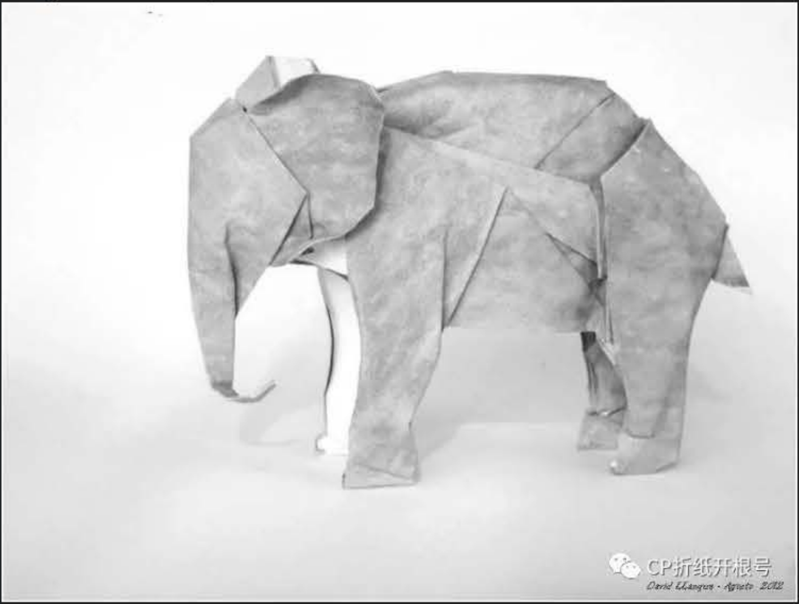
Origami Interactive Series No.02 CP CP Origami of the 21st Issue Elephant

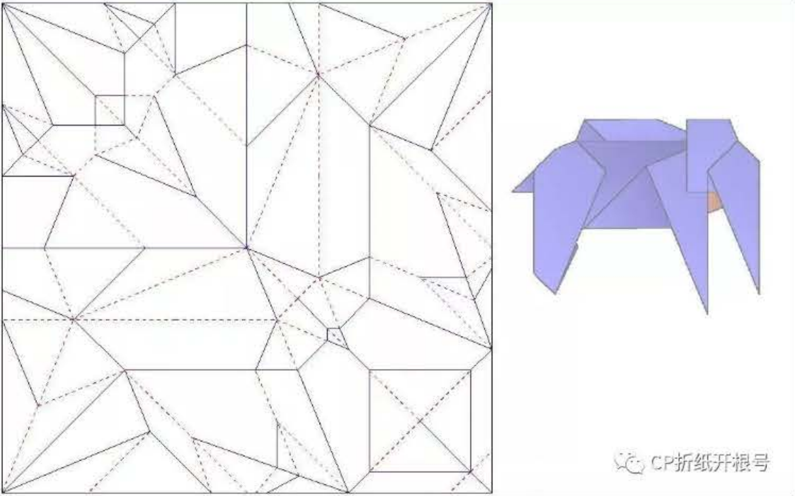
Origami student Takayama **CP origami opening** number2018-03-19

He Xi gave me a total of three CPs. This is the second one. In the next issue, we will make a hippo CP.

In this issue of elephants, you can use monochromatic or bi-color paper. In the final effect, you can use it. My suggestion here is to use a square of 45 grams or more, which can be 15-35 cm in size. .

Let's get to know this picture!





CP折纸开根号

The construction of the whole picture is very clear, and there is no particular difficulty in using the 22.5 degree line. So what are we waiting for? ?

The pictures of the last part of the wireline were basically not sent, and some people said that they could still send some, so this issue is still a little less.
Find a square with a folding rice.

After that, we click on the picture below. The black line is the line we want to hit, and the green line is the line we hit.

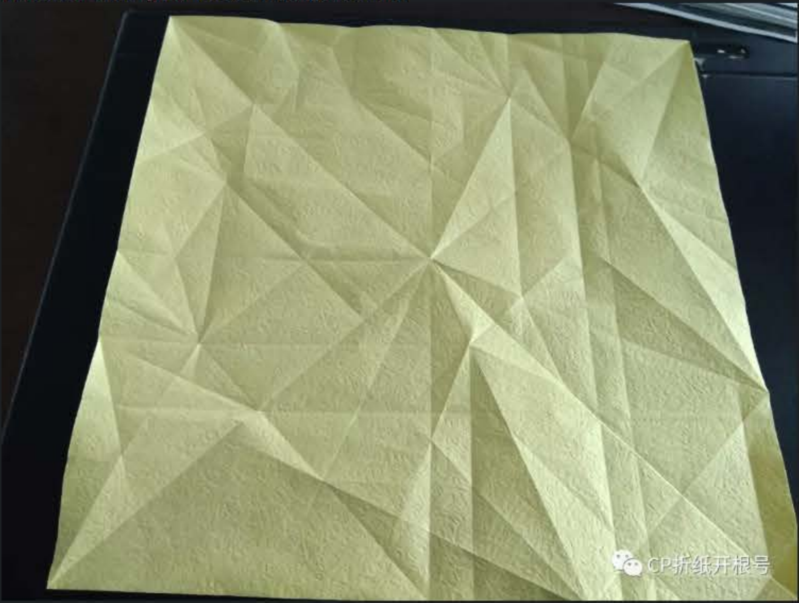
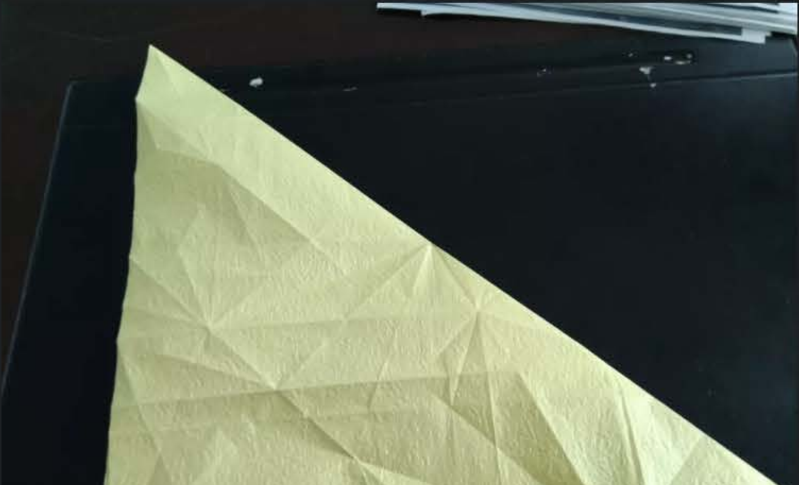
Here we hit almost all lines.

We still use a similar folding sequence as last time, because everyone was very good last time, so we will do it again.

Flattened and lightly pressed. Diagonal fold.

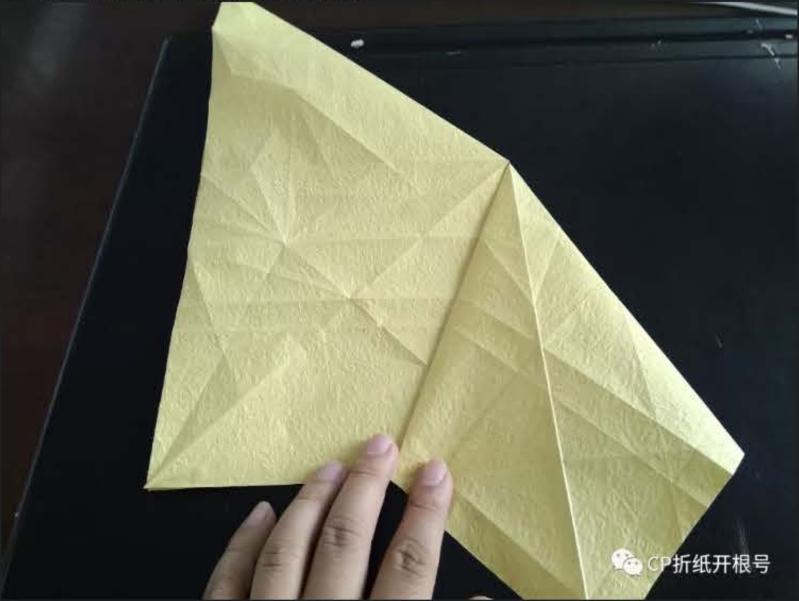


CP折纸开根号



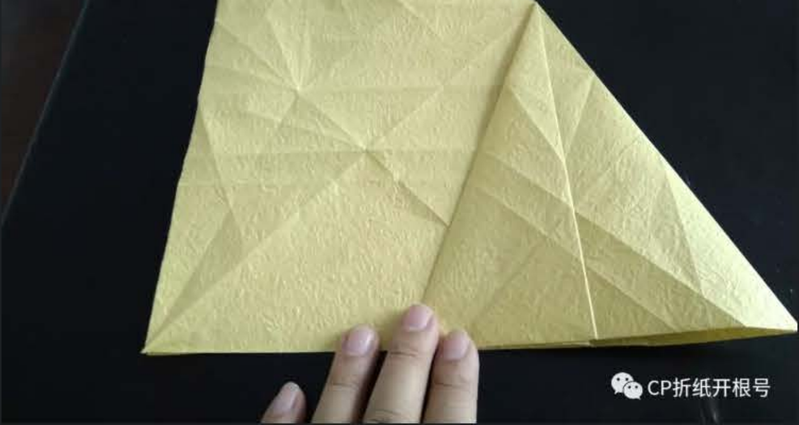
CP折纸开根号

Start at a 22.5 degree and flatten gently.

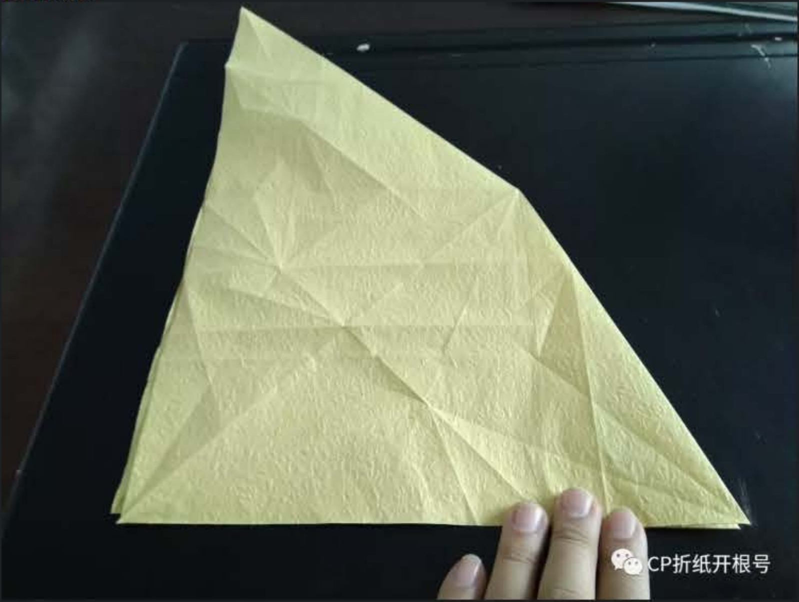


CP折纸开根号

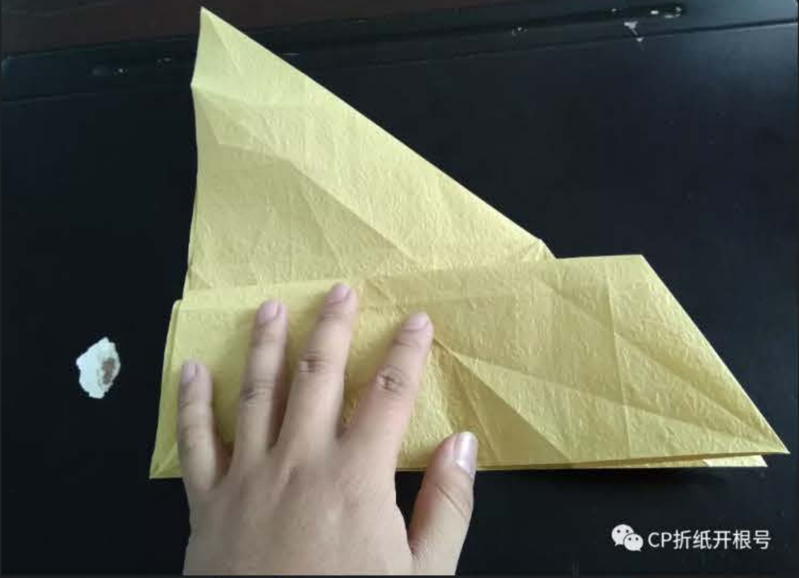
Fold in the lower corner peak.



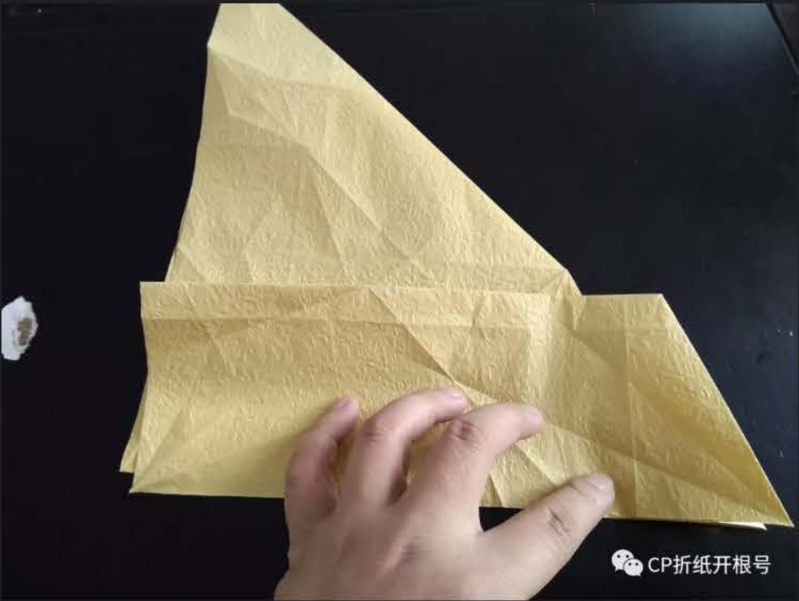
Fold right.



There is a break here on the CP, let's do it, and then sink directly into it

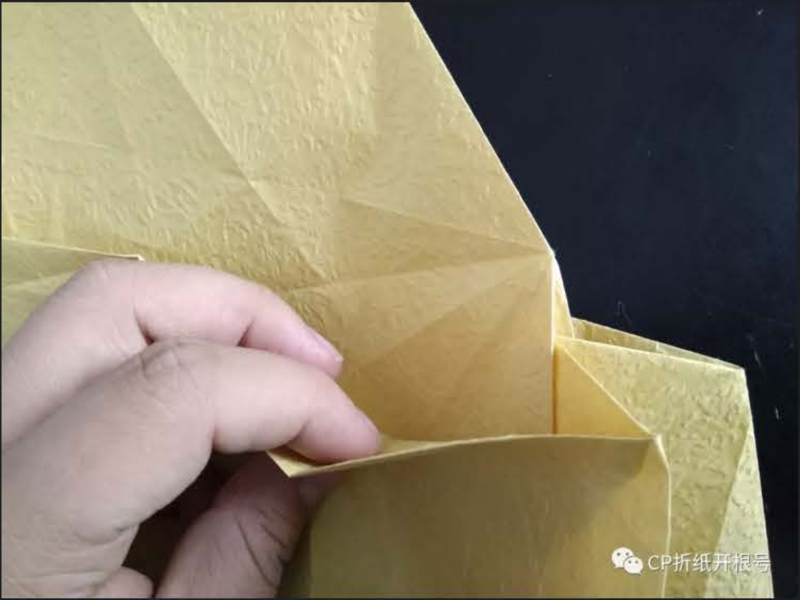


CP折纸开根号



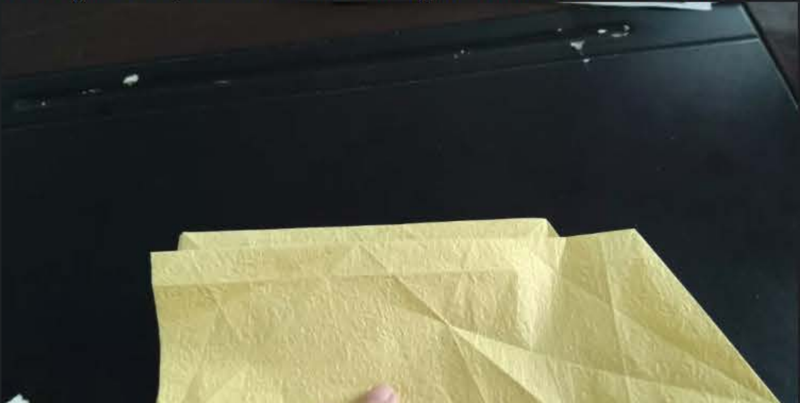
CP折纸开根号

The following figure is the top perspective. Let me show you the number of layers inside.



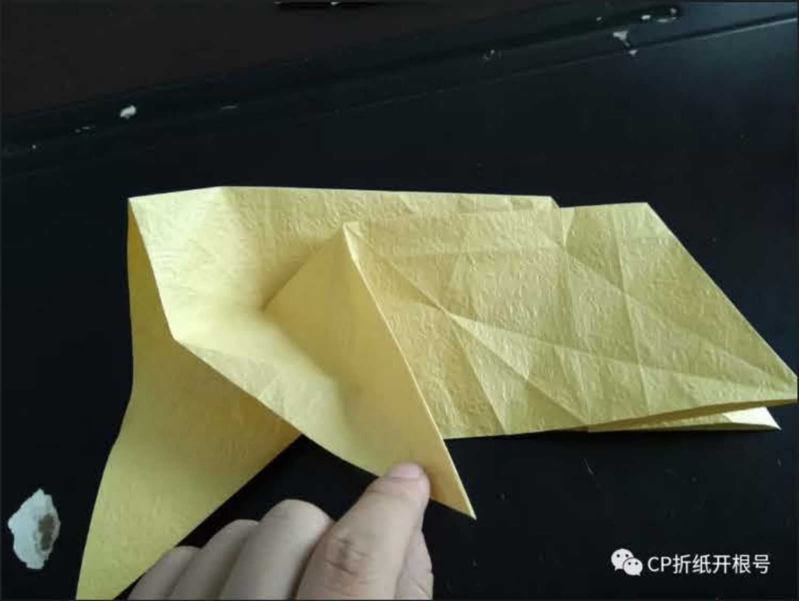
CP折纸开根号

In the figure below, the entire corner of the upper corner is folded into the inside.

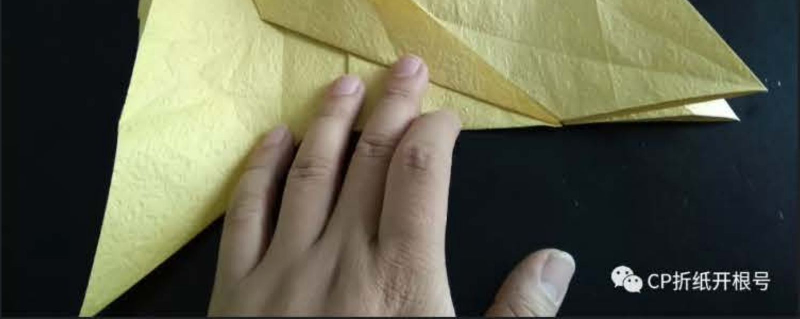


CP折纸开根号

Below, pull a corner slightly.

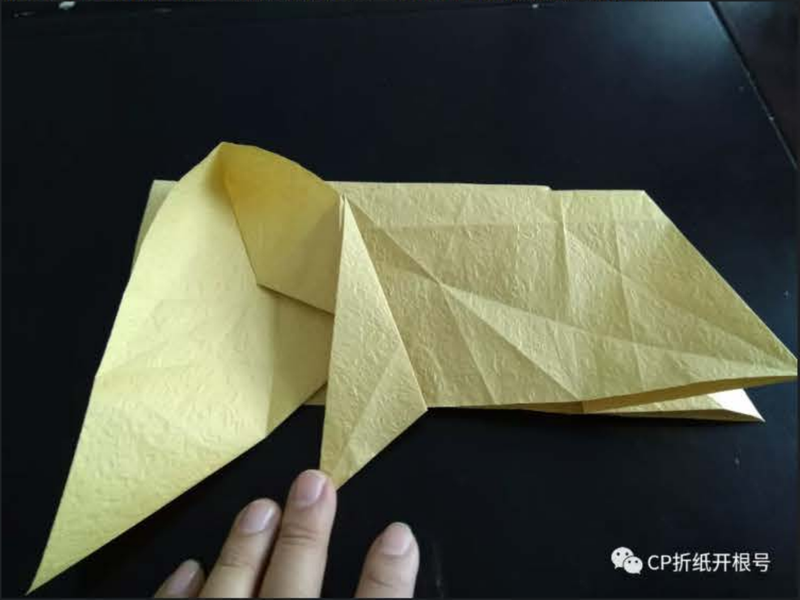


CP折纸开根号

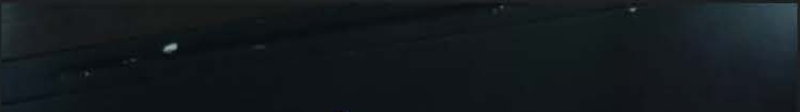


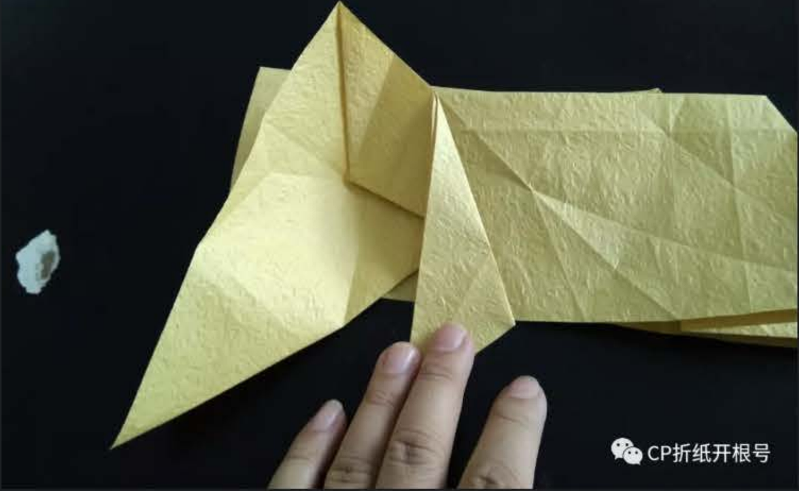
CP折纸开根号

Above, the corner line is folded. This line should be played by everyone.



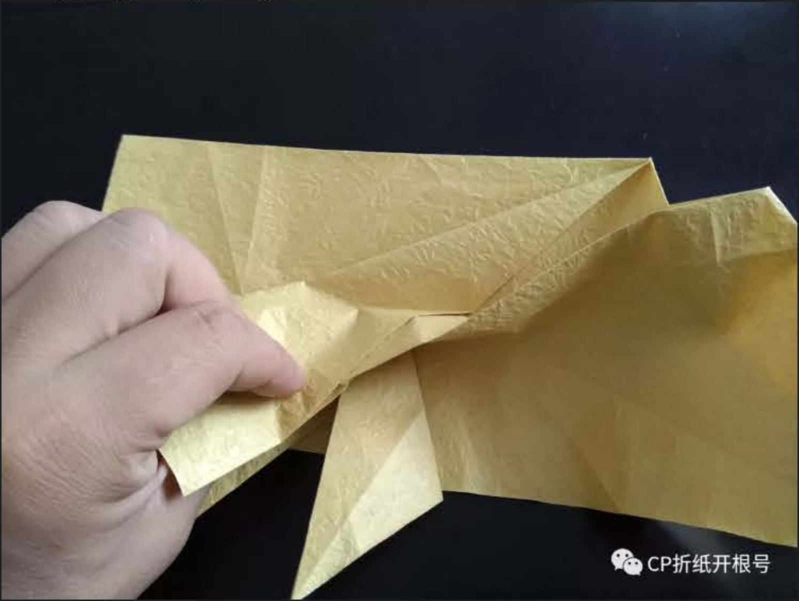
CP折纸开根号





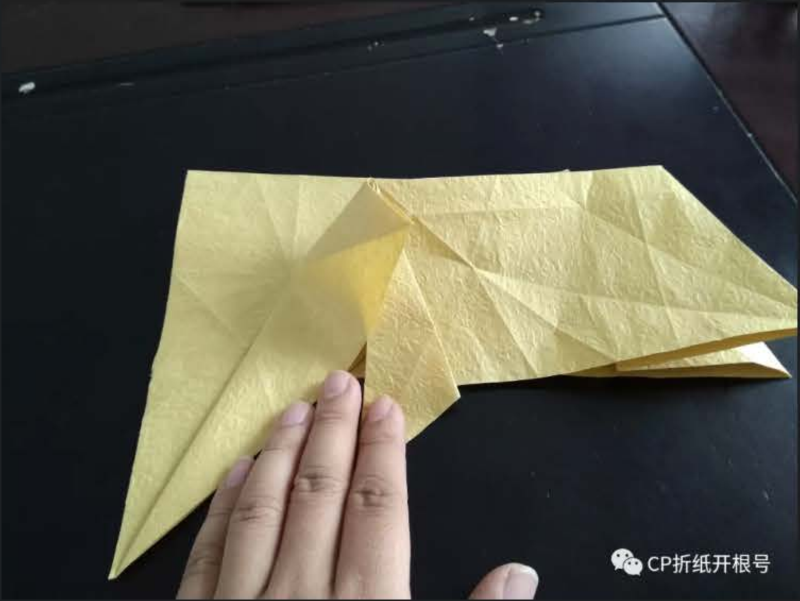
CP折纸开根号

Above, the upper angle is adjusted to make the lines vertical.



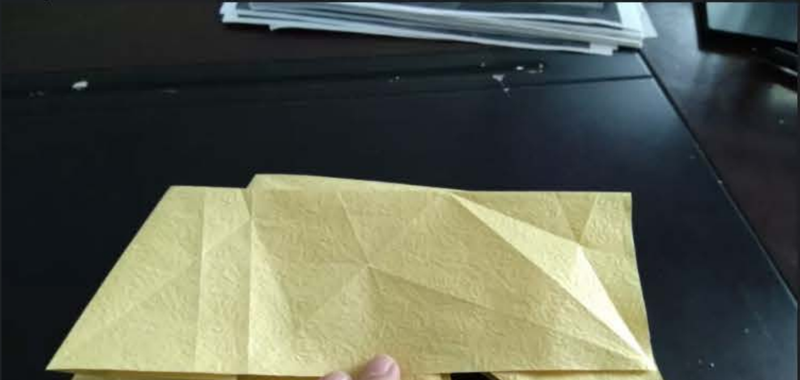
CP折纸开根号

Above, the whole is pulled down, and the inside is folded down at 22.5 degrees. Then fold it back.

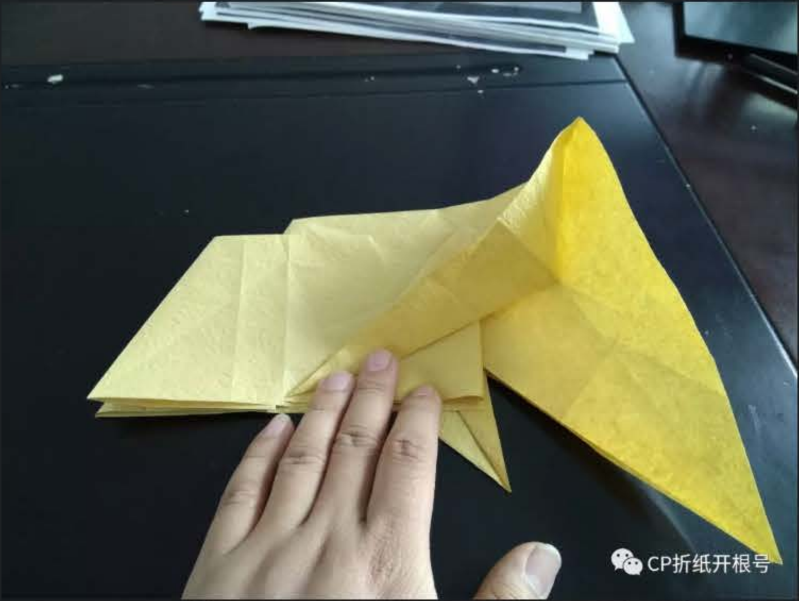


CP折纸开根号

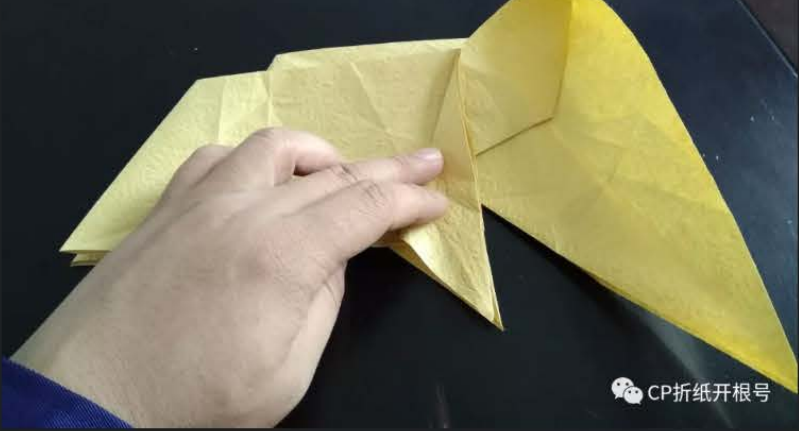
In the figure above, fold the left corner line, press gently, you don't have to flatten it. Complete the other side



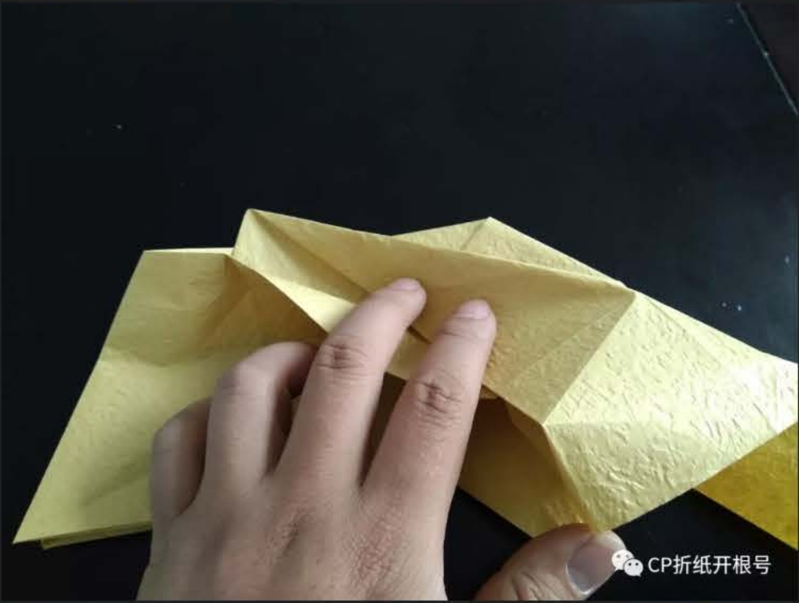
CP折纸开根号



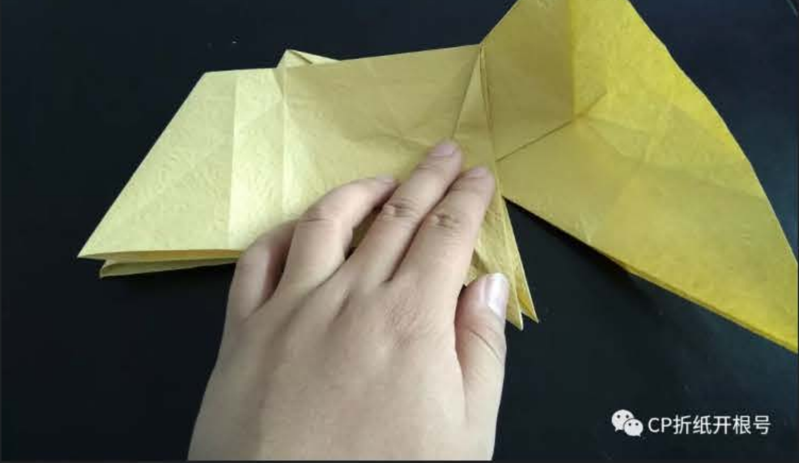
CP折纸开根号



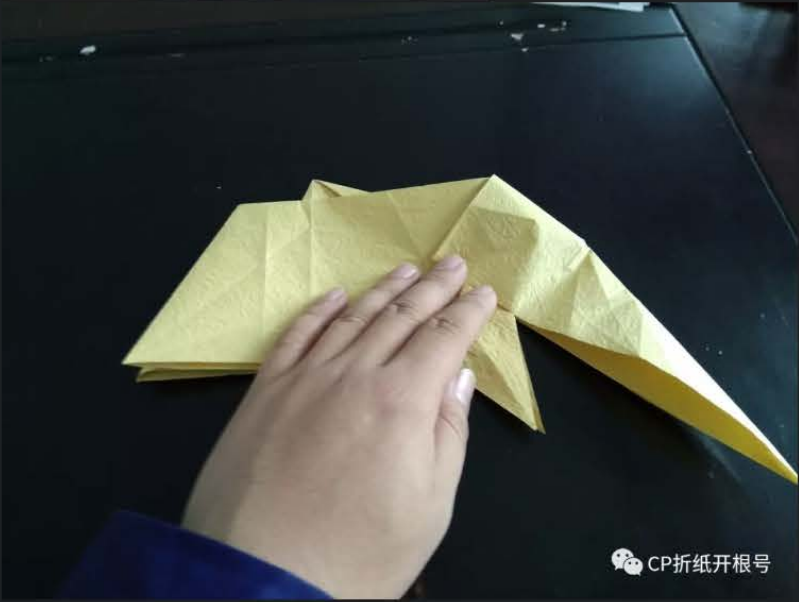
CP折纸开根号



CP折纸开根号

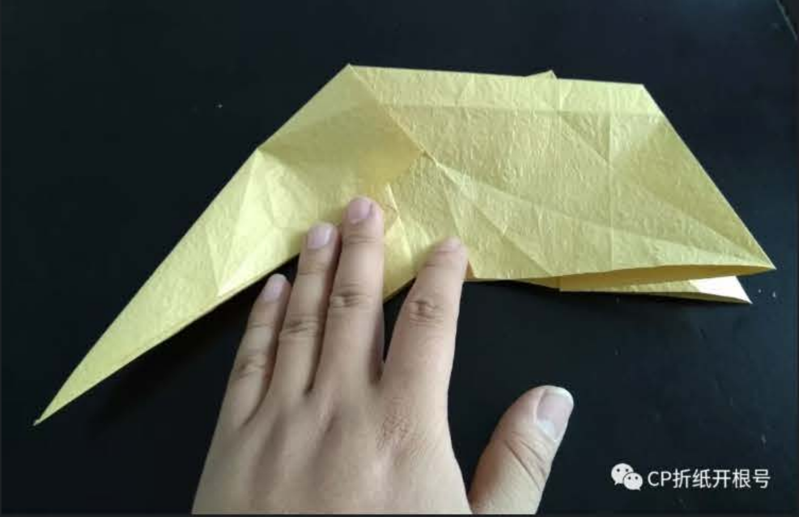


CP折纸开根号

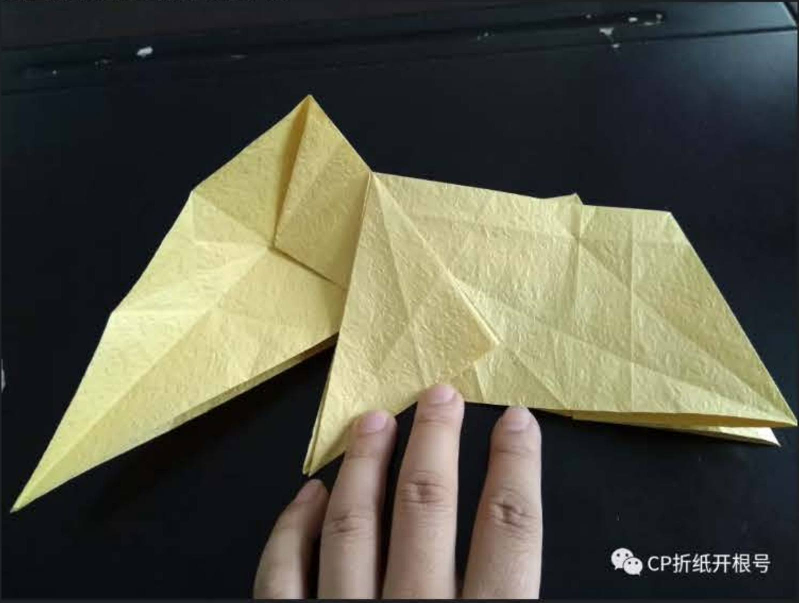


CP折纸开根号

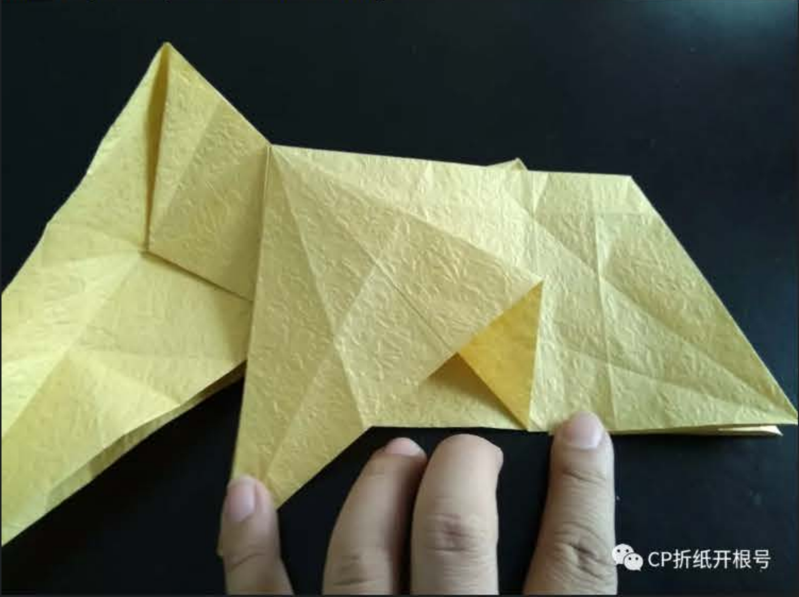
Back to the original view.



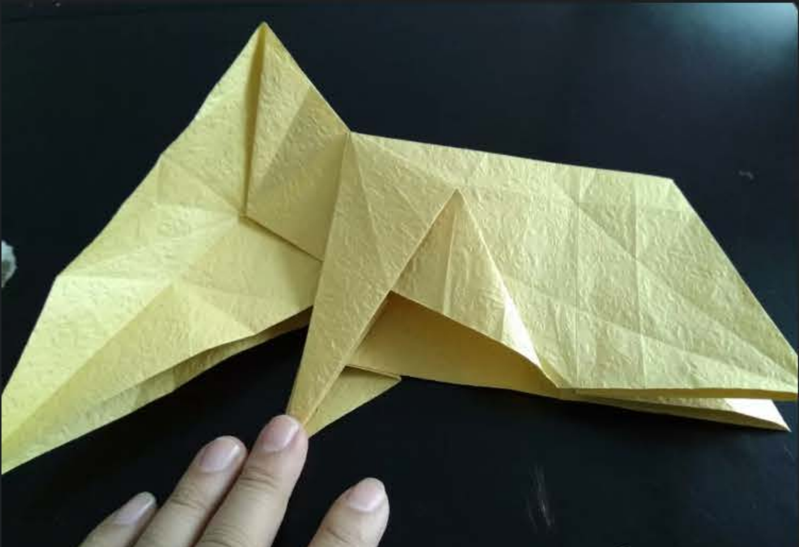
Pull up on both sides of the ear



Below, adjust the position of the front legs.

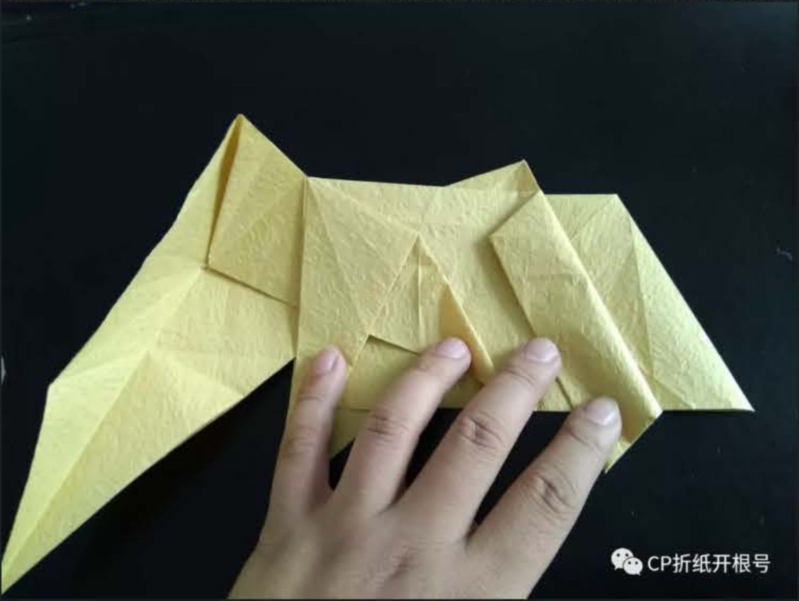


CP折纸开根号

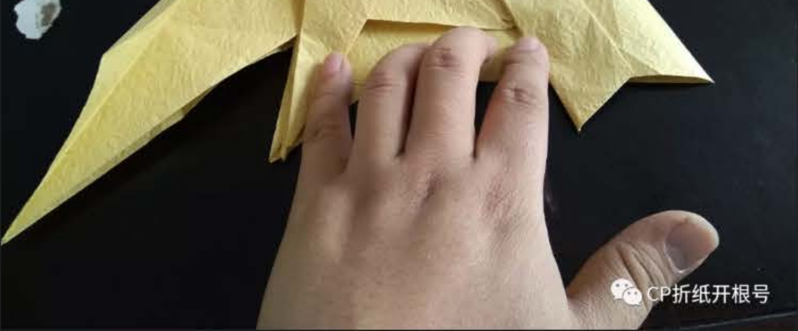


CP折纸开根号

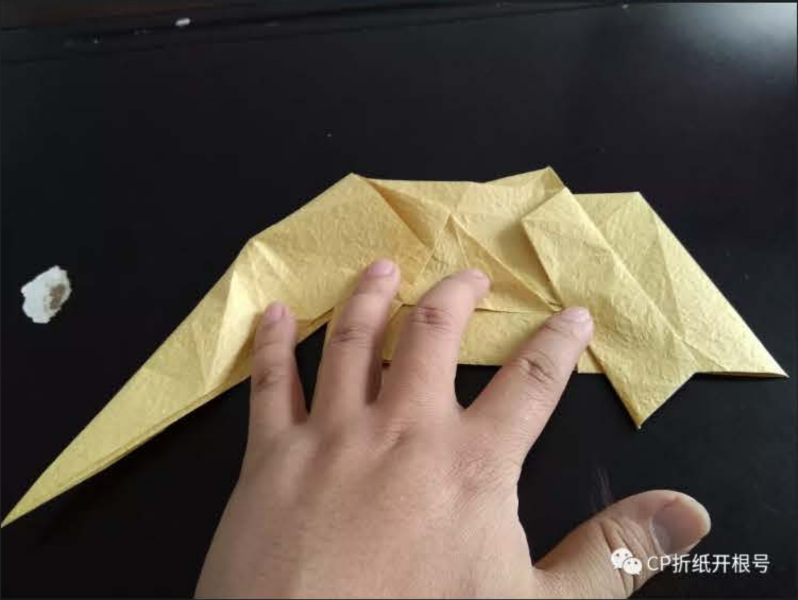
Adjust the position of the hind legs, the direction of the front legs, and adjust the belly



CP折纸开根号

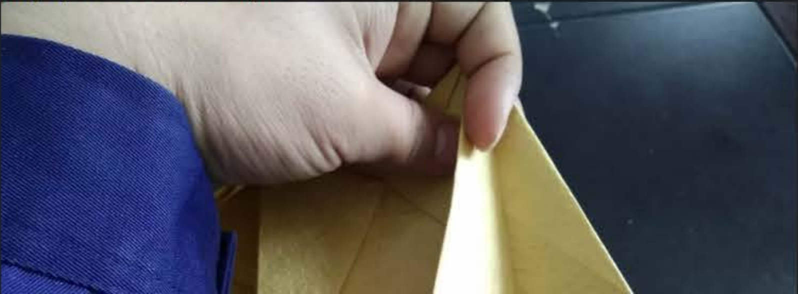


CP折纸开根号



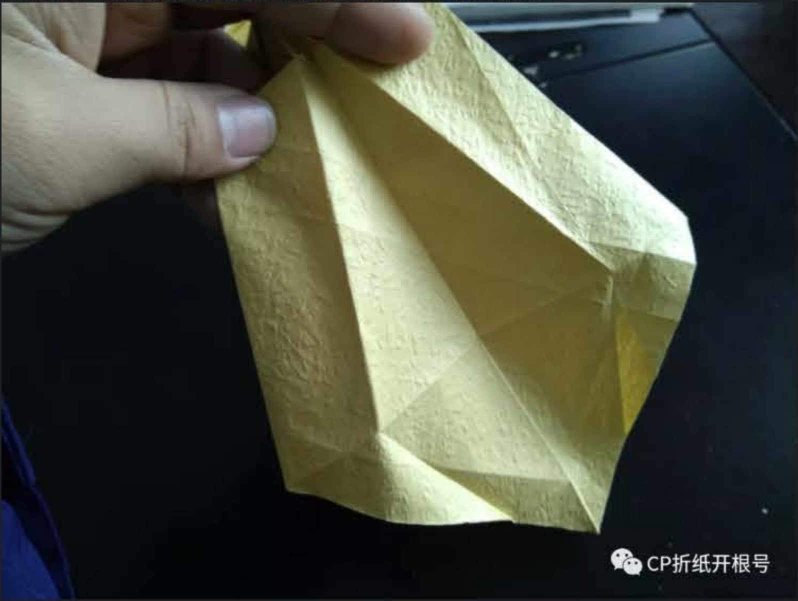
CP折纸开根号

Prop up the back, open, adjust

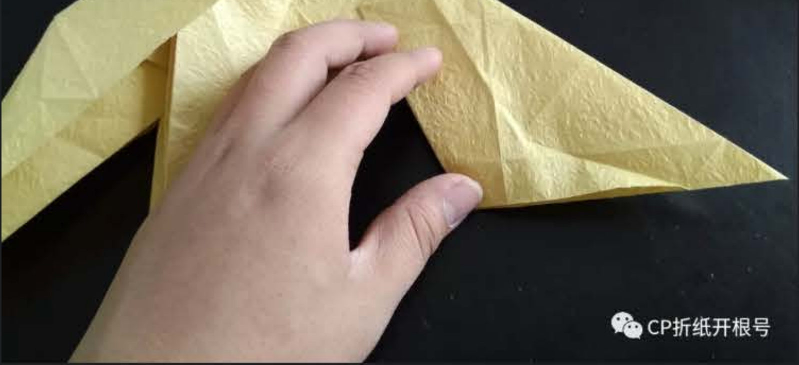


CP折纸开根号

Pull away the corner where the original peak was folded in.

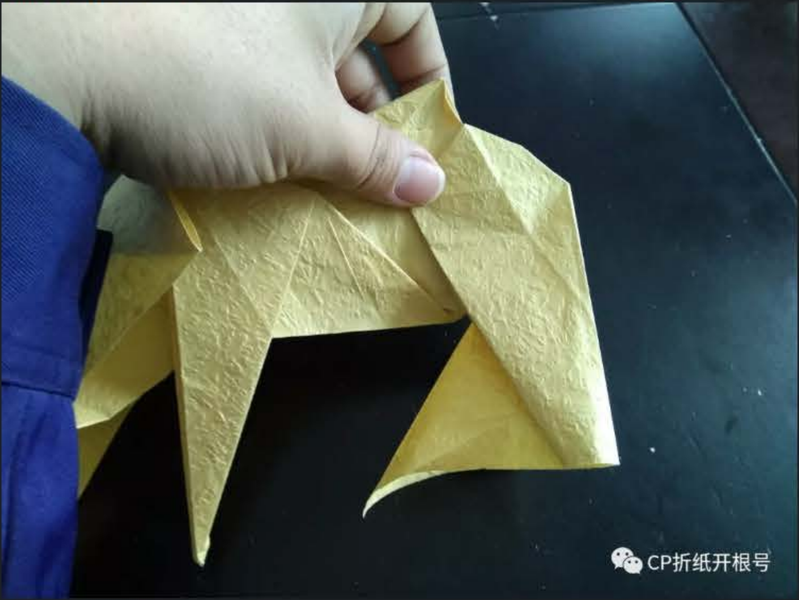


CP折纸开根号



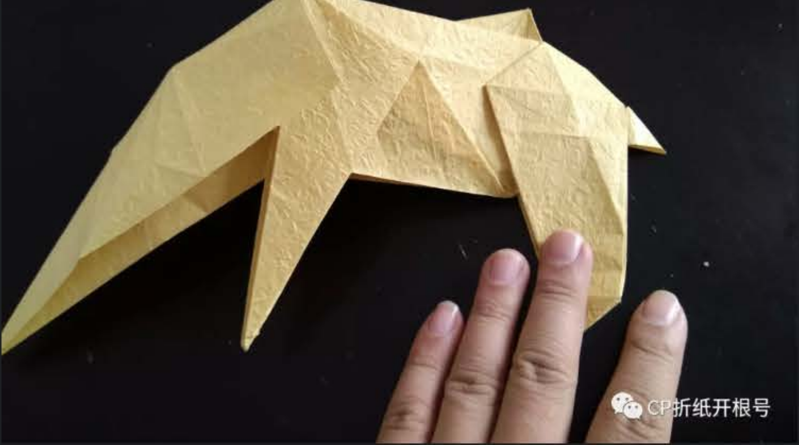
CP折纸开根号

Fold left to the inside



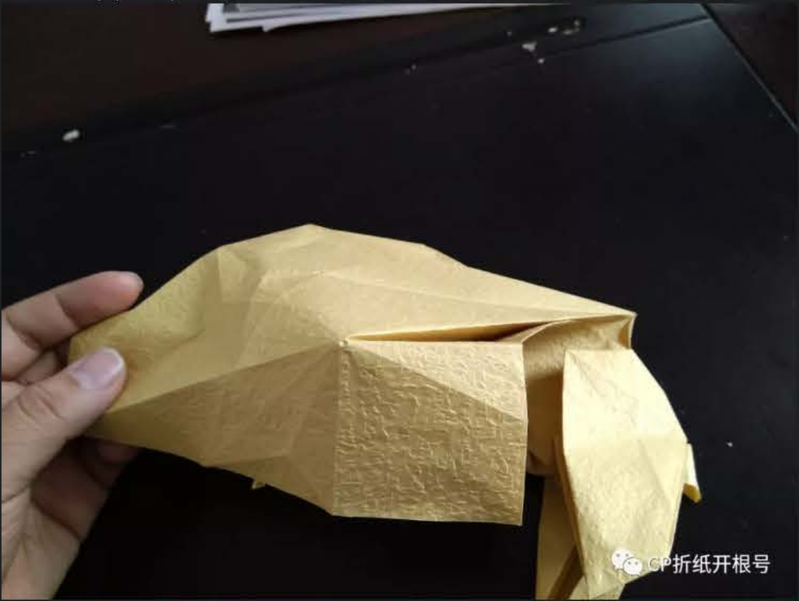
CP折纸开根号

Fold out the tail by the CP line

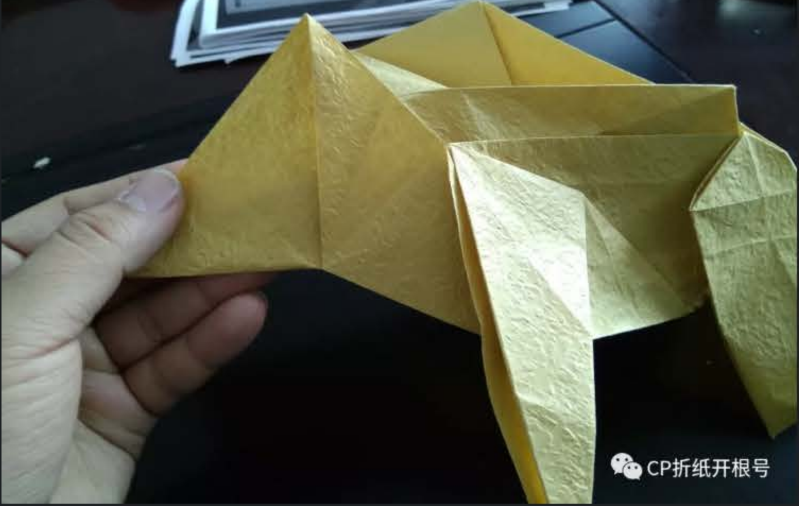


CP折纸开根号

Pull the top part up

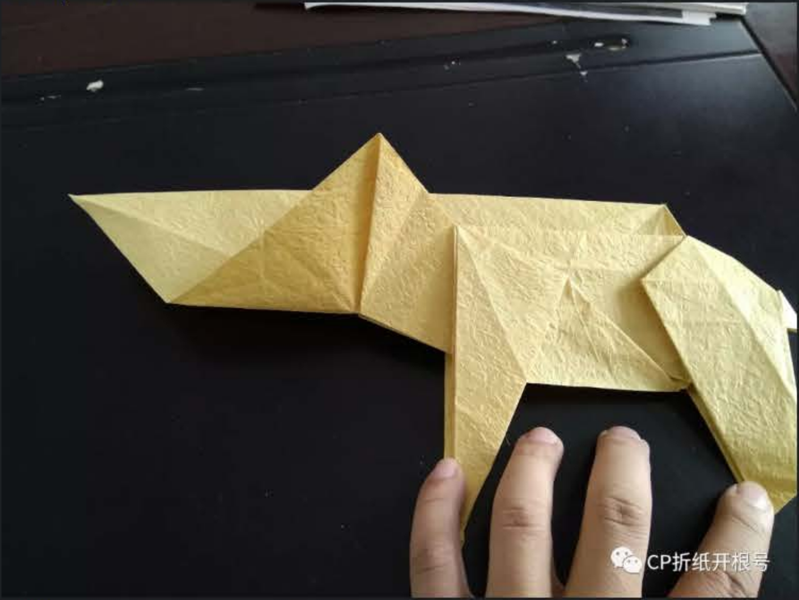


CP折纸开根号



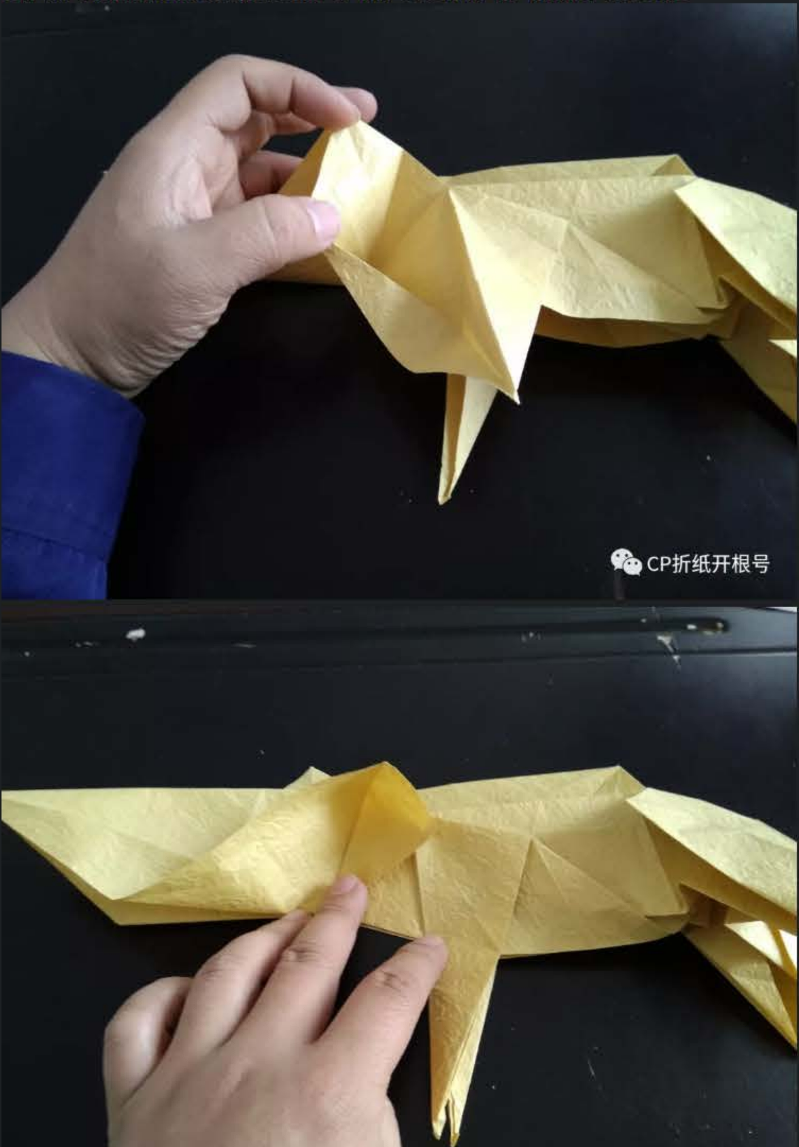
CP折纸开根号

In the figure below, press gently to prepare to start the whole head with the inner line as the peak line.



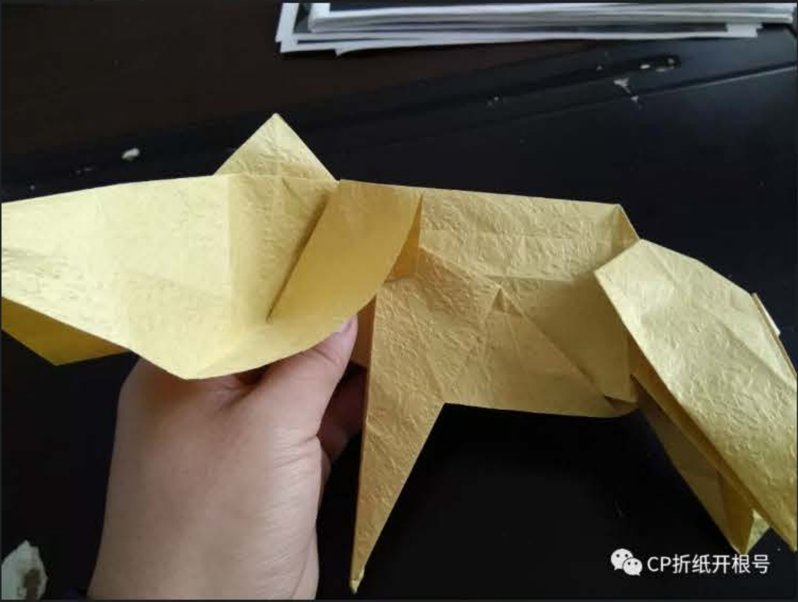
CP折纸开根号

Pull the corner down and press the CP line to handle the internal structure

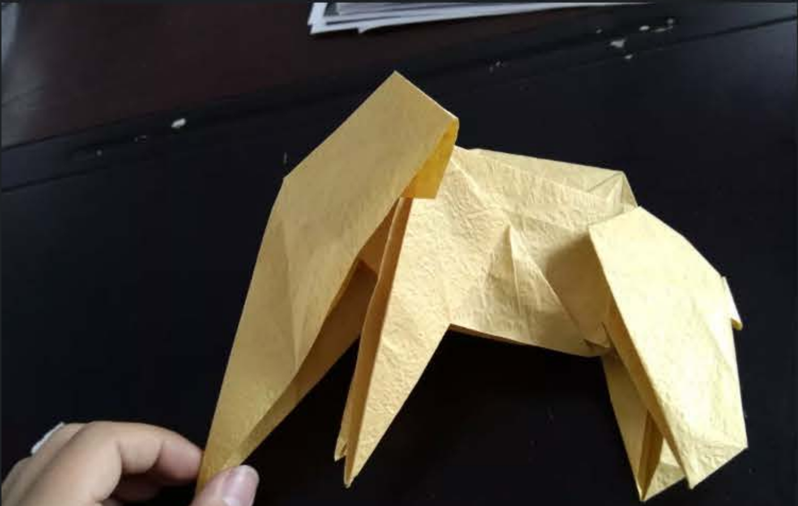


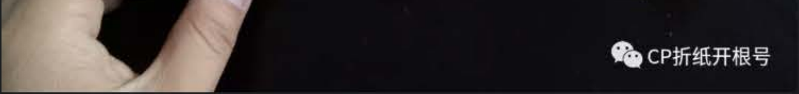
CP折纸开根号

CP折纸开根号



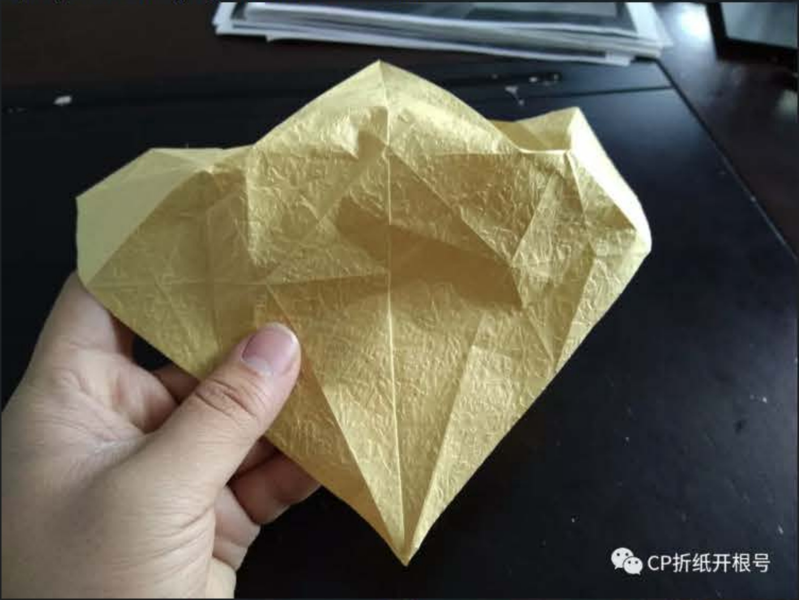
CP折纸开根号



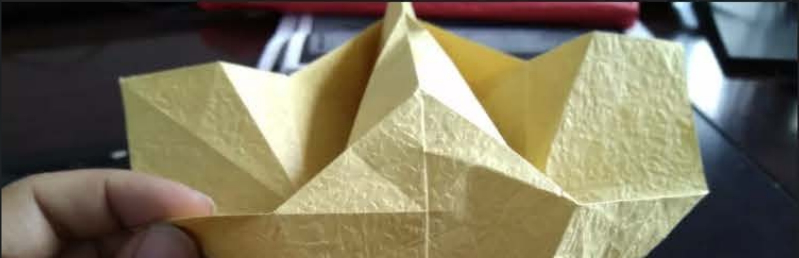


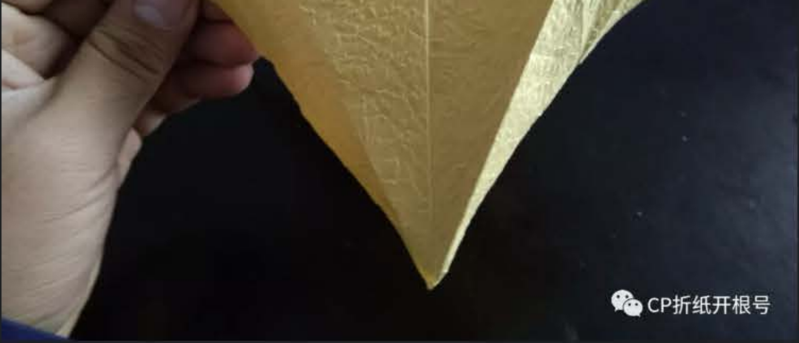
CP折纸开根号

Open your head slightly and watch from above

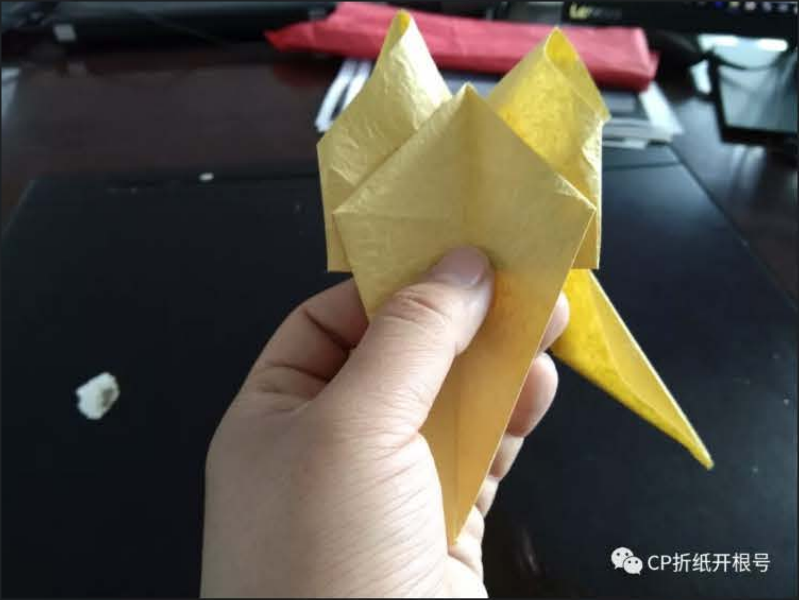


CP折纸开根号

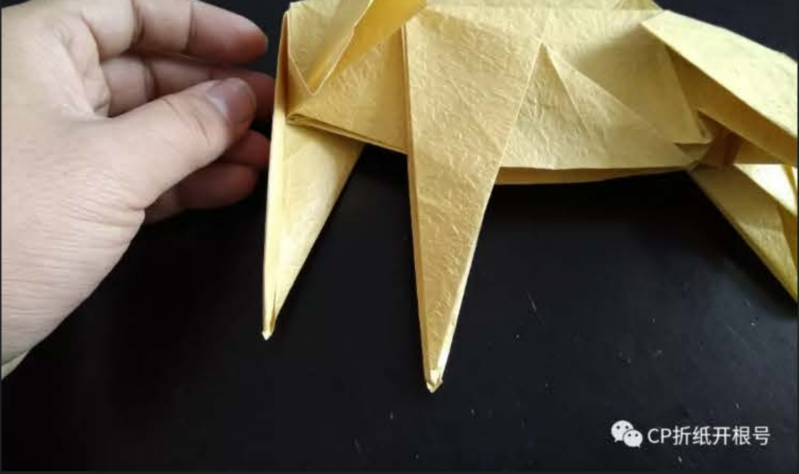




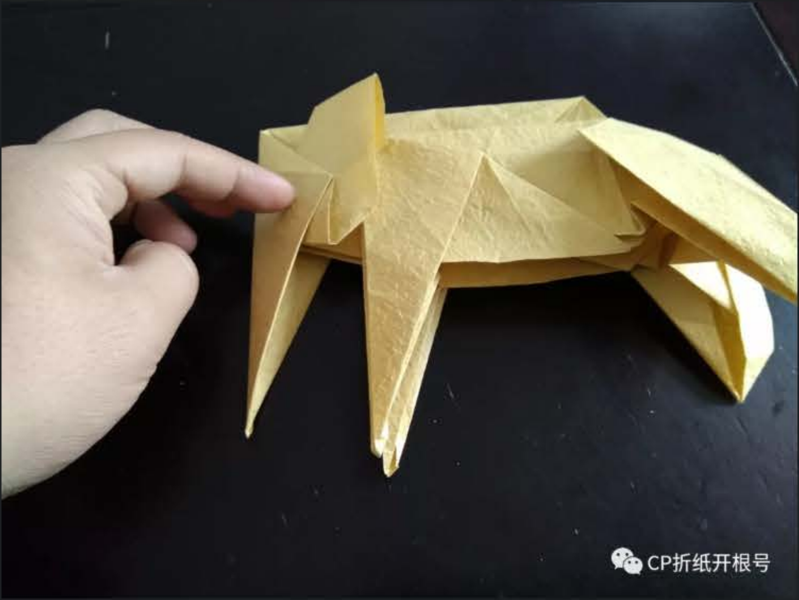
CP折纸开根号



CP折纸开根号

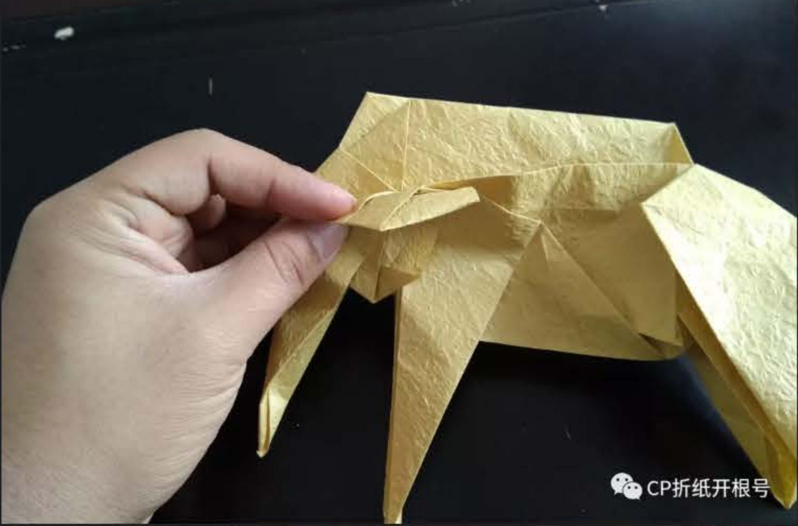


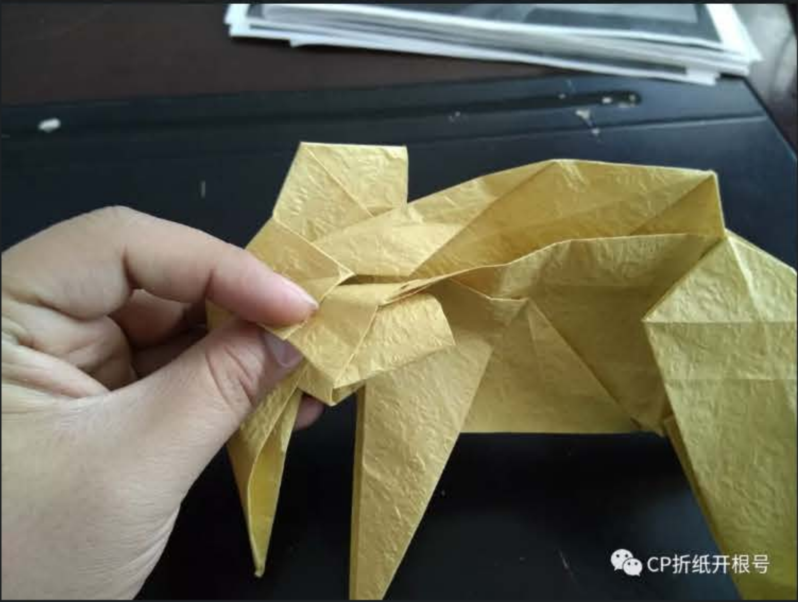
CP折纸开根号



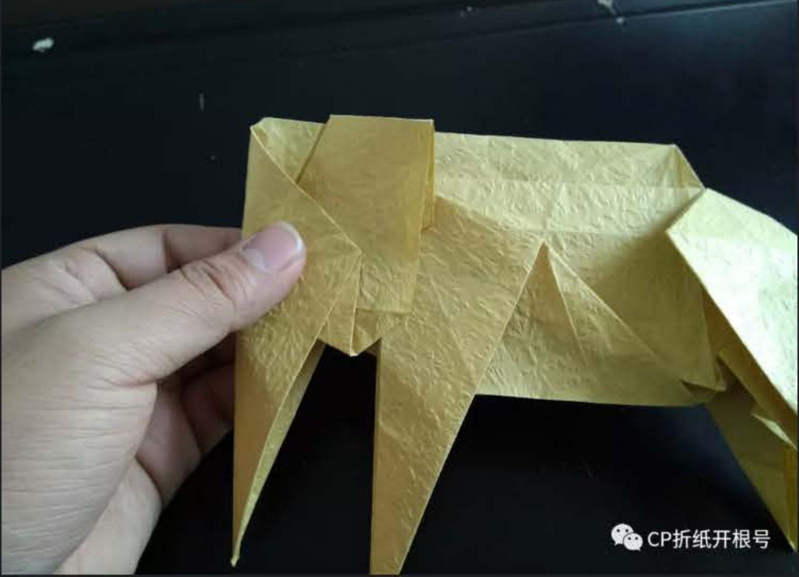
CP折纸开根号

Pull down from the middle and fold in the top of the inside head.





Push the head out as a whole



Adjust the forehead to sink inward

At this point, everyone needs to reshape themselves.

If you successfully fold a small elephant, I suggest fold another one with a little harder paper and save it.

Looking forward to your reply and message!

The picture below is a correction in the little donkey last time. When it comes to the basic shape of the little donkey, the position of the crosshair is marked on the upper square. It should be marked on the lower square as shown below. Thank you for your suggestions. Thank you for your continued attention!
