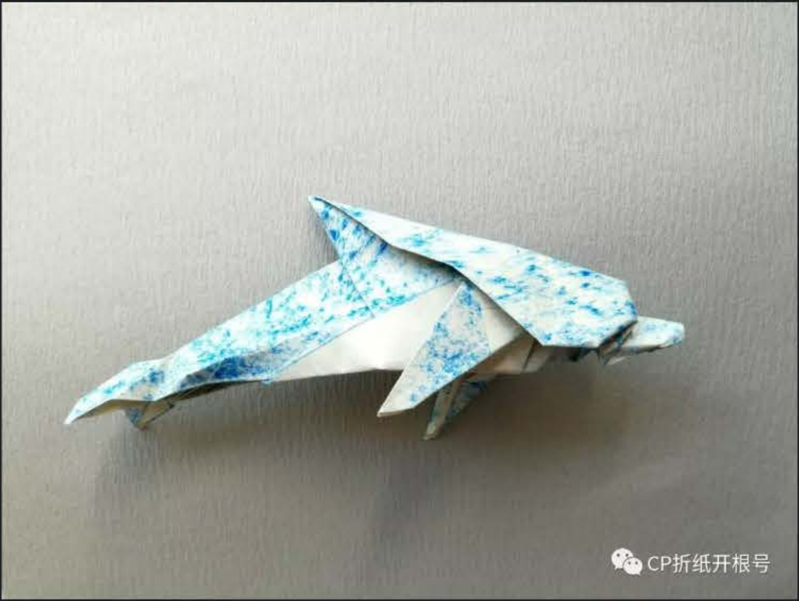
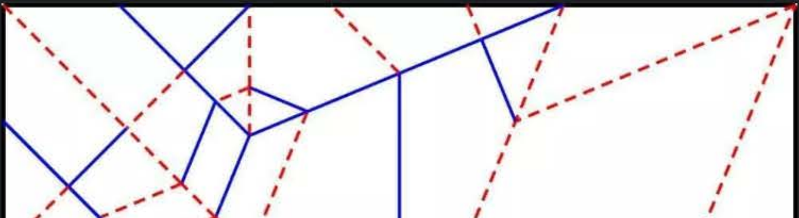
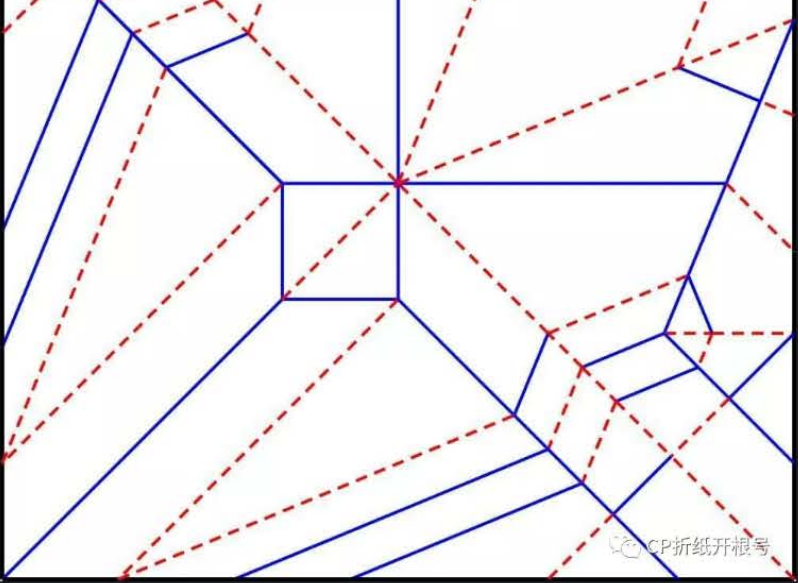
Public Issue Tenth Super Simple Little Dolphin Origami

Origami student Takayama CP origami opening number 2018-02-14

This period is for everyone. We hope that more than ten people will discount it.
I just want to say that this work is super easy!







The picture above is probably the simplest work in the process of studying CP together with CP. Then you should get a lot of information by observing it. First of all, you can take out your two-color paper, and then fold it. Or half-meter folds.

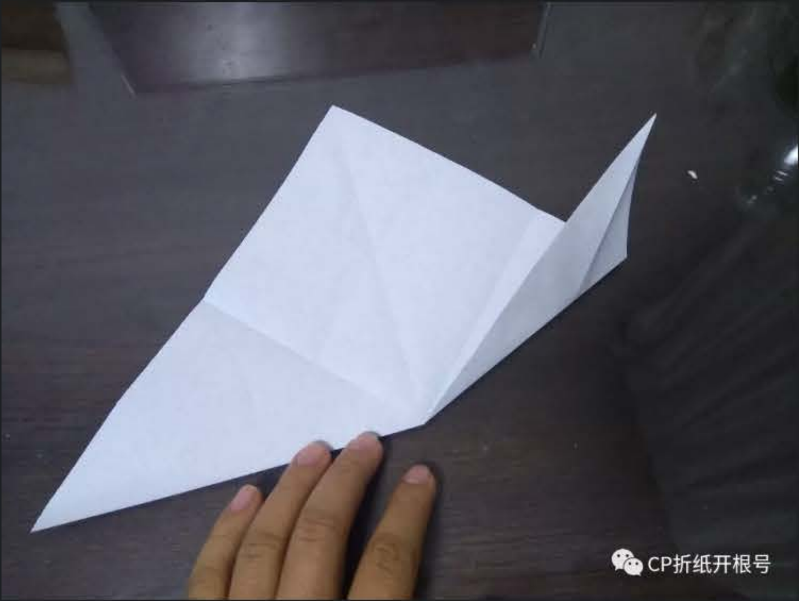
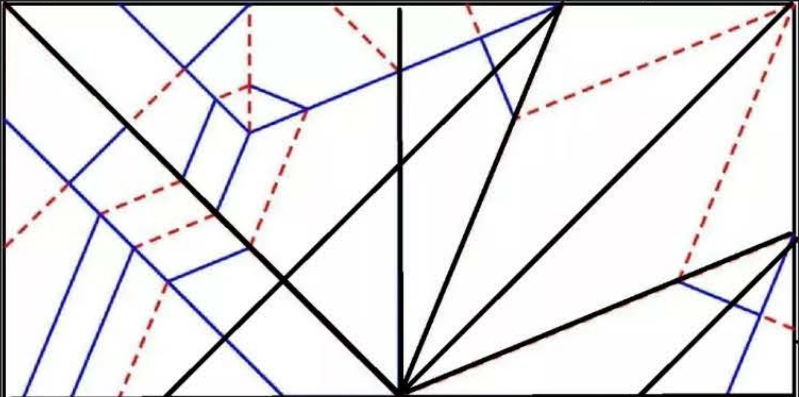
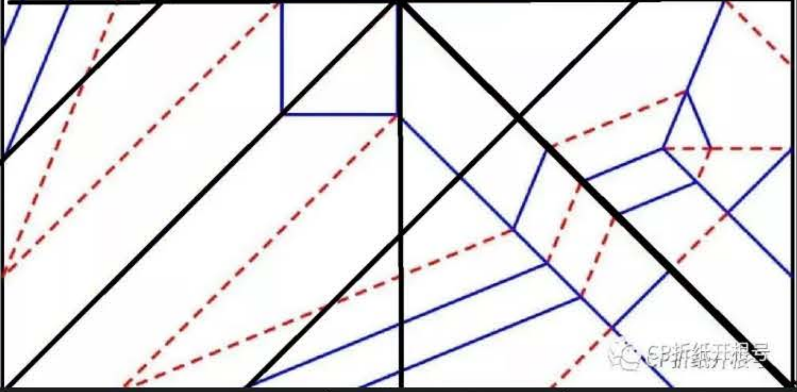
Above, we make two corner breaks for the square in the upper right corner.



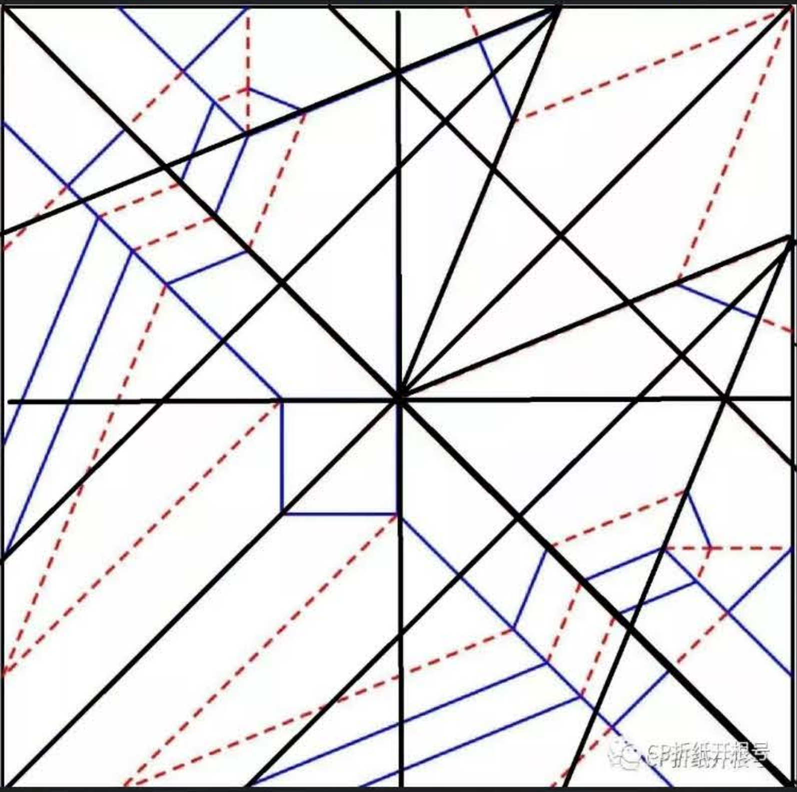
CP折纸开根号

Next, fold the corners in half and bisect the corners as shown in the figure below.

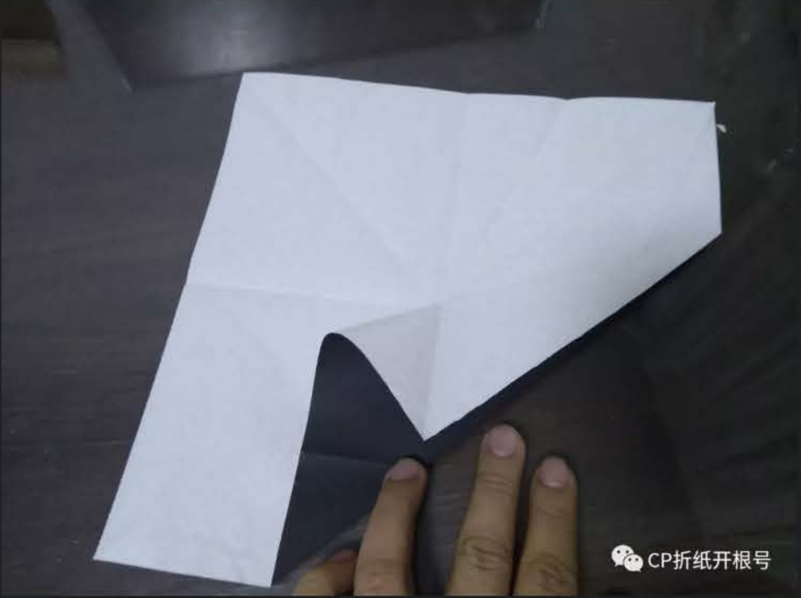




CP折纸开根号



CP折纸开根号



CP折纸开根号

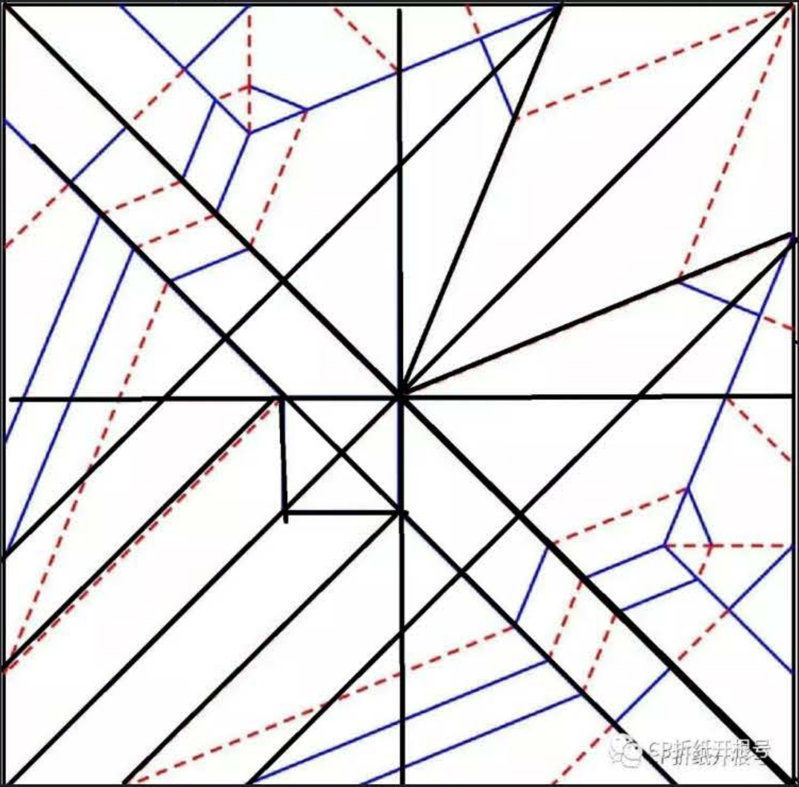
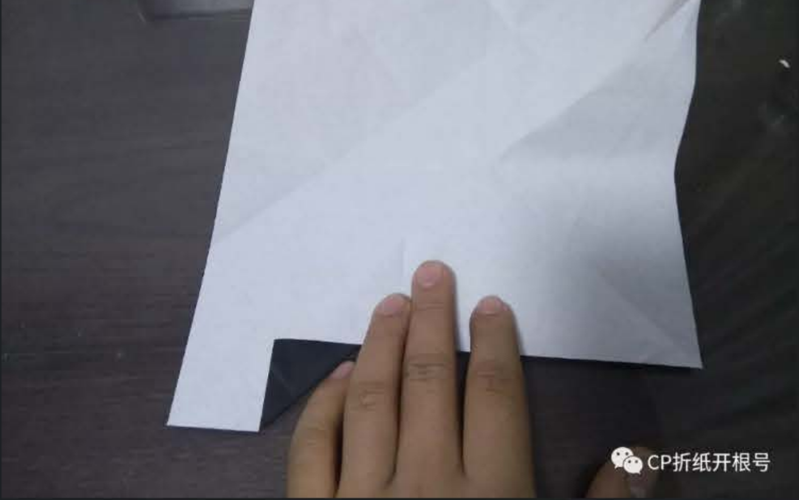
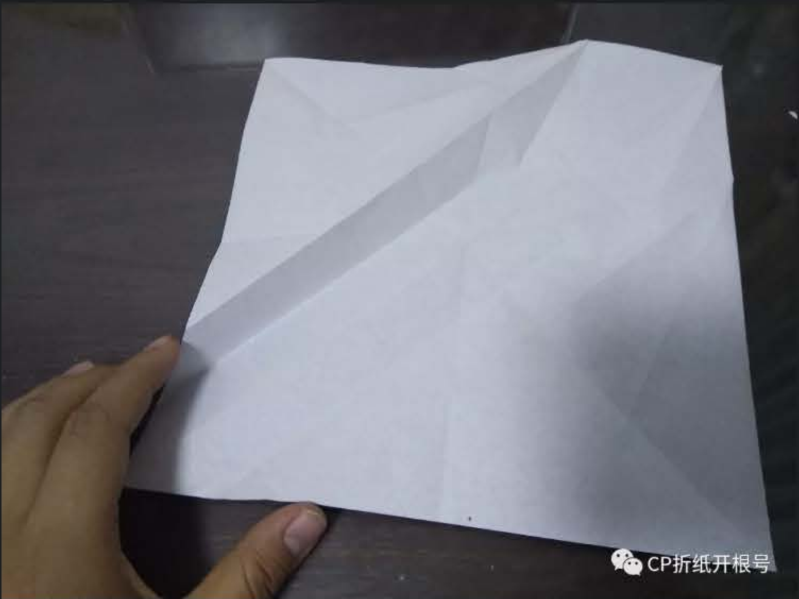
Next, as shown in the figure below, fold out the small square in the lower left middle part to make a long diagonal line.



SP折纸开根号

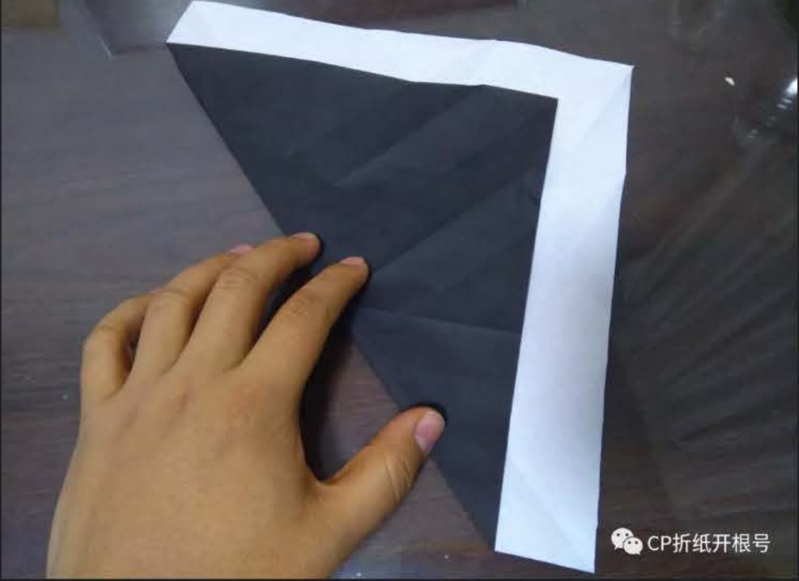


CP折纸开根号

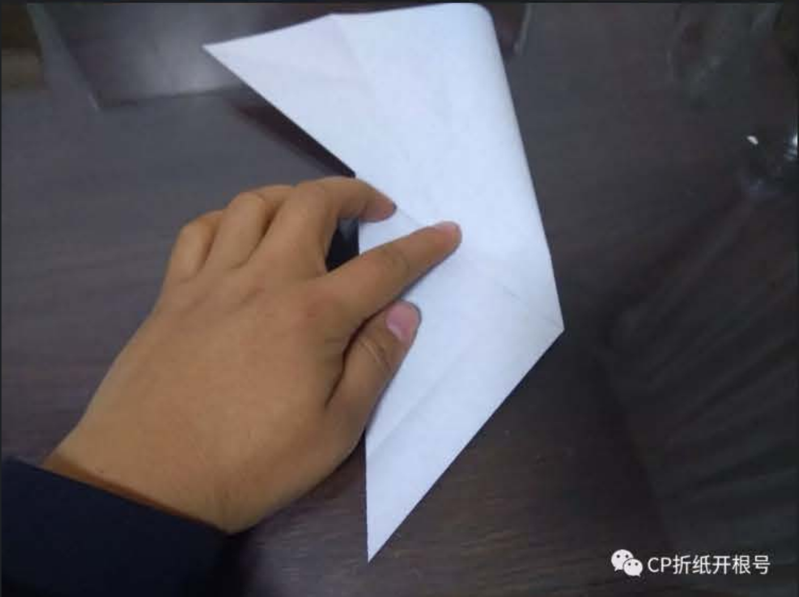


CP折纸开根号

In the above two pictures, the two diagonal lines in the lower left square are first determined to determine the point of the small square.



CP折纸开根号



CP折纸开根号

Above, the small square edge is finally determined.

Next, as shown in the figure below, we need to locate the new line in the figure below (the diagonal long line above the diagonal line) based on the long line just folded.

Let 's take a look at the picture below, because there are no more lines left to play, but the following picture draws a curve that is more difficult for men to play. How to make it?

CP折纸开根号

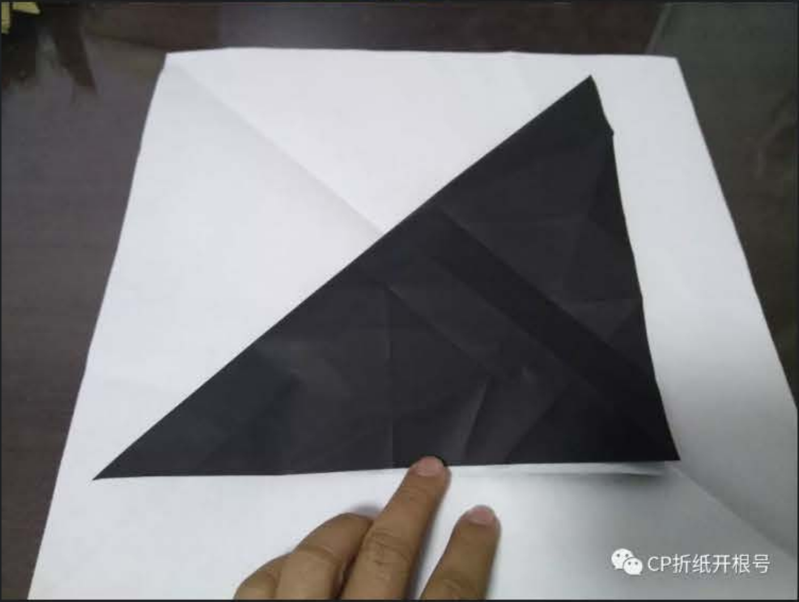
Even if you have completed the wiring here, in fact, this is really a work of conscience. If you already have a good understanding of CP, then this work may not need to be wired. Really, one does not need to.

Well, I won't mark how to aggregate here, let's look at the actual shots directly.

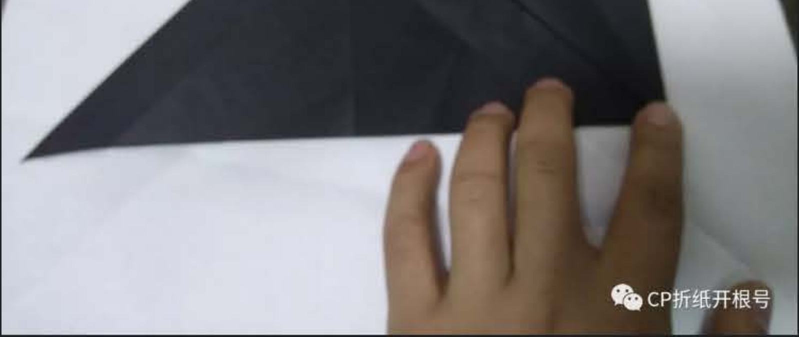
Turn over the white paper just to see it clearly, because the whole work is black! Then fold diagonally.

CP折纸开根号

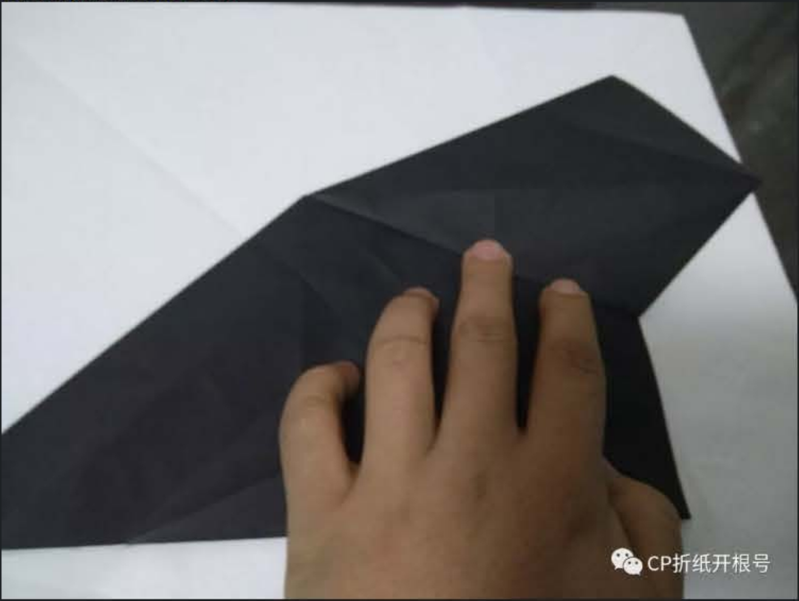


CP折纸开根号

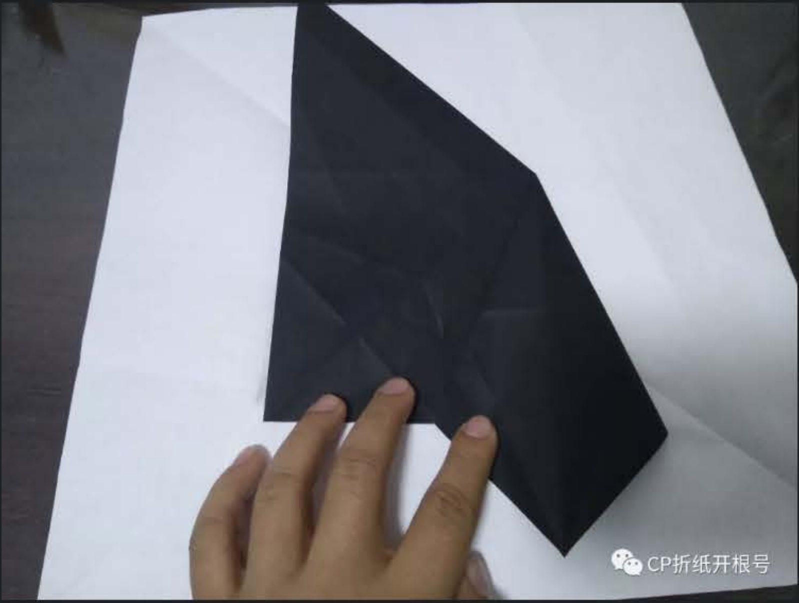
The upper corner is folded down in half, as shown below.



Open up, as shown below

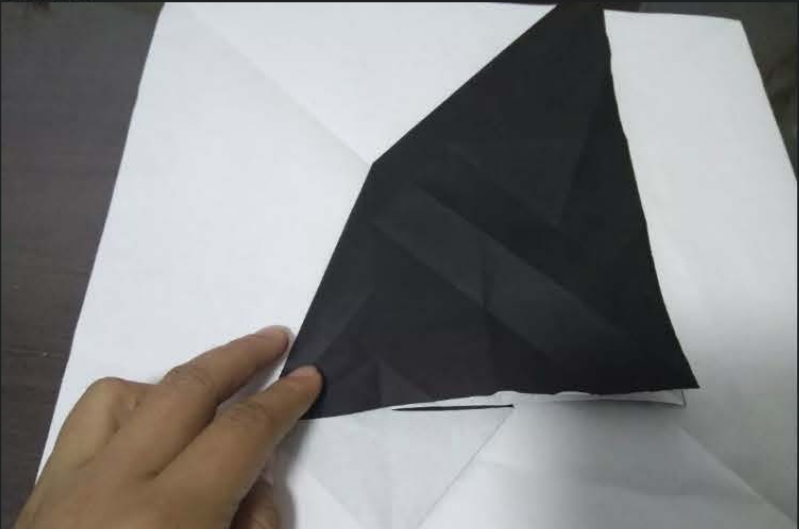


90 degree rotation

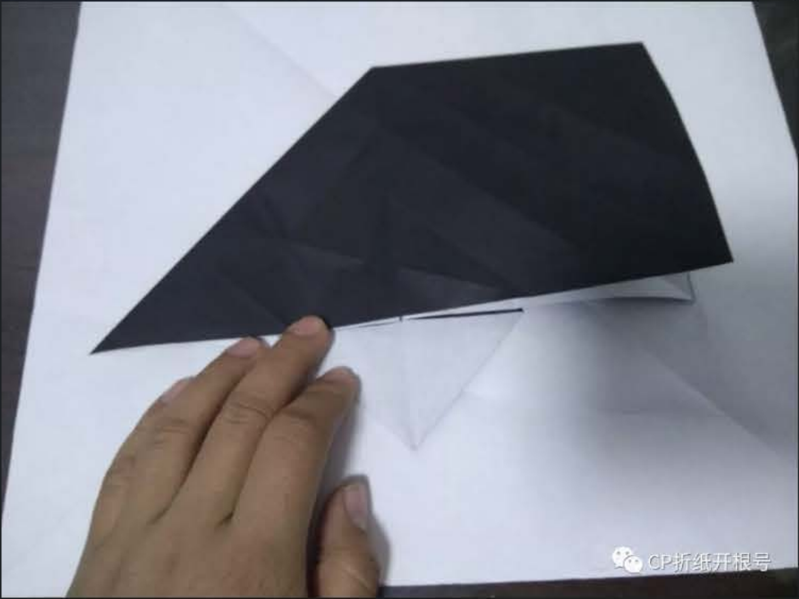


CP折纸开根号

Turn over.



CP折纸开根号



CP折纸开根号

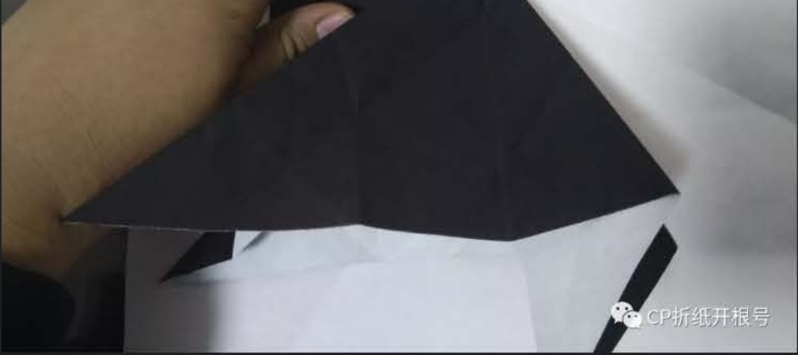
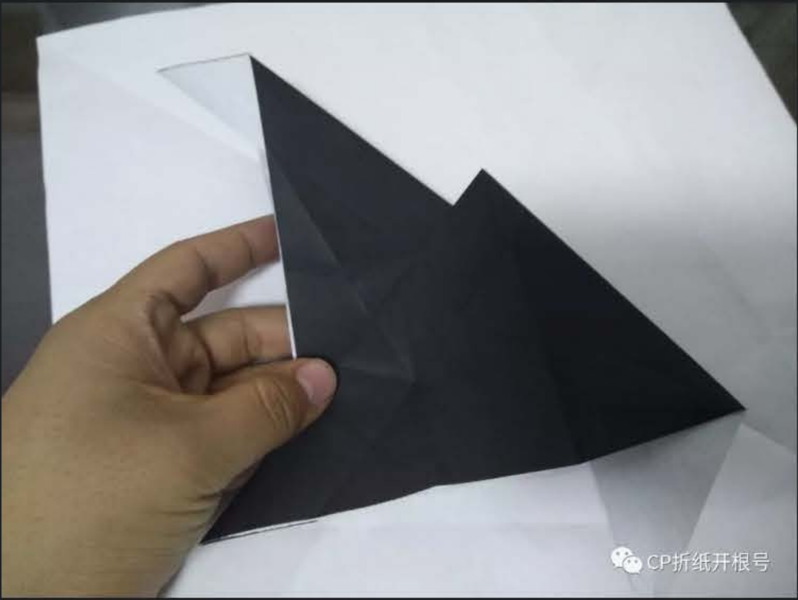
In the above three pictures, we change the angle and pull the part that has just been pulled up to the top and then do the setback.

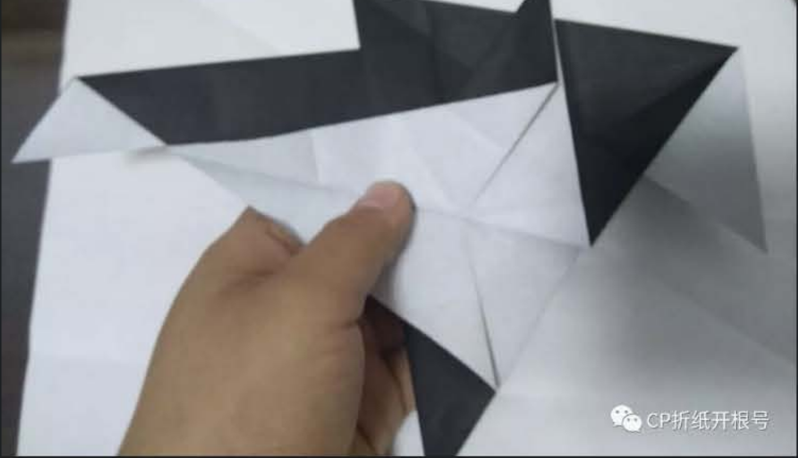


CP折纸开根号



CP折纸开根号

Fold up in half below.



CP折纸开根号

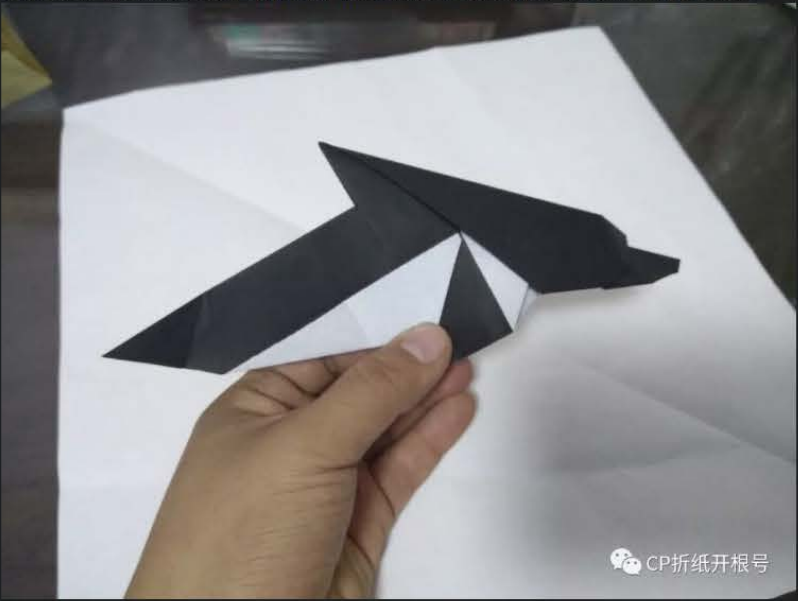
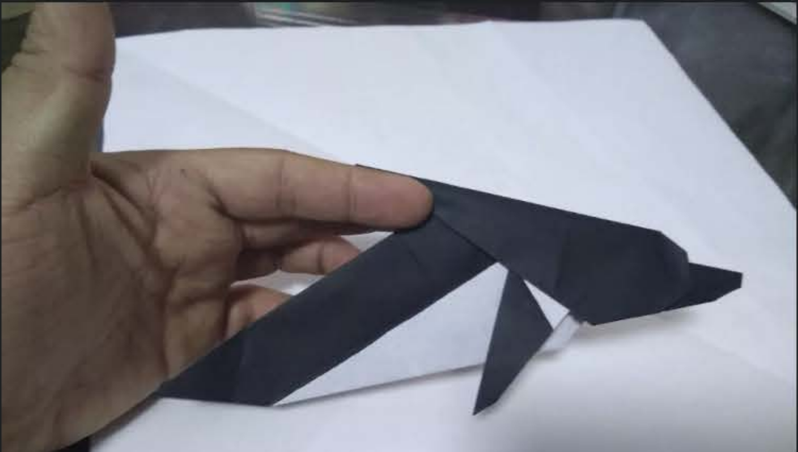
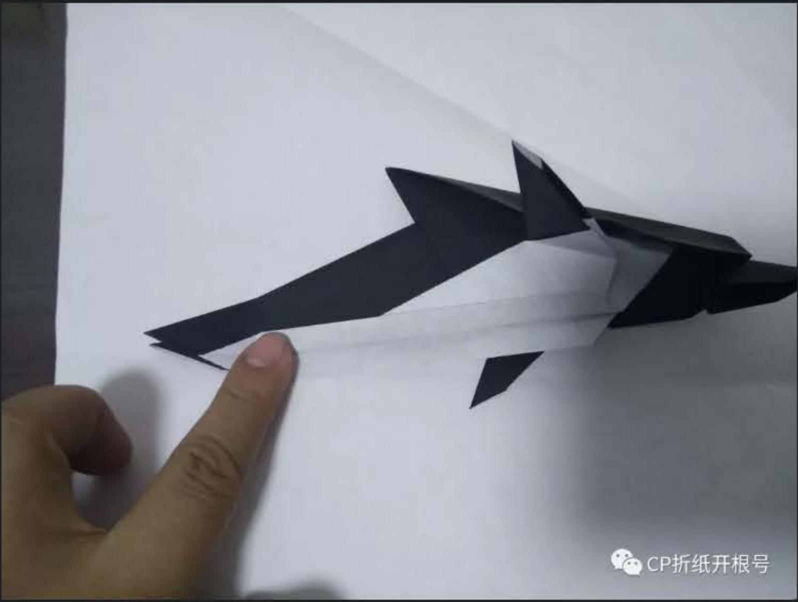
The above pictures are for adjusting the lower tail. Here you can fold more freely.



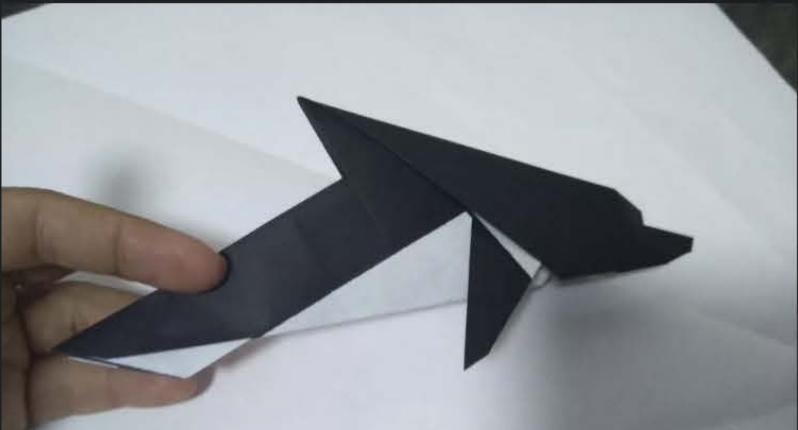
CP折纸开根号



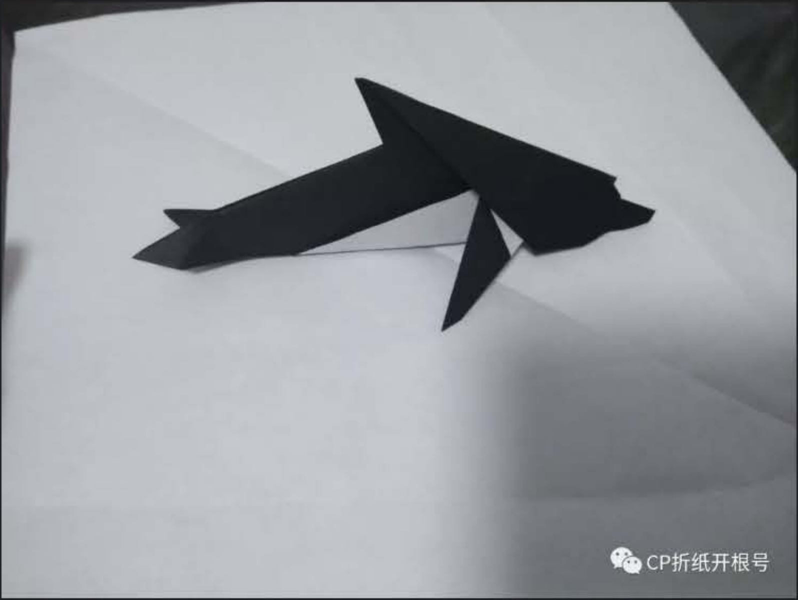
CP折纸开根号



CP折纸开根号



CP折纸开根号



CP折纸开根号

Finally adjust the position of the lower fin, of course, the size and angle are relatively free.

The New Year is coming, I wish you all a new year and a good luck!
