CP Share Series No.50 Total 125th Spider with Big Eyes

Original Origami Student Takayama CP Origami Opening Number 2019-12-03

Hello everyone, welcome to CP Opening!
The spider is here again! And it's a simple two-color work, so would you fold it with me if you love origami?

Before we fold this piece, let 's get to know the eyes,
In fact, most of the spider's eyes are in front of the head. Most spiders have eight eyes of different sizes, some spiders have six eyes, and a few spiders have no eyes, or there are two, four, or twelve. Eyes. Although the spider has many eyes, its vision is average and what it sees is always blurred.

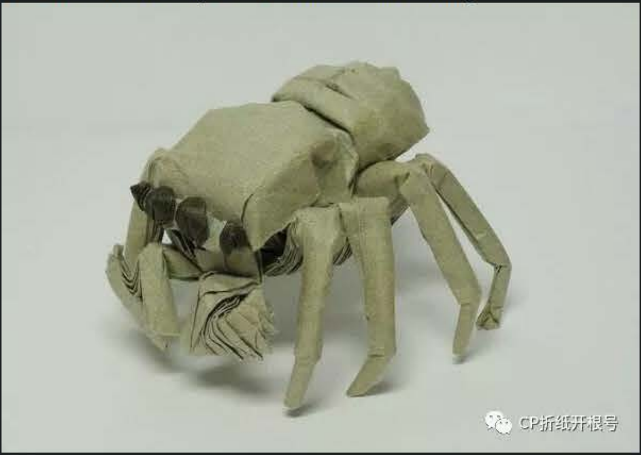
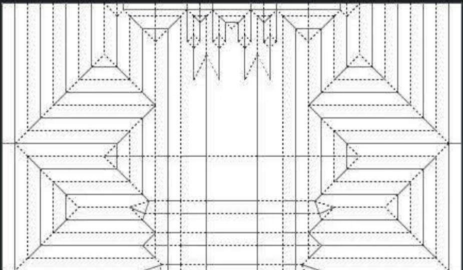
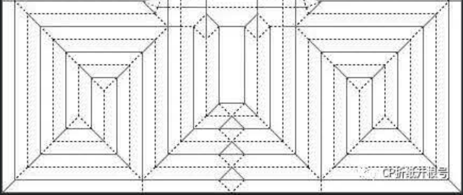
The above picture is from Baidu

Let's meet this little spider that will be folded today!







This work 36--36 square

Let 's play the grid and line together!

CP折纸开根号

First of all, we start from the middle of the peak and valley according to the following figure, and then gather together from the two sides to the middle.

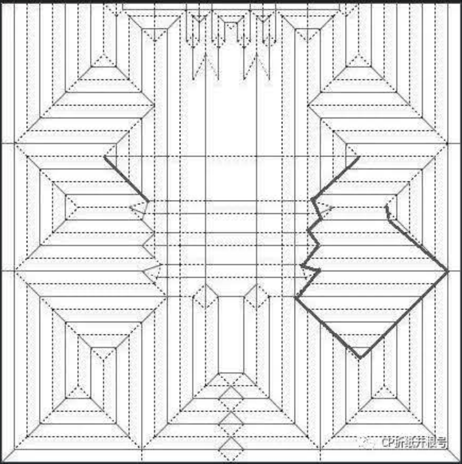
Next, let 's gently pull the sides apart according to the figure below, and then make the zigzag structure.



CP折纸开眼号

After making the zigzag structure, we aggregate the black parts above and below as shown below.
