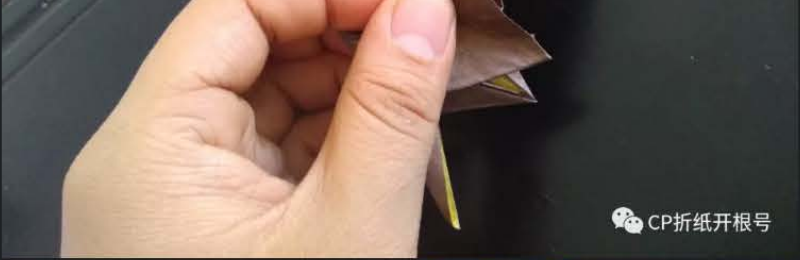
CP折纸开根号

The picture above is folding the legs.

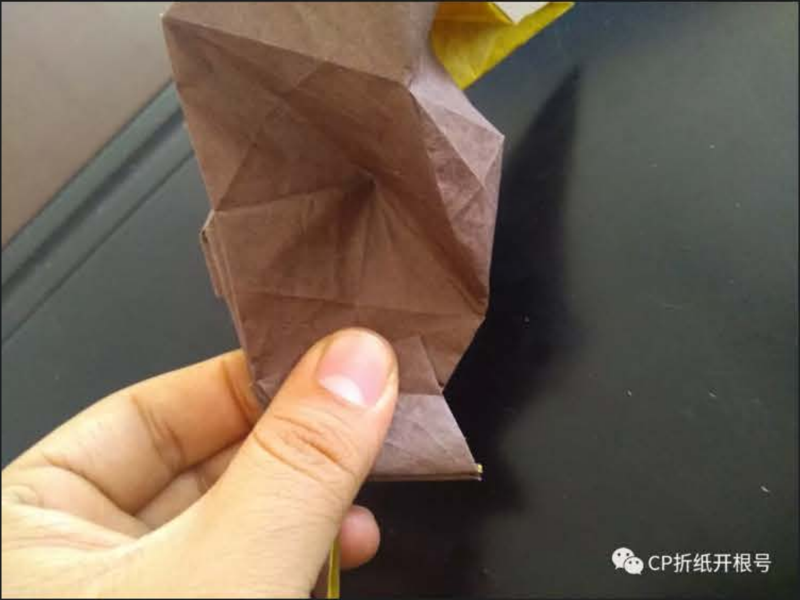


CP折纸开根号



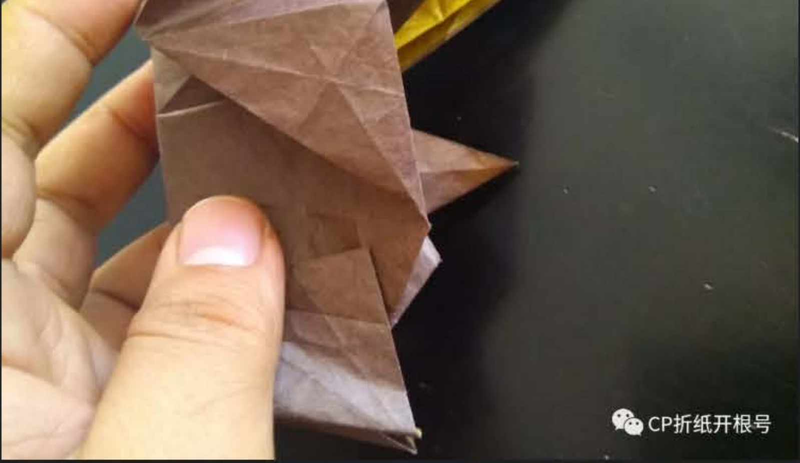


CP折纸开根号

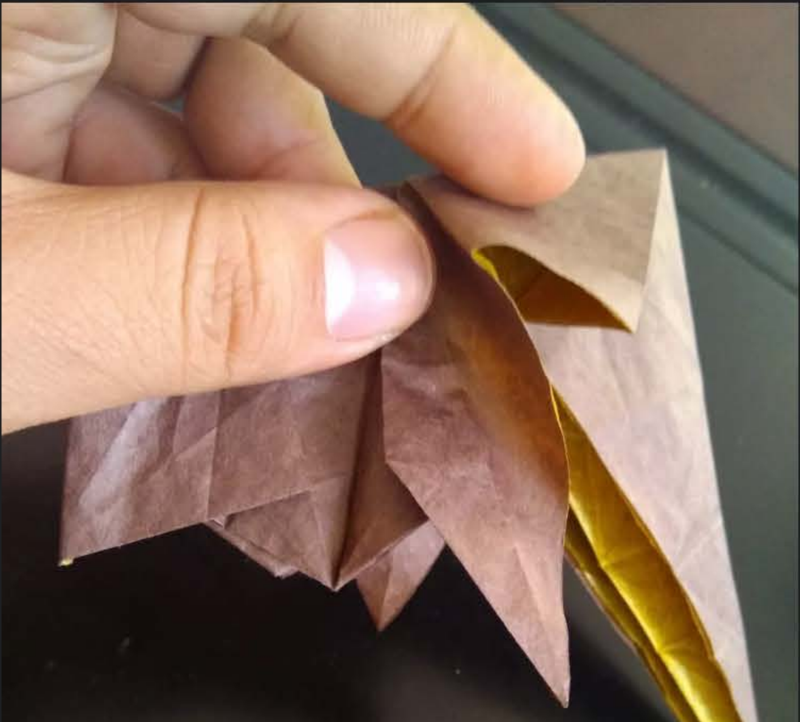


CP折纸开根号

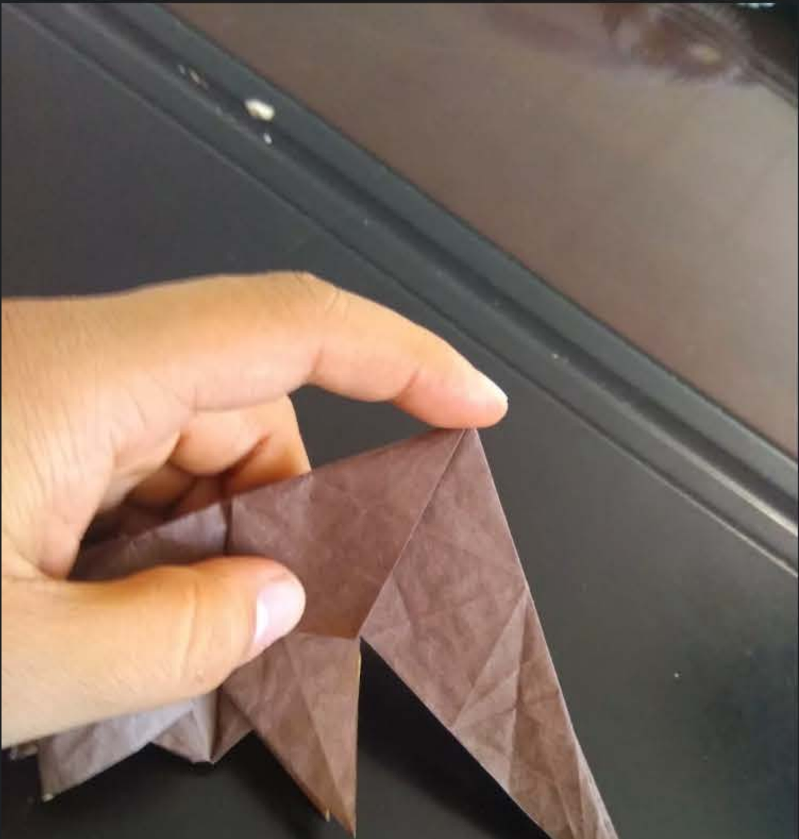
Adjust sinking.



CP折纸开根号

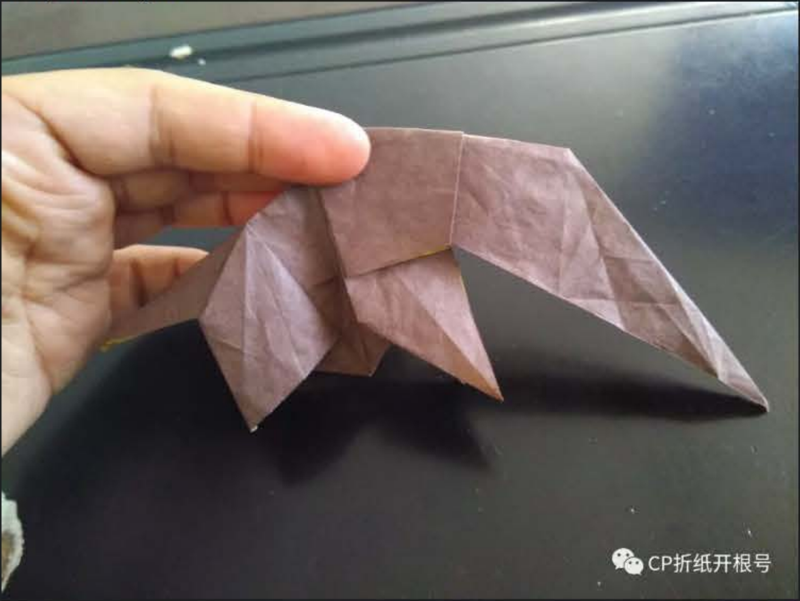


CP折纸开根号

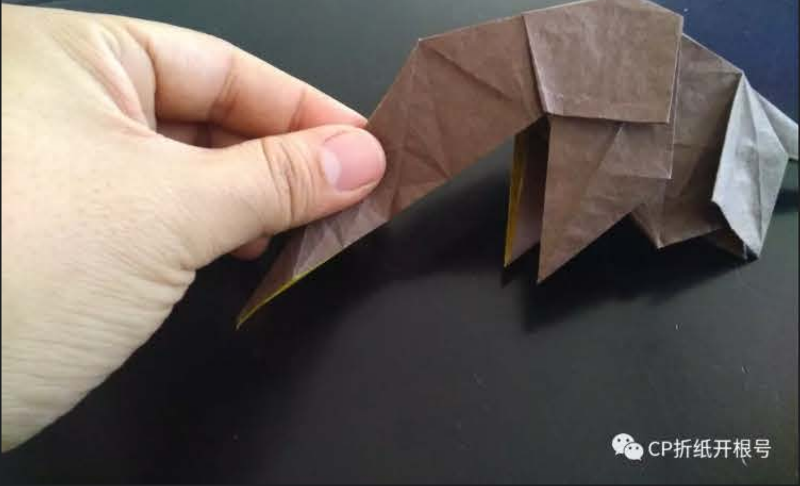


CP折纸开根号

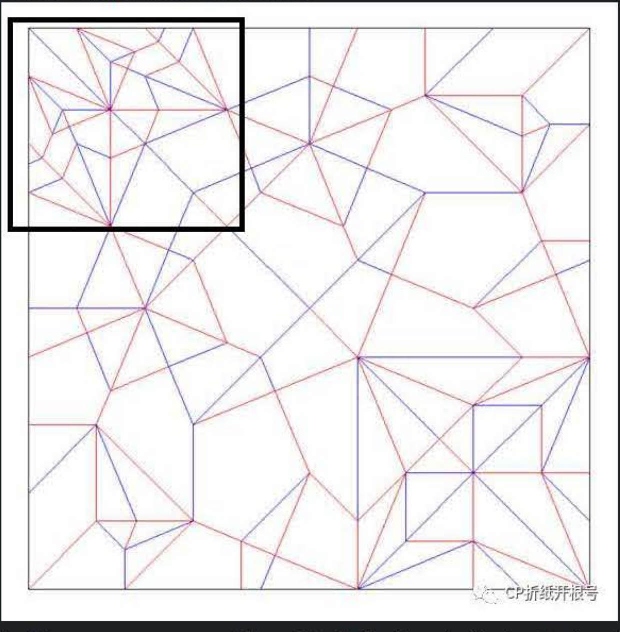
Ready to sink again.



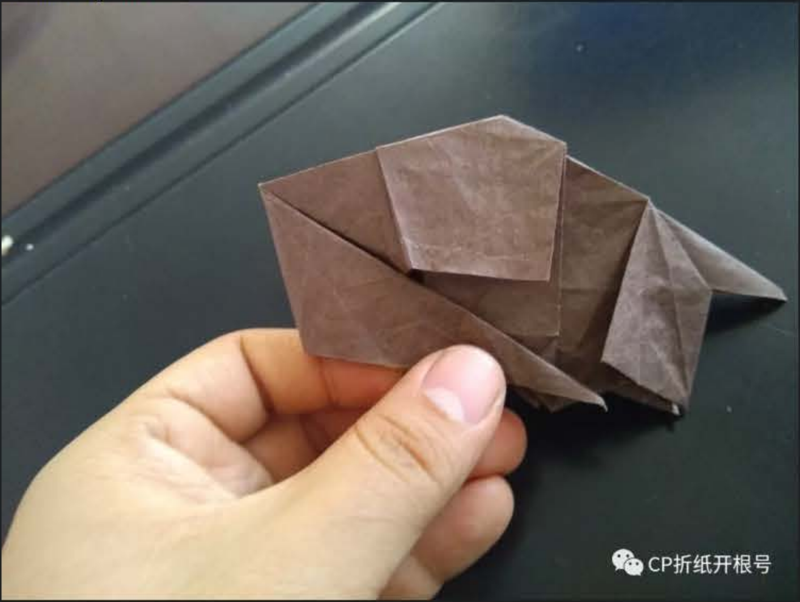
CP折纸开根号



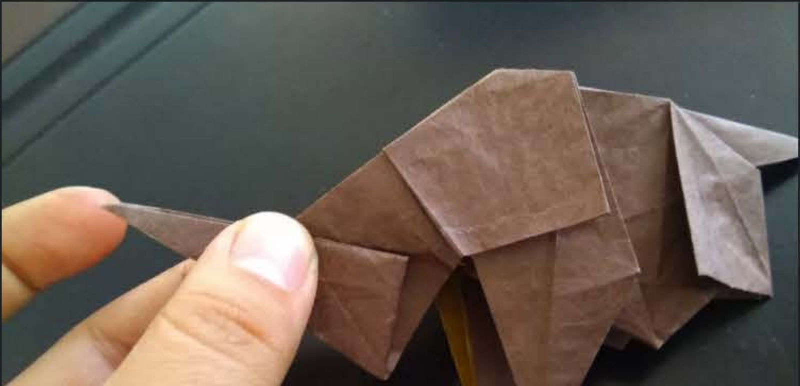
The final aggregation is the head.



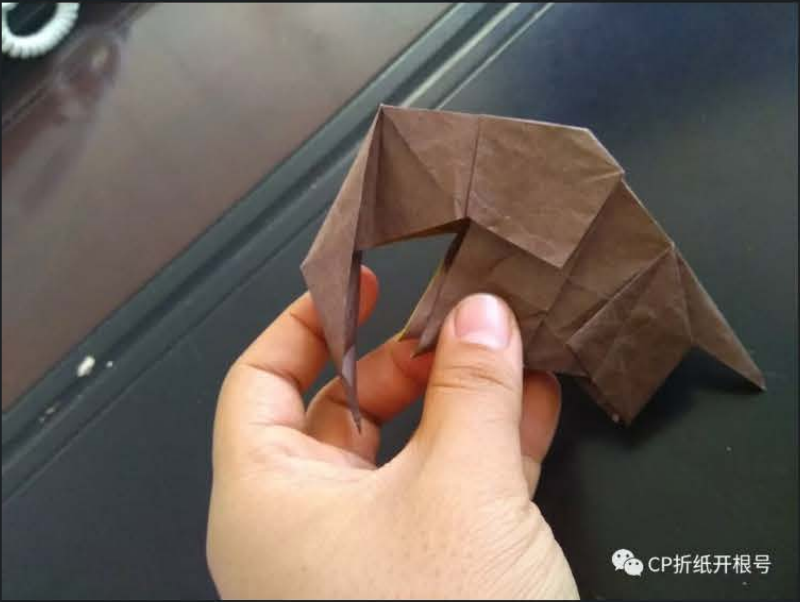
In this case, you may not have hit all the lines in the beginning, but we can fold them out directly here.



CP折纸开根号

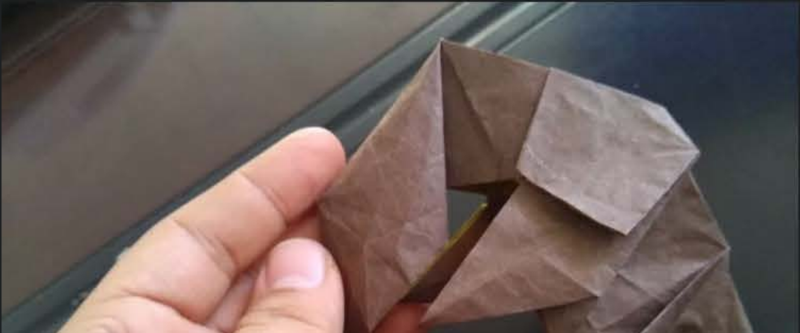


CP折纸开根号



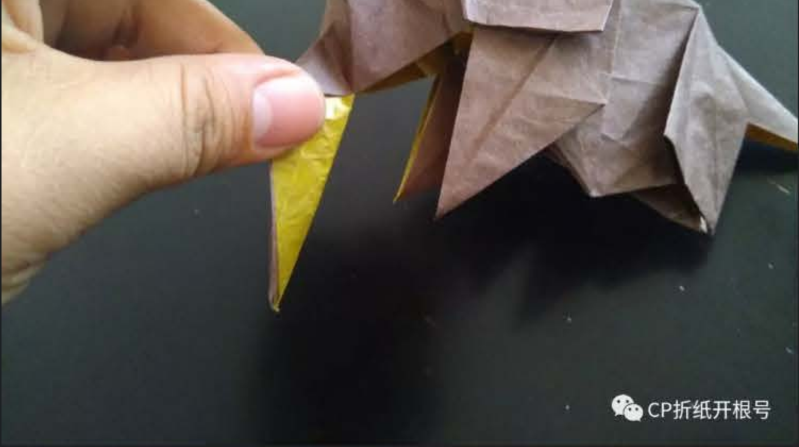
CP折纸开根号

Pull out the lower layer.

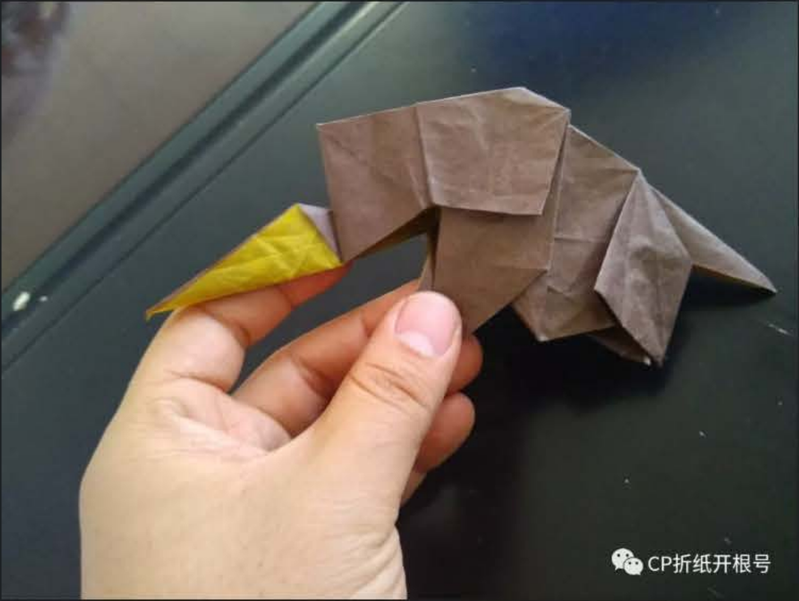


CP折纸开根号

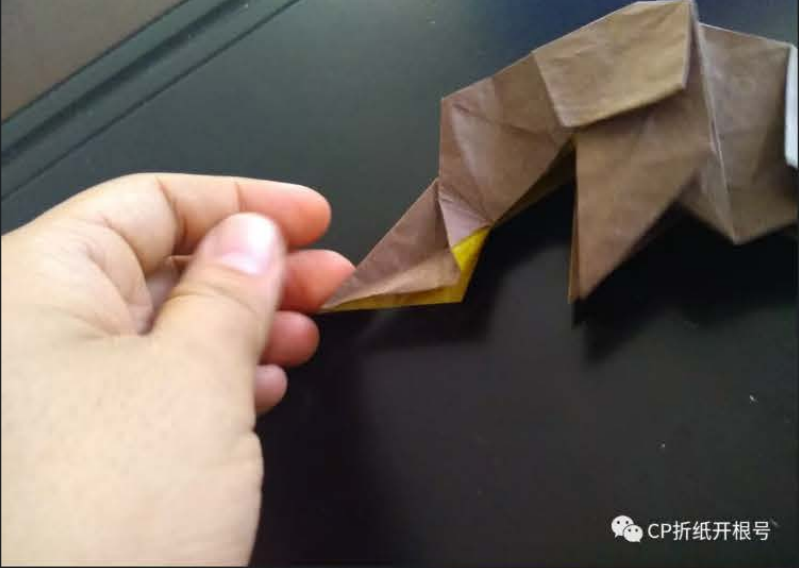
CP折纸开根号



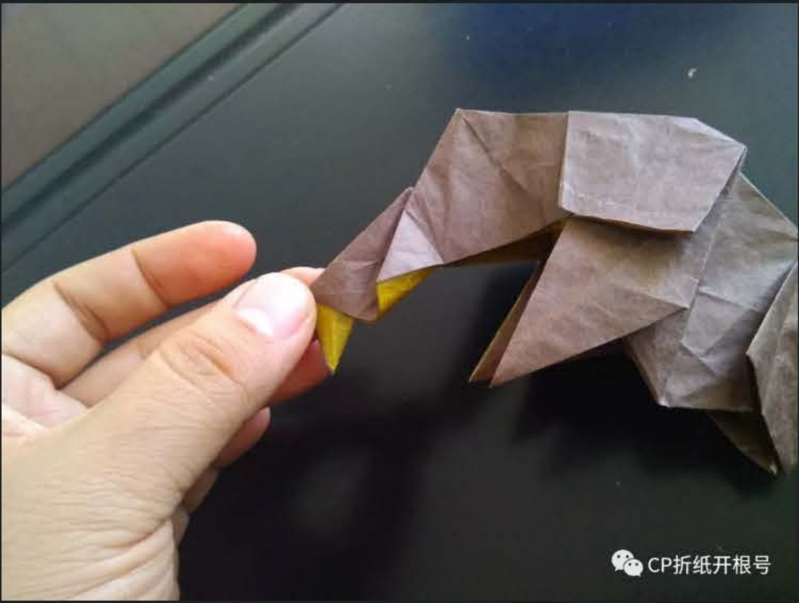
CP折纸开根号



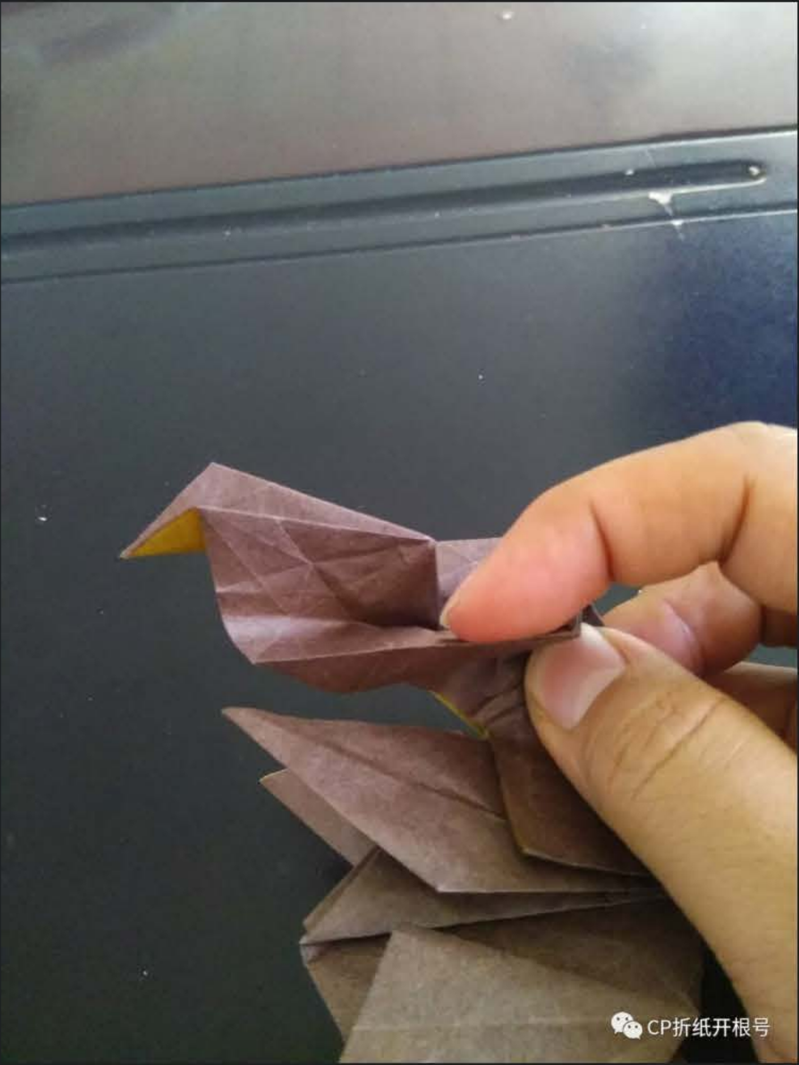
CP折纸开根号



CP折纸开根号

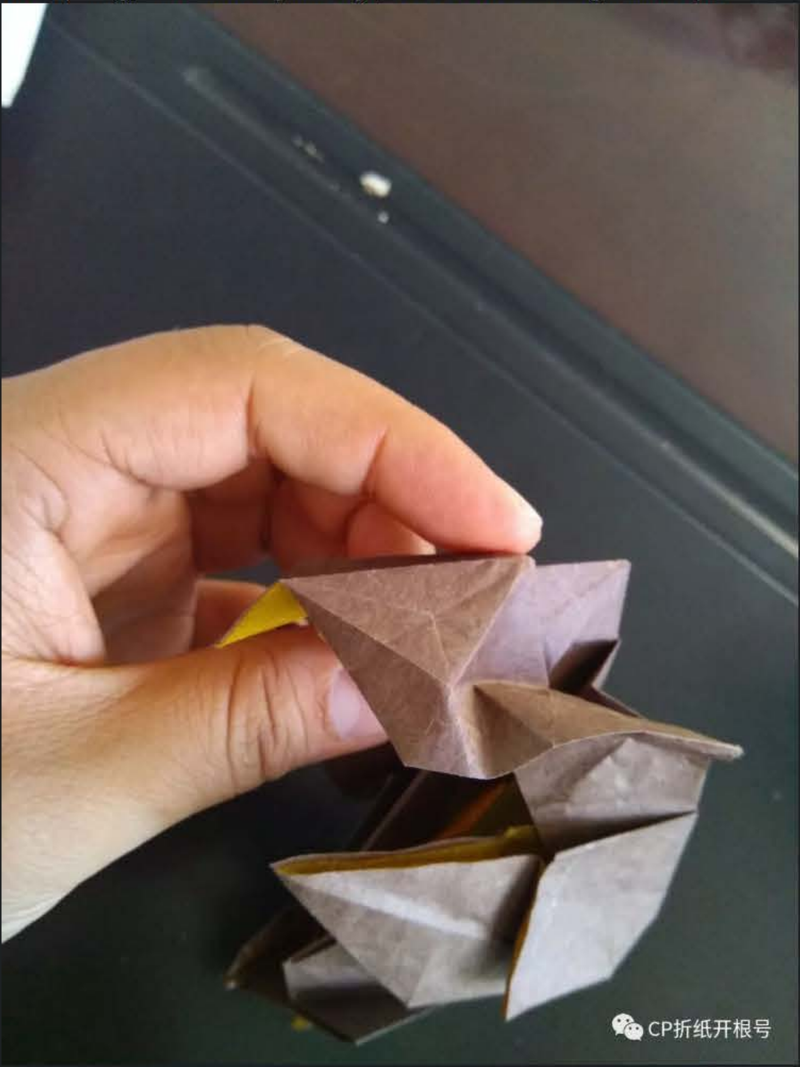


CP折纸开根号

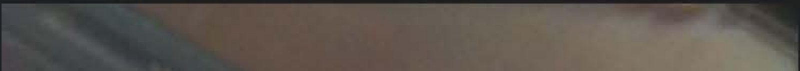


CP折纸开根号

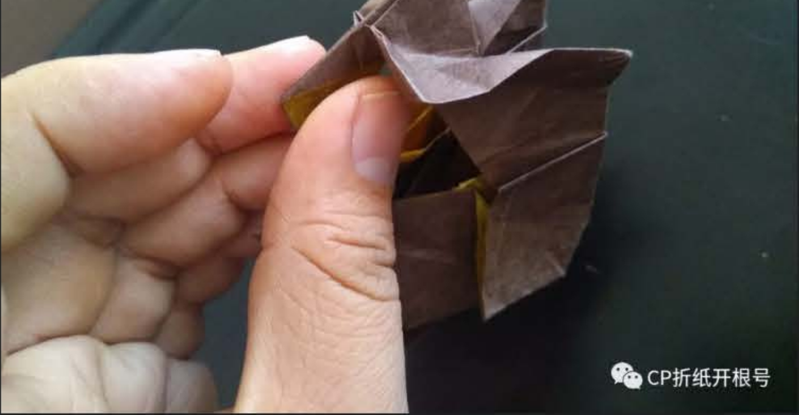
After opening, focus on the right triangle, because this closed figure is full-peak.

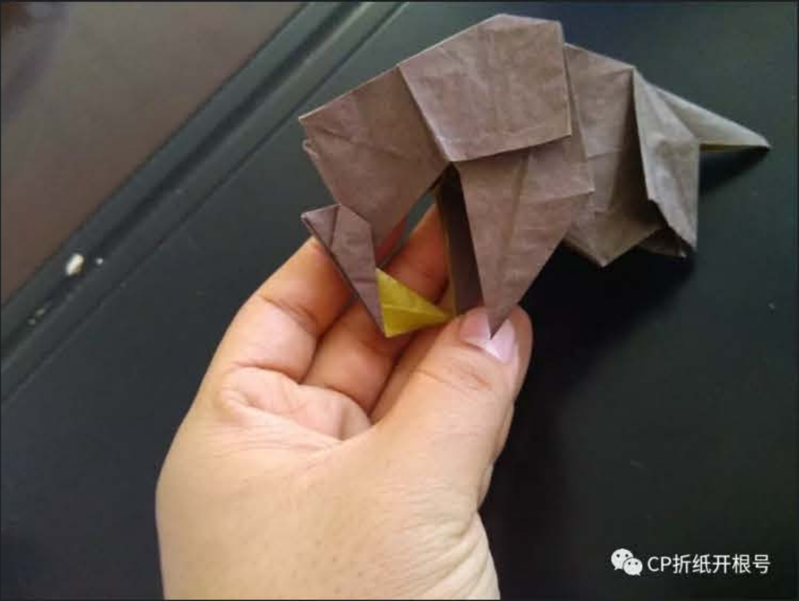


CP折纸开根号

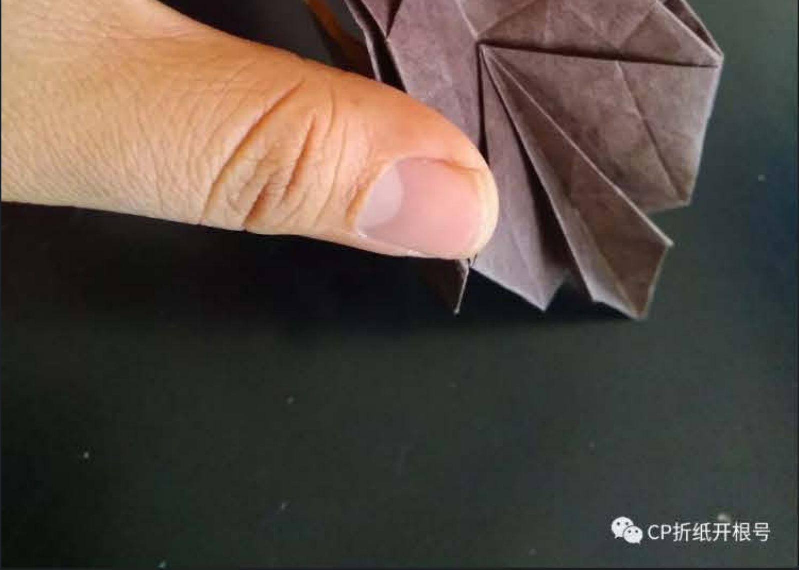


CP折纸开根号

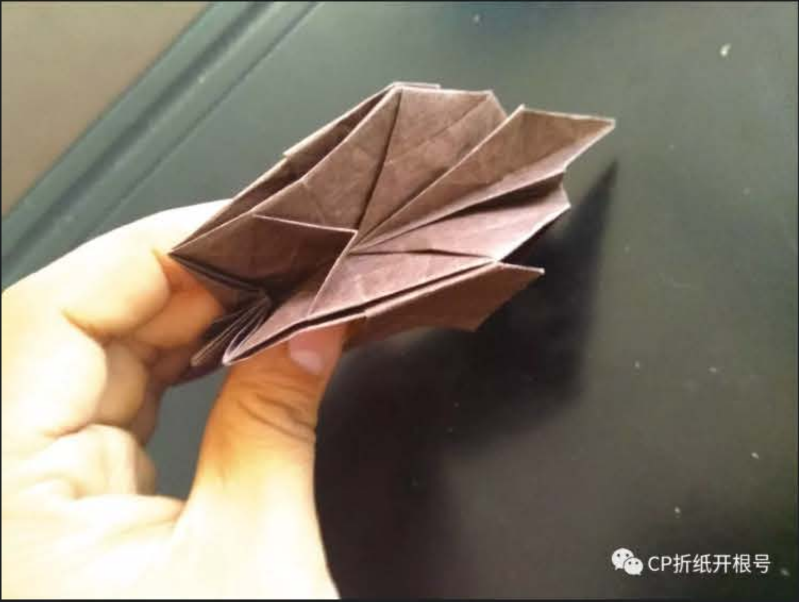




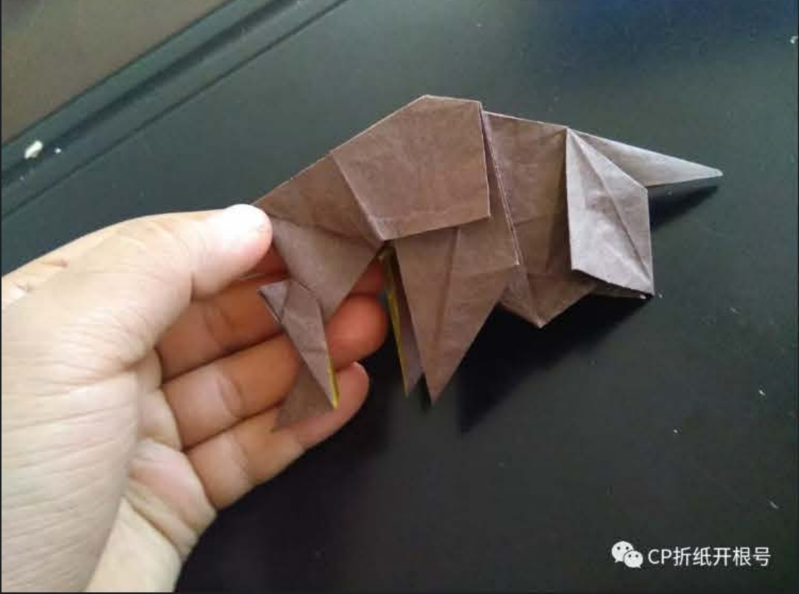
Looking at all the lines in the picture, they are now aggregated, and you can see the four legs, tail, back and stomach. The head is not very obvious, but you can simply take a few more shots.



CP折纸开根号



CP折纸开根号



CP折纸开根号

Above, first adjusted the inside of the back.

CP折纸开根号

CP折纸开根号

CP折纸开根号

CP折纸开根号

CP折纸开根号

We do n't do the specific plastic surgery here. Let 's take a look at the finished product and handle it by yourself. It 's very simple, but it 's more difficult to make the charm.
